

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. SKETCHES

OF THE

HISTORY OF MAN.

BOOK III.

A BRIEF ACCOUNT OF ARISTOTLE'S LOGIC,

WITH REMARKS.

INTRODUCTION.

IN reviewing the foregoing sketch, it occurred, that a fair analysis of Aristotle's logic, would be a valuable addition to the historical branch. A distinct and candid account of a system that for many ages governed the reasoning part of mankind, cannot but be acceptable to the public. Curiosity will be gratified, in seeing a phantom delineated that so long fascinated the learned world; a phantom, which shows infinite genius, but like

VOL. III.

A

the

the pyramids of Egypt or hanging gardens of Babylon, is absolutely useless unless for raising wonder. Dr Reid, professor of moral philosophy in the College of Glasgow, relished the thought; and his friendship to me prevailed on him, after much solicitation, to undertake the laborious task. No man is better acquainted with Aristotle's writings; and, without any enthusiastic attachment, he holds that philosopher to be a first-rate genius.

The logic of Aristotle has been on the decline more than a century; and is at present relegated to schools and colleges. It has occasionally been criticised by different writers; but this is the first attempt to draw it out of its obscurity into daylight. From what follows, one will be enabled to pass a true judgment on that work, and to determine whether it ought to make a branch of education. The Doctor's essay, as a capital article in the progress and history of the sciences, will be made welcome, even with the fatigue of squeezing through many thorny paths, before a distinct view can be got of that ancient and stupendous fabric.

It will at the same time show the hurt that Aristotle has done to the reasoning faculty, by drawing it out of its natural course into devious paths. His artificial mode of reasoning, is no less superficial than intricate: I say, superficial; for in none of his logical works, is a single truth attempted to be proved by syllogism that requires a proof: the propositions

propositions he undertakes to prove by syllogism, are all of them self-evident. Take for instance the following proposition, That man has a power of self-motion. To prove this, he assumes the following axiom, upon which indeed every one of his syllogisms are founded, That whatever is true of a number of particulars joined together, holds true of every one separately; which is thus expressed in logical terms, Whatever is true of the genus, holds true of every species. Founding upon that axiom, he reasons thus: "All animals have a power of self-motion: man is an animal: *ergo*, man has a power of self-motion." Now if all animals have a power of self-motion, it requires no argument to prove, that man, an animal, has that power: and therefore, what he gives as a conclusion or consequence, is not really so; it is not *inferred* from the fundamental proposition, but is *included* in it. At the same time, the self-motive power of man, is a fact that cannot be known but from experience; and it is more clearly known from experience than that of any other animal. Now, in attempting to prove man to be a self-motive animal, is it not absurd, to found the argument on a proposition less clear than that undertaken to be demonstrated? What is here observed, will be found applicable to the greater part, if not the whole, of his syllogisms.

Unless for the reason now given, it would appear singular, that Aristotle never attempts to apply

WITH REMARKS.

INTRODUCTION.

IN reviewing the foregoing sketch, it occurred, that a fair analysis of Aristotle's logic, would be a valuable addition to the historical branch. A distinct and candid account of a system that for many ages governed the reasoning part of mankind, cannot but be acceptable to the public. Curiosity will be gratified, in seeing a phantom delineated that so long fascinated the learned world; a phantom, which shows infinite genius, but like

VOL. III.

A

the

twenty years a favourite scholar of Plato, and tutor to Alexander the Great; who both honoured him with his friendship, and supplied him with every thing necessary for the prosecution of his inquiries.

These advantages he improved by indefatigable study, and immense reading. He was the first, we know, says Strabo, who composed a library. And in this the Egyptian and Pergamenian kings, copied his example. As to his genius, it would be disrespectful to mankind, not to allow an uncommon share to a man who governed the opinions of the most enlightened part of the species near two thousand years.

If his talents had been laid out solely for the discovery of truth and the good of mankind, his laurels would have remained for ever fresh: but he seems to have had a greater passion for fame than for truth, and to have wanted rather to be admired as the prince of philosophers than to be useful: so that it is dubious, whether there be in his character, most of the philosopher or of the sophist. The opinion of Lord Bacon is not without probability, That his ambition was as boundless as that of his royal pupil; the one aspiring at universal monarchy over the bodies and fortunes of men, the other over their opinions. If this was the case, it cannot be said, that the philosopher pursued his aim with less industry, less ability, or less success than the hero.

His

His writings carry too evident marks of that philosophical pride, vanity, and envy, which have often sullied the character of the learned. He determines boldly things above all human knowledge; and enters upon the most difficult questions, as his pupil entered on a battle, with full assurance of success. He delivers his decisions oracularly, and without any fear of mistake. Rather than confess his ignorance, he hides it under hard words and ambiguous expressions, of which his interpreters can make what they please. There is even reason to suspect, that he wrote often with affected obscurity, either that the air of mystery might procure greater veneration, or that his books might be understood only by the adepts who had been initiated in his philosophy.

His conduct towards the writers that went before him has been much censured. After the manner of the Ottoman princes, says Lord Verulam, he thought his throne could not be secure unless he killed all his brethren. Ludovicus Vives charges him with detracting from all philosophers, that he might derive that glory to himself, of which he robbed them. He rarely quotes an author but with a view to censure, and is not very fair in representing the opinions which he censures.

The faults we have mentioned are such as might be expected in a man, who had the daring ambition to be transmitted to all future ages, as the

prince of philosophers, as one who had carried every branch of human knowledge to its utmost limit ; and who was not very scrupulous about the means he took to obtain his end.

We ought, however, to do him the justice to observe, that although the pride and vanity of the sophist appear too much in his writings in abstract philosophy ; yet in natural history the fidelity of his narrations seems to be equal to his industry ; and he always distinguishes between what he knew and what he had by report. And even in abstract philosophy, it would be unfair to impute to Aristotle all the faults, all the obscurities, and all the contradictions, that are to be found in his writings. The greatest part, and perhaps the best part, of his writings is lost. There is reason to doubt whether some of those we ascribe to him be really his ; and whether what are his be not much vitiated and interpolated. These suspicions are justified by the fate of Aristotle's writings, which is judiciously related, from the best authorities, in Bayle's dictionary, under the article *Tyrannion*, to which I refer.

His books in logic which remain, are, 1. One book of the Categories. 2. One of Interpretation. 3. First Analytics, two books. 4. Last Analytics, two books. 5. Topics, eight books. 6. Of Sophisms, one book. Diogenes Laertius mentions many others that are lost. Those I have mentioned have commonly been published together, under the

the name of *Aristotle's Organon*, or *his Logic*; and for many ages, Porphyry's Introduction to the Categories has been prefixed to them.

SECT. 2. *Of Porphyry's Introduction.*

In this Introduction, which is addressed to Chrysostomus, the author observes, That in order to understand Aristotle's doctrine concerning the categories, it is necessary to know what a *genus* is, what a *species*, what a *specific difference*, what a *property*, and what an *accident*; that the knowledge of these is also very useful in definition, in division, and even in demonstration; therefore he proposes, in this little tract, to deliver shortly and simply the doctrine of the ancients, and chiefly of the Peripatetics, concerning these five *predicables*; avoiding the more intricate questions concerning them; such as, Whether *genera* and *species* do really exist in nature? or, Whether they are only conceptions of the human mind? If they exist in nature, Whether they are corporeal or incorporeal? and, Whether they are inherent in the objects of sense, or disjoined from them? These, he says, are very difficult questions, and require accurate discussion; but that he is not to meddle with them.

After this preface, he explains very minutely each of the five words above mentioned, divides and subdivides each of them, and then pursues all the

the agreements and differences between one and another through sixteen chapters.

SECT. 3. *Of the Categories.*

The book begins with an explication of what is meant by univocal words, what by equivocal, and what by denominative. Then it is observed, that what we say is either simple, without composition or structure, as *man, horse* ; or, it has composition and structure, as, *a man fights, the horse runs*. Next comes a distinction between a subject of predication ; that is, a subject of which any thing is affirmed or denied, and a subject of inherion. These things are said to be inherent in a subject, which, although they are not a part of the subject, cannot possibly exist without it, as figure in the thing figured. Of things that are, says Aristotle, some may be predicated of a subject, but are in no subject ; as *man* may be predicated of James or John, but is not in any subject. Some again are in a subject, but can be predicated of no subject. Thus, my knowledge in grammar is in me as its subject, but it can be predicated of no subject ; because it is an individual thing. Some are both in a subject, and may be predicated of a subject, as science ; which is in the mind as its subject, and may be predicated of geometry. Lastly, Some things can neither be in a subject, nor be predicated of any subject. Such are all individual substances, which cannot be predicated, because they are individuals ;
and

and cannot be in a subject, because they are substances. After some other subtilties about predicates and subjects, we come to the categories themselves; the things above mentioned being called by the schoolmen the *antepredicamenta*. It may be observed, however, that notwithstanding the distinction now explained, the *being in a subject*, and the *being predicated truly of a subject*, are in the Analytics used as synonymous phrases; and this variation of style has led some persons to think that the Categories were not written by Aristotle.

Things that may be expressed without composition or structure, are, says the author, reducible to the following heads. They are either *substance*, or *quantity*, or *quality*, or *relatives*, or *place*, or *time*, or *having*, or *doing*, or *suffering*. These are the predicaments or categories. The first four are largely treated of in four chapters; the others are slightly passed over, as sufficiently clear of themselves. As a specimen, I shall give a summary of what he says on the category of substance.

Substances are either primary, to wit, individual substances, or secondary, to wit, the genera and species of substances. Primary substances neither are in a subject, nor can be predicated of a subject; but all other things that exist, either are in primary substances, or may be predicated of them. For whatever can be predicated of that which is in a subject, may also be predicated of the subject itself. Primary substances are more substances than

than the secondary ; and of the secondary, the species is more a substance than the genus. If there were no primary, there could be no secondary substances.

The properties of substance are these : 1. No substance is capable of intension or remission. 2. No substance can be in any other thing as its subject of inherence. 3. No substance has a contrary ; for one substance cannot be contrary to another ; nor can there be contrariety between a substance and that which is no substance. 4. The most remarkable property of substance, is, that one and the same substance, may, by some change in itself, become the subject of things that are contrary. Thus, the same body may be at one time hot, at another cold.

Let this serve as a specimen of Aristotle's manner of treating the categories. After them, we have some chapters, which the schoolmen call *post-prædicamenta* ; wherein first, the four kinds of opposition of terms are explained ; to wit, *relative*, *privative*, of *contrariety*, and of *contradiction*. This is repeated in all systems of logic. Last of all we have distinctions of the four Greek words which answer to the Latin ones, *prius*, *simul*, *motus*, and *habere*.

SECT. 4. *Of the book concerning Interpretation.*

We are to consider, says Aristotle, what a noun is, what a verb, what affirmation, what negation, what

what speech. Words are the signs of what passeth in the mind ; writing is the sign of words. The signs both of writing and of words are different in different nations, but the operations of mind signified by them are the same. There are some operations of thought which are neither true nor false. These are expressed by nouns or verbs singly, and without composition.

A noun is a sound, which, by compact, signifies something without respect to time, and of which no part has signification by itself. The cries of beasts may have a natural signification, but they are not nouns ; we give that name only to sounds which have their signification by compact. The cases of a noun, as the genitive, dative, are not nouns. *Non homo* is not a noun, but, for distinction's sake, may be called a *nomen infinitum*.

A verb signifies something by compact with relation to time. Thus *valet* is a verb ; but *valetudo* is a noun, because its signification has no relation to time. It is only the present tense of the indicative that is properly called a verb ; the other tenses and moods are variations of the verb. *Non valet* may be called a *verbum infinitum*.

Speech is sound significant by compact, of which some part is also significant. And it is either enunciative, or not enunciative. Enunciative speech is that which affirms or denies. As to speech which is not enunciative, such as a prayer or wish, the consideration of it belongs to oratory, or poetry.

Every

Every enunciative speech must have a verb, or some variation of a verb. Affirmation is the enunciation of one thing concerning another. Negation is the enunciation of one thing from another. Contradiction is an affirmation and negation that are opposite. This is a summary of the first six chapters.

The seventh and eighth treat of the various kinds of enunciations or propositions, universal, particular, indefinite, and singular; and of the various kinds of opposition in propositions, and the axioms concerning them. These things are repeated in every system of logic. In the ninth chapter, he endeavours to prove, by a long metaphysical reasoning, that propositions respecting future contingencies are not, determinately, either true or false; and that if they were, it would follow, that all things happen necessarily, and could not have been otherwise than as they are. The remaining chapters contain many minute observations concerning the equipollency of propositions both pure and modal.

CHAP. II.

REMARKS.

SECT. I. *On the Five Predicables.*

THE writers on logic have borrowed their materials almost entirely from Aristotle's Organon, and Porphyry's Introduction. The Organon, however, was not written by Aristotle as one work. It comprehends various tracts, written without the view of making them parts of one whole, and afterwards thrown together by his editors under one name on account of their affinity. Many of his books that are lost, would have made a part of the Organon if they had been saved.

The three treatises of which we have given a brief account, are unconnected with each other, and with those that follow. And although the first was undoubtedly compiled by Porphyry, and the two last probably by Aristotle, yet I consider them as the venerable remains of a philosophy more ancient than Aristotle. Archytas of Tarentum, an eminent mathematician and philosopher of

of the Pythagorean school, is said to have wrote upon the ten categories ; and the five predicables probably had their origin in the same school. Aristotle, though abundantly careful to do justice to himself, does not claim the invention of either. And Porphyry, without ascribing the latter to Aristotle, professes only to deliver the doctrine of the ancients and chiefly of the Peripatetics, concerning them.

The writers on logic have divided that science into three parts ; the first treating of simple apprehension and of terms ; the second, of judgment and of propositions ; and the third, of reasoning and of syllogisms. The materials of the first part are taken from Porphyry's Introduction and the Categories ; and those of the second from the book of Interpretation.

A predicable, according to the grammatical form of the word, might seem to signify, whatever may be predicated, that is, affirmed or denied, of a subject : and in that sense every predicate would be a predicable. But logicians give a different meaning to the word. They divide propositions into certain classes, according to the relation which the predicate of the proposition bears to the subject. The first class is that wherein the predicate is the *genus* of the subject ; as when we say, *This is a triangle, Jupiter is a planet*. In the second class, the predicate is a *species* of the subject ; as when we say, *This triangle is right-angled*. A
third

third class is when the predicate is the specific difference of the subject ; as when we say, *Every triangle has three sides and three angles.* A fourth when the predicate is a property of the subject ; as when we say, *The angles of every triangle are equal to two right angles.* And a fifth class is when the predicate is something accidental to the subject ; as when we say, *This triangle is neatly drawn.*

Each of these classes comprehends a great variety of propositions, having different subjects, and different predicates ; but in each class the relation between the predicate and the subject is the same. Now it is to this relation that logicians have given the name of *a predicable*. Hence it is, that although the number of predicates be infinite, yet the number of predicables can be no greater than that of the different relations which may be in propositions between the predicate and the subject. And if all propositions belong to one or other of the five classes above mentioned, there can be but five predicables, to wit, *genus, species, differentia, proprium, and accidens.* These might, with more propriety perhaps, have been called *the five classes of predicates* ; but use has determined them to be called *the five predicables.*

It may also be observed, that as some objects of thought are individuals, such as, *Julius Cæsar, the City Rome* ; so others are common to many individuals, as *good, great, virtuous, vicious.* Of this last kind are all the things that are expressed by ad-

jectives. Things common to many individuals, were by the ancients called *universals*. All predicates are universals, for they have the nature of adjectives; and, on the other hand, all universals may be predicates. On this account, universals may be divided into the same classes as predicates; and as the five classes of predicates above mentioned have been called the five predicables, so by the same kind of phraseology they have been called *the five universals*; although they may more properly be called *the five classes of universals*.

The doctrine of the five universals or predicables makes an essential part of every system of logic, and has been handed down without any change to this day. The very name of *predicables* shews, that the author of this division, whoever he was, intended it as a complete enumeration of all the kinds of things that can be affirmed of any subject; and so it has always been understood. It is accordingly implied in this division, that all that can be affirmed of any thing whatever, is either the *genus* of the thing, or its *species*, or its *specific difference*, or some *property* or *accident* belonging to it.

Burgesdick, a very acute writer in logic, seems to have been aware, that strong objections might be made to the five predicables, considered as a complete enumeration: but, unwilling to allow any imperfection in this ancient division, he endeavours to restrain the meaning of the word *predicable*,

dicable, so as to obviate objections. Those things only, says he, are to be accounted predicables, which may be affirmed of *many individuals, truly, properly, and immediately*. The consequence of putting such limitations upon the word *predicable* is, that in many propositions, perhaps in most, the predicate is not a predicable. But admitting all his limitations, the enumeration will still be very incomplete: for of many things we may affirm truly, properly, and immediately, their existence, their end, their cause, their effect, and various relations which they bear to other things. These, and perhaps many more, are predicables in the strict sense of the word, no less than the five which have been so long famous.

Although Porphyry and all subsequent writers, make the predicables to be, in number, five; yet Aristotle himself, in the beginning of the Topics, reduces them to four; and demonstrates, that there can be no more. We shall give his demonstration when we come to the Topics; and shall only here observe, that as Burgerisdick justifies the fivefold division, by restraining the meaning of the word *predicable*; so Aristotle justifies the fourfold division, by enlarging the meaning of the words *property* and *accident*.

After all, I apprehend, that this ancient division of predicables with all its imperfections will bear a comparison with those which have been substi-

tuted in its stead by the most celebrated modern philosophers.

Locke, in his *Essay on the Human Understanding*, having laid it down as a principle, That all our knowledge consists in perceiving certain agreements and disagreements between our ideas, reduces these agreements and disagreements to four heads: to wit, 1. Identity and diversity; 2. Relation; 3. Coexistence; 4. Real Existence*. Here are four predicables given as a complete enumeration, and yet not one of the ancient predicables is included in the number.

The author of the *Treatise of Human Nature*, proceeding upon the same principle that all our knowledge is only a perception of the relations of our ideas, observes, “That it may perhaps be esteemed
“an endless task, to enumerate all those qualities
“which admit of comparison, and by which the
“ideas of philosophical relation are produced:
“but if we diligently consider them, we shall find,
“that without difficulty they may be comprised
“under seven general heads: 1. Resemblance;
“2. Identity; 3. Relations of Space and Time;
“4. Relations of Quantity and Number; 5. Degrees of Quality; 6. Contrariety; 7. Causation†”. Here again are seven predicables given as a complete enumeration, wherein all the predicables of the ancients, as well as two of Locke’s are left out.

The

* Book 4. chap. 1.

† Vol. 1. p. 33. and 125.

The ancients in their division attended only to categorical propositions which have one subject and one predicate; and of these to such only as have a general term for their subject. The moderns, by their definition of knowledge, have been led to attend only to relative propositions, which express a relation between two subjects, and these subjects they suppose to be always ideas.

SECT. 2. *On the Ten Categories, and on Divisions in general.*

The intention of the categories or predicaments is, to muster every object of human apprehension under ten heads: for the categories are given as a complete enumeration of every thing which can be expressed without *composition* and *structure*; that is, of every thing that can be either the subject or the predicate of a proposition. So that as every soldier belongs to some company, and every company to some regiment; in like manner every thing that can be the object of human thought, has its place in one or other of the ten categories; and by dividing and subdividing properly the several categories, all the notions that enter into the human mind may be mustered in rank and file, like an army in the day of battle.

The perfection of the division of categories into ten heads, has been strenuously defended by the

followers of Aristotle, as well as that of the five predicables. They are indeed of kin to each other: they breathe the same spirit, and probably had the same origin. By the one we are taught to marshal every term that can enter into a proposition, either as subject or predicate; and by the other, we are taught all the possible relations which the subject can have to the predicate. Thus, the whole furniture of the human mind is presented to us at one view, and contracted, as it were, into a nut-shell. To attempt, in so early a period, a methodical delineation of the vast region of human knowledge, actual and possible, and to point out the limits of every district, was indeed magnanimous in a high degree, and deserves our admiration, while we lament that the human powers are unequal to so bold a flight.

A regular distribution of things under proper classes or heads, is, without doubt, a great help both to memory and judgment. As the philosopher's province includes all things human and divine that can be objects of inquiry, he is naturally led to attempt some general division, like that of the categories. And the invention of a division of this kind, which the speculative part of mankind acquiesced in for two thousand years, marks a superiority of genius in the inventor, whoever he was. Nor does it appear, that the general divisions, which, since the decline of the Peripatetic philosophy,

philosophy, have been substituted in place of the ten categories, are more perfect.

Locke has reduced all things to three categories ; to wit, substances, modes, and relations. In this division, time, space, and number, three great objects of human thought, are omitted.

The author of the Treatise of Human Nature has reduced all things to two categories ; to wit, ideas and impressions : a division which is very well adapted to his system ; and which puts me in mind of another made by an excellent mathematician in a printed thesis I have seen. In it the author, after a severe censure of the ten categories of the Peripatetics, maintains, that there neither are nor can be more than two categories of things ; to wit, *data* and *quæsitæ*.

There are two ends that may be proposed by such divisions. The first is, to methodize or digest in order what a man actually knows. This is neither unimportant nor impracticable ; and in proportion to the solidity and accuracy of a man's judgment, his divisions of the things he knows, will be elegant and useful. The same subject may admit, and even require, various divisions, according to the different points of view from which we contemplate it : nor does it follow, that because one division is good, therefore another is naught. To be acquainted with the divisions of the logicians and metaphysicians, without a superstitious attachment to them, may be of use in dividing the same

subjects, or even those of a different nature. Thus, Quintilian borrows from the ten categories his division of the topics of rhetorical argumentation. Of all methods of arrangement, the most antiphilosophical seems to be the invention of this age ; I mean, the arranging the arts and sciences by the letters of the alphabet, in dictionaries and encyclopedies. With these authors the categories are, A, B, C, &c.

Another end commonly proposed by such divisions, but very rarely attained, is to exhaust the subject divided ; so that nothing that belongs to it shall be omitted. It is one of the general rules of division in all systems of logic, That the division should be adequate to the subject divided : a good rule, without doubt ; but very often beyond the reach of human power. To make a perfect division, a man must have a perfect comprehension of the whole subject at one view. When our knowledge of the subject is imperfect, any division we can make, must be like the first sketch of a painter, to be extended, contracted, or mended, as the subject shall be found to require. Yet nothing is more common, not only among the ancient, but even among modern philosophers, than to draw, from their incomplete divisions, conclusions which suppose them to be perfect.

A division is a repository which the philosopher frames for holding his ware in convenient order. The philosopher maintains, that such or such a thing

thing is not good ware, because there is no place in his ware-room that fits it. We are apt to yield to this argument in philosophy, but it would appear ridiculous in any other traffic.

Peter Ramus, who had the spirit of a reformer in philosophy, and who had force of genius sufficient to shake the Aristotelian fabric in many parts; but insufficient to erect any thing more solid in its place, tried to remedy the imperfection of philosophical divisions, by introducing a new manner of dividing. His divisions always consisted of two members; one of which was contradictory of the other; as if one should divide England into Middlesex and what is not Middlesex. It is evident that these two members comprehend all England: for the logicians observe, that a term along with its contradictory, comprehend all things. In the same manner, we may divide what is not Middlesex into Kent and what is not Kent. Thus one may go on by divisions and subdivisions that are absolutely complete. This example may serve to give an idea of the spirit of Ramean divisions, which were in no small reputation about two hundred years ago.

Aristotle was not ignorant of this kind of division. But he used it only as a touchstone to prove by induction the perfection of some other division, which indeed is the best use that can be made of it. When applied to the common purpose of division, it is both inelegant, and burdensome to the memory;

memory ; and, after it has put one out of breath by endless subdivisions, there is still a negative term left behind, which shews that you are no nearer the end of your journey than when you began.

Until some more effectual remedy be found for the imperfection of divisions, I beg leave to propose one more simple than that of Ramus. It is this : When you meet with a division of any subject imperfectly comprehended, add to the last member an *et cætera*. That this *et cætera* makes the division complete, is undeniable ; and therefore it ought to hold its place as a member, and to be always understood, whether expressed or not, until clear and positive proof be brought that the division is complete without it. And this same *et cætera* is to be the repository of all members that shall in any future time shew a good and valid right to a place in the subject.

SECT. 3. *On Distinctions.*

Having said so much of logical divisions, we shall next make some remarks upon distinctions.

Since the philosophy of Aristotle fell into disrepute, it has been a common topic of wit and railery, to inveigh against metaphysical distinctions. Indeed the abuse of them in the scholastic ages, seems to justify a general prejudice against them : and shallow thinkers and writers have good reason to be jealous of distinctions, because they make
sad

bad work when applied to their flimsy compositions. But every man of true judgment, while he condemns distinctions that have no foundation in the nature of things, must perceive, that indiscriminately to decry distinctions, is to renounce all pretensions to just reasoning: for as false reasoning commonly proceeds from confounding things that are different; so without distinguishing such things, it is impossible to avoid error, or detect sophistry. The authority of Aquinas, or Suarez, or even of Aristotle, can neither stamp a real value upon distinctions of base metal, nor hinder the currency of those of true metal.

Some distinctions are verbal; others are real. The first kind distinguish the various meanings of a word; whether proper, or metaphorical. Distinctions of this kind make a part of the grammar of a language, and are often absurd when translated into another language. Real distinctions are equally good in all languages, and suffer no hurt by translation. They distinguish the different species contained under some general notion, or the different parts contained in one whole.

Many of Aristotle's distinctions are verbal merely; and therefore, more proper materials for a dictionary of the Greek language, than for a philosophical treatise. At least, they ought never to have been translated into other languages, when the idiom of the language will not justify them: for this is to adulterate the language, to introduce foreign

reign idioms into it without necessity or use, and to make it ambiguous where it was not. The distinctions in the end of the Categories of the four words, *prius*, *simul*, *motus*, and *habere*, are all verbal.

The modes or species of *prius*, according to Aristotle, are five. One thing may be prior to another; first, in point of time; secondly, in point of dignity; thirdly, in point of order; and so forth. The modes of *simul* are only three. It seems this word was not used in the Greek with so great latitude as the other, although they are relative terms.

The modes or species of *motion* he makes to be six, to-wit, generation, corruption, increase, decrease, alteration, and change of place.

The modes or species of *having* are eight. 1. Having a quality or habit, as having wisdom. 2. Having quantity or magnitude. 3. Having things adjacent, as having a sword. 4. Having things as parts, as having hands or feet. 5. Having in a part or on a part, as having a ring on one's finger. 6. Containing, as a cask is said to have wine. 7. Possessing, as having lands or houses. 8. Having a wife.

Another distinction of this kind is Aristotle's distinction of causes; of which he makes four kinds, efficient, material, formal, and final. These distinctions may deserve a place in a dictionary of
the

the Greek language; but in English or Latin they adulterate the language. Yet so fond were the schoolmen of distinctions of this kind, that they added to Aristotle's enumeration, an impulsive cause, an exemplary cause, and I don't know how many more. We seem to have adopted into English a final cause; but it is merely a term of art, borrowed from the Peripatetic philosophy, without necessity or use: for the English word *end* is as good as *final cause*, though not so long nor so learned.

SECT. 4. *On Definitions.*

It remains that we make some remarks on Aristotle's definitions, which have exposed him to much censure and ridicule. Yet I think it must be allowed, that in things which need definition and admit of it, his definitions are commonly judicious and accurate; and had he attempted to define such things only, his enemies had wanted great matter of triumph. I believe it may likewise be said in his favour, that until Locke's essay was wrote, there was nothing of importance delivered by philosophers with regard to definition, beyond what Aristotle has said upon that subject.

He considers a definition as a speech declaring what a thing is. Every thing essential to the thing defined, and nothing more, must be contained in the definition. Now the essence of a thing consists

sists of these two parts: First, What is common to it with other things of the same kind; and, secondly, What distinguishes it from other things of the same kind. The first is called the *genus* of the thing, the second its *specific difference*. The definition therefore consists of these two parts. And for finding them, we must have recourse to the ten categories; in one or other of which every thing in nature is to be found. Each category is a *genus*, and is divided into so many species, which are distinguished by their specific differences. Each of these species is again subdivided into so many species, with regard to which it is a genus. This division and subdivision continues until we come to the lowest species, which can only be divided into individuals, distinguished from one another, not by any specific difference, but by accidental differences of time, place, and other circumstances.

The category itself being the highest genus, is in no respect a species, and the lowest *species* is in no respect a *genus*; but every intermediate order is a genus compared with those that are below it, and a species compared with those above it. To find the definition of any thing; therefore, you must take the genus which is immediately above its place in the category, and the specific *difference*, by which it is distinguished from other species of the same *genus*. These two make a perfect definition. This I take to be the substance of Aristotle's

stotle's system ; and probably the system of the Pythagorean school before Aristotle, concerning definition.

But notwithstanding the specious appearance of this system, it has its defects. Not to repeat what was before said of the imperfection of the division of things into ten categories, the subdivisions of each category are no less imperfect. Aristotle has given some subdivisions of a few of them ; and, as far as he goes, his followers pretty unanimously take the same road. But when they attempt to go farther, they take very different roads. It is evident, that if the series of each category could be completed, and the division of things into categories could be made perfect, still the highest genus in each category could not be defined, because it is not a species ; nor could individuals be defined, because they have no specific difference. There are also many species of things, whose specific difference cannot be expressed in language, even when it is evident to sense, or to the understanding. Thus green, red, and blue, are very distinct species of colour ; but who can express in words wherein green differs from red or blue ?

Without borrowing light from the ancient system, we may perceive, that every definition must consist of words that need no definition ; and that to define the common words of a language that have no ambiguity, is trifling, if it could be done ; the only use of a definition being to give a clear
and

and' adequate conception of the meaning of a word.

The logicians indeed distinguish between the definition of a word, and the definition of a thing; considering the former as the mean office of a lexicographer, but the last as the grand work of a philosopher. But what they have said about the definition of a thing, if it have a meaning, is beyond my comprehension. All the rules of definition agree to the definition of a word; and if they mean by the definition of a thing, the giving an adequate conception of the nature and essence of any thing that exists; this is impossible, and is the vain boast of men, unconscious of the weakness of human understanding.

The works of God are but imperfectly known by us. We see their outside; or perhaps we discover some of their qualities and relations, by observation and experiment assisted by reasoning: but even of the simplest of them we can give no definition that comprehends its real essence. It is justly observed by Locke, that nominal essences only, which are the creatures of our own minds, are perfectly comprehended by us, or can be properly defined; and even of these there are many too simple in their nature to admit of definition. When we cannot give precision to our notions by a definition, we must endeavour to do it by attentive reflection upon them, by observing minutely their agreements and differences, and especially by

a right understanding of the powers of our own minds, by which such notions are formed.

The principles laid down by Locke with regard to definition, and with regard to the abuse of words, carry conviction along with them. I take them to be one of the most important improvements made in logic since the days of Aristotle: not so much because they enlarge our knowledge; as because they make us sensible of our ignorance; and shew that a great part of what speculative men have admired as profound philosophy, is only a darkening of knowledge by words without understanding.

If Aristotle had understood these principles, many of his definitions, which furnish matter of triumph to his enemies, had never seen the light: let us impute them to the times rather than to the man. The sublime Plato, it is said, thought it necessary to have the definition of a man, and could find none better than *Animal implume bipes*; upon which Diogenes sent to his school a cock with his feathers plucked off, desiring to know whether it was a man or not.

SECT. 5. *On the Structure of Speech.*

The few hints contained in the beginning of the book concerning Interpretation relating to the structure of speech, have been left out in treatises of logic, as belonging rather to grammar; yet I

apprehend this is a rich field of philosophical speculation. Language being the express image of human thought, the analysis of the one must correspond to that of the other. Nouns adjective and substantive, verbs active and passive, with their various moods, tenses, and persons, must be expressive of a like variety in the modes of thought. Things that are distinguished in all languages, such as substance and quality, action and passion, cause and effect, must be distinguished by the natural powers of the human mind. The philosophy of grammar, and that of the human understanding, are more nearly allied than is commonly imagined.

The structure of language was pursued to a considerable extent, by the ancient commentators upon this book of Aristotle. Their speculations upon this subject, which are neither the least ingenious nor the least useful part of the Peripatetic philosophy, were neglected for many ages, and lay buried in ancient manuscripts, or in books little known, till they were lately brought to light by the learned Mr Harris in his *Hermes*.

The definitions given by Aristotle, of a noun, of a verb, and of speech, will hardly bear examination. It is easy in practice to distinguish the various parts of speech ; but very difficult, if at all possible, to give accurate definitions of them.

He observes justly, that besides that kind of speech called a *proposition*, which is always either
true

true or false, there are other kinds which are neither true nor false; such as, a prayer, or wish; to which we may add, a question, a command, a promise, a contract, and many others. These Aristotle pronounces to have nothing to do with his subject, and remits them to oratory, or poetry; and so they have remained banished from the regions of philosophy to this day: yet I apprehend, that an analysis of such speeches, and of the operations of mind which they express, would be of real use, and perhaps would discover how imperfect an enumeration the logicians have given of the powers of human understanding, when they reduce them to simple apprehension, judgment, and reasoning.

SECT. 6. *On Propositions.*

Mathematicians use the word *proposition* in a larger sense than logicians. A problem is called a *proposition* in mathematics, but in logic it is not a proposition: it is one of those speeches which are not enunciative, and which Aristotle remits to oratory or poetry.

A proposition, according to Aristotle, is a speech wherein one thing is affirmed or denied of another. Hence it is easy to distinguish the thing affirmed or denied, which is called *the predicate*, from the thing of which it is affirmed or denied, which is called *the subject*; and these two are called

ed *the terms of the proposition*. Hence likewise it appears, that propositions are either affirmative or negative ; and this is called *their quality*. All affirmative propositions have the same quality, so likewise have all negative ; but an affirmative and a negative are contrary in their quality.

When the subject of a proposition is a general term, the predicate is affirmed or denied, either of the whole, or of a part. Hence propositions are distinguished into universal and particular. *All men are mortal*, is an universal proposition ; *Some men are learned*, is a particular ; and this is called *the quantity of the proposition*. All universal propositions agree in quantity, as also all particular : but an universal and a particular are said to differ in quantity. A proposition is called *indefinite*, when there is no mark either of universality or particularity annexed to the subject : thus, *Man is of few days*, is an indefinite proposition ; but it must be understood either as universal or as particular, and therefore is not a third species, but by interpretation is brought under one of the other two.

There are also singular propositions, which have not a general term but an individual for their subject ; as, *Alexander was a great conqueror*. These are considered by logicians as universal, because, the subject being indivisible, the predicate is affirmed or denied of the whole, and not of a part only. Thus all propositions, with regard to quality,

lity, are either affirmative or negative ; and with regard to quantity, are universal or particular ; and taking in both quantity and quality, they are universal affirmatives, or universal negatives, or particular affirmatives, or particular negatives. These four kinds, after the days of Aristotle, came to be named by the names of the four first vowels, A, E, I, O, according to the following distich :

Afferit A, negat E, sed universaliter ambe ;
Afferit I, negat O, sed particulariter ambo.

When the young logician is thus far instructed in the nature of propositions, he is apt to think there is no difficulty in analysing any proposition, and shewing its subject and predicate, its quantity and quality ; and indeed, unless he can do this, he will be unable to apply the rules of logic to use. Yet he will find, there are some difficulties in this analysis, which are overlooked by Aristotle altogether ; and although they are sometimes touched, they are not removed by his followers. For,

1. There are propositions in which it is difficult to find a subject and a predicate ; as in these, *It rains*, *It snows*.
2. In some propositions either term may be made the subject or the predicate as you like best ; as in this, *Virtue is the road to happiness*.
3. The same example may serve to shew, that it is sometimes difficult to say, whether a proposition be universal or particular.
4. The quality of some propositions is so dubious, that logicians have never been able to agree whether they be affirmative

or negative ; as in this proposition, *Whatever is in-
ficient is not animal.* 5. As there is one class of
propositions which have only two terms, to wit,
one subject and one predicate, which are called *ca-
tegorical propositions* ; so there are many classes that
have more than two terms. What Aristotle deli-
vers in this book is applicable only to categorical
propositions ; and to them only the rules concern-
ing the conversion of propositions, and concerning
the figures and modes of syllogisms, are accommo-
dated. The subsequent writers of logic have ta-
ken notice of some of the many classes of complex
propositions, and have given rules adapted to
them ; but finding this work endless, they have
left us to manage the rest by the rules of common
sense.

C H A P. III.

ACCOUNT OF THE FIRST ANALYTICS.

SECT. I. *Of the Conversion of Propositions.*

IN attempting to give some account of the Ana-
lytics and of the Topics of Aristotle, inge-
nuity requires me to confess, that though I have
often

often purposed to read the whole with care, and to understand what is intelligible, yet my courage and patience always failed before I had done. Why should I throw away so much time and painful attention upon a thing of so little real use? If I had lived in those ages when the knowledge of Aristotle's Organon entitled a man to the highest rank in philosophy, ambition might have induced me to employ upon it some years of painful study; and less, I conceive, would not be sufficient. Such reflections as these, always got the better of my resolution, when the first ardor began to cool. All I can say is, that I have read some parts of the different books with care, some slightly, and some perhaps not at all. I have glanced over the whole often, and when any thing attracted my attention, have dipped into it till my appetite was satisfied. Of all reading it is the most dry and the most painful, employing an infinite labour of demonstration about things of the most abstract nature, delivered in a laconic style, and often, I think, with affected obscurity; and all to prove general propositions, which when applied to particular instances appear self-evident.

There is probably but little in the Categories or in the book of Interpretation, that Aristotle could claim as his own invention; but the whole theory of syllogisms he claims as his own, and as the fruit of much time and labour. And indeed

it is a stately fabric, a monument of a great genius, which we could wish to have been more usefully employed. There must be something however adapted to please the human understanding, or to flatter human pride, in a work which occupied men of speculation for more than a thousand years. These books are called *Analytics*, because the intention of them is to resolve all reasoning into its simple ingredients.

The first book of the First Analytics, consisting of forty-six chapters, may be divided into four parts; the first treating of the conversion of propositions; the second, of the structure of syllogisms, in all the different figures and modes; the third, of the invention of a middle term; and the last, of the resolution of syllogisms. We shall give a brief account of each.

To convert a proposition, is to infer from it another proposition, whose subject is the predicate of the first, and whose predicate is the subject of the first. This is reduced by Aristotle to three rules.

1. An universal negative may be converted into an universal negative: thus, *No man is a quadruped*; therefore, *No quadruped is a man*. 2. An universal affirmative can be converted only into a particular affirmative: thus, *All men are mortal*; therefore, *Some mortal beings are men*. 3. A particular affirmative may be converted into a particular affirmative: as, *Some men are just*; therefore, *Some just persons are men*. When a proposition may

may be converted without changing its quantity, this is called *simple conversion*; but when the quantity is diminished, as in the universal affirmative, it is called conversion *per accidens*.

There is another kind of conversion, omitted in this place by Aristotle, but supplied by his followers, called *conversion by contraposition*, in which the term that is contradictory to the predicate is put for the subject, and the quality of the proposition is changed; as, *All animals are sentient*; therefore, *What is insentient is not an animal*. A fourth rule of conversion therefore is, That an universal affirmative, and a particular negative, may be converted by contraposition.

SECT. 2. *Of the Figures and Modes of pure Syllogisms.*

A syllogism is an argument, or reasoning, consisting of three propositions, the last of which, called *the conclusion*, is inferred from the two preceding, which are called *the premises*. The conclusion having two terms, a subject and a predicate, its predicate is called the *major* term, and its subject the *minor* term. In order to prove the conclusion, each of its terms is, in the premises, compared with a third term, called the *middle* term. By this means one of the premises will have for its two terms the major term and the middle term;
and

and, this, premise is called the *major* premise, or the *major* proposition of the syllogism. The other premise must have for its two terms the minor term and the middle term, and it is called the *minor* proposition. Thus, the syllogism consists of three propositions, distinguished, by the names of the *major*, the *minor*, and the *conclusion*: and although each of these has two terms, a subject and a predicate, yet there are only three different terms in all. The major term is always the predicate of the conclusion, and is also either the subject or predicate of the major proposition. The minor term is always the subject of the conclusion, and is also either the subject or predicate of the minor proposition. The middle term never enters into the conclusion, but stands in both premises, either in the position of subject or of predicate.

According to the various positions which the middle term may have in the premises, syllogisms are said to be of various figures. Now all the possible positions of the middle term are only four: for, first, it may be the subject of the major proposition, and the predicate of the minor, and then the syllogism is of the first figure; or it may be the predicate of both premises, and then the syllogism is of the second figure; or it may be the subject of both, which makes a syllogism of the third figure; or it may be the predicate of the major proposition, and the subject of the minor, which makes the fourth figure. Aristotle takes no notice
of

of the fourth figure. . It was added by the famous Galen, and is often called *the Galenical figure*.

There is another division of syllogisms according to their modes. The mode of a syllogism is determined by the quality and quantity of the propositions of which it consists. . Each of the three propositions must be either an universal affirmative, or an universal negative, or a particular affirmative, or a particular negative. These four kinds of propositions, as was before observed, have been named by the four vowels, A, E, I, O; by which means the mode of a syllogism is marked by any three of those four vowels. Thus A, A, A, denotes that mode in which the major, minor, and conclusion, are all universal affirmatives; E, A, E, denotes that mode in which the major and conclusion are universal negatives, and the minor is an universal affirmative.

To know all the possible modes of syllogism, we must find how many different combinations may be made of three out of the four vowels, and from the art of combination the number is found to be sixty-four. So many possible modes there are in every figure; consequently in the three figures of Aristotle there are one hundred and ninety-two, and in all the four figures two hundred and fifty-six.

Now, the theory of syllogism requires, that we shew what are the particular modes in each figure, which do, or do not, form a just and conclusive syllogism,

logism, that so the legitimate may be adopted, and the spurious rejected. This Aristotle has shewn in the first three figures, examining all the modes one by one, and passing sentence upon each ; and from this examination he collects some rules which may aid the memory in distinguishing the false from the true, and point out the properties of each figure.

The first figure has only four legitimate modes. The major proposition in this figure must be universal, and the minor affirmative ; and it has this property, that it yields conclusions of all kinds, affirmative and negative, universal and particular.

The second figure has also four legitimate modes. Its major proposition must be universal, and one of the premises must be negative. It yields conclusions both universal and particular, but all negative.

The third figure has six legitimate modes. Its minor must always be affirmative ; and it yields conclusions both affirmative and negative, but all particular.

Besides the rules that are proper to each figure, Aristotle has given some that are common to all, by which the legitimacy of syllogisms may be tried. These may, I think, be reduced to five. 1. There must be only three terms in a syllogism. As each term occurs in two of the propositions, it must be precisely the same in both : if it be not, the syllogism is said to have four terms, which makes a
vicious

vicious syllogism. 2. The middle term must be taken universally in one of the premises. 3. Both premises must not be particular propositions, nor both negative. 4. The conclusion must be particular, if either of the premises be particular; and negative, if either of the premises be negative. 5. No term can be taken universally in the conclusion, if it be not taken universally in the premises.

For understanding the second and fifth of these rules, it is necessary to observe, that a term is said to be taken universally, not only when it is the subject of an universal proposition, but when it is the predicate of a negative proposition; on the other hand, a term is said to be taken particularly, when it is either the subject of a particular, or the predicate of an affirmative proposition.

SECT. 3. *Of the Invention of a Middle Term.*

The third part of this book contains rules general and special for the invention of a middle term; and this the author conceives to be of great utility. The general rules amount to this, That you are to consider well both terms of the proposition to be proved; their definition, their properties, the things which may be affirmed or denied of them, and those of which they may be affirmed or denied: these things collected together, are the materials from which your middle term is to be taken.

The special rules require you to consider the quantity and quality of the proposition to be proved,

We have likewise precepts given in this book, both to the assailant in a syllogistical dispute, how to carry on his attack with art, so as to obtain the victory; and to the defendant, how to keep the enemy at such a distance as that he shall never be obliged to yield. From which we learn, that Aristotle introduced in his own school, the practice of syllogistical disputation, instead of the rhetorical disputations which the sophists were wont to use in more ancient times.

CHAP. IV.

REMARKS.

SECT. I. *Of the Conversion of Propositions.*

WE have given a summary view of the theory of pure syllogisms as delivered by Aristotle, a theory of which he claims the sole invention. And I believe it will be difficult, in any science, to find so large a system of truths of so very abstract and so general a nature, all fortified by demonstration, and all invented and perfected by one man. It shows a force of genius and labour

bour of investigation, equal to the most arduous attempts. I shall now make some remarks upon it.

As to the conversion of propositions, the writers on logic commonly satisfy themselves with illustrating each of the rules by an example, conceiving them to be self-evident when applied to particular cases. But Aristotle has given demonstrations of the rules he mentions. As a specimen, I shall give his demonstration of the first rule. "Let A B be an universal negative proposition; I say, that if A is in no B, it will follow that B is in no A. If you deny this consequence, let B be in some A, for example, in C; then the first supposition will not be true; for C is of the B's." In this demonstration, if I understand it, the third rule of conversion is assumed, that if B is in some A, then A must be in some B, which indeed is contrary to the first supposition. If the third rule be assumed for proof of the first, the proof of all the three goes round in a circle; for the second and third rules are proved by the first. This is a fault in reasoning which Aristotle condemns, and which I would be very unwilling to charge him with, if I could find any better meaning in his demonstration. But it is indeed a fault very difficult to be avoided, when men attempt to prove things that are self-evident.

The rules of conversion cannot be applied to all propositions, but only to those that are categorical; and we are left to the direction of common sense in the conversion of other propositions. To give an example: Alexander was the son of Philip; therefore Philip was the father of Alexander: A is greater than B; therefore B is less than A. These are conversions which, as far as I know, do not fall within any rule in logic; nor do we find any loss for want of a rule in such cases.

Even in the conversion of categorical propositions, it is not enough to transpose the subject and predicate. Both must undergo some change, in order to fit them for their new station: for in every proposition the subject must be a substantive, or have the force of a substantive; and the predicate must be an adjective, or have the force of an adjective. Hence it follows, that when the subject is an individual, the proposition admits not of conversion. How, for instance, shall we convert this proposition, God is omniscient?

These observations show, that the doctrine of the conversion of propositions is not so complete as it appears. The rules are laid down without any limitation; yet they are fitted only to one class of propositions, to wit, the categorical; and of these only to such as have a general term for their subject.

SECT.

SECT. 2. *On Additions made to Aristotle's Theory.*

Although the logicians have enlarged the first and second parts of logic, by explaining some technical words and distinctions which Aristotle has omitted, and by giving names to some kinds of propositions which he overlooks; yet in what concerns the theory of categorical syllogisms, he is more full, more minute and particular, than any of them: so that they seem to have thought this capital part of the *Organon* rather redundant than deficient.

It is true, that Galen added a fourth figure to the three mentioned by Aristotle. But there is reason to think that Aristotle omitted the fourth figure, not through ignorance or inattention, but of design, as containing only some indirect modes, which, when properly expressed, fall into the first figure.

It is true also, that Peter Ramus, a professed enemy of Aristotle, introduced some new modes that are adapted to singular propositions; and that Aristotle takes no notice of singular propositions, either in his rules of conversion, or in the modes of syllogism: But the friends of Aristotle have shewn, that this improvement of Ramus is more specious than useful. Singular propositions have the force of universal propositions, and are subject to the same rules. The definition given by Aristotle of an universal proposition applies to them; and

therefore he might think, that there was no occasion to multiply the modes of syllogism upon their account.

These attempts, therefore, show rather inclination than power, to discover any material defect in Aristotle's theory.

The most valuable addition made to the theory of categorical syllogisms, seems to be the invention of those technical names given to the legitimate modes, by which they may be easily remembered, and which have been comprised in these barbarous verses.

Barbara, Celarent, Darii, Ferio, dato primæ ;
Cesare, Camestres, Festino, Baroco, secundæ ;
Tertia grande sonans recitat Darapti, Felapton ;
Adjungens Disamis, Datifi, Bocardo, Ferison.

In these verses, every legitimate mode belonging to the three figures has a name given to it, by which it may be distinguished and remembered. And this name is so contrived, as to denote its nature : for the name has three vowels, which denote the kind of each of its propositions.

Thus, a syllogism in *Bocardo* must be made up of the propositions denoted by the three vowels, O, A, O ; that is, its major and conclusion must be particular negative propositions, and its minor an universal affirmative ; and being in the third figure, the middle term must be the subject of both premises.

This

This is the mystery contained in the vowels of those barbarous words. But there are other mysteries contained in their consonants: for, by their means, a child may be taught to reduce any syllogism of the second or third figure to one of the first. So that the four modes of the first figure being directly proved to be conclusive, all the modes of the other two are proved at the same time, by means of this operation of reduction. For the rules and manner of this reduction, and the different species of it, called *ostensive* and *per impossible*, I refer to the logicians, that I may not disclose all their mysteries.

The invention contained in these verses is so ingenious, and so great an adminicle to the dextrous management of syllogisms, that I think it very probable that Aristotle had some contrivance of this kind, which was kept as one of the secret doctrines of his school, and handed down by tradition, until some person brought it to light. This is offered only as a conjecture, leaving it to those who are better acquainted with the most ancient commentators on the Analytics, either to refute or to confirm it.

SECT. 3. *On Examples used to illustrate this Theory.*

We may observe, that Aristotle hardly ever gives examples of real syllogisms to illustrate his rules. In demonstrating the legitimate modes, he takes A, B, C, for the terms of the syllogism.

D 3

Thus,

Thus, the first mode of the first figure is demonstrated by him in this manner. "For," says he, "if A is attributed to every B, and B to every C, it follows necessarily, that A may be attributed to every C." For disproving the illegitimate modes, he uses the same manner; with this difference, that he commonly for an example gives three real terms, such as, *bonum, habitus, prudentia*; of which three terms you are to make up a syllogism of the figure and mode in question, which will appear to be inconclusive.

The commentators and systematical writers in logic, have supplied this defect; and given us real examples of every legitimate mode in all the figures. We acknowledge this to be charitably done, in order to assist the conception in matters so very abstract; but whether it was prudently done for the honour of the art, may be doubted. I am afraid this was to uncover the nakedness of the theory; it has undoubtedly contributed to bring it into contempt; for when one considers the silly and un-instructive reasonings that have been brought forth by this grand organ of science, he can hardly forbear crying out, *Parturiunt montes, et nascitur ridiculus mus*. Many of the writers of logic are acute and ingenious, and much practised in the syllogistical art; and there must be some reason why the examples they have given of syllogisms are so lean.

We

We shall speak of the reason afterwards; and shall now give a syllogism in each figure as an example.

No work of God is bad;

The natural passions and appetites of men are the work of God;

Therefore none of them is bad.

In this syllogism, the middle term, *work of God*, is the subject of the major and the predicate of the minor; so that the syllogism is of the first figure. The mode is that called *Celarent*; the major and conclusion being both universal negatives, and the minor an universal affirmative. It agrees to the rules of the figure, as the major is universal, and the minor affirmative; it is also agreeable to all the general rules; so that it maintains its character in every trial. And to show of what ductile materials syllogisms are made, we may, by converting simply the major proposition, reduce it to a good syllogism of the second figure, and of the mode *Cesare*, thus:

Whatever is bad is not the work of God;

All the natural passions and appetites of men are the work of God;

Therefore they are not bad.

Another example:

Every thing virtuous is praise-worthy;

Some pleasures are not praise-worthy.

Therefore some pleasures are not virtuous.

Here the middle term *praise-worthy* being the predicate of both premises, the syllogism is of the second figure ; and seeing it is made up of the propositions, A, O, O, the mode is *Baroco*. It will be found to agree both with the general and special rules : and it may be reduced into a good syllogism of the first figure upon converting the major by contraposition, thus :

What is not praise-worthy is not virtuous ;

Some pleasures are not praise-worthy ;

Therefore some pleasures are not virtuous.

That this syllogism is conclusive, common sense pronounces, and all logicians must allow ; but it is somewhat unpliant to rules, and requires a little straining to make it tally with them.

That it is of the first figure is beyond dispute ; but to what mode of that figure shall we refer it ? This is a question of some difficulty. For, in the first place, the premises seem to be both negative, which contradicts the third general rule ; and moreover, it is contrary to a special rule of the first figure, That the minor should be negative. These are the difficulties to be removed.

Some logicians think, that the two negative particles in the major are equivalent to an affirmative ; and that therefore the major proposition, *What is not praise-worthy, is not virtuous*, is to be accounted an affirmative proposition. This, if granted, solves one difficulty ; but the other remains. The most ingenious solution, therefore, is this :

this: Let the middle term be *not praise-worthy*. Thus, making the negative particle a part of the middle term, the syllogism stands thus:

Whatever is *not praise-worthy* is not virtuous;

Some pleasures are *not praise-worthy*;

Therefore some pleasures are not virtuous.

By this analysis, the major becomes an universal negative, the minor a particular affirmative, and the conclusion a particular negative, and so we have a just syllogism in *Ferio*.

We see, by this example, that the quality of propositions is not so invariable, but that, when occasion requires, an affirmative may be degraded into a negative, or a negative exalted to an affirmative. Another example:

All Africans are black;

All Africans are men;

Therefore some men are black.

This is of the third figure, and of the mode *Darapti*; and it may be reduced to *Darii* in the first figure, by converting the minor.

All Africans are black;

Some men are Africans;

Therefore some men are black.

By this time I apprehend the reader has got as many examples of syllogisms as will stay his appetite for that kind of entertainment.

SECT. 4. *On the Demonstration of the Theory.*

Aristotle and all his followers have thought it necessary, in order to bring this theory of categorical syllogisms to a science, to demonstrate, both that the fourteen authorized modes conclude justly, and that none of the rest do. Let us now see how this has been executed.

As to the legitimate modes, Aristotle and those who follow him the most closely, demonstrate the four modes of the first figure directly from an axiom called the *Dictum de omni et nullo*. The amount of the axiom is, That what is affirmed of a whole *genus*, may be affirmed of all the species and individuals belonging to that *genus*; and that what is denied of the whole *genus*, may be denied of its species and individuals. The four modes of the first figure are evidently included in this axiom. And as to the legitimate modes of the other figures, they are proved by reducing them to some mode of the first. Nor is there any other principle assumed in these reductions but the axioms concerning the conversion of propositions, and in some cases the axioms concerning the opposition of propositions.

As to the illegitimate modes, Aristotle has taken the labour to try and condemn them one by one in all the three figures: but this is done in such a manner that it is very painful to follow him. To give a specimen. In order to prove, that those
modes

modes of the first figure in which the major is particular, do not conclude, he proceeds thus: "If
" A is or is not in some B, and B in every C, no
" conclusion follows. Take for the terms in the
" affirmative case, *good, habit, prudence*, in the
" negative, *good, habit, ignorance*." This laconic style, the use of symbols not familiar, and, in place of giving an example, his leaving us to form one from three assigned terms, give such embarrassment to a reader, that he is like one reading a book of riddles.

Having thus ascertained the true and false modes of a figure, he subjoins the particular rules of that figure, which seem to be deduced from the particular cases before determined. The general rules come last of all, as a general corollary from what goes before.

I know not whether it is from a diffidence of Aristotle's demonstrations, or from an apprehension of their obscurity, or from a desire of improving upon his method, that almost all the writers in logic I have met with, have inverted his order, beginning where he ends, and ending where he begins. They first demonstrate the general rules, which belong to all the figures, from three axioms; then from the general rules and the nature of each figure, they demonstrate the special rules of each figure. When this is done, nothing remains but to apply these general and special rules, and to reject every mode which contradicts them.

This

This method has a very scientific appearance : and when we consider, that by a few rules once demonstrated, an hundred and seventy-eight false modes are destroyed at one blow, which Aristotle had the trouble to put to death one by one, it seems to be a great improvement. I have only one objection to the three axioms.

The three axioms are these : 1. Things which agree with the same third, agree with one another. 2. When one agrees with the third, and the other does not, they do not agree with one another. 3. When neither agrees with the third, you cannot thence conclude, either that they do, or do not agree with one another. If these axioms are applied to mathematical quantities, to which they seem to relate when taken literally, they have all the evidence that an axiom ought to have : but the logicians apply them in an analogical sense, to things of another nature. In order, therefore, to judge whether they are truly axioms, we ought to strip them of their figurative dress, and to set them down in plain English, as the logicians understand them. They amount therefore to this. 1. If two things be affirmed of a third, or the third be affirmed of them ; or if one be affirmed of the third, and the third affirmed of the other ; then they may be affirmed one of the other. 2. If one is affirmed of the third, or the third of it, and the other denied of the third, or the third of it, they may be denied one of the other. 3. If both are denied

nied of the third, or the third of them ; or if one is denied of the third, and the third denied of the other ; nothing can be inferred.

When the three axioms are thus put in plain English, they seem not to have that degree of evidence which axioms ought to have ; and if there is any defect of evidence in the axioms, this defect will be communicated to the whole edifice raised upon them.

It may even be suspected, that an attempt by any method to demonstrate that a syllogism is conclusive, is an impropriety somewhat like that of attempting to demonstrate an axiom. In a just syllogism, the connection between the premises and the conclusion is not only real, but immediate ; so that no proposition can come between them to make their connection more apparent. The very intention of a syllogism is, to leave nothing to be supplied that is necessary to a complete demonstration. Therefore a man of common understanding, who has a perfect comprehension of the premises, finds himself under a necessity of admitting the conclusion, supposing the premises to be true ; and the conclusion is connected with the premises with all the force of intuitive evidence. In a word, an immediate conclusion is seen in the premises, by the light of common sense ; and where that is wanting, no kind of reasoning will supply its place.

SECT.

SECT. 5. *On this Theory, considered as an Engine of Science.*

The slow progress of useful knowledge, during the many ages in which the syllogistic art was most highly cultivated as the only guide to science, and its quick progress since that art was disused, suggest a presumption against it ; and this presumption is strengthened by the puerility of the examples which have always been brought to illustrate its rules.

The ancients seem to have had too high notions, both of the force of the reasoning power in man, and of the art of syllogism as its guide. Mere reasoning can carry us but a very little way in most subjects. By observation, and experiments properly conducted, the stock of human knowledge may be enlarged without end ; but the power of reasoning alone, applied with vigour through a long life, would only carry a man round, like a horse in a mill who labours hard but makes no progress. There is indeed an exception to this observation in the mathematical sciences. The relations of quantity are so various and so susceptible of exact mensuration, that long trains of accurate reasoning on that subject may be formed, and conclusions drawn very remote from the first principles. It is in this science and those which depend upon it, that the power of reasoning triumphs ; in other matters its trophies are inconsiderable.

siderable. If any man doubt this, let him produce, in any subject unconnected with mathematics, a train of reasoning of some length, leading to a conclusion, which without this train of reasoning would never have been brought within human sight. Every man acquainted with mathematics can produce thousands of such trains of reasoning. I do not say, that none such can be produced in other sciences; but I believe they are few, and not easily found; and that if they are found, it will not be in subjects that can be expressed by categorical propositions, to which alone the theory of figure and mode extends.

In matters to which that theory extends, a man of good sense, who can distinguish things that differ, can avoid the snares of ambiguous words, and is moderately practised in such matters, sees at once all that can be inferred from the premises; or finds, that there is but a very short step to the conclusion.

When the power of reasoning is so feeble by nature, especially in subjects to which this theory can be applied, it would be unreasonable to expect great effects from it. And hence we see the reason why the examples brought to illustrate it by the most ingenious logicians, have rather tended to bring it into contempt.

If it should be thought, that the syllogistic art may be an useful engine in mathematics, in which pure reasoning has ample scope: First, It may be observed,

observed, That facts are unfavourable to this opinion : for it does not appear, that Euclid, or Apollonius, or Archimedes, or Hugen, or Newton, ever made the least use of this art ; and I am even of opinion, that no use can be made of it in mathematics. I would not wish to advance this rashly, since Aristotle has said, that mathematicians reason for the most part in the first figure. What led him to think so was, that the first figure only yields conclusions that are universal and affirmative, and the conclusions of mathematics are commonly of that kind. But it is to be observed, that the propositions of mathematics are not categorical propositions, consisting of one subject and one predicate. They express some relation which one quantity bears to another, and on that account must have three terms. The quantities compared make two, and the relation between them is a third. Now to such propositions we can neither apply the rules concerning the conversion of propositions, nor can they enter into a syllogism of any of the figures or modes. We observed before, that this conversion, *A is greater than B, therefore B is less than A*, does not fall within the rules of conversion given by Aristotle or the logicians ; and we now add, that this simple reasoning, *A is equal to B, and B to C ; therefore A is equal to C*, cannot be brought into any syllogism in figure and mode. There are indeed syllogisms into which mathematical propositions may enter, and

and of such we shall afterwards speak : but they have nothing to do with the system of figure and mode.

When we go without the circle of the mathematical sciences, I know nothing in which there seems to be so much demonstration as in that part of logic which treats of the figures and modes, of syllogism ; but the few remarks we have made, shew, that it has some weak places : and besides, this system cannot be used as an engine to rear itself.

The compass of the syllogistic system as an engine of science, may be discerned by a compendious and general view of the conclusion drawn, and the argument used to prove it, in each of the three figures.

In the first figure, the conclusion affirms or denies something of a certain species or individual ; and the argument to prove this conclusion is, That the same thing may be affirmed or denied of the whole genus to which that species or individual belongs.

In the second figure, the conclusion is, That some species or individual does not belong to such a genus ; and the argument is, That some attribute common to the whole genus does not belong to that species or individual.

In the third figure, the conclusion is, That such an attribute belongs to part of a genus ; and the argument is, That the attribute in question belongs

to a species or individual which is part of that genus.

I apprehend, that in this short view, every conclusion that falls within the compass of the three figures, as well as the mean of proof, is comprehended. The rules of all the figures might be easily deduced from it; and it appears, that there is only one principle of reasoning in all the three: so that it is not strange, that a syllogism of one figure should be reduced to one of another figure.

The general principle in which the whole terminates, and of which every categorical syllogism is only a particular application, is this, That what is affirmed or denied of the whole genus, may be affirmed or denied of every species and individual belonging to it. This is a principle of undoubted certainty indeed, but of no great depth. Aristotle and all the logicians assume it as an axiom or first principle, from which the syllogistic system, as it were, takes its departure: and after a tedious voyage, and great expence of demonstration, it lands at last in this principle as its ultimate conclusion. *O curas hominum! O quantum est in rebus inane!*

SECT. 6. *On Modal Syllogisms.*

Categorical propositions, besides their quantity and quality, have another affection, by which they are divided into pure and modal. In a pure proposition,

position, the predicate is barely affirmed or denied of the subject; but in a modal proposition, the affirmation or negation is modified, by being declared to be necessary, or contingent, or possible, or impossible. These are the four modes observed by Aristotle, from which he denominates a proposition modal. His genuine disciples maintain, that these are all the modes that can affect an affirmation or negation, and that the enumeration is complete. Others maintain, that this enumeration is incomplete; and that when an affirmation or negation is said to be certain or uncertain, probable or improbable, this makes a modal proposition, no less than the four modes of Aristotle. We shall not enter into this dispute; but proceed to observe, that the epithets of *pure* and *modal* are applied to syllogisms as well as to propositions. A pure syllogism is that in which both premises are pure propositions. A modal syllogism is that in which either of the premises is a modal proposition.

The syllogisms, of which we have already said so much, are those only which are pure as well as categorical. But when we consider, that through all the figures and modes, a syllogism may have one premise modal of any of the four modes, while the other is pure, or it may have both premises modal, and that they may be either of the same mode or of different modes; what prodigious variety arises from all these combinations? Now it

is the business of a logician, to shew how the conclusion is affected in all this variety of cases. Aristotle has done this in his First Analytics, with immense labour ; and it will not be thought strange, that when he had employed only four chapters in discussing one hundred and ninety-two modes, true and false, of pure syllogisms, he should employ fifteen upon modal syllogisms.

I am very willing to excuse myself from entering upon this great branch of logic, by the judgment and example of those who cannot be charged either with want of respect to Aristotle, or with a low esteem of the syllogistic art.

Keckerman, a famous Dantzican professor, who spent his life in teaching and writing logic, in his huge folio system of that science, published anno 1600, calls the doctrine of the modals the *crux logicorum*. With regard to the scholastic doctors, among whom this was a proverb, *De modalibus non gustabit asinus*, he thinks it very dubious, whether they tortured most the modal syllogisms, or were most tortured by them. But those crabbed geniuses, says he, made this doctrine so very thorny, that it is fitter to tear a man's wits in pieces than to give them solidity. He desires it to be observed, that the doctrine of the modals is adapted to the Greek language. The modal terms were frequently used by the Greeks in their disputations ; and, on that account, are so fully handled by Aristotle ; but in the Latin tongue you shall hardly even

ever meet with them. Nor do I remember, in all my experience, says he, to have observed any man in danger of being foiled in a dispute, through his ignorance of the modals.

This author, however, out of respect to Aristotle, treats pretty fully of modal propositions, shewing how to distinguish their subject and predicate, their quantity and quality. But the modal syllogisms he passes over altogether.

Ludovicus Vives, whom I mention, not as a devotee of Aristotle, but on account of his own judgment and learning, thinks that the doctrine of modals ought to be banished out of logic, and remitted to grammar; and that if the grammar of the Greek tongue had been brought to a system in the time of Aristotle, that most acute philosopher would have saved the great labour he has bestowed on this subject.

Burgersdick, after enumerating five classes of modal syllogisms, observes, that they require many rules and cautions, which Aristotle hath handled diligently; but that, as the use of them is not great, and their rules difficult, he thinks it not worth while to enter into the discussion of them; recommending to those who would understand them, the most learned paraphrase of Joannes Monlorius upon the first book of the First Analytics.

All the writers of logic for two hundred years back that have fallen into my hands, have passed over the rules of modal syllogisms with as little

ceremony. So that this great branch of the doctrine of syllogism, so diligently handled by Aristotle, fell into neglect, if not contempt, even while the doctrine of pure syllogisms continued in the highest esteem. Moved by these authorities, I shall let this doctrine rest in peace, without giving the least disturbance to its ashes.

SECT. 7. *On Syllogisms that do not belong to Figure and Mode.*

Aristotle gives some observations upon imperfect syllogisms: such as, the Enthimema, in which one of the premises is not expressed, but understood: Induction, wherein we collect an universal from a full enumeration of particulars: and Examples, which are an imperfect induction. The logicians have copied Aristotle upon these kinds of reasoning, without any considerable improvement. But to compensate the modal syllogisms, which they have laid aside, they have given rules for several kinds of syllogism, of which Aristotle takes no notice. These may be reduced to two classes.

The first class comprehends the syllogisms into which any exclusive, restrictive, exceptive, or reduplicative proposition enters. Such propositions are by some called *exponible*, by others *imperfectly modal*. The rules given with regard to these are obvious, from a just interpretation of the propositions.

The

The second class is that of hypothetical syllogisms, which take that denomination from having a hypothetical proposition for one or both premises. Most logicians give the name of *hypothetical* to all complex propositions which have more terms than one subject and one predicate. I use the word in this large sense ; and mean by hypothetical syllogisms, all those in which either of the premises consists of more terms than two. How many various kinds there may be of such syllogisms, has never been ascertained. The logicians have given names to some ; such as, the copulative, the conditional, by some called hypothetical, and the disjunctive.

Such syllogisms cannot be tried by the rules of figure and mode. Every kind would require rules peculiar to itself. Logicians have given rules for some kinds ; but there are many that have not so much as a name.

The Dilemma is considered by most logicians as a species of the disjunctive syllogism. A remarkable property of this kind is, that it may sometimes be happily retorted : it is, it seems, like a hand-grenade, which by dextrous management may be thrown back, so as to spend its force upon the assailant. We shall conclude this tedious account of syllogisms, with a dilemma mentioned by *A. Gellius*, and from him by many logicians, as insoluble in any other way.

E 4

“ Euathlus,

Euathlus, a rich young man, desirous of learning the art of pleading, applied to Protagoras, a celebrated sophist, to instruct him, promising a great sum of money as his reward ; one-half of which was paid down ; the other half he bound himself to pay as soon as he should plead a cause before the judges, and gain it. Protagoras found him a very apt scholar ; but, after he had made good progress, he was in no haste to plead causes. The master, conceiving that he intended by this means to shift off his second payment, took, as he thought, a sure method to get the better of his delay. He sued Euathlus before the judges ; and, having opened his cause at the bar, he pleaded to this purpose. O most foolish young man, do you not see, that, in any event, I must gain my point ? for if the judges give sentence for me, you must pay by their sentence ; if against me, the condition of our bargain is fulfilled, and you have no plea left for your delay, after having pleaded and gained a cause. To which Euathlus answered. O most wise master, I might have avoided the force of your argument, by not pleading my own cause. But, giving up this advantage, do you not see, that whatever sentence the judges pass, I am safe ? If they give sentence for me, I am acquitted by their sentence ; if against me, the condition of our bargain is not fulfilled, by my pleading a cause, and losing it. The judges, thinking the arguments

“arguments unanswerable on both sides, put off
“the cause to a long day.”

CHAP. V.

ACCOUNT OF THE REMAINING BOOKS OF THE ORGANON.

SECT. I. *Of the Last Analytics.*

IN the First Analytics, syllogisms are considered in respect of their form; they are now to be considered in respect of their matter. The form lies in the necessary connection between the premises and the conclusion; and where such a connection is wanting, they are said to be informal, or vicious in point of form.

But where there is no fault in the form, there may be in the matter; that is, in the propositions of which they are composed, which may be true or false, probable or improbable.

When the premises are certain, and the conclusion drawn from them in due form, this is demonstration, and produces science. Such syllogisms

gisms are called *apodictical*; and are handled in the two books of the Last Analytics. When the premises are not certain, but probable only, such syllogisms are called *dialectical*; and of them he treats in the eight books of the Topics. But there are some syllogisms which seem to be perfect both in matter and form, when they are not really so; as, a face may seem beautiful which is but painted. These being apt to deceive, and produce a false opinion, are called *sophistical*; and they are the subject of the book concerning Sophisms.

To return to the Last Analytics, which treat of demonstration and of science: We shall not pretend to abridge these books; for Aristotle's writings do not admit of abridgment: no man in fewer words can say what he says; and he is not often guilty of repetition. We shall only give some of his capital conclusions, omitting his long reasonings and nice distinctions, of which his genius was wonderfully productive.

All demonstration must be built upon principles already known; and these upon others of the same kind; until we come at last to first principles, which neither can be demonstrated, nor need to be, being evident of themselves.

We cannot demonstrate things in a circle, supporting the conclusion by the premises, and the premises by the conclusion. Nor can there be an infinite number of middle terms between the first principle and the conclusion.

In

In all demonstration, the first principles, the conclusion, and all the intermediate propositions, must be necessary, general, and eternal truths: for of things fortuitous, contingent, or mutable, or of individual things, there is no demonstration.

Some demonstrations prove only, that the thing is thus affected; others prove, why it is thus affected. The former may be drawn from a remote cause, or from an effect: but the latter must be drawn from an immediate cause; and are the most perfect.

The first figure is best adapted to demonstration, because it affords conclusions universally affirmative; and this figure is commonly used by the mathematicians.

The demonstration of an affirmative proposition is preferable to that of a negative; the demonstration of an universal to that of a particular; and direct demonstration to that *ad absurdum*.

The principles are more certain than the conclusion.

There cannot be opinion and science of the same thing at the same time.

In the second book we are taught, that the questions that may be put with regard to any thing, are four: 1. Whether the thing be thus affected. 2. Why it is thus affected. 3. Whether it exists. 4. What it is.

The last of these questions Aristotle, in good Greek, calls the *What is it* of a thing. The schoolmen,

men, in very barbarous Latin, called this, the *quiddity* of a thing. This quiddity, he proves by many arguments, cannot be demonstrated, but must be fixed by a definition. This gives occasion to treat of definition, and how a right definition should be formed. As an example, he gives a definition of the number *three*, and defines it to be the first odd number.

In this book he treats also of the four kinds of causes; efficient, material, formal, and final.

Another thing treated of in this book is, the manner in which we acquire first principles, which are the foundation of all demonstration. These are not innate, because we may be for a great part of life ignorant of them: nor can they be deduced demonstratively from any antecedent knowledge, otherwise they would not be first principles. Therefore he concludes, that first principles are got by induction, from the informations of sense. The senses give us informations of individual things, and from these by induction we draw general conclusions: for it is a maxim with Aristotle, That there is nothing in the understanding which was not before in some sense.

The knowledge of first principles, as it is not acquired by demonstration, ought not to be called science: and therefore he calls it *intelligence*.

SECT. 2. *Of the Topics.*

The professed design of the Topics is, to shew a method by which a man may be able to reason with probability and consistency upon every question that can occur.

Every question is either about the genus of the subject, or its specific difference, or something proper to it, or something accidental.

To prove that this division is complete, Aristotle reasons thus: Whatever is attributed to a subject, it must either be, that the subject can be reciprocally attributed to it, or that it cannot. If the subject and attribute can be reciprocated, the attribute either declares what the subject is, and then it is a definition; or it does not declare what the subject is, and then it is a property. If the attribute cannot be reciprocated, it must be something contained in the definition, or not. If it be contained in the definition of the subject, it must be the genus of the subject, or its specific difference; for the definition consists of these two. If it be not contained in the definition of the subject, it must be an accident.

The furniture proper to fit a man for arguing dialectically may be reduced to these four heads: 1. Probable propositions of all sorts, which may on occasion be assumed in an argument. 2. Distinctions of words which are nearly of the same signification. 3. Distinctions of things which are not

not so far asunder but that they may be taken for one and the same. 4. Similitudes.

The second and the five following books are taken up in enumerating the topics or heads of argument that may be used in questions about the genus, the definition, the properties, and the accidents of a thing; and occasionally he introduces the topics for proving things to be the same, or different; and the topics for proving one thing to be better or worse than another.

In this enumeration of topics, Aristotle has shewn more the fertility of his genius, than the accuracy of method. The writers of logic seem to be of this opinion: for I know none of them that has followed him closely upon this subject. They have considered the topics of argumentation as reducible to certain axioms. For instance, when the question is about the genus of a thing, it must be determined by some axiom about genus and species; when it is about a definition, it must be determined by some axiom relating to definition, and things defined: and so of other questions. They have therefore reduced the doctrine of the topics to certain axioms or canons, and disposed these axioms in order under certain heads.

This method seems to be more commodious and elegant than that of Aristotle. Yet it must be acknowledged, that Aristotle has furnished the materials from which all the logicians have borrowed their doctrine of topics: and even Cicero, Quintilian,

Quintilian, and other rhetorical writers, have been much indebted to the Topics of Aristotle.

He was the first, as far as I know, who made an attempt of this kind: and in this he acted up to the magnanimity of his own genius, and that of ancient philosophy. Every subject of human thought had been reduced to ten categories; every thing that can be attributed to any subject, to five predicables: he attempted to reduce all the forms of reasoning to fixed rules of figure and mode, and to reduce all the topics of argumentation under certain heads; and by that means to collect as it were into one store all that can be said on one side or the other of every question, and to provide a grand arsenal, from which all future combatants might be furnished with arms offensive and defensive in every cause, so as to leave no room to future generations to invent any thing new.

The last book of the Topics is a code of the laws according to which a syllogistical disputation ought to be managed, both on the part of the assailant and defendant. From which it is evident, that this philosopher trained his disciples to contend, not for truth merely, but for victory.

SECT. 3. *Of the book concerning Sophisms.*

A syllogism which leads to a false conclusion, must be vicious, either in matter or form: for from true principles nothing but truth can be
justly

justly deduced. If the matter be faulty, that is if either of the premises be false, that premise must be denied by the defendant. If the form be faulty, some rule of syllogism is transgressed; and it is the part of the defendant to shew, what general or special rule it is that is transgressed. So that, if he be an able logician, he will be impregnable in the defence of truth, and may resist all the attacks of the sophist. But as there are syllogisms which may seem to be perfect both in matter and form, when they are not really so, as a piece of money may seem to be good coin when it is adulterate; such fallacious syllogisms are considered in this treatise, in order to make a defendant more expert in the use of his defensive weapons.

And here the author, with his usual magnanimity, attempts to bring all the fallacies that can enter into a syllogism under thirteen heads; of which six lie in the diction or language, and seven not in the diction.

The fallacies in diction are, 1. When an ambiguous word is taken at one time in one sense, and at another time in another. 2. When an ambiguous phrase is taken in the same manner. 3. and 4. are ambiguities in syntax; when words are conjoined in syntax that ought to be disjoined; or disjoined when they ought to be conjoined. 5. Is an ambiguity in prosody, accent, or pronunciation. 6. An ambiguity arising from some figure of speech.

When

When a sophism of any of these kinds is translated into another language, or even rendered into unambiguous expressions in the same language, the fallacy is evident, and the syllogism appears to have four terms.

The seven fallacies which are said not to be in the diction, but in the thing, have their proper names in Greek and in Latin, by which they are distinguished. Without minding their names, we shall give a brief account of their nature.

1. The first is, Taking an accidental conjunction of things for a natural or necessary connection: as, when from an accident we infer a property; when from an example we infer a rule; when from a single act we infer a habit.

2. Taking that absolutely which ought to be taken comparatively, or with a certain limitation. The construction of language often leads into this fallacy: for in all languages, it is common to use absolute terms to signify things that carry in them some secret comparison; or to use unlimited terms, to signify what from its nature must be limited.

3. Taking that for the cause of a thing which is only an occasion, or concomitant.

4. Begging the question. This is done, when the thing to be proved, or some thing equivalent, is assumed in the premises.

5. Mistaking the question. When the conclusion of the syllogism is not the thing that ought

to be proved, but something else that is mistaken for it.

6. When that which is not a consequence is mistaken for a consequence; as if, because all Africans are black, it were taken for granted that all blacks are Africans.

7. The last fallacy lies in propositions that are complex, and imply two affirmations, whereof one may be true, and the other false; so that whether you grant the proposition, or deny it, you are entangled: as when it is affirmed, that such a man has left off playing the fool. If it be granted, it implies, that he did play the fool formerly. If it be denied, it implies, or seems to imply, that he plays the fool still.

In this enumeration, we ought, in justice to Aristotle, to expect only the fallacies incident to categorical syllogisms. And I do not find, that the logicians have made any additions to it when taken in this view; although they have given some other fallacies that are incident to syllogisms of the hypothetical kind, particularly the fallacy of an incomplete enumeration in disjunctive syllogisms and dilemmas.

The different species of sophisms above mentioned are not so precisely defined by Aristotle, or by subsequent logicians, but that they allow of great latitude in the application; and it is often dubious under what particular species a sophistical syllogism ought to be classed. We even find the same example brought under one species by one author,

author, and under another species by another. Nay, what is more strange, Aristotle himself employs a long chapter in proving by a particular induction, that all the seven may be brought under that which we have called *mistaking the question*, and which is commonly called *ignoratio elenchi*. And indeed the proof of this is easy, without that laborious detail which Aristotle uses for the purpose: for if you lop off from the conclusion of a sophistical syllogism all that is not supported by the premises, the conclusion, in that case, will always be found different from that which ought to have been proved; and so it falls under the *ignoratio elenchi*.

It was probably Aristotle's aim, to reduce all the possible variety of sophisms, as he had attempted to do of just syllogisms, to certain definite species: but he seems to be sensible that he had fallen short in this last attempt. When a genus is properly divided into its species, the species should not only, when taken together, exhaust the whole genus; but every species should have its own precinct so accurately defined, that one shall not encroach upon another. And when an individual can be said to belong to two or three different species, the division is imperfect; yet this is the case of Aristotle's division of the sophisms, by his own acknowledgment. It ought not therefore to be taken for a division strictly logical. It may rather be compared to the several species or forms of action invented in law for the redress of wrongs.

For every wrong there is a remedy in law by one action or another : but sometimes a man may take his choice among several different actions. So every sophistical syllogism may, by a little art, be brought under one or other of the species mentioned by Aristotle, and very often you may take your choice of two or three.

Besides the enumeration of the various kinds of sophisms, there are many other things in this treatise concerning the art of managing a syllogistical dispute with an antagonist. And indeed, if the passion for this kind of litigation, which reigned for so many ages, should ever again lift up its head, we may predict, that the Organon of Aristotle will then become a fashionable study : for it contains such admirable materials and documents for this art, that it may be said to have brought it to a science.

The conclusion of this treatise ought not to be overlooked : it manifestly relates, not to the present treatise only, but also to the whole analytics and topics of the author. I shall therefore give the substance of it.

“ Of those who may be called inventors, some
“ have made important additions to things long be-
“ fore begun, and carried on through a course of
“ ages ; others have given a small beginning to
“ things which, in succeeding times, will be
“ brought to greater perfection. The beginning
“ of a thing, though small, is the chief part of it,
“ and

“ and requires the greatest degree of invention ;
“ for it is easy to make additions to inventions
“ once begun. Now with regard to the dialecti-
“ cal art, there was not something done, and some-
“ thing remaining to be done. There was abso-
“ lutely nothing done : for those who professed the
“ art of disputation, had only a set of orations com-
“ posed, and of arguments, and of captious que-
“ stions, which might suit many occasions. These
“ their scholars soon learned, and fitted to the oc-
“ casion. This was not to teach you the art, but
“ to furnish you with the materials produced by
“ the art : as if a man professing to teach you the
“ art of making shoes, should bring you a parcel
“ of shoes of various sizes and shapes, from which
“ you may provide those who want. This may
“ have its use ; but it is not to teach the art of
“ making shoes. And indeed, with regard to rhe-
“ torical declamation, there are many precepts
“ handed down from ancient times ; but with
“ regard to the construction of syllogisms, not
“ one.

“ We have therefore employed much time and
“ labour upon this subject ; and if our system ap-
“ pear to you not to be in the number of those
“ things, which, being before carried a certain
“ length, were left to be perfected ; we hope for
“ your favourable acceptance of what is done,
“ and your indulgence in what is left imper-
“ fect.”

C H A P. VI.

REFLECTIONS ON THE UTILITY OF LOGIC, AND THE MEANS OF ITS IMPROVEMENT.

SECT. I. *Of the Utility of Logic.*

MEN rarely leave one extreme, without running into the contrary. It is no wonder, therefore, that the excessive admiration of Aristotle, which continued for so many ages, should end in an undue contempt; and that the high esteem of logic as the grand engine of science, should at last make way for too unfavourable an opinion, which seems now prevalent, of its being unworthy of a place in a liberal education. Those who think according to the fashion, as the greatest part of men do, will be as prone to go into this extreme, as their grandfathers were to go into the contrary.

Laying aside prejudice, whether fashionable or unfashionable, let us consider whether logic is, or may be made, subservient to any good purpose.

Its

Its professed end is, to teach men to think, to judge, and to reason, with precision and accuracy. No man will say that this is a matter of no importance ; the only thing therefore that admits of doubt, is, whether it can be taught.

To resolve this doubt, it may be observed, that our rational faculty is the gift of God, given to men in very different measure. Some have a large portion, some a less ; and where there is a remarkable defect of the natural power, it cannot be supplied by any culture. But this natural power, even where it is the strongest, may lie dead for want of the means of improvement : a savage may have been born with as good faculties as a Bacon or a Newton : but his talent was buried, being never put to use ; while theirs was cultivated to the best advantage.

It may likewise be observed, that the chief mean of improving our rational power, is the vigorous exercise of it, in various ways and in different subjects, by which the habit is acquired of exercising it properly. Without such exercise, and good sense over and above, a man who has studied logic all his life, may after all be only a petulant wrangler, without true judgment or skill of reasoning in any science.

I take this to be Locke's meaning, when in his Thoughts on Education he says, " If you would have your son to reason well, let him read Chillingworth." The state of things is much altered

ed since Locke wrote. Logic has been much improved, chiefly by his writings ; and yet much less stress is laid upon it, and less time consumed in it. His counsel, therefore, was judicious and reasonable ; to wit, That the improvement of our reasoning power is to be expected much more from an intimate acquaintance with the authors who reason the best, than from studying voluminous systems of logic. But if he had meant, that the study of logic was of no use nor deserved any attention, he surely would not have taken the pains to have made so considerable an addition to it, by his *Essay on the Human Understanding*, and by his *Thoughts on the Conduct of the Understanding*. Nor would he have remitted his pupil to Chillingworth, the acuteſt logician as well as the beſt reaſoner of his age ; and one who, in innumerable places of his excellent book, without pedantry even in that pedantic age, makes the happieſt application of the rules of logic, for unravelling the ſophiſtical reaſoning of his antagoniſt.

Our reaſoning power makes no appearance in infancy ; but as we grow up, it unfolds itſelf by degrees, like the bud of a tree. When a child firſt draws an inference, or perceives the force of an inference drawn by another, we may call this *the birth of his reaſon* ; but it is yet like a new-born babe, weak and tender ; it muſt be cheriſhed, carried in arms, and have food of eaſy digeſtion, till it gather ſtrength.

I believe no man remembers the birth of his reason : but it is probable that his decisions are at first weak and wavering ; and, compared with that steady conviction which he acquires in ripe years, are like the dawn of the morning compared with noon-day. We see that the reason of children yields to authority, as a reed to the wind ; nay, that it clings to it, and leans upon it, as if conscious of its own weakness.

When reason acquires such strength as to stand on its own bottom, without the aid of authority, or even in opposition to authority, this may be called its *'manly age'*. But in most men, it hardly ever arrives at this period. Many, by their situation in life, have not the opportunity of cultivating their rational powers. Many, from the habit they have acquired of submitting their opinions to the authority of others, or from some other principle which operates more powerfully than the love of truth, suffer their judgment to be carried along to the end of their days, either by the authority of a leader, or of a party, or of the multitude, or by their own passions. Such persons, however learned, however acute, may be said to be all their days children in understanding. They reason, they dispute, and perhaps write : but it is not that they may find the truth ; but that they may defend opinions which have descended to them by inheritance, or into which they have fallen by accident, or been led by affection.

I agree with Mr Locke, that there is no study better fitted to exercise and strengthen the reasoning powers, than that of the mathematical sciences ; for two reasons ; first, Because there is no other branch of science which gives such scope to long and accurate trains of reasoning ; and, secondly, Because in mathematics there is no room for authority, nor for prejudice of any kind, which may give a false bias to the judgment.

When a youth of moderate parts begins to study Euclid, every thing at first is new to him. His apprehension is unsteady : his judgment is feeble ; and rests partly upon the evidence of the thing, and partly upon the authority of his teacher. But every time he goes over the definitions, the axioms, the elementary propositions, more light breaks in upon him : the language becomes familiar, and conveys clear and steady conceptions : the judgment is confirmed : he begins to see what demonstration is ; and it is impossible to see it without being charmed with it. He perceives it to be a kind of evidence that has no need of authority to strengthen it. He finds himself emancipated from that bondage ; and exults so much in this new state of independence, that he spurns at authority, and would have demonstration for every thing ; until experience teaches him, that this is a kind of evidence that cannot be had in most things ; and that in his most important concerns, he must rest contented with probability.

As

As he goes on in mathematics, the road of demonstration becomes smooth and easy : he can walk in it firmly, and take wider steps : and at last he acquires the habit, not only of understanding a demonstration, but of discovering and demonstrating mathematical truths.

Thus, a man, without rules of logic, may acquire a habit of reasoning justly in mathematics ; and, I believe, he may, by like means, acquire a habit of reasoning justly in mechanics, in jurisprudence, in politics, or in any other science. Good sense, good examples, and assiduous exercise, may bring a man to reason justly and acutely in his own profession, without rules.

But if any man think, that from this concession he may infer the inutility of logic, he betrays a great want of that art by this inference : for it is no better reasoning than this, That because a man may go from Edinburgh to London by the way of Paris, therefore any other road is useless.

There is perhaps no practical art which may not be acquired, in a very considerable degree, by example and practice, without reducing it to rules. But practice, joined with rules, may carry a man on in his art farther and more quickly, than practice without rules. Every ingenious artist knows the utility of having his art reduced to rules, and by that means made a science. He is thereby enlightened in his practice, and works with more assurance. By rules, he sometimes corrects his own errors,

errors, and often detects the errors of others : he finds them of great use to confirm his judgment, to justify what is right, and to condemn what is wrong.

Is it of no use in reasoning, to be well acquainted with the various powers of the human understanding, by which we reason ? Is it of no use, to resolve the various kinds of reasoning into their simple elements ; and to discover, as far as we are able, the rules by which these elements are combined in judging and in reasoning ? Is it of no use, to mark the various fallacies in reasoning, by which even the most ingenious men have been led into error ? It must surely betray great want of understanding, to think these things useless or unimportant. These are the things which logicians have attempted ; and which they have executed ; not indeed so completely as to leave no room for improvement, but in such a manner as to give very considerable aid to our reasoning powers. That the principles laid down with regard to definition and division, with regard to the conversion and opposition of propositions and the general rules of reasoning, are not without use, is sufficiently apparent from the blunders committed by those who disdain any acquaintance with them.

Although the art of categorical syllogism is better fitted for scholastic litigation, than for real improvement in knowledge, it is a venerable piece of antiquity, and a great effort of human genius. We
admire

admire the pyramids of Egypt, and the wall of China, though useless burdens upon the earth. We can bear the most minute description of them, and travel hundreds of leagues to see them. If any person should with sacrilegious hands destroy or deface them, his memory would be had in abhorrence. The predicaments and predicables, the rules of syllogism, and the topics, have a like title to our veneration as antiquities : they are uncommon efforts, not of human power, but of human genius ; and they make a remarkable period in the progress of human reason.

The prejudice against logic has probably been strengthened by its being taught too early in life. Boys are often taught logic as they are taught their creed, when it is an exercise of memory only, without understanding. One may as well expect to understand grammar before he can speak, as to understand logic before he can reason. It must even be acknowledged, that commonly we are capable of reasoning in mathematics more early than in logic. The objects presented to the mind in this science, are of a very abstract nature, and can be distinctly conceived only when we are capable of attentive reflection upon the operations of our own understanding, and after we have been accustomed to reason. There may be an elementary logic, level to the capacity of those who have been but little exercised in reasoning ; but the most important parts of this science require a ripe understanding,

standing, capable of reflecting upon its own operations. Therefore to make logic the first branch of science that is to be taught, is an old error that ought to be corrected.

SECT. 2. *Of the Improvement of Logic.*

In compositions of human thought expressed by speech or by writing, whatever is excellent and whatever is faulty, fall within the province, either of grammar, or of rhetoric, or of logic. Propriety of expression is the province of grammar ; grace, elegance, and force, in thought and in expression, are the province of rhetoric ; justness and accuracy of thought are the province of logic.

The faults in composition, therefore, which fall under the censure of logic, are obscure and indistinct conceptions, false judgment, inconclusive reasoning, and all improprieties in distinctions, definitions, division, or method. To aid our rational powers, in avoiding these faults and in attaining the opposite excellencies, is the end of logic ; and whatever there is in it that has no tendency to promote this end, ought to be thrown out.

The rules of logic being of a very abstract nature, ought to be illustrated by a variety of real and striking examples taken from the writings of good authors. It is both instructive and entertaining, to observe the virtues of accurate composition in writers of fame. We cannot see them, without being drawn to the imitation of them, in a more
powerful

powerful manner than we can be by dry rules. Nor are the faults of such writers, less instructive or less powerful monitors. A wreck, left upon a shoal or upon a rock, is not more useful to the sailor, than the faults of good writers, when set up to view, are to those who come after them. It was a happy thought in a late ingenious writer of English grammar, to collect under the several rules, examples of bad English found in the most approved authors. It were to be wished that the rules of logic were illustrated in the same manner. By these means, a system of logic would become a repository; wherein whatever is most acute in judging and in reasoning, whatever is most accurate in dividing, distinguishing, and defining, should be laid up and disposed in order for our imitation; and wherein the false steps of eminent authors should be recorded for our admonition.

After men had laboured in the search of truth near two thousand years by the help of syllogisms, Lord Bacon proposed the method of induction, as a more effectual engine for that purpose. His *Novum Organum* gave a new turn to the thoughts and labours of the inquisitive, more remarkable and more useful than that which the *Organum* of Aristotle had given before; and may be considered as a second grand æra in the progress of human reason.

The art of syllogism produced numberless disputes; and numberless sects who fought against
each

each other with much animosity, without gaining or losing ground, but did nothing considerable for the benefit of human life. The art of induction, first delineated by Lord Bacon, produced numberless laboratories and observatories ; in which Nature has been put to the question by thousands of experiments, and forced to confess many of her secrets, that before were hid from mortals. And by these, arts have been improved, and human knowledge wonderfully increased.

In reasoning by syllogism, from general principles we descend to a conclusion virtually contained in them. The process of induction is more arduous ; being an ascent from particular premises to a general conclusion. The evidence of such general conclusions is probable only, not demonstrative : but when the induction is sufficiently copious, and carried on according to the rules of art, it forces conviction no less than demonstration itself does.

The greatest part of human knowledge rests upon evidence of this kind. Indeed we can have no other for general truths which are contingent in their nature, and depend upon the will and ordination of the Maker of the world. He governs the world he has made, by general laws. The effects of these laws in particular phenomena, are open to our observation ; and by observing a train of uniform effects with due caution, we may at last decypher

decypher the law of nature by which they are regulated.

Lord Bacon has displayed no less force of genius in reducing to rules this method of reasoning, than Aristotle did in the method of syllogism. His *Novum Organum* ought therefore to be held as a most important addition to the ancient logic. Those who understand it, and enter into its spirit will be able to distinguish the chaff from the wheat in philosophical disquisitions into the works of God. They will learn to hold in due contempt all hypotheses and theories, the creatures of human imagination ; and to respect nothing but facts sufficiently vouched, or conclusions drawn from them by a fair and chaste interpretation of nature.

Most arts have been reduced to rules, after they had been brought to a considerable degree of perfection by the natural sagacity of artists ; and the rules have been drawn from the best examples of the art, that had been before exhibited ; but the art of philosophical induction was delineated by Lord Bacon in a very ample manner, before the world had seen any tolerable example of it. This, although it adds greatly to the merit of the author, must have produced some obscurity in the work, and a defect of proper examples for illustration. This defect may now be easily supplied, from those authors who, in their philosophical disquisitions, have the most strictly pursued the path pointed out in the *Novum Organum*. Among these Sir Isaac

Newton appears to hold the first rank ; having, in the third book of his *Principia* and in his *Optics*, had the rules of the *Novum Organum* constantly in his eye.

I think Lord Bacon was also the first who endeavoured to reduce to a system the prejudices or biases of the mind, which are the causes of false judgments and which he calls *the idols of the human understanding*. Some late writers of logic have very properly introduced this into their system ; but it deserves to be more copiously handled, and to be illustrated by real examples.

It is of great consequence to accurate reasoning, to distinguish first principles which are to be taken for granted, from propositions which require proof. All the real knowledge of mankind may be divided into two parts : the first consisting of self-evident propositions ; the second, of those which are deduced by just reasoning from self-evident propositions. The line that divides these two parts ought to be marked as distinctly as possible ; and the principles that are self-evident reduced, as far as can be done, to general axioms. This has been done in mathematics from the beginning, and has tended greatly to the advancement of that science. It has lately been done in natural philosophy : and by this means that science has advanced more in an hundred and fifty years, than it had done before in two thousand. Every science is in an unformed state until its first principles are ascertained :

ed : after which, it advances regularly, and secures the ground it has gained.

Although first principles do not admit of direct proof, yet there must be certain marks and characters, by which those that are truly such may be distinguished from counterfeits. These marks ought to be described, and applied, to distinguish the genuine from the spurious.

In the ancient philosophy, there is a redundancy, rather than a defect of first principles. Many things were assumed under that character without a just title : That nature abhors a *vacuum* ; That bodies do not gravitate in their proper place ; That the heavenly bodies undergo no change ; That they move in perfect circles, and with an equable motion. Such principles as these were assumed in the Peripatetic philosophy, without proof, as if they were self-evident.

Des Cartes, sensible of this weakness in the ancient philosophy, and desirous to guard against it in his own system, resolved to admit nothing until his assent was forced by irresistible evidence. The first thing that he found to be certain and evident was, that he thought, and reasoned, and doubted. He found himself under a necessity of believing the existence of those mental operations of which he was conscious : and having thus found sure footing in this one principle of consciousness, he rested satisfied with it, hoping to be able to build the whole fabric of his knowledge upon it ;

like Archimedes, who wanted but one fixed point to move the whole earth. But the foundation was too narrow; and in his progress he unawares assumes many things less evident than those which he attempts to prove. Although he was not able to suspect the testimony of consciousness; yet he thought the testimony of sense, of memory, and of every other faculty, might be suspected, and ought not to be received until proof was brought that they are not fallacious. Therefore he applies these faculties, whose character is yet in question, to prove, That there is an infinitely perfect Being, who made him, and who made his senses, his memory, his reason, and all his faculties; That this Being is no deceiver, and therefore could not give him faculties that are fallacious; and that on this account they deserve credit.

It is strange, that this philosopher, who found himself under a necessity of yielding to the testimony of consciousness, did not find the same necessity of yielding to the testimony of his senses, his memory, and his understanding: and that while he was certain that he doubted, and reasoned, he was uncertain whether two and three made five, and whether he was dreaming or awake. It is more strange, that so acute a reasoner should not perceive, that his whole train of reasoning to prove that his faculties were not fallacious, was mere sophistry; for if his faculties were fallacious, they might deceive him in this train of reasoning; and

so the conclusion, That they were not fallacious, was only the testimony of his faculties in their own favour, and might be a fallacy.

It is difficult to give any reason for distrusting our other faculties, that will not reach consciousness itself. And he who distrusts the faculties of judging and reasoning which God hath given him, must even rest in his scepticism, till he come to a sound mind, or until God give him new faculties to sit in judgment upon the old. If it be not a first principle, That our faculties are not fallacious, we must be absolute sceptics : for this principle is incapable of proof ; and if it is not certain, nothing else can be certain.

Since the time of Des Cartes, it has been fashionable with those who dealt in abstract philosophy, to employ their invention in finding philosophical arguments, either to prove those truths which ought to be received as first principles, or to overturn them : and it is not easy to say, whether the authority of first principles is more hurt by the first of these attempts, or by the last : for such principles can stand secure only upon their own bottom ; and to place them upon any other foundation than that of their intrinsic evidence, is in effect to overturn them.

I have lately met with a very sensible and judicious treatise, wrote by Father Buffier about fifty years ago, concerning first principles and the source of human judgments, which, with great propriety,

he prefixed to his treatise of logic. And indeed I apprehend it is a subject of such consequence, that if inquisitive men can be brought to the same unanimity in the first principles of the other sciences, as in those of mathematics and natural philosophy, (and why should we despair of a general agreement in things that are self-evident?), this might be considered as a third grand æra in the progress of human reason.

SKETCH II.

PRINCIPLES AND PROGRESS OF MORALITY.

THE principles of morality are little understood among savages : and if they arrive at maturity among enlightened nations, it is by slow degrees. This progress points out the historical part, as first in order : but as that history would give little satisfaction, without a rule for comparing the morals of different ages, and of different nations, I begin with the principles of morality, such as ought to govern at all times, and in all nations. The present sketch accordingly is divided into two parts. In the first, the principles are unfolded ; and the second is altogether historical.

PART

PART I.

PRINCIPLES OF MORALITY.

SECT. I.

Human actions analysed.

THE hand of God is no where more visible, than in the nice adjustment of our internal frame to our situation in this world. An animal is endued with a power of self-motion ; and in performing animal functions, requires no external aid. This in particular is the case of man, the noblest of terrestrial beings. His heart beats, his blood circulates, his stomach digests, &c. &c. By what means? Not surely by the laws of mechanism, which are far from being adequate to such operations. They are effects of an internal power, bestowed on man for preserving life. The power is exerted uniformly, and without interruption, independent of will, and without consciousness.

Man is a being susceptible of pleasure and pain : these generate desire to attain what is agreeable, and to shun what is disagreeable ; and he is possessed of other powers which enable him to gratify his desires. One power, termed *instinct*, is exerted indeed with consciousness ; but without will, and consequently without desiring or intending to produce any effect. Brute animals act for the most part by instinct : hunger prompts them to eat, and cold to take shelter ; knowingly indeed, but with-

out exerting any act of will, and without foresight of what will happen. Infants of the human species are, like brutes, governed by instinct: they apply to the nipple, without knowing that sucking will satisfy their hunger; and they weep when pained, without any view of relief. But men commonly are governed by desire and intention. In the progress from infancy to maturity, the mind opens to objects without end, agreeable and disagreeable, which raise in us a desire to attain the former and avoid the latter. The will is influenced by desire, and the actions thus performed are termed *voluntary*.

But to have an accurate conception of human nature, it is necessary to be more particular. To incline, to intend, to consent, to resolve, to will, are acts of the mind preparatory to external action. These several acts are well understood, though they cannot be defined, being perfectly simple. As every act implies a power to act, the acts mentioned must be the effects of mental powers. The mind cannot determine without having a power to determine, nor will without having a power to will.

Instinctive actions are exerted without any previous desire or motive, and without any previous act of will. Actions influenced by desire or motives are very different. In such actions, will is essential to connect the desire or motive with the external act. A man who desires or is moved to perform an external act in view, must have a power to determine

termine himself: that power is termed *will*; and the determination is an act of will. With respect to external acts influenced by desire, we cannot even move a finger, without a previous act of will directing that motion. We are very sensible of this determination or act of will, when we deliberate upon motives that tend to different ends. The mind for some time is suspended; deliberates, and at last determines according to the strongest motive. But there must also be a determination where there is but a single motive, though not so perceptible. Being called to dinner when hungry, I instantly obey the call. I cannot go to dinner without first determining to rise from my seat. And it is this determination that entitles it to be called a voluntary act, as much as where the determination is the result of the most anxious deliberation.

Some effects require a train of actions; walking, reading, singing. Where these actions are uniform, as in walking, or nearly so, as in playing on a musical instrument, an act of will is only necessary at the commencement: the train proceeds by habit without any new act of will. The body is antecedently adjusted to the uniform progress; and is disturbed if any thing unexpected happen: in walking, for example, a man feels a shock if he happen to tread on ground higher or lower than his body was prepared for. The power thus acquired by habit of acting without will, is an illustrious

lustrious branch of our nature ; for upon it depend all the arts, both the fine and the useful. To play on the violin, requires, wonderful swiftness of fingers, every motion of which in a learner is preceded by an act of will : and yet by habit solely, an artist moves his fingers with no less accuracy than celerity. Let the most handy person try for the first time to knit a stocking : every motion of the needle demands the strictest attention ; and yet a girl of nine or ten will move the needle so swiftly as almost to escape the eye without once looking on her work. If every motion in the arts required a new act of will, they would remain in infancy for ever ; and what would man be in that case ? In the foregoing instances, we are conscious of the external operation without being conscious of a cause. But there are various internal operations of which we have no consciousness ; and yet that they have existed is made known by their effects. Often have I gone to bed with a confused notion of what I was studying ; and have awaked in the morning completely master of the subject. I have heard a new tune of which I carried away but an imperfect conception. A week or perhaps a fortnight after, the tune has occurred to me in perfection ; recollecting with difficulty where I heard it. Such things have happened to me frequently, and probably also to others. My mind must have been active in these instances, though I knew nothing of it.

There

There still remains another species of actions, termed *involuntary*. Strictly speaking, every action influenced by a motive is *voluntary*, because no such action can be done but by an antecedent act of will. But in a less strict sense, actions done contrary to desire are termed *involuntary*; and they have more or less of that character according to the strength of the motive. A man to free himself from torture, reveals the secrets of his party: his confession is in a degree involuntary, being extorted from him with great reluctance. But let us suppose, that after the firmest resolution to reveal nothing, his mind is unhinged by exquisite torture: the discovery he makes is in the highest degree *involuntary*.

Man is by his nature an accountable being, answerable for his conduct to God and man. In doing any action that wears a double face, he is prompted by his nature to explain the same to his relations, his friends, his acquaintance; and above all, to those who have authority over him. He hopes for praise for every right action, and dreads blame for every one that is wrong. But for what sort of actions does he hold himself accountable? Not surely for an instinctive action, which is done blindly, without intention and without will: neither for an involuntary action, because it is extorted from him reluctantly, and contrary to his desire; and least of all, for actions done without consciousness. What only remain are voluntary actions proceeding from desire, which are done as we say wittingly

wittingly and willingly: for these we must account, if at all accountable; and for these every man in conscience holds himself bound to account. — Further upon voluntary actions. To intend and to will, though commonly held synonymous, signify different acts of the mind. Intention respects the effect: Will respects the action that is exerted for producing the effect. It is my intention, for example, to relieve my friend from distress: upon seeing him, it is my will to give him a sum for his relief: the external act of giving follows; and my friend is relieved, which is the effect intended. But these internal acts are always united: I cannot will the means, without intending the effect; and I cannot intend the effect, without willing the means.

Some effects of voluntary action follow necessarily: A wound is an effect that necessarily follows the stabbing a person with a dagger: death is a necessary effect of throwing one down from the battlements of a high tower. Some effects are probable only: I labour in order to provide for my family; fight for my country to rescue it from oppressors; take physic for my health. In such cases, the event intended does not necessarily nor always follow.

A man, when he wills to act, must intend the necessary effect: a person who stabs, certainly intends to wound. But where the effect is probable only,

only, one may act without intending the effect that follows: a stone thrown by me at random into the market place, may happen to wound a man without my intending it. One acts by instinct, without either will or intention: voluntary actions, that necessarily produce their effect, imply intention: voluntary actions, when the effect is probable only, are sometimes intended, sometimes not.

Human actions are distinguished from each other by certain *qualities*, termed *right* and *wrong*. But, as these make the corner-stone of morality, they are reserved to the following section.

SECT. III.

DIVISION OF HUMAN ACTIONS INTO RIGHT, WRONG, AND INDIFFERENT.

THE qualities of right and wrong in voluntary actions, are universally acknowledged as the foundation of morality; and yet philosophers have been strangely perplexed about them. The history of their various opinions, would signify little but to darken the subject: the reader will have more satisfaction in seeing these qualities explained, without entering at all into controversy.

No person is ignorant of primary and secondary qualities, a distinction much insisted on by philosophers. Primary qualities, such as figure, cohesion, weight, are permanent qualities, that exist in a subject

subject whether perceived or not. Secondary qualities, such as colour, taste, smell, depend on the percipient as much as on the subject, being nothing when not perceived. Beauty and ugliness are qualities of the latter sort: they have no existence but when perceived; and, like all other secondary qualities, they are perceived intuitively; having no dependence on reason nor on judgment, more than colour has, or smell, or taste.

The qualities of right and wrong in voluntary actions, are secondary, like beauty and ugliness and the other secondary qualities mentioned. Like them, they are objects of intuitive perception, and depend not in any degree on reason. No argument is requisite to prove, that to rescue an innocent babe from the jaws of a wolf, to feed the hungry, to clothe the naked, are right actions: they are perceived to be so intuitively. As little is an argument requisite to prove, that murder, deceit, perjury, are wrong actions: they are perceived to be so intuitively. The Deity has bestowed on man different faculties for different purposes. Truth and falsehood are investigated by the reasoning faculty. Beauty and ugliness are objects of a sense, known by the name of *taste*. Right and wrong are objects of a sense termed the *moral sense* or *conscience*. And supposing these qualities to be hid from our perception, in vain would we try

* Elements of Criticism, vol. 1. p. 207. edit. 5.

try to discover them by any argument or process of reasoning: the attempt would be absurd; no less so than an attempt to discover by reasoning colour, or taste, or smell*.

Right and wrong, as mentioned above, are qualities of voluntary actions; and of no other kind. An instinctive action may be agreeable, may be disagreeable; but it cannot properly be denominated either right or wrong. An involuntary act is hurtful to the agent, and disagreeable to the spectator; but it is neither right nor wrong. These qualities also depend in no degree on the event. Thus, if to save my friend from drowning I plunge into a river, the action is right, though I happen to come too late. And if I aim a stroke at a man behind his back, the action is wrong, though I happen not to touch him.

The qualities of right and of agreeable, are inseparable;

* Every perception must proceed from some faculty or power of perception, termed *sense*. The moral sense, by which we perceive the qualities of right and wrong, may be considered either as a branch of the sense of seeing, by which we perceive the actions to which these qualities belong, or as a sense distinct from all others. The senses by which objects are perceived, are not separated from each other by distinct boundaries: the sorting or classing them, seems to depend more on taste and fancy, than on nature. I have followed the plan laid down by former writers; which is, to consider the moral sense as a sense distinct from others, because it is the easiest and clearest manner of conceiving it.

separable; and so are the qualities of wrong and of disagreeable. A right action is agreeable, not only in the direct perception, but equally so in every subsequent recollection. And in both circumstances equally, a wrong action is disagreeable.

Right actions are distinguished by the moral sense into two kinds, what *ought* to be done, and what *may* be done, or left undone. Wrong actions admit not that distinction: they are all prohibited to be done. To say that an action ought to be done, means that we are tied or obliged to perform; and to say that an action ought not to be done, means that we are restrained from doing it. Though the necessity implied in the being tied or obliged, is not physical, but only what is commonly termed *moral*; yet we conceive ourselves deprived of liberty or freedom, and necessarily bound to act or to forbear acting, in opposition to every other motive. The necessity here described is termed *duty*. The moral necessity we are under to forbear harming the innocent, is a proper example: the moral sense declares the restraint to be our duty, which no motive whatever will excuse us for transgressing.

The duty of performing or forbearing any action, implies a *right* in some person to exact performance of that duty; and accordingly, a duty or obligation necessarily infers a corresponding right. My promise to pay L. 100 to John, confers a right on him to demand performance. The
man

man who commits an injury, violates the *right* of the person injured ; which entitles that person to demand reparation of the wrong.

Duty is twofold ; duty to others, and duty to ourselves. With respect to the former, the doing what we ought to do, is termed *just* : the doing what we ought not to do, and the omitting what we ought to do, are termed *unjust*. With respect to ourselves, the doing what we ought to do, is termed *proper* : the doing what we ought not to do, and the omitting what we ought to do, are termed *improper*. Thus, *right*, signifying a quality of certain actions, is a genus ; of which *just* and *proper* are species : *wrong* signifying a quality of other actions, is a genus ; of which *unjust* and *improper* are species.

Right actions left to our free will, to be done or left undone, come next in order. They are, like the former, right when done ; but they differ, in not being wrong when left undone. To remit a just debt for the sake of a growing family, to yield a subject in controversy rather than go to law with a neighbour, generously to return good for ill, are examples of this species. They are universally approved as right actions : but as no person has a right or title to oblige us to perform such actions, the leaving them undone is not a wrong : no person is injured by the forbearance. Actions that come under this class, shall be termed

arbitrary or discretionary, for want of a more proper designation.

So much for right actions, and their divisions. Wrong actions are of two kinds, *criminal* and *culpable*. What are done intentionally to produce mischief, are *criminal*: rash or ungarded actions that produce mischief without intention, are *culpable*. The former are restrained by punishment, to be handled in the 5th section; the latter by reparation, to be handled in the 6th.

The divisions of voluntary actions are not yet exhausted. Some there are that, properly speaking, cannot be denominated either right or wrong. Actions done merely for amusement or pastime, without intention to produce good or ill, are of that kind; leaping, for example, running, jumping over a stick, throwing a stone to make circles in the water. Such actions are neither approved nor disapproved: they may be termed *indifferent*.

There is no cause for doubting the existence of the moral sense, more than for doubting the existence of the sense of beauty, of seeing, or of hearing. In fact, the perception of right and wrong as qualities of actions, is no less distinct and clear, than that of beauty, of colour, or of any other quality; and as every perception is an act of sense, the sense of beauty is not with greater certainty evinced from the perception of beauty, than the moral sense is from the perception of right and wrong.

wrong. We find this sense distributed among individuals in different degrees of perfection: but there perhaps never existed any one above the condition of an idiot, who possessed it not in some degree; and were any man entirely destitute of it, the terms *right* and *wrong* would be to him no less unintelligible, than the term colour is to one born blind.

. That every individual is endued with a sense of right and wrong, more or less distinct, will probably be granted; but whether there be among men what may be termed a *common sense* of right and wrong, producing uniformity of opinion as to right and wrong, is not so evident. There is no absurdity in supposing the opinions of men about right and wrong, to be as various as about beauty and deformity. And that the supposition is not destitute of foundation, we are led to suspect, upon discovering that in different countries, and even in the same country at different times, the opinions publicly espoused with regard to right and wrong, are extremely various; that among some nations it was held lawful for a man to sell his children for slaves, and in their infancy to abandon them to wild beasts; that it was held equally lawful to punish children, even capitally, for the crime of their parent; that the murdering an enemy in cold blood, was once a common practice; that human sacrifices, impious no less than immoral according to our notions, were of

old universal; that even in later times, it has been held meritorious, to inflict cruel torments for the slightest deviations from the religious creed of the plurality; and that among the most enlightened nations, there are at this day considerable differences with respect to the rules of morality.

These facts tend not to disprove the reality of a common sense in morals: they only prove, that the moral sense has not been equally perfect at all times, nor in all countries. This branch of the history of morality, is reserved for the second part. To give some interim satisfaction, I shall shortly observe, that the savage state is the infancy of man; during which, the more delicate senses lie dormant, leaving nations to the authority of custom, of imitation, and of passion, without any just taste of morals more than of the fine arts. But a nation, like an individual, ripens gradually, and acquires a refined taste in morals as well as in the fine arts: after which we find great uniformity of opinion about the rules of right and wrong; with few exceptions, but what may proceed from imbecillity, or corrupted education. There may be found, it is true, even in the most enlightened ages, men who have singular notions in morality, and in many other subjects; which no more affords an argument against a common sense or standard of right and wrong, than a monster doth against the standard that regulates our external form, or than an exception

exception doth against the truth of a general proposition.

That there is in mankind an uniformity of opinion with respect to right and wrong, is a matter of fact of which the only infallible evidence is observation and experience: and to that evidence I appeal; entering only a caveat, that, for the reason above given, the inquiry may be confined to enlightened nations. In the mean time, I take liberty to suggest an argument from analogy, That if there be great uniformity among the different tribes of men in seeing and hearing, in pleasure and pain, in judging of truth and error, the same uniformity ought to be expected with respect to right and wrong. Whatever minute differences there may be to distinguish one person from another, yet in the general principles that constitute our nature, internal and external, there is wonderful uniformity.

This uniformity of sentiment, which may be termed *the common sense of mankind with respect to right and wrong*, is essential to social beings. Did the moral sentiments of men differ as much as their faces, they would be unfit for society: discord and controversy would be endless, and *major vis* would be the only rule of right and wrong.

But such uniformity of sentiment, though general, is not altogether universal: men there are, as above mentioned, who differ from the common sense of mankind with respect to various points of

morality. What ought to be the conduct of such men ; ought they to regulate their conduct by that standard, or by their private conviction ? There will be occasion afterward to observe, that we judge of others as we believe they judge of themselves ; and that private conviction is the standard for rewards and punishments *. But with respect to every controversy about property and pecuniary interest, and, in general, about every civil right and obligation, the common sense of mankind is to every individual the standard, and not private conviction or conscience ; for proof of which take what follows.

...We have an innate sense of a common nature, not only in our own species, but in every species of animals. And that our perception holds true in fact, is verified by experience ; for there appears a remarkable uniformity in creatures of the same kind, and a deformity, no less remarkable, in creatures of different kinds. It is accordingly a subject of wonder to find an individual deviating from the common nature of the species, whether in its internal or external structure : a child born with aversion to its mother's milk, is a wonder, no less than if born without a mouth, or with more than one.

Secondly, this sense dictates, that the common nature of man in particular, is invariable as well as universal ; that it will be the same hereafter as it

* See §. 5.

it is at present, and as it was in time past; the same among all nations, and in all corners of the earth: nor are we deceived, because, allowing for slight differences occasioned by culture and other accidental circumstances, the fact corresponds to our perception.

Thirdly, We perceive that this common nature is *right* and *perfect*, and that it *ought* to be a model or standard for every human being. Any remarkable deviation from it in the structure of an individual, appears imperfect or irregular; and raises a painful emotion: a monstrous birth, exciting curiosity in a philosopher, fails not at the same time to excite aversion in every spectator.

This sense of perfection in the common nature of man, comprehends every branch of his nature; and particularly the common sense of right and wrong; which accordingly is perceived by all to be perfect, having authority over every individual as the ultimate and unerring standard of morals, even in contradiction to private conviction. Thus, a law in our nature binds us to regulate our conduct by that standard: and its authority is universally acknowledged; as nothing is more ordinary in every dispute about *meum et tuum*, than an appeal to common sense as the ultimate and unerring standard.

At the same time, as that standard, through infirmity or prejudice, is not conspicuous to every individual; many are misled into erroneous opi-

nions, by mistaking a false standard for that of nature. And hence a distinction between a right and a wrong sense in morals ; a distinction which every one understands, but which, unless for the conviction of a moral standard, would have no meaning.

The final cause of this branch of our Nature is conspicuous. Were there no standard of right and wrong for determining endless controversies about matters of interest, the strong would have recourse to force, the weak to cunning, and society would dissolve. Courts of law could afford no remedy ; for without a standard of morals, their decisions would be arbitrary, and of no authority. Happy it is for men to be provided with such a standard : it is necessary in society that our actions be uniform with respect to right and wrong ; and in order to uniformity of action, it is necessary that our perceptions of right and wrong be also uniform : to produce such uniformity, a standard of morals is indispensable. Nature has provided us with that standard, which is daily applied by courts of law with success*.

In reviewing what is said, it must afford great satisfaction, to find morality established upon the solid foundations of intuitive perception ; which is a single mental act complete in itself, having no dependence on any antecedent proposition. The most accurate reasoning affords not equal conviction ;

* See Elements of Criticism, vol. ii. p. 490. edit. 5.

tion; for every sort of reasoning, as explained in the sketch immediately foregoing, requires not only self-evident truths or axioms to found upon, but employs over and above various propositions to bring out its conclusions. By intuitive perception solely, without reasoning, we acquire knowledge of right and wrong; of what we may do, of what we ought to do, and of what we ought to abstain from: and considering that we have thus greater certainty of moral laws than of any proposition discoverable by reasoning, man may well be deemed a favourite of Heaven, when he is so admirably qualified for doing his duty. The moral sense or conscience is the voice of God within us; constantly admonishing us of our duty, and requiring from us no exercise of our faculties but attention merely. The celebrated Locke ventured what he thought a bold conjecture, That moral duties are susceptible of demonstration: how agreeable to him would have been the discovery, that they are founded upon intuitive perception, still more convincing and authoritative!

By one branch of the moral sense, we are taught what we ought to do; and what we ought not to do; and by another branch, what we may do, or leave undone. But society would be imperfect, if the moral sense stopped here. There is a third branch that makes us accountable for our conduct to our fellow-creatures; and it will be made evident afterward in the third sketch, that we are accountable

accountable to our Maker, as well as to our fellow-creatures.

It follows from the standard of right and wrong, that an action is right or wrong, independent of what the agent may think. Thus, when a man, excited by friendship or pity, rescues a heretic from the flames, the action is right, even though he think it wrong, from a conviction that heretics ought to be burnt. But we apply a different standard to the agent: a man is approved and held to be innocent in doing what he himself thinks right: he is disapproved and held to be guilty in doing what he himself thinks wrong. Thus, to assassinate an atheist for the sake of religion, is a wrong action; and yet the enthusiast who commits that wrong, may be innocent: and one is guilty, who against conscience eats meat in Lent, though the action is not wrong. In short, an action is perceived to be right or wrong, independent of the actor's own opinion: but he is approved or disapproved, held to be innocent or guilty, according to his own opinion.

SECT. III.

Laws of Nature respecting our Moral Conduct in Society.

A STANDARD being thus established for regulating our moral conduct in society, we proceed to investigate the laws that result from it.

But

But first we take under consideration, what other principles concur with the moral sense to qualify men for society.

When we reflect on the different branches of human knowledge, it might seem, that of all subjects human nature should be the best understood; because every man has daily opportunities to study it, in his own passions and in his own actions. But human nature, an interesting subject, is seldom left to the investigation of philosophy. Writers of a sweet disposition and warm imagination, hold, that man is a benevolent being, and that every man ought to direct his conduct for the good of all, without regarding himself but as one of the number*. Those of a cold temperament and contracted mind, hold him to be an animal entirely selfish; to evince which, examples are accumulated without end†. Neither of these systems is that of nature. The selfish system is contradicted by the experience of all ages, affording the clearest evidence, that men frequently act for the sake of others, without regarding themselves, and sometimes in direct opposition to their own interest‡.

And

* Lord Shaftesbury.

† Helvetius.

‡ Whatever wiredrawn arguments may be urged for the selfish system, as if benevolence were but refined selfishness, the emptiness of such arguments will clearly appear when applied to children, who know no refinement. In them, the rudiments of the social principle are no less visible than of the selfish

And however much selfishness may prevail in action ; man cannot be an animal entirely selfish, when all men conspire to put a high estimation upon generosity, benevolence, and other social virtues : even the most selfish are disgusted with selfishness in others, and endeavour to hide it in themselves. The most zealous patron of the selfish principle, will not venture to maintain, that it renders us altogether indifferent about our fellow-creatures. Laying aside self-interest with every connection of love and hatred, good fortune happening to any one gives pleasure to all, and bad fortune happening to any one is painful to all. On the other hand, the system of universal benevolence, is no less contradictory to experience ; from which we learn, that men commonly are disposed to prefer their own interest before that of others, especially where there is no strict connection : nor do we find that such bias is condemned by the moral sense. Man in fact is a complex being, composed of principles, some benevolent, some selfish : and these principles are so justly blended in his nature, as to fit him for acting a proper part in society. It would indeed be losing time to prove, that without some affection for his fellow-creatures, he would be ill qualified
for

selfish principle. Nothing is more common, than mutual good-will and fondness between children : which must be the work of nature ; for to reflect upon what is one's interest, is far above the capacity of children.

for society. And it will be made evident afterward *, that universal benevolence would be more hurtful to society, than even absolute selfishness †.

We are now prepared for investigating the laws that result from the foregoing principles. The several duties we owe to others shall be first discussed; taking them in order according to the extent of their influence. And for the sake of perspicuity, I shall first present them in a general view, and then proceed to particulars. Of our duties to others, one there is so extensive, as to have for its object all the innocent part of mankind. It is the duty that prohibits us to hurt others: than which no law is more clearly dictated by the moral sense; nor is the transgression of any other law more deeply stamped with the character of wrong. A man may be hurt externally

* Sect. 4.

† “ Many moralists enter so deeply into one passion or bias
 “ of human nature, that, to use the painter’s phrase, they
 “ quite overcharge it. Thus I have seen a whole system of
 “ morals founded upon a single pillar of the inward frame;
 “ and the entire conduct of life and all the characters in it
 “ accounted for, sometimes from superstition, sometimes from
 “ pride, and most commonly from interest. They forget
 “ how various a creature it is they are painting; how many
 “ springs and weights, nicely adjusted and balanced, enter
 “ into the movement, and require allowance to be made for
 “ their several clogs and impulses, ere you can define its operation and effects.” *Enquiry into the life and writings of Homer.*

nally in his goods, in his person, in his relations, and in his reputation. Hence the laws, Do not steal; Defraud not others; Do not kill nor wound; Be not guilty of defamation. A man may be hurt internally, by an action that occasions to him distress of mind, or by being impressed with false notions of men and things. Therefore conscience dictates, that we ought not to treat men disrespectfully; that we ought not causelessly to alienate their affections from others; and, in general, that we ought to forbear whatever may tend to break their peace of mind, or tend to unqualify them for being good men and good citizens.

The duties mentioned are duties of restraint. Our active duties regard particular persons; such as our relations, our friends, our benefactors, our masters, our servants. It is our duty to honour and obey our parents; and to establish our children in the world, with all advantages internal and external: we ought to be faithful to our friends, grateful to our benefactors, submissive to our masters, kind to our servants; and to aid and comfort every one of these persons when in distress. To be obliged to do good to others beyond these bounds, must depend on positive engagement; for, as will appear afterward, universal benevolence is not a duty.

This general sketch will prepare us for particulars. The duty of restraint comes first in view, that

that which bars us from harming the innocent ; and to it corresponds a right in the innocent to be safe from harm. This is the great law preparatory to society ; because without it, society could never have existed. Here the moral sense is inflexible : it dictates, that we ought to submit to any distress, even death itself, rather than procure our own safety by laying violent hands upon an innocent person. And we are under the same restraint with respect to the property of another ; for robbery and theft are never upon any pretext indulged. It is indeed true, that in extreme hunger I may lawfully take food where it can be found ; and may freely lay hold of my neighbour's horse, to carry me from an enemy who threatens death. But it is his duty as a fellow-creature to assist me in distress ; and when there is no time for delay, I may lawfully use what he ought to offer were he present, and what I may presume he would offer. For the same reason, if in a storm my ship be driven among the anchor-ropes of another ship, I may lawfully cut the ropes to get free. But in every case of this kind, it would be a wrong in me to use my neighbour's property, without resolving to pay the value. If my neighbour be bound to aid me in distress, conscience binds me to make up his loss*.

The

* This doctrine is obviously founded on justice ; and yet, in the Roman law, there are two passages which deny any recompence in such cases. “ Item Labeo scribit, si cum

The prohibition of hurting others internally, is perhaps not essential to the formation of societies, because

“ vi ventorum navis impulsa esset in funes anchorarum
 “ alterius, et nautæ funes præcidissent; si nullo alio modo,
 “ nisi præcisus funibus, explicare se potuit, nullam actio-
 “ nem dandam;” *l. 29. § 3. ad leg. Aquil.* “ Quod dici-
 “ tur *damnum injuria datum Aquilia persequi*, sic erit ac-
 “ cipiendum, ut videatur *damnum injuria datum* quod cum
 “ *damno injuriam attulerit*; nisi magna vi cogente, fuerit
 “ factum. Ut Celsus scribit circa eum, qui incendii ar-
 “ cendi gratia vicinas ædes intercidit; et siue pervenit ig-
 “ nis, siue antea extinctus est, existimat legis Aquiliæ ac-
 “ tionem cessare;” *l. 49. § 1. eod.* — [*In English thus:*
 “ In the opinion of Labeo, if a ship is driven by the vio-
 “ lence of a tempest among the anchor-ropes of another
 “ ship, and the sailors cut the ropes, having no other means
 “ of getting free, there is no action competent.—The A-
 “ quilian law must be understood to apply only to such da-
 “ mage as carries the idea of an injury along with it, un-
 “ less such injury has not been wilfully done, but from
 “ necessity. Thus Celsus puts the case of a person who,
 “ to stop the progress of a fire, pulls down his neighbour’s
 “ house; and whether the fire had reached that house
 “ which is pulled down, or was extinguished before it got
 “ to it, in neither case, he thinks, will an action be com-
 “ petent from the Aquilian law.”]—These opinions are
 undoubtedly erroneous. And it is not difficult to say
 what has occasioned the error: the cases mentioned are
 treated as belonging to the *lex Aquilia*; which being con-
 fined to the reparation of wrongs, lays it justly down for a
 rule, That no action for reparation can lie, where there is
 no

because the transgression of that law doth not much alarm plain people : but where manners and refined sentiments prevail, the mind is susceptible of more grievous wounds than the body ; and therefore, without that law, a polished society could have no long endurance.

By adultery, mischief is done both external and internal. Each sex is so constituted, as to require strict fidelity and attachment in a mate. The breach of these duties is the greatest external harm that can befall them : it harms them also internally, by breaking their peace of mind. It has indeed been urged, that no harm will ensue, if the adultery be kept secret ; and consequently, that there can be no crime where the fact is kept secret. But such as reason thus do not advert, that to declare secret adultery to be lawful, is in effect to overturn every foundation of mutual trust and fidelity in the matrimonial state. It is clear beyond all doubt, says a reputable writer, that no man is permitted to violate his faith ; and that the man is unjust and barbarous who deprives his wife of the only reward she has for adhering to the austere duties of her sex. But an unfaithful

VOL. III.

I

wife

no culpa. But had Laheo and Celsus adverted, that these cases belong to a different head, viz. the duty of recompence, where one suffers loss by benefiting another, they themselves would have no difficulty of sustaining a claim or making up that loss.

wife is still more criminal, by dissolving the whole ties of nature : in giving to her husband children that are not his, she betrays both, and joins perfidy to infidelity. *

Veracity is commonly ranked among the active duties ; but erroneously : for if a man be not bound to speak, he cannot be bound to speak truth. It is therefore only a restraining duty, prohibiting us to deceive others, by affirming what is not true. Among the many corresponding principles in the human mind that in conjunction tend to make society comfortable, a principle of veracity †, and a principle that leads us to rely on human testimony, are two : without the latter, the former would be an useless principle ; and without the former, the latter would lay us open to fraud and treachery. The moral sense accordingly dictates, that we ought

* Emile, liv. 5.

† Truth is always uppermost, being the natural issue of the mind : it requires no art nor training, no inducement nor temptation, but only that we yield to natural impulse. Lying, on the contrary, is doing violence to our nature ; and is never practised, even by the worst of men, without some temptation. Speaking truth is like using our natural food, which we would do from appetite although it answered no end : lying is like taking physic, which is nauseous to the taste, and which no man takes but for some end which he cannot otherwise attain. *Dr Reid's Inquiry into the human mind.*

ought to adhere strictly to truth, without regard to consequences. .

It must not be inferred, that we are bound to explain our thoughts, when truth is demanded from us by unlawful means. Words uttered voluntarily, are naturally relied on, as expressing the speaker's mind ; and if his mind differ from his words, he tells a lie, and is guilty of deceit. But words drawn from a man by torture, are no indication of his mind; and he is not guilty of deceit in uttering whatever words may be agreeable, however alien from his thoughts : if the author of the unlawful violence suffer himself to be deceived, he ought to blame himself, not the speaker.

It need scarce be mentioned, that the duty of veracity excludes not fable, nor any liberty of speech intended for amusement only.

Active duties, as hinted above, are all of them directed to particular persons. And the first I shall mention, is that between parent and child. The relation of parent and child, the strongest that can exist between individuals, binds these persons to exert their utmost powers in mutual good offices. . Benevolence among other blood-relations, is also a duty ; but not so indispensable, being proportioned to the inferior degree of relation.

Gratitude is a duty directed to our benefactors. But though gratitude is strictly a duty, the measure of performance, and the kind, are left mostly to our own choice. It is scarce necessary to add,

To fulfil a rational promise or covenant, deliberately made, is a duty no less inflexible than those duties are which arise independent of consent. But as man is fallible, often misled by ignorance, and liable to be deceived, his condition would be deplorable, did the moral sense compel him to fulfil every engagement, however imprudent or irrational. Here the moral sense gives way to human infirmity : it relieves from deceit, from imposition, from ignorance, from error ; and binds a man by no engagement but what answers the end fairly intended. There is still less doubt that it will relieve us from an engagement extorted by external violence, or by overbearing passion. The dread of torture will force most men to submit to any terms ; and a man in imminent hazard of drowning, will voluntarily promise all he has in the world to save him. The moral sense would be ill suited to the imbecillity of our nature, did it bind men in conscience to fulfil engagements made in such circumstances.

The other branch of duties, those we owe to ourselves, shall be discussed in a few words. *Propriety*, a branch of the moral sense, regulates our conduct with respect to ourselves ; as *Justice*, another branch of the moral sense, regulates our conduct with respect to others. Propriety dictates, that we ought to act up to the dignity of our nature, and to the station allotted us by Providence : it dictates in particular, that temperance, prudence, modesty,

modesty, and uniformity of conduct, are self-duties. These duties contribute to private happiness, by preserving health, peace of mind, and self-esteem; which are inestimable blessings: they contribute no less to happiness in society, by gaining the love and esteem of others, and aid and support in time of need.

Upon reviewing the foregoing duties respecting others, we find them more or less extensive; but none so extensive as to have for their end the good of mankind in general. The most extensive duty is that of restraint, prohibiting us to harm others: but even that duty has a limited end; for its purpose is only to protect others from mischief, not to do them any positive good. The active duties of doing positive good are circumscribed within still narrower bounds, requiring some relation that connects us with others; such as those of parent, child, friend, benefactor. The slighter relations, unless in peculiar circumstances, are not the foundation of any active duty: neighbourhood, for example, does not alone make benevolence a duty: but supposing a neighbour to be in distress, relief becomes our duty, if it can be done without distress to ourselves. The duty of relieving from distress, seldom goes farther; for though we always sympathize with our relations, and with those under our eye, the distresses of the remote and unknown affect us very little. Pactions and agreements become necessary, if we would extend the duty of benevo-

lence beyond the limits mentioned. Men, it is true, are capable of doing more good than is required of them as a duty ; but every such good must be a free-will offering.

And this leads to arbitrary or discretionary actions, such as may be done or left undone ; which make the second general head of moral actions. With respect to these, the moral sense leaves us at freedom : a benevolent act is approved, but the omission is not condemned. This holds strictly in single acts ; but in viewing the whole of a man's conduct, the moral sense appears to vary a little. As the nature of man is complex, partly social, partly selfish, we have an intuitive perception, that our conduct ought to be conformable to our nature ; and that in advancing our own interest, we ought not altogether to neglect that of others. The man accordingly who confines his whole time and thoughts within his own little sphere, is condemned by all the world as guilty of wrong conduct ; and the man himself, if his moral perceptions be not blunted by selfishness, must be sensible that he deserves to be condemned. On the other hand, it is possible that free benevolence may be extended beyond proper bounds : where it prevails, it commonly leads to excess, by prompting a man to sacrifice a great interest of his own to a small interest of others ; and the moral sense dictates, that such conduct is wrong. The just
temperament,

temperament, is a subordination of benevolence to self-love.

Thus, moral actions are divided into two classes: the first regards our duty, containing actions that ought to be done, and actions that ought not to be done; the other regards arbitrary or discretionary actions, containing actions that are right when done, but not wrong when left undone. Society is indeed promoted by the latter; but it can scarce subsist, unless the former be made our duty. Hence it is, that actions only of the first class are made indispensable; those of the other class being left to our free-will. And hence also it is, that the various propensities that dispose us to actions of the first class, are distinguished by the name of *primary virtues*; leaving the name of *secondary virtues* to those propensities which dispose us to actions of the other class*.

The deduction above given makes it evident, that the general tendency of right actions is to promote the good of society, and of wrong actions, to obstruct that good. Universal benevolence is indeed not required of man; because to put it in practice, is beyond his utmost abilities. But for promoting the general good, every thing
is

* Virtue signifies that disposition of mind which gives the ascendant to moral principles. Vice signifies that disposition of mind which gives little or no ascendant to moral principles.

is required of him that he can accomplish ; which will appear from reviewing the foregoing duties. The prohibition of harming others is an easy task ; and upon that account is made universal. Our active duties are very different : man is circumscribed both in capacity and power : he cannot do good but in a slow succession ; and therefore it is wisely ordered, that his obligation to do good should be confined to his relations, his friends, his benefactors. Even distress makes not benevolence a general duty : all a man can readily do, is to relieve those at hand ; and accordingly we hear of distant misfortunes with little or no concern.

But let not the moral system be misapprehended, as if it were our duty, or even lawful, to prosecute what upon the whole we reckon the most beneficial to society, balancing ill with good. The moral sense permits not a violation of any person's right, however trivial, whatever benefit may thereby accrue to another. A man for example in low circumstances, by denying a debt he owes to a rich miser, saves himself and a hopeful family from ruin. In that case, the good effect far outweighs the ill, or rather has no counterbalance : but the moral sense permits not the debtor to balance ill with good ; nor gives countenance to an unjust act, whatever benefit it may produce. And hence a maxim in which all moralists agree, That we must

must not do ill to bring about good ; the final cause of which shall be given below *.

S E C T. IV.

Principles of Duty and of Benevolence.

HAVING thus shortly delineated the moral laws of our nature, we proceed to an article of great importance, which is, to inquire into the means provided by our Maker for compelling obedience to these laws. The moral sense is an unerring guide ; but the most expert guide will not profit those who are not disposed to be led. This consideration makes it evident, that to complete the moral system, man ought to be endued with some principle or propensity, some impulsive power, to enforce obedience to the laws dictated by the moral sense.

The author of our nature leaves none of his works imperfect. In order to render us obsequious to the moral sense as our guide, he hath implanted in our nature the principles of duty, of benevolence, of rewards and punishments, and of reparation. It may possibly be thought, that rewards and punishments, of which afterward, are sufficient of themselves to enforce the laws of nature, without necessity of any other principle.

Human

Human laws, it is true, are enforced by these means ; because no higher sanction is under command of a terrestrial legislator. But the celestial legislator, with power that knows no control, and benevolence that knows no bounds, hath enforced his laws by means no less remarkable for mildness than for efficacy : he employs no external compulsion ; but, in order to engage our will on the right side, hath in the breast of individuals established the principles of duty and of benevolence, which efficaciously excite them to obey the dictates of the moral sense.

The restraining and active duties being both of them essential to society, our Maker has wisely ordered, that the principle which enforces these duties, should be the most cogent of all that belong to our nature. Other principles may solicit, allure, or terrify ; but the principle of duty assumes authority, commands, and insists to be obeyed, without giving ear to any opposing motive.

As one great purpose of society, is to furnish opportunities of mutual aid and support ; nature seconding that purpose, hath provided the principle of benevolence, which excites us to be kindly, beneficent, and generous. Nor ought it to escape observation, that the author of nature, attentive to our wants and to our well-being, hath endued us with a liberal portion of that principle. It excites us to be kind, not only to those we are connected with, but to our neighbours, and even to those

those we are barely acquainted with. Providence is peculiarly attentive to objects in distress, who require immediate aid and relief. To the principle of benevolence, it hath superadded the passion of pity, which in every feeling heart is irresistible. To make benevolence more extensive, would be fruitless ; because here are objects in plenty to fill the most capacious mind. It would not be fruitless only, but hurtful to society : I say hurtful ; because frequent disappointments in attempting to gratify our benevolence, would render it a troublesome guest, and make us cling rather to selfishness, which we can always gratify. At the same time, though there is not room for a more extensive list of particular objects, yet the faculty we have of uniting numberless individuals into one complex object, enlarges greatly the sphere of benevolence. By that faculty, our country, our government, our religion, become objects of public spirit, and of a lively affection. The individuals that compose the group, considered apart, may be too minute, or too distant, for our benevolence : but when united into one whole, accumulation makes them great, greatness makes them conspicuous ; and affection, preserved entire and undivided, is bestowed upon an abstract object, as upon one that is single and visible ; but with energy proportioned to its greater dignity and importance. Thus the principle of benevolence is not too sparingly scattered among men. It is indeed made subordinate to self-interest,

rest, which is wisely ordered, as will afterwards be made evident* : but its power and extent are nicely proportioned to the limited capacity of man, and to his situation in this world ; so as better to fulfil its destination, than if it were an overmatch for self-interest, and for every other principle.

S E C T. V.

Laws respecting Rewards and Punishments.

RELECTING on the moral branch of our nature qualifying us for society in a manner suited to our capacity, we cannot overlook the hand of our Maker ; for means so finely adjusted to an important end, never happen by chance. It must however be acknowledged, that in many individuals, the principle of duty has not vigour nor authority sufficient to stem every tide of unruly passion : by the vigilance of some passions, we are taken unguarded ; deluded by the sly insinuations of others ; or overwhelmed with the stormy impetuosity of a third sort. Moral evil is thus introduced, and much wrong is done. This new scene suggests to us, that there must be some article still wanting to complete the moral system ; some means for redressing such wrongs, and for preventing

* Sect. 7.

preventing the reiteration of them. To accomplish these important ends, there are added to the moral system, laws relative to rewards and punishments, and to reparation ; of which in their order.

Many animals are qualified for society by instinct merely ; such as beavers, sheep, monkeys, bees, rooks. But men are seldom led by instinct : their actions are commonly prompted by passions ; of which there is an endless variety, social and selfish, benevolent and malevolent. And were every passion equally entitled to gratification, man would be utterly unqualified for society : he would be a ship without a rudder, obedient to every wind, and moving at random without any ultimate destination. The faculty of reason would make no opposition ; for were there no sense of wrong, it would be reasonable to gratify every desire that harms not ourselves : and to talk of punishment would be absurd ; for punishment, in its very idea, implies some wrong that ought to be redressed. Hence the necessity of the moral sense, to qualify us for society : by instructing us in our duty, it renders us accountable for our conduct, and makes us susceptible of rewards and punishments. The moral sense fulfils another valuable purpose : it erects in man an unerring standard for the application and measure of rewards and punishments.

To

To complete the system of rewards and punishments, it is necessary that a provision be made, both of power and of willingness to reward and punish. The Author of our nature hath provided amply for the former, by entitling every man to reward and punish as his native privilege. And he has provided for the latter, by a noted principle in our nature, prompting us to exercise the power. Impelled by that principle, we reward the virtuous with approbation and esteem, and punish the vicious with disapprobation and contempt. And there is an additional motive for exercising that principle, which is, that we have great satisfaction in rewarding, and no less in punishing.

As to punishment in particular, an action done intentionally to produce mischief, is criminal, and merits punishment. Such an action, being disagreeable, raises my resentment, even where I have no connection with the person injured; and the principle mentioned impels me to chastise the delinquent with indignation and hatred. An injury done to myself raises my resentment to a higher tone: I am not satisfied with so slight a punishment as indignation and hatred: the author must by my hand suffer mischief, as great as he has made me suffer.

Even the most secret crime escapes not punishment. The delinquent is tortured with remorse: he even desires to be punished, sometimes so ardently

dently as to punish himself*. There cannot be imagined a contrivance more effectual to deter one from

* Mr. John Kello, minister of Spot, in East Lothian, had an extraordinary talent for preaching, and was universally held a man of singular piety. His wife was handsome, cheerful, tender-hearted, and in a word possessed all the qualities that can endear a woman to her husband. A pious and rich widow in the neighbourhood tempted his avarice. She clung to him as a spiritual guide; and but for his little wife, he had no doubt of obtaining her in marriage. He turned gradually peevish and discontented. His change of behaviour made a deep impression on his wife, for she loved him dearly; and yet she was anxious to conceal her treatment from the world. Her meekness, her submission, her patience, tended but to increase his sullenness. Upon a Sunday morning, when on her knees, she was offering up her devotions, he came softly behind her, put a rope about her neck, and hung her up to the ceiling. He bolted his gate, crept out at a window, walked demurely to church, and charmed his hearers with a most pathetic sermon. After divine service, he invited two or three of his neighbours to pass the evening, at his house, telling them that his wife was indisposed, and of late inclined to melancholy; but that she would be glad to see them. It surprised them to find the gate bolted, and none to answer: much more when, upon its being forced open, they found her in the posture mentioned. The husband seemed to be struck dumb; and counterfeited sorrow so much to the life, that his guests, forgetting the deceased, were wholly interested about the living. His feigned tears, however, became real: his soul was oppressed with the weight of his guilt. Finding no relief from agonizing remorse, and from the image of

from vice, than remorse, which itself is a grievous punishment. Self-punishment goes still farther: every criminal, sensible that he ought to be punished, dreads punishment from others; and this dread, however smothered during prosperity, breaks out in adversity, or in depression of mind: his crime stares him in the face, and every accidental misfortune is in his disturbed imagination interpreted to be a punishment: “ And they said one
 “ to another, We are very guilty concerning our
 “ brother, in that we saw the anguish of his soul,
 “ when he besought us; and we would not hear:
 “ therefore is this distress come upon us. And
 “ Reuben answered them, saying, Spake I not un-
 “ to you, saying, Do not sin against the child?
 “ and ye would not hear; therefore behold also
 “ his blood is required * †.”

The

of his murdered wife constantly haunting him, he about six weeks after the horrid deed went to Edinburgh, and delivered himself up to justice. He was condemned upon his own confession, and executed 4th October 1570.

* Genesis xlii. 21.

† John, Duke of Britany, commonly termed *the Good Duke*, illustrious for generosity, clemency, and piety, reigned forty-three years, wholly employed about the good of his subjects. He was succeeded by his eldest son Francis, a prince weak and suspicious, and consequently liable to be misled by favourites. Arthur of Montauban, in love with the wife of Gilles, brother
 ther

The Usurper, Oliver Cromwell, found to his dire experience, that the grandeur which he had attained with so much cunning and courage, did not contribute to his happiness; for with happiness

K 2

guilt

ther to the Duke, persuaded the Duke that his brother was laying plots to dethrone him. Gilles being imprisoned, the Duke's best friends conjured him to pity his unhappy brother, who might be imprudent, but assuredly was innocent;—all in vain. Gilles being prosecuted before the three estates of the province for high-treason, was unanimously absolved; which irritated the Duke more and more. Arthur of Montauban artfully suggested to his master to try poison; which having miscarried, they next resolved to starve the prisoner to death. The unfortunate Prince, through the bars of a window, cried aloud for bread; but the passengers durst not supply him. One poor woman only had courage more than once to slip some bread within the window. He charged a priest, who had received his confession, to declare to the Duke, “That seeing justice was refused him in this world, he appealed to Heaven;” and called upon the Duke to appear before the judgment-seat of God in forty days.” The Duke and his favourite, amazed that the Prince lived so long without nourishment, employed assassins to smother him with his bed-clothes. The priest, in obedience to the orders he had received, presented himself before the Duke, and with a loud voice cited him in name of the deceased Lord Gilles to appear before God in forty days. Shame and remorse verified the prediction. The Duke was seized with a sudden terror; and the image of his brother, expiring by his orders, haunted him day and night. He decayed daily without any marks of a regular disease, and died within the forty days in frightful agony.

See this subject further illustrated in the Sketch, *Principles and Progress of Theology*, chap. 1.

guilt is inconsistent. Conscious that he deserved punishment for his crimes, and dreading its being inflicted upon him, all around appeared to him treacherous friends or bitter enemies. Death, which with intrepidity he had braved in the field, was now timorously apprehended from assassins. With a piercing and anxious eye he surveyed every new face. He wore armour under his clothes, and never moved a step without his guards. Seldom he slept three nights together in the same chamber; nor in any but what had a back-door, at which centinels were placed. Society terrified him by reflecting on his unknown enemies, numerous and implacable. Solitude astonished him by leaving him without protection. Can all the glory and power that this earth can afford be a counterbalance for such misery?

No transgression of self-duty escapes punishment, more than transgression of duty to others. The punishments, though not the same, differ in degree more than in kind. Injustice is punished with remorse: impropriety with shame, which is remorse in a lower degree. Injustice raises indignation in the beholder, and so doth every flagrant impropriety: slighter improprieties receive a milder punishment, being rebuked with some degree of contempt, and commonly with derision*.

So

* See Elements of Criticism, chap. 10.

So far we have been led in a beaten track; but in attempting to proceed, we are entangled in mazes and intricacies. An action well intended may happen to produce no good; and an action ill intended may happen to produce no mischief: a man overawed by fear, may be led to do mischief against his will; and a person, mistaking the standard of right and wrong, may be innocently led to do acts of injustice. By what rule, in such cases, are rewards and punishments to be applied? Ought a man to be rewarded when he does no good, or punished when he does no mischief; ought he to be punished for doing mischief against his will, or for doing mischief when he thinks he is acting innocently? These questions suggest a doubt, whether the standard of right and wrong be applicable to rewards and punishments.

We have seen that there is an invariable standard of right and wrong, which depends not in any degree on private opinion, or conviction. By that standard, all pecuniary claims are judged, all claims of property, and, in a word, every demand founded on interest, not excepting reparation, as will afterward appear. But with respect to the moral characters of men, and with respect to rewards and punishments, a different standard is erected in the common sense of mankind, neither rigid nor inflexible; which is, the opinion that men have of their own actions. It is mentioned above, that a man is esteemed innocent in doing what he himself thinks right, and guilty in doing

what he himself thinks wrong. In applying this standard to rewards and punishments, we reward those who in doing wrong are however convinced that they are innocent; and punish those who in doing right are however convinced that they are guilty*. Some, it is true, are so perverted by improper education or by superstition, as to espouse numberless absurd tenets, contradictory to the standard of right and wrong; and yet such men are no exception from the general rule: if they act according to conscience, they are innocent, and safe against punishment however wrong the action may be; and if they act against conscience, they are guilty and punishable however right the action may be: it is abhorrent to every moral perception, that a guilty person be rewarded, or an innocent person punished. Further, if mischief be done contrary to will, as where a man is compelled by fear or by torture, to reveal the secrets of his party; he may be grieved for yielding to the weakness of his nature, contrary to his firmest resolves; but he has no check of conscience, and upon that account is not liable to punishment. And lastly, in order that personal merit and demerit may not in any measure depend on chance, we

* Virtuous and vicious, innocent and guilty, signify qualities both of men and of their actions. Approbation and disapprobation, praise and blame, signify certain emotions or sentiments of those who see or contemplate men and their actions.

we are so constituted as to place innocence and guilt, not on the event, but on the intention of doing right or wrong; and accordingly, whatever be the event, a man is praised for an action well-intended, and condemned for an action ill-intended.

But what if a man intending a certain wrong happen by accident to do a wrong he did not intend; as, for example, intending to rob a warren by shooting the rabbits, he accidentally wounds a child unseen behind a bush? The delinquent ought to be punished for intending to rob; and he is also subjected to repair the hurt done to the child: but he cannot be punished for the accidental wound; because our nature regulates punishment by the intention, and not by the event*.

K 4

A

* During the infancy of nations, pecuniary compositions for crimes were universal; and during that long period, very little weight was laid upon intention. This proceeded from the cloudiness and obscurity of moral perceptions among barbarians, making no distinction between reparation and pecuniary punishment. Where a man does mischief intentionally, or is *versans in illicito*, as expressed in the Roman law, he is justly bound to repair all the harm that ensues, however accidentally; and from the resemblance of pecuniary punishment to reparation, the rule was childishly extended to punishment. But this rule, so little consistent with moral principles, could not long subsist after pecuniary compositions gave place to corporal punishment; and accordingly, among civilized nations, the law of nature is restored, which prohibits punishment for any mischief that is not intentional.

The

A crime against any primary virtue is attended with severe and never-failing punishment, more efficacious than any that have been invented to enforce municipal laws: on the other hand, the preserving primary virtues inviolate, is attended with little merit. The secondary virtues are directly opposite: the neglecting them is not attended with any punishment; but the practice of them is attended with illustrious rewards. Offices of undeserved kindness, returns of good for ill, generous toils and sufferings for our friends or for our country, are attended with consciousness of self-merit, and with universal praise and admiration;

The English must be excepted, who, remarkably tenacious of their original laws and customs, preserve in force, even as to capital punishment, the above-mentioned rule that obtained among barbarians, when pecuniary compositions were in vigour. The following passage is from Hales, (Pleas of the Crown, chap. 39.) “ Regularly he that voluntarily and
“ knowingly intends hurt to the person of a man, as for example to beat him, though he intend not death, yet if death
“ ensues, it excuseth not from the guilt of murder, or manslaughter at least, as the circumstances of the case happen.” And Foster, in his Crown law, teaches the same doctrine, never once suspecting in it the least deviation from moral principles. “ A shooteth at the poultry of B, and by accident
“ killeth a man: if his intention was to steal the poultry,
“ which must be collected from circumstances, it will be murder, by reason of that felonious intent; but if it was done
“ wantonly and without that intention, it will be barely manslaughter.” (P. 259.)

ration; the highest rewards a generous mind is susceptible of.

From what is said, the following observation will occur: The pain of transgressing justice, fidelity, or any duty, is much greater than the pleasure of performing: but the pain of neglecting a generous action, or any secondary virtue, is as nothing compared with the pleasure of performing. Among the vices opposite to the primary virtues, the most striking moral deformity is found; among the secondary virtues, the most striking moral beauty.

SECT. VI.

Laws respecting Reparation.

THE principle of reparation is made a branch of the moral system for accomplishing two ends: which are, to repress wrongs that are not criminal, and to make up the loss sustained by wrongs of whatever kind. With respect to the former, reparation is a species of punishment: with respect to the latter, it is an act of justice. These ends will be better understood, after ascertaining the nature and foundation of reparation; to which the following division of actions is necessary. First, actions that we are bound to perform. Second, actions that we perform in prosecution

cution of a right or privilege. Third, indifferent actions, described above. Actions of the first kind subject not a man to reparation, whatever damage ensues; because it is his duty to perform them, and it would be inconsistent with morality that a man should be subjected to reparation for doing his duty. The laws of reparation that concern actions of the second kind, are more complex. The social state, highly beneficial by affording opportunity for mutual good offices, is attended with some inconveniences; as where a person happens to be in a situation of necessarily harming others by exercising a right or privilege. If the foresight of harming another restrain me not from exercising my right, the interest of that other is made subservient to mine: on the other hand, if such foresight restrain me from exercising my right, my interest is made subservient to his. What doth the moral sense provide in that case? To preserve as far as possible an equality among persons born free and by nature equal in rank, the moral sense dictates a rule, no less beautiful than salutary; which is, That the exercising a right will not justify me for doing direct mischief; but will justify me, though I foresee that mischief may possibly happen. The first branch of the rule resolves into a proposition established above, That no interest of mine, not even life itself, will authorise me to hurt an innocent person. The other branch is supported by expediency: for if
the

the bare possibility of hurting others were sufficient to restrain a man from prosecuting his rights and privileges ; men would be too much cramped in action, or rather would be reduced to a state of absolute inactivity. With respect to the first branch, I am criminal, and liable even to punishment : with respect to the other, I am not even culpable, nor bound to repair the mischief that happens to ensue. But this proposition admits a temperament, which is, that if any danger be foreseen, I am in some degree culpable, if I be not at due pains to prevent it. For example, where in pulling down an old house I happen to wound one passing accidentally, without calling aloud to beware.

With respect to indifferent actions, the moral sense dictates, that we ought carefully to avoid doing mischief, either direct or consequential. As we suffer no loss by forbearing actions that are done for pastime merely, such an action is *culpable* or *faulty*, if the consequent mischief was foreseen or might have been foreseen ; and the actor of course is subjected to reparation. As this is a cardinal point in the doctrine of reparation, I shall endeavour to explain it more fully. Without intending any harm, a man may foresee, that what he is about to do will probably or possibly produce mischief ; and sometimes mischief follows that was neither intended nor foreseen. The action in the former case is not criminal ; because
ill

ill intention is essential to a crime ; but it is culpable or faulty ; and if mischief ensue, the actor blames himself, and is blamed by others, for having done what he ought not to have done. Thus, a man who throws a large stone among a crowd of people, is highly culpable ; because he must foresee that mischief will probably ensue, though he has no intention to hurt any person. As to the latter case, though mischief was neither intended nor foreseen, yet if it might have been foreseen, the action is rash or uncautious, and consequently culpable or faulty in some degree. Thus, if a man, shooting at a mark for recreation near a high road, happen to wound one passing accidentally, without calling aloud to keep out of the way, the action is in some degree culpable, because the mischief might have been foreseen. But though mischief ensue, an action is not culpable or faulty if all reasonable precaution have been adhibited : the moral sense declares the author to be innocent * and blameless : the mischief is accidental ; and the action may be termed *unlucky*, but comes not under the denomination of either right or wrong. In general, when we act merely for amusement, our nature makes us answerable for the harm that ensues, if it was either foreseen or might

* *Innocent* here is opposed to *culpable* : in a broader sense it is opposed to *criminal*. With respect to punishment, an action though culpable is innocent, if it be not criminal : with respect to reparation, it is not innocent if it be culpable.

might with due attention have been foreseen. But our rights and privileges would profit us little, if their exercise were put under the same restraint: it is more wisely ordered, that the probability of mischief, even foreseen, should not restrain a man from prosecuting his concerns, which may often be of consequence to him; provided that he act with due precaution. He proceeds accordingly with a safe conscience, and is not afraid of being blamed either by God or man.

With respect to rash or uncautious actions, where the mischief might have been foreseen though not actually foreseen; it is not sufficient to escape blame, that a man, naturally rash or inattentive, acts according to his character: a degree of precaution is required, both by himself and by others, such as is natural to the generality of men: he perceives that he might and *ought* to have acted more cautiously; and his conscience reproaches him for his inattention, no less than if he were naturally more sedate and attentive. Thus the circumspection natural to mankind in general, is applied as a standard to every individual; and if a man fall short of that standard, he is culpable and blameable, however unforeseen by him the mischief may have been.

What is said upon culpable actions, is equally applicable to culpable omissions; for by these also mischief may be occasioned, entitling the sufferer to reparation. If we forbear to do our duty with

an intention to occasion mischief, the forbearance is criminal. The only question is, how far forbearance without such intention is culpable: supposing the probability of mischief to have been foreseen, though not intended, the omission is highly culpable; and though neither intended nor foreseen, yet the omission is culpable in a lower degree, if there have been less care and attention than are proper in performing the duty required. But supposing all due care, the omission of extreme care and diligence is not culpable*.

By ascertaining what acts and omissions are culpable or faulty, the doctrine of reparation is rendered extremely simple; for it may be laid down as a rule without a single exception, That every culpable act, and every culpable omission, binds us in conscience to repair the mischief occasioned by it. The moral sense binds us no farther; for it loads not with reparation the man who is blameless and innocent: the harm is accidental; and we
are

* *Culpa lata equiparatur dolo*, says the Roman law. They are equal with respect to reparation and to every civil consequence; but they are certainly not equal in a criminal view. The essence of a crime consists in the intention to do mischief; upon which account no fault or *culpa*, however gross, amounts to a crime. But may not gross negligence be a subject of punishment? A jailor sees a state-prisoner taking steps to make his escape; and yet will not give himself the trouble to prevent it; and so the prisoner escapes. Damages cannot be qualified, because no person is hurt; and if the jailor cannot be punished, he escapes free.

are so constituted as not to be responsible in conscience for what happens by accident. But here it is requisite, that the man be in every respect innocent : for if he intend harm, though not what he has done, he will find himself bound in conscience to repair the accidental harm he has done ; as, for example, when aiming a blow unjustly at one in the dark, he happens to wound another whom he did not suspect to be there. And hence it is a rule in all municipal laws, That one *versans in illicito* is liable to repair every consequent damage. That these particulars are wisely ordered by the Author of our nature for the good of society, will appear afterward *. In general, the rules above mentioned are dictated by the moral sense ; and we are compelled to obey them by the principle of reparation.

We are now prepared for a more particular inspection of the two ends of reparation above mentioned, The repressing wrongs that are not criminal, and the making up what loss is sustained by wrongs of whatever kind. With respect to the first, it is clear, that punishment in its proper sense cannot be inflicted for a wrong that is culpable only ; and if nature did not provide some means for repressing such wrongs, society would scarce be a comfortable state. Laying conscience aside, pecuniary reparation is the only remedy that can be provided against culpable omissions : and with respect

* Sect. 7.

respect to culpable commissions, the necessity of reparation is still more apparent ; for conscience alone, without the sanction of reparation, would seldom have authority sufficient to restrain us from acting rashly or uncautiously, even where the possibility of mischief is foreseen, and far less where it is not foreseen.

With respect to the second end of reparation, my conscience dictates to me, that if a man suffer by my fault, whether the mischief was foreseen or not foreseen, it is my duty to make up his loss ; and I perceive intuitively, that the loss ought to rest ultimately upon me, and not upon the sufferer, who has not been culpable in any degree.

In every case where the mischief done can be estimated by a pecuniary compensation, the two ends of reparation coincide. The sum is taken from the one as a sort of punishment for his fault, and is bestowed on the other to make up the loss he has sustained. But in numberless cases where mischief done cannot be compensated with money, reparation is in its nature a sort of punishment. Defamation, contemptuous treatment, personal restraint, the breaking one's peace of mind, are injuries that cannot be repaired with money ; and the pecuniary reparation decreed against the wrong-doer, can only be considered as a punishment inflicted in order to deter him from reiterating such injuries : the sum, it is true, is awarded to the person injured ; but not as sufficient to make up

up his loss, which money cannot do, but only as a *solatium* for what he has suffered.

Hitherto it is supposed, that the man who intends a wrong action, is at the same time conscious of its being so. But a man may intend a wrong action, thinking erroneously that it is right; or a right action, thinking erroneously that it is wrong; and the question is, What shall be the consequence of such errors with respect to reparation. The latter case is clear: the person who occasionally suffers loss by a right action, has not a claim for reparation, because he has no just cause of complaint. On the other hand, if the action be wrong, the innocence of the author, for which he is indebted to an error in judgment, will not relieve him from reparation. When he is made sensible of his error, he feels himself bound in conscience to repair the harm he has done by a wrong action: and others, sensible of his error from the beginning, have the same feeling; nor will his obstinacy in resisting conviction, nor his dulness in not apprehending his error, mend the matter: it is well that these defects relieve him from punishment, without wronging others: by denying a claim for reparation. A man's errors ought to affect himself only, and not those who have not erred. Hence in general, reparation always follows wrong; and is not affected by any erroneous opinion of a wrong action being right, more than of a right action being wrong.

But this doctrine suffers an exception with respect to one who, having undertaken a trust, is bound in duty to act. A judge is in that state: it is his duty to pronounce sentence in every case that comes before him; and if he judge according to his knowledge, he is not liable for consequences. A judge cannot be subjected to reparation, unless the judgment he gave was intentionally wrong. An officer of the revenue is in the same predicament. Led by a doubtful clause in a statute, he makes a seizure of goods as forfeited to the crown, which afterward, in the proper court, are found not to be seizable: he ought not to be subjected to reparation, if he have acted to the best of his judgment. This rule however must be taken with a limitation: a public officer who is grossly ignorant, will not be excused; for he ought to know better.

Reparation is due, though the immediate act be involuntary, provided it be connected with a preceding voluntary act. Example: "If A ride an
 " unruly horse in Lincolns-Inn Fields, to tame him,
 " and the horse breaking from A, run over B and
 " grievously hurt him; B shall have an action
 " against A: for though the mischief was done
 " against the will of A, yet since it was his fault
 " to bring a wild horse into a frequented place
 " where mischief might ensue, he must answer for
 " the consequences." Gaius seems to carry this rule still farther, holding in general, that if a horse,
 by

by the weakness or unskilfulness of the rider, break away and do mischief, the rider is liable *. But Gaius probably had in his eye a frequented place, where the mischief might have been foreseen. Thus in general, a man is made liable for the mischief occasioned by his voluntary deed, though the immediate act that occasioned the mischief be involuntary.

SECT. VII.

Final Causes of the foregoing Laws of Nature.

SEVERAL final causes have been already mentioned, which could not conveniently be reserved for the present section, being necessary for explaining the subjects to which they relate; the final cause for instance of erecting a standard of morals upon the common sense of mankind. I proceed now to what have not been mentioned, or but slightly mentioned.

The final cause that presents itself first to view, respects man considered as an accountable being. The sense of being accountable, is one of our most vigilant guards against the silent attacks of vice. When a temptation moves me it immediately occurs, What will the world say? I imagine my friends exhorting, my enemies reviling—it

L 2

would

* L. 8. § 1. ad leg. Aquil.

would be in vain to dissemble—my spirits sink—the temptation vanishes. 2dly, Praise and blame, especially from those we regard, are strong incentives to virtue: but if we were not accountable for our conduct, praise and blame would seldom be well directed; for how shall a man's intentions be known, without calling him to account? And praise or blame, frequently ill-directed, would lose their influence. 3dly, This branch of our nature, is the corner-stone of the criminal law. Did not a man think himself accountable to all the world, and to his judge in a peculiar manner, it would be natural for him to think, that the justest sentence pronounced against him, is oppression, not justice. 4thly, It promotes society. If we were not accountable beings, those connected by blood, or by country, would be no less shy and reserved, than if they were utter strangers to each other.

The final cause that next occurs, being simple and obvious, is mentioned only that it may not seem to have been overlooked. All right actions are agreeable, all wrong actions, disagreeable. This is a wise appointment of Providence. We meet with so many temptations against duty, that it is not always easy to persevere in the right path: would we persevere, were duty disagreeable? And were acts of pure benevolence disagreeable, they would be rare, however worthy of praise.

Another final cause respects duty, in contradistinction to pure benevolence. All the moral laws
are

are founded on intuitive perception; and are so simple and plain, as to be perfectly apprehended by the most ignorant. Were they in any degree complex or obscure, they would be perverted by selfishness and prejudice. No conviction inferior to what is afforded by intuitive perception, could produce in mankind a common sense in moral duties. Reason would afford no general conviction; because that faculty is distributed in portions so unequal, as to bar all hopes from it of uniformity either in practice or in opinion. We are taught beside, by woful experience, that reason, even the most convincing, has no commanding influence over the greater part of men. Reason, it is true, aided by experience, supports morality; by convincing us, that we cannot be happy if we abandon duty for any other interest. But conviction seldom weighs much against imperious passion; to control which the vigorous and commanding principle of duty is requisite, directed by the shining light of intuition.

A proposition laid down above, appears a sort of mystery in the moral system, That though evidently all moral duties are contrived for promoting the general good, yet that a choice is not permitted among different goods, or between good and ill; but that we are strictly tied down to perform or forbear certain particular acts, without regard to consequences; or, in other words, that we must not do wrong, whatever good it may produce. The

final cause I am about to unfold, will clear this mystery, and set the beauty of the moral system in a conspicuous light. I begin with observing, that as the general good of mankind, or even of the society we live in, results from many and various circumstances intricately combined ; it is far above the capacity of man, to judge in every instance what particular action will tend the most to that end. The authorising, therefore, a man to trace out his duty, by weighing endless circumstances, good and ill, would open a wide door to partiality and passion, and often lead him unwittingly to prefer the preponderating ill, under a false appearance of being the greater good. At that rate, the opinions of men about right and wrong, would be as various as their faces ; which, as observed above, would totally unhinge society. It is better ordered by Providence even for the general good, that, avoiding complex and obscure objects, we are directed by the moral sense to perform certain plain and simple acts, which admit no ambiguity.

In the next place, To permit ill in order to produce greater good, may suit a being of universal benevolence ; but is repugnant to the nature of man, composed of selfish and benevolent principles. We have seen above, that the true moral balance depends on a subordination of self-love to duty, and of discretionary benevolence to self-love ; and accordingly every man is sensible of in-
justice,

justice, when he is hurt in order to benefit another. Were it a rule in society, That a greater good to any other would make it an act of justice to deprive me of my life, of my reputation, or of my property, I should renounce the society of men, and associate with more harmless animals.

Thirdly, The true moral system, that which is displayed above, is not only better suited to the nature of man and to his limited capacity, but contributes more to the general good, which I now proceed to demonstrate. It would be losing time to prove, that one entirely selfish is ill fitted for society; and we have seen *, that universal benevolence, were it a duty, would contribute to the general good perhaps less than absolute selfishness. Man is too limited in capacity and in power for universal benevolence. Even the greatest monarch has not power to exercise his benevolence, but within a very narrow sphere; and if so, how unfit would such a duty be for private persons, who have very little power? Serving only to distress them by inability of performance, they would endeavour to smother it altogether, and give full scope to selfishness. Man is much better qualified for doing good, by a constitution in which benevolence is duly blended with self-love. Benevolence as a duty, takes place of self-love; a regulation essential to society: benevolence as a virtue, not a duty, gives place to self-love; because as every

L 4

man

* Sect. 4.

man has more power, knowledge and opportunity, to promote his own good than that of others, a greater quantity of good is produced, than if benevolence were our only principle of action. This holds, even supposing no harm done to any person : much more would it hold, were we permitted to hurt some, in order to produce more good to others.

The foregoing final causes respect morality in general. We now proceed to particulars ; and the first and most important is the law of restraint. Man is evidently framed for society : and as there can be no society among creatures who prey upon each other, it was necessary to provide against mutual injuries ; which is effectually done by this law. Its necessity with respect to personal security is self-evident ; and with respect to property, its necessity will appear from what follows. In the nature of every man there is a propensity to hoard or store up things useful to himself and family. But this natural propensity would be rendered ineffectual, were he not secured in the possession of what he thus stores up ; for no man will toil to accumulate what he cannot securely possess. This security is afforded by the moral sense, which dictates, that the first occupant of goods provided by nature for the subsistence of man, ought to be protected in the possession, and that such goods ought to be inviolably his property. Thus, by the great law of restraint, men have a protection for
their

their goods, as well as for their persons ; and are no less secure in society, than if they were separated from each other by impregnable walls.

Several other duties are little less essential than that of restraint, to the existence of society. Mutual trust and confidence, without which society would be an uncomfortable state, enter into the character of the human species ; to which the duties of veracity and fidelity correspond. The final cause of these corresponding duties is obvious : the latter would be of no use in society without the former ; and the former, without the latter, would be hurtful, by laying men open to fraud and deceit.

With respect to veracity in particular, man is so constituted, that he must be indebted to information for the knowledge of most things that benefit or hurt him ; and if he could not depend upon information, society would be very little beneficial. Further, it is wisely ordered, that we should be bound by the moral sense to speak truth, even where we perceive no harm in transgressing that duty ; because it is sufficient that harm may ensue, though not foreseen. At the same time, falsehood always does mischief : it may happen not to injure us externally in our reputation, or in our goods ; but it never fails to injure us internally : the sweetest and most refined pleasure of society, is a candid intercourse of sentiments, of opinions,
of

of desires; and wishes; and it would be poisonous to indulge any falsehood in such intercourse.

Because man is the weakest of all animals in a state of separation, and the very strongest in society by mutual aid and support; covenants and promises, which greatly contribute to these, are made binding by the moral sense.

The final cause of the law of propriety, which enforces the duty we owe to ourselves, comes next in order. In discoursing upon those laws of nature which concern society, there is no occasion to mention any self-duty but what relates to society; of which kind are prudence, temperance, industry, firmness of mind. And that such qualities should be made our duty, is wisely ordered in a double respect; first, as qualifying us to act a proper part in society; and next, as entitling us to good-will from others. It is the interest, no doubt, of every man, to suit his behaviour to the dignity of his nature, and to the station allotted him by Providence; for such rational conduct contributes to happiness, by preserving health, procuring plenty, gaining the esteem of others, and, which of all is the greatest blessing, by gaining a justly-founded self-esteem. But here interest solely is not relied on: the powerful authority of duty is added, that in a matter of the utmost importance to ourselves, and of some importance to the society we live in, our conduct may be regular and steady. These duties tend not only to render a man happy in himself; but also
by

by procuring the good-will and esteem of others, to command their aid and assistance in time of need.

I proceed to the final causes of natural rewards and punishments. It is laid down above, that controversies about property and about other matters of interest, must be adjusted by the standard of right and wrong. But to bring rewards and punishments under the same standard, without regard to private conscience, would be a plan unworthy of our Maker. It is clear, that to reward one who is not conscious of merit, or to punish one who is not conscious of demerit, cannot answer any good end; and in particular, cannot tend either to improvement or to reformation of manners. How much more like the Deity is the plan of nature; which rewards no man who is not conscious that he merits reward, and punishes no man who is not conscious that he merits punishment! By that plan, and by that only, rewards and punishments accomplish every good end, a final cause most illustrious!

The rewards and punishments that attend the primary and secondary virtues, are finely contrived for supporting the distinction between them set forth above. Punishment must be confined to the transgression of primary virtues, it being the intention of nature that secondary virtues be entirely free. On the other hand, secondary virtues are more highly rewarded than primary: generosity, for

for example, makes a greater figure than justice; and magnanimity, heroism, undaunted courage, a still greater figure. One would imagine at first view, that the primary virtues, being more essential, should be entitled to the first place in our esteem, and be more amply rewarded than the secondary; and yet in elevating the latter above the former, peculiar wisdom and foresight are conspicuous. Punishment is appropriated to enforce primary virtues; and if these virtues were also attended with the highest rewards, secondary virtues, degraded to a lower rank, would be deprived of that enthusiastic admiration which is their chief support: self-interest would universally prevail over benevolence; and would banish those numberless favours we receive from each other in society, which are beneficial in point of interest, and still more so by generating affection and friendship.

In our progress through final causes, we come at last to reparation, one of the principles destined by Providence for redressing wrongs committed, and for preventing reiteration. The final cause of this principle, where the mischief arises from intention, is clear: for to protect individuals in society, it is not sufficient that the delinquent be punished; it is necessary over and above, that the mischief be repaired.

Secondly, Where the act is wrong or unjust, though not understood by the author to be so, it is wisely ordered that reparation should follow; which
...

will

will thus appear. Considering the fallibility of man, it would be too severe never to give any allowance for error. On the other hand, to make it a law in our nature, never to take advantage of error, would be giving too much indulgence to indolence and remission of mind, tending to make us neglect the improvement of our rational faculties. Our nature is so happily framed, as to avoid these extremes by distinguishing between gain and loss: No man is conscious of wrong, when he takes advantage of an error committed by another to save himself from loss: if there must be a loss, common sense dictates, that it ought to rest upon the person who has erred, however innocently, rather than upon the person who has not erred. Thus, in a competition among creditors about the estate of their bankrupt debtor, every one is at liberty to avail himself of an error committed by his competitor, in order to recover payment. But *in lucro captando*, the moral sense teacheth a different lesson; which is, that no man ought to lay hold of another's error to make gain by it. Thus, an heir finding a rough diamond in the repositories of his ancestor, gives it away, mistaking it for a common pebble: the purchaser is in conscience and equity bound to restore, or to pay a just price.

Thirdly, The following considerations respecting the precaution that is necessary in acting, unfold a final cause, no less beautiful than that last mentioned. Society could not subsist in any tolerable

lerable manner, were full scope given to rashness and negligence, and to every action that strictly speaking is not criminal; whence it is a maxim, founded no less upon utility than upon justice, That men in society ought to be extremely circumspect, as to every action that may possibly do harm. On the other hand, it is also a maxim, That as the prosperity and happiness of man depend on action, activity ought to be encouraged, instead of being discouraged by dread of consequences. These maxims, seemingly in opposition, have natural limits that prevent their encroaching one upon the other. There is a certain degree of attention and circumspection that men generally bestow upon affairs, proportioned to their importance; if that degree were not sufficient to defend against a claim of reparation, individuals would be too much cramped in action; which would be a great discouragement to activity: if a less degree were sufficient, there would be too great scope for rash or remiss conduct; which would prove the bane of society. These limits, which evidently tend to the good of society, are adjusted by the moral sense; which dictates, as laid down in the section of Reparation, that the man who acts with foresight of the probability of mischief, or acts rashly and uncautiously without such foresight, ought to be liable for consequences; but that the man who acts cautiously, without foreseeing or suspecting
any

any mischief, ought not to be liable for consequences.

In the same section it is laid down, that the moral sense requires from every man, not his own degree of vigilance and attention, which may be very small, but that which belongs to the common nature of the species. The final cause of that regulation will appear upon considering, that were reparation to depend upon personal circumstances, there would be a necessity of inquiring into the character of individuals, their education, their manner of living, and the extent of their understanding; which would render judges arbitrary, and such law-suits inextricable. But by assuming the common nature of the species as a standard, by which every man in conscience judges of his own actions, law-suits about reparation are rendered easy and expeditious.

S E C T. VIII.

Liberty and Necessity considered with respect to Morality.

HAVING, in the foregoing sections, ascertained the reality of a moral sense, with its sentiments of approbation and disapprobation, praise and blame; the purpose of the present section is, to shew, that these sentiments are consistent with
the

the laws that govern the actions of man as a rational being. In order to which, it is first necessary to explain these laws ; for there has been much controversy about them, especially among divines of the Arminian and Calvinist sects.

Human actions, as laid down in the first section, are of three kinds : one, where we act by instinct, without any view to consequences ; one, where we act by will, in order to produce some effect ; and one, where we act against will. With respect to the first, the agent acts blindly, without deliberation or choice ; and the external act follows necessarily from the instinctive impulse *. Voluntary actions done with a view to an end, are in a very different condition : into these, desire and will, enter : desire to accomplish the end goes first ; the will to act in order to accomplish the end is next ;

* A stonechatter makes its nest on the ground or near it ; and the young, as soon as they can shift for themselves, leave the nest instinctively. An egg of that bird was laid in a swallow's nest, fixed to the roof of a church. The swallow fed all the young equally, without distinction. The young stonechatter left the nest at the usual time before it could fly ; and falling to the ground, it was taken up dead. Here is instinct in purity, exerting itself blindly without regard to variation of circumstances. The same is observable in our dunghill-fowl. They feed on worms, corn, and other seeds dropt on the ground. In order to discover their food, nature has provided them with an instinct to scrape with the foot ; and the instinct is so regularly exercised, that they scrape even when they are set upon a heap of corn.

next; and the external act follows of course. Desire considered as what influences the will, is termed a *motive*. Thus, hearing that my friend is in the hands of robbers, I burn with desire to free him: desire influences my will to arm my servants, and to fly to his relief. Actions done against will come in afterward.

But what is it that raises desire? The answer is ready: it is the prospect of attaining some agreeable end, or of avoiding one that is disagreeable. And if it be inquired, What makes an object agreeable or disagreeable; the answer is equally ready, that our nature makes it so. Certain visible objects are agreeable, certain sounds, and certain smells: other objects of these senses are disagreeable. But there we must stop; for we are far from being so intimately acquainted with our own nature as to assign the causes. These hints are sufficient for my present purpose: if one be curious to know more, the theory of desire, and of agreeableness and disagreeableness, will be found in Elements of Criticism*.

With respect to instinctive actions, no person, I presume, thinks that there is any freedom: an infant applies to the nipple, and a bird builds a nest, no less necessarily than a stone falls to the ground. With respect to voluntary actions, done in order to produce some effect, the necessity is the same, though less apparent at first view.

The external action is determined by the will : the will is determined by desire : and desire by what is agreeable or disagreeable. Here is a chain of causes and effects, not one link of which is arbitrary, or under command of the agent : he cannot will but according to his desire : he cannot desire but according to what is agreeable or disagreeable in the objects perceived : nor do these qualities depend on his inclination or fancy ; he has no power to make a beautiful woman appear ugly, nor to make a rotten carcase smell sweetly.

Many good men apprehending danger to morality from holding our actions to be necessary, endeavour to break the chain of causes and effects above mentioned, maintaining, “ That whatever
“ influence desire or motives may have, it is the
“ agent himself who is the cause of every action ;
“ that desire may advise, but cannot command ;
“ and therefore that a man is still free to act in
“ contradiction to desire, and to the strongest mo-
“ tives.” That a being may exist, which in every case, acts blindly and arbitrarily, without having any end in view, I can make a shift to conceive : but it is difficult for me even to imagine a thinking and rational being, that has affections and passions, that has a desirable end in view, that can easily accomplish this end ; and yet, after all, can fly off, or remain at rest, without any cause, reason, or motive, to sway it. If such a whimsical being can possibly exist, I am certain that man is
not

not the being. There is perhaps not a person above the condition of a changeling, but can say why he did so and so, what moved him, what he intended. Nor is a single fact stated to make us believe, that ever a man acted against his own desire, who was not compelled by external force. On the contrary, constant and universal experience proves, that human actions are governed by certain inflexible laws; and that a man cannot exert his self-motive power, but in pursuance of some desire or motive.

Had a motive always the same influence, actions proceeding from it would appear no less necessary than the actions of matter. The various degrees of influence that motives have on different men at the same time, and on the same man at different times, occasion a doubt by suggesting a notion of chance. Some motives however have such influence, as to leave no doubt: a timid female has a physical power to throw herself into the mouth of a lion, roaring for food; but she is withheld by terror no less effectually than by cords: if she should rush upon the lion, would not every one conclude that she was frantic? A man, though in a deep sleep, retains a physical power to act, but he cannot exert it. A man, though desperately in love, retains a physical power to refuse the hand of his mistress; but he cannot exert that power in contradiction to his own ardent desire, more than if he were fast asleep. Now if a

strong motive have a necessary influence, there is no reason for doubting, but that a weak motive must also have its influence, the same in kind, though not in degree. Some actions indeed are strangely irregular: but let the wildest action be scrutinized, there will always be discovered some motive or desire, which, however whimsical or capricious, was what influenced the person to act. Of two contending motives, is it not natural to expect that the stronger will prevail, however little its excess may be? If there be any doubt, it must arise from a supposition that a weak motive can be resisted arbitrarily. Where then are we to fix the boundary between a weak and a strong motive? If a weak motive can be resisted, why not one a little stronger, and why not the strongest? In *Elements of Criticism* * the reader will find many examples of contrary motives weighing against each other. Let him ponder these with the strictest attention: his conclusion will be, that between two motives, however nearly balanced, a man has not an arbitrary choice, but must yield to the stronger. The mind indeed fluctuates for some time, and feels itself in a measure loose: at last, however, it is determined by the more powerful motive, as a balance is by the greater weight after many vibrations.

Such then are the laws that govern our voluntary actions. A man is absolutely free to act according

according to his own will ; greater freedom than which is not conceivable. At the same time, as man is made accountable for his conduct, to his Maker, to his fellow-creatures, and to himself, he is not left to act arbitrarily ; for at that rate he would be altogether unaccountable : his will is regulated by desire ; and desire by what pleases or displeases him. Where we are subjected to the will of another, would it be our wish, that his will should be under no regulation ? And where we are guided by our own will, would it be reasonable to wish, that it should be under no regulation, but be exerted without reason, without any motive, and contrary to common sense ? Thus, with regard to human conduct, there is a chain of laws established by nature, no one link of which is left arbitrary. By that wise system, man is made accountable : by it, he is made a fit subject for divine and human government : by it, persons of sagacity foresee the conduct of others : and by it, the presence of the Deity with respect to human actions, is clearly established.

The absurd figure that a man would make acting in contradiction to motives, should be sufficient to open our eyes without an argument. What a despicable figure does a person make, upon whom the same motive has great influence at one time, and very little at another ? He is a bad member of society, and cannot be relied on as a friend or as an associate. But how highly rational is this

supposed person, compared with one who can act in contradiction to every motive? The former may be termed whimsical or capricious: the latter is worse; he is absolutely unaccountable, and cannot be the subject of government, more than a lump of matter unconscious of its own motion.

Let the faculty of acting be compared with that of reasoning: the comparison will reconcile every unbiassed mind to the necessary influence of motives. A man is tied by his nature to form conclusions upon what appears to him true at the time. This indeed does not always secure him against error; but would he be more secure by a power to form conclusions contrary to what appears true? Such a power would make him a most absurd reasoner. Would he be less absurd in acting, if he had a power to act against motives, and contrary to what he thinks right or eligible? To act in that manner, is inconsistent with any notion we can form of a sensible being. Nor do we suppose that man is such a being; in accounting for any action, however whimsical, we always ascribe it to some motive; never once dreaming that there was no motive.

And after all, where would be the advantage of such an arbitrary power? Can a rational man wish seriously to have such a power? or can he seriously think, that God would make man so whimsical a being? To endue man with a degree of self-command sufficient to resist every vicious motive, without

without any power to resist those that are virtuous, would indeed be a valuable gift; too valuable indeed for man, because it would exalt him to be an angel. But such self-command as to resist both equally, which is the present supposition, would be a great curse, as it would unqualify us for being governed either by God or by man. Better far to be led as rational creatures by the prospect of good, however erroneous our judgment may sometimes be.

While all other animals are subjected to divine government and unerringly fulfil their destination, and considering that man is the only terrestrial being who is formed to know his Maker and to worship him; will it not sound harsh that he alone should be withdrawn from divine government? The power of resisting the strongest motives, whether of religion or of morality, would render him independent of the Deity.

This reasoning is too diffuse: if it can be comprehended in a single view, it will make the deeper impression. There may be conceived different systems for governing man as a thinking and rational being. One is, That virtuous motives should always prevail over every other motive. This, in appearance, would be the most perfect government: but man is not so constituted; and there is reason to doubt, whether such perfection would in his present state correspond to the other branches of his nature*. Another system is, that virtuous

M 4

motives

* See book 2. sketch 1. at the end.

motives sometimes prevail, sometimes vitious; and that we are always determined by the prevailing motive. This is the true system of nature; and hence great variety of character and of conduct among men. A third system is, That motives have influence; but that one can act in contradiction to every motive. This is the system I have been combating. Observe only what it resolves into. How is an action to be accounted for that is done in contradiction to every motive? It wanders from the region of common sense into that of mere chance. If such were the nature of man, no one could rely on another: a promise or an oath would be a rope of sand: the utmost cordiality between two friends would be no security to either against the other: the first weapon that comes in the way might be lethal. Would any man wish to have been formed according to such a model? He would probably wish to have been formed according to the model first mentioned: but that is denied him, virtuous motives sometimes prevailing, sometimes vitious; and from the wisdom of Providence we have reason to believe, that this law is of all the best fitted for man in his present state.

To conclude this branch of the subject: In none of the works of Providence, as far as we can penetrate, is there displayed a deeper reach of art and wisdom, than in the laws of action peculiar to man as a thinking and rational being. Were he
let

let loose to act in contradiction to motives, there would be no place for prudence, foresight, nor for adjusting means to an end : It could not be foreseen by others what a man would do the next hour ; nay it could not be foreseen even by himself. Man would not be capable of rewards and punishments : he would not be fitted, either for divine or for human government : he would be a creature that has no resemblance to the human race. But man is not left loose ; for though he is at liberty to act according to his own will, yet his will is regulated by desire, and desire by what pleases and displeases. This connection preserves uniformity of conduct, and confines human actions within the great chain of causes and effects. By this admirable system, liberty and necessity, seemingly incompatible, are made perfectly concordant, fitting us for society, and for government both human and divine.

Having explained the laws that govern human actions ; we proceed to what is chiefly intended in the present section, which is, to examine how far the moral sentiments handled in the foregoing sections are consistent with these laws. Let it be kept in view, that the perception of a right and a wrong in actions, is founded entirely upon the moral sense. And that upon the same sense are founded the sentiments of approbation and praise when a man does right, and of disapprobation and blame when he does wrong. Were we destitute of the moral sense, right and wrong, praise and blame, would

would be as little understood as colours are by one born blind *.

The formidable argument urged to prove that our moral sentiments are inconsistent with the supposed necessary influence of motives, is what follows. “ If motives have a necessary influence on
 “ our actions, there can be no good reason to
 “ praise a man for doing right, nor to blame him
 “ for doing wrong. What foundation can there
 “ be either for praise or blame, when it was not
 “ in a man’s power to have acted otherwise. A
 “ man commits murder, instigated by a sudden fit
 “ of revenge : why should he be punished, if he
 “ acted necessarily, and could not resist the violence of the passion ?” Here it is supposed, that a power of resistance is essential to praise and blame. But upon examination it will be found, that this supposition has not any support in the
 moral

* In an intricate subject like the present, great care should be taken to avoid ambiguities. The term *praise* has two different significations : in one sense it is opposed to *blame* ; in another, to *dispraise*. In the former sense, it expresses a moral sentiment : in the latter, it expresses only the approving any object that pleases me. I praise one man for his candour, and blame another for being a double-dealer. These, both of them, imply will and intention. I praise a man for being acute ; but for being dull, I only dispraise him. I praise a woman for beauty ; but blame not any for ugliness, I only dispraise them. None of these particulars imply will or intention.

moral sense, nor in reason, nor in the common sense of mankind.

With respect to the first, the moral sense, as we have seen above, places innocence and guilt, and consequently praise and blame, entirely upon will and intention. The connection between the motive and the action, so far from diminishing, enhances the praise or blame. The greater influence a virtuous motive has, the greater is the virtue of the actor, and the more warm our praise. On the other hand, the greater influence a vicious motive has, the greater is the vice of the actor, and the more violently do we blame him. As this is the cardinal point, I wish to have it considered in a general view. It is essential both to human and divine government, that the influence of motives should be necessary. It is equally essential, that that necessary influence should not have the effect to lessen guilt in the estimation of men. To fulfil both ends, guilt is placed by the moral sense entirely upon will and intention: a man accordingly blames himself for doing mischief willingly and intentionally, without once considering whether he acted necessarily or not. And his sentiments are adopted by all the world: they pronounce the same sentence of condemnation that he himself does. A man put to the torture, yields to the pain, and with bitter reluctance reveals the secrets of his party: another does the same, yielding to a tempting bribe. The latter only is blamed as
guilty

guilty of a crime ; and yet the bribe perhaps operated as strongly on the latter, as torture did on the former. But the one was compelled reluctantly to reveal the secrets of his party ; and therefore is innocent : the other acted willingly, in order to procure a great sum of money ; and therefore is guilty.

With respect to reason, I observe, that the moral sense is the only judge in this controversy, not the faculty of reason. I should, however, not be afraid of a sentence against me, were reason to be the judge. For would not reason dictate, that the less a man wavers about his duty, or, in other words, the less influence vicious motives have, the more praise-worthy he is ; and the more blame-able, the less influence virtuous motives have ?

Nor are we led by common sense to differ from reason or from the moral sense. A man commits murder, overcome by a sudden fit of revenge which he could not resist : do we not reflect, even at first view, that the man did not desire to resist ; and that he would have committed the murder, though he had not been under any necessity ? a person of plain understanding will say, What signifies it whether the criminal could resist it or no, when he committed the murder wittingly and willingly ? A man gives poison privately out of revenge. Does any one doubt of his guilt, when he never once repented ; though after administering the poison it no longer was in his power to draw back ? A
man

man may be guilty and blame-worthy, even where there is external compulsion that he cannot resist. With sword in hand I run to attack an enemy : my foot slipping, I fall headlong upon him, and by that accident the sword is pushed into his body. The external act was not the effect of Will, but of accident : but my intention was to commit murder, and I am guilty. All men acknowledge, that the Deity is necessarily good. Does that circumstance detract from his praise in common apprehension ? On the contrary, he merits from us the highest praise on that very account.

It is commonly said, that there can be no virtue where there is no struggle. Virtue, it is true, is best known from a struggle : a man who has never met with a temptation, can be little confident of his virtue. But the observation taken in a strict sense, is undoubtedly erroneous. A man, tempted to betray his trust, wavers ; but, after much doubting, refuses at last the bribe. Another hesitates not a moment, but rejects the bribe with disdain : duty is obstinate, and will not suffer him even to deliberate. Is there no virtue in the latter ? Undoubtedly more than in the former.

Upon the whole, it appears that praise and blame rest ultimately upon the disposition or frame of mind *. Nor is it obvious, that a power to act
against

* Malice and resentment, though commonly joined together, have no resemblance but in producing mischief. Malice
is

against motives, could vary in any degree these moral sentiments. When a man commits a crime, let it be supposed that he could have resisted the prevailing motive. Why then did he not resist, instead of bringing upon himself shame and misery? The answer must be, for no other can be given, that his disposition is vicious, and that he is a detestable creature. Further, it is not a little difficult to conceive, how a man can resist a prevailing motive, without having any thing in his mind that should engage him to resist it. But letting that pass, I make the following supposition. A man is tempted by avarice to accept a bribe: if he resist upon the principle of duty, he is led by the prevailing motive: if he resist without having any reason or motive for resisting, I cannot discover any merit in such resistance: it seems to resolve into a matter of chance or accident, whether he resist or do not resist. Where can the merit lie of resisting a vicious motive, when resistance happens by mere chance? and where the demerit of resisting a virtuous motive, when it is owing to the same chance? If a man, actuated by no principle, good or bad, and having no end or purpose in view, should kill his neighbour, I see not that he

is a propensity of nature that operates deliberately without passion: resentment is a passion to which even good-natured people are subject. A malicious character is esteemed much more vitious than one that is irascible. Does not this shew that virtue and vice consist more in disposition than in action?

he would be more accountable, than if he had acted in his sleep, or were mad.

Human punishments are perfectly consistent with the necessary influence of motives, without supposing a power to withstand them. If it be urged, That a man ought not to be punished for committing a crime when he could not resist : the answer is, That as he committed the crime intentionally and with his eyes open, he is guilty in his own opinion, and in the opinion of all men. Here is a just foundation for punishment. And its utility is great ; being intended to deter people from committing crimes. The dread of punishment is a weight in the scale on the side of virtue, to counterbalance vitious motives.

The final cause of this branch of our nature is admirable. If the necessary influence of motives had the effect either to lessen the merit of a virtuous action, or the demerit of a crime, morality would be totally unhinged. The most virtuous action would of all be the least worthy of praise ; and the most vitious be of all the least worthy of blame. Nor would the evil stop there : instead of curbing inordinate passions, we should be encouraged to indulge them, as an excellent excuse for doing wrong. Thus, the moral sentiments of approbation and disapprobation, of praise and blame, are found perfectly consistent with the laws above mentioned that govern human actions, without

out necessity of recurring to an imaginay power of acting against motives.

The only plausible objection I have met with against the foregoing theory, is the remorse a man feels for a crime he suddenly commits, and as suddenly repents of. During a fit of bitter remorse for having slain my favourite servant in a violent passion, without just provocation, I accuse myself for having given way to passion; and acknowledge that I could and ought to have restrained it. Here we find remorse founded on a system directly opposite to that above laid down; a system that acknowledges no necessary connection between an action and its motive; but, on the contrary, supposes that it is in a man's power to resist his passion, and that he ought to resist it. What shall be said upon this point? Can a man be a necessary agent, when he is conscious of the contrary, and is sensible that he can act in contradiction to motives? This objection is strong in appearance; and would be invincible, were we not happily relieved of it by a doctrine laid down in *Elements of Criticism** concerning the irregular influence of passion on our opinions and sentiments. Upon examination, it will be found, that the present case may be added to the many examples there given of that irregular influence. In a peevish fit, I take exception at some slight word or gesture of my friend, which I interpret as if he doubted of my
veracity.

* Chap. 2. Part 5.

veracity. I am instantly in a flame : in vain he protests that he had no meaning, for impatience will not suffer me to listen. I bid him draw, which he does with reluctance ; and before he is well prepared, I give him a mortal wound. Bitter remorse and anguish succeed instantly to rage. “ What have
“ I done ? I have murdered my innocent, my best
“ friend ; and yet I was not mad—with that hand
“ I did the horrid deed ; why did not I rather
“ turn it against my own heart ? ” Here every impression of necessity vanishes : my mind informs me that I was absolutely free, and that I ought to have smothered my passion. I put an opposite case. A brutal fellow treats me with great indignity, and proceeds even to a blow. My passion rises beyond the possibility of restraint : I can scarce forbear so long as to bid him draw ; and that moment I stab him to the heart. I am sorry for having been engaged with a ruffian ; but have no contrition nor remorse. In this case, I never once dream that I could have resisted the impulse of passion : on the contrary, my thoughts and words are, “ That flesh and blood could not
“ bear the affront ; and that I must have been
“ branded for a coward ; had I not done what I
“ did. ” In reality, both actions were equally necessary. Whence then opinions and sentiments so opposite to each other ? The irregular influence of passion on our opinions and sentiments, will solve the question. All violent passions are prone to their own gratification. A man who has done

an action that he repents of and that affects him with anguish, abhors himself, and is odious in his own eyes : he wishes to find himself guilty ; and the thought that his guilt is beyond the possibility of excuse, gratifies the passion. In the first case, accordingly, remorse forces upon me a conviction that I might have restrained my passion, and ought to have restrained it. I will not give way to any excuse ; because in a severe fit of remorse, it gives me pain to be excused. In the other case, as there is no remorse, things appear in their true light without disguise. To illustrate this reasoning, I observe, that passion warps my judgment of the actions of others, as well as of my own. Many examples are given in the chapter above quoted : join to these the following. My servant aiming at a partridge, happens to shoot a favourite spaniel crossing the way unseen. Inflamed with anger, I storm at his rashness, pronounce him guilty, and will listen to no excuse. When passion subsides, I become sensible that the action was merely accidental, and that the man is absolutely innocent. The nurse overlays my only child, the long-expected heir to a great estate. With difficulty I refrain from putting her to death : “ The wretch “ has murdered my infant : she ought to be torn “ to pieces.” When I turn calm, the matter appears to me in a very different light. The poor woman is inconsolable, and can scarce believe that she is innocent : she bitterly reproaches herself
for

for want of care and concern. But, upon cool reflection, both she and I become sensible, that no person in sound sleep has any self-command, and that we cannot be answerable for any action of which we are not conscious. Thus, upon the whole, we discover, that any impression we occasionally have of being able to act in contradiction to motives, is the result of passion, not of sound judgment.

The reader will observe, that this section is copied from *Essays on Morality and Natural Religion*. The ground-work is the same: the alterations are only in the superstructure; and the subject is abridged, in order to adapt it to its present place. The preceding parts of the *Sketch* were published in the second edition of the *Principles of Equity*. But as law-books have little currency, the publishing the whole in one essay, will not, I hope, be thought improper.

APPENDIX.

Upon Chance and Contingency.

I Hold it to be an intuitive proposition, That the Deity is the primary cause of all things, that with consummate wisdom he formed the

N 2

great

great plan of government, which he carries on by laws suited to the different natures of animate and inanimate beings ; and that these laws, produce a regular chain of causes and effects in the moral as well as the material world, admitting no events but what are comprehended in the original plan *. Hence it clearly follows, that chance is excluded out of this world, that nothing can happen by accident, and that no event is arbitrary or contingent. This is the doctrine of the essay quoted ; and, in my apprehension, well founded. But I cannot subscribe to what follows, “ That we have an impression of chance and contingency, which consequently must be delusive.” I would not willingly admit any delusion in the nature of man, unless it were made evident beyond contradiction ; and I now see clearly, that the impression we have of chance and contingency, is not delusive, but perfectly consistent with the established plan.

The explanation of chance and contingency in the said essay, shall be given in the author’s own words, as a proper text to reason upon. “ In our ordinary train of thinking, it is certain that all events appear not to us as necessary. A multitude of events seem to be under our power to cause or to prevent ; and we readily make a distinction betwixt events that are *necessary, i. e.* that must be ; and events, that are *contingent, i. e.* that

* See Essays on Morality and Natural Religion, Part i. Essay 3.

“ that may be, or may not be. This distinction
“ is void of truth : for all things that fall out ei-
“ ther in the material or moral world, are, as we
“ have seen, alike necessary, and alike the result
“ of fixed laws. Yet, whatever conviction a phi-
“ losopher may have of this, the distinction be-
“ twixt things necessary and things contingent,
“ possesses his ordinary train of thought, as much
“ as it possesses the most illiterate. We act uni-
“ versally upon that distinction : nay it is in truth
“ the cause of all the labour, care, and industry
“ of mankind. I illustrate this doctrine by an
“ example. Constant experience hath taught us,
“ that death is a necessary event. The human
“ frame is not made to last for ever in its present
“ condition ; and no man thinks of more than a
“ temporary existence upon this globe. But the
“ particular time of our death appears a contin-
“ gent event. However certain it be, that the
“ time and manner of the death of each individual
“ is determined by a train of preceding causes,
“ and is no less fixed than the hour of the sun’s
“ rising or setting ; yet no person is affected by
“ this doctrine. In the care of prolonging life,
“ we are directed by the supposed contingency of
“ the time of death, which, to a certain term of
“ years, we consider as depending in a great mea-
“ sure on ourselves, by caution against accidents,
“ due use of food, exercise, &c. These means are
“ prosecuted with the same diligence as if there

“ were in fact no necessary train of causes to fix
“ the period of life. In short, whoever attends to
“ his own practical ideas, whoever reflects upon
“ the meaning of the following words, which oc-
“ cur in all languages, of things *possible, contingent,*
“ *that are in our power to cause or prevent* ; who-
“ ever, I say, reflects upon these words, will clear-
“ ly see, that they suggest certain perceptions or
“ notions repugnant to the doctrine above esta-
“ blished of universal necessity.”

In order to show that there is no repugnance, I begin with defining *chance* and *contingency*. The former is applied to events that have happened ; the latter to future events. When we say a thing has happened *by chance*, we surely do not mean that *chance* was the cause ; for no person ever imagined that *chance* is a thing that can act, and by acting produce events : we only mean, that we are ignorant of the cause, and that, for ought we see, it might have happened or not happened, or have happened differently. Aiming at a bird, I shoot *by chance* a favourite spaniel : the meaning is not, that chance killed the dog, but that as to me the dog's death was accidental. With respect to contingency, future events that are variable and the cause unknown, are said to be contingent ; changes of the weather, for example, whether it will be frost or thaw to-morrow, whether fair or foul. In a word, chance and contingency applied to events, mean not that such events happen with-
out

out any cause, but only that we are ignorant of the cause.

It appears to me, that there is no such thing in human nature, as a sense that any thing happens without a cause: such a sense would be grossly delusive. It is indeed true, that our sense of a cause is not always equally distinct: with respect to an event that happens regularly, such as summer, winter, rising or setting of the sun, we have a distinct sense of a cause: our sense is less distinct with respect to events less regular, such as alterations of the weather; and extremely indistinct with respect to events that seldom happen, and that happen without any known cause. But with respect to no event whatever does our sense of a cause vanish altogether, and give place to a sense of things happening without a cause.

Chance and contingency thus explained, suggest not any perception or notion repugnant to the doctrine of universal necessity; for my ignorance of a cause, does not, even in my own apprehension, exclude a cause. Descending to particulars, I take the example mentioned in the text, namely, the uncertainty of the time of my death. Knowing that my life depends in some measure on myself, I use all means to preserve it, by proper food, exercise, and care to prevent accidents. Nor is there any delusion here. I am moved to use these means by the desire I have to live: these means accordingly prove effectual to carry on my present

existence to the appointed period ; and in that view are so many links in the great chain of causes and effects. A burning coal falling from the grate upon the floor, wakes me from a sound sleep. I start up to extinguish the fire. The motive is irresistible : nor have I reason to resist, were it in my power ; for I consider the extinction of the fire by my hand, to be one of the means chosen by Providence for prolonging my life to its destined period.

Were there a chain of causes and effects established entirely independent on me, and were my life in no measure under my own power, it would indeed be fruitless for me to act ; and the absurdity of knowingly acting in vain, would be a prevailing motive for remaining at rest. Upon that supposition, the *ignava ratio* of Chrysippus might take place ; *cui si pareamus, nihil omnino agamus in vita* *. But I act necessarily when influenced by motives ; and I have no reason to forbear, considering that my actions, by producing their intended effects, contribute to carry on the great chain.

PART

* “ The indolent principle ; which if we were to follow, “ we should do nothing in life.”

PART II.

PROGRESS OF MORALITY.

HAVING unfolded the principles of morality, the next step is to trace out its gradual progress, from its infancy among savages to its maturity among polished nations. The history of opinions concerning the foundation of morality, falls not within my plan ; and I am glad to be relieved from an article that is executed in perfection by more able hands *.

An animal is brought forth with every one of its external members : and completes its growth, not by production of any new member, but by addition of matter to those originally formed. The same holds with respect to internal members ; the senses, for example, instincts, powers and faculties, principles and propensities : these are coeval with the individual, and are gradually unfolded, some early, some late. The external senses, being necessary for self-preservation, soon arrive at maturity. Some internal senses, of order for example, of propriety, of dignity, of grace, being of no use during infancy, are not only slow in their progress toward maturity, but require much culture. Among savages they are scarce perceptible.

The

* Dr Cudworth and Dr Smith.

The moral sense, in its progress, differs from those last mentioned ; being frequently discovered, even in childhood. It is however slow of growth, and seldom arrives at perfection without culture and experience.

The moral sense not only ripens gradually with the other internal senses mentioned, but from them acquires force and additional authority : a savage makes no difficulty to kill an enemy in cold blood : bloody scenes are familiar to him, and his moral sense is not sufficiently vigorous to give him compunction. The action appears in a different light to a person of delicate feelings ; and accordingly, the moral sense has much more authority over those who have received a refined education, than over savages.

It is pleasant to trace the progress of morality in members of a polished nation. Objects of external sense make the first impressions ; and from them are derived a stock of simple ideas. Affection, accompanying ideas, is first directed to particular objects, such as my father, my brother, my companion. The mind, opening by degrees, takes in complex objects, such as my country, my religion, the government under which I live ; and these also become objects of affection. Our connections multiply ; and the moral sense, acquiring strength as the mind opens, regulates our duty to every connected object. Objects of hatred multiply as well as objects of affection, and give full scope

scope to dissocial passions, the most formidable antagonists that morality has to encounter. But nature hath provided a remedy: the person who indulges malice or revenge, is commonly the greatest sufferer by the indulgence: men become wise by experience, and have more peace and satisfaction in fostering kindly affection: stormy passions are subdued, or brought under rigid discipline; and benevolence triumphs over selfishness. We refine upon the pleasures of society: we learn to submit our opinions: we affect to give preference to others; and readily fall in with whatever sweetens social intercourse: we carefully avoid causes of discord; and overlooking trivial offences, we are satisfied with moderate reparation, even for gross injuries.

A nation from its original savage state, grows to maturity like the individuals above described, and the progress of morality is the same in both. The savage state is the infancy of a nation, during which the moral sense is feeble, yielding to custom, to imitation, to passion. But a nation, like a member of a polished society, ripens gradually, and acquires a taste in the fine arts, with acuteness of sense in matters of right and wrong. Hatred and revenge, the great obstacles to moral duty, raged without controul, while the privilege of avenging wrongs was permitted to individuals*. But hatred and revenge yielded gradually to the pleasures

* See Historical Law Tracts, tract 1.

pleasures of society, and to the growing authority of the moral sense; and benevolent affections prevailed over dissocial passions. In that comfortable period, we hear no more of cruelty as a national character: on the contrary, the aversion we have to an enemy, is even in war exercised with moderation. Nor do the stormy passions ever again revive; for after a nation begins to decline from its meridian height, the passions that prevail are not of the violent kind, but selfish, timorous, and deceitful.

Morality however has not to this day arrived to such maturity, as to operate between nations with equal steadiness and vigour, as between individuals. Ought this to be regretted as an imperfection in our nature? I think not: had we the same compunction of heart for injuring a nation as for injuring an individual, and were injustice equally blameable as to both; war would cease, and a golden age ensue, than which a greater misfortune could not befall the human race*.

In the progress from maturity to a declining state, a nation differs widely from an individual: Old age puts an end to the latter: there are many causes that weaken the former; but old age is none of them, if it be not in a metaphorical sense. Riches, selfishness, and luxury, are the diseases that weaken prosperous nations: these diseases, following each other in a train, corrupt the heart,
dethrone

* Book 2. sketch 1.

dethrone the moral sense, and make an anarchy in the soul: men stick at no expence to purchase pleasure; and they stick at no vice to supply that expence.

Such are the outlines of morality in its progress from birth to burial; and these outlines I purpose to fill up with an induction of particulars. Looking back to the commencement of civil society, when no wants were known but those of nature, and when such wants were amply provided for; we find individuals of the same tribe living innocently and cordially together: they had no irregular appetites, nor any ground for strife. In that state, moral principles joined their influence with that of national affection, to secure individuals from harm. Savages accordingly, who have plenty of food and are simple in habitation and clothing, seldom transgress the rules of morality within their own tribe. Diodorus Siculus, who composed his history recently after Cæsar's expedition into Britain, says, that the inhabitants dwelt in mean cottages covered with reeds or sticks; that they were of much sincerity and integrity, contented with plain and homely fare; and were strangers to the excess and luxury of rich men. In Friesland, in Holland, and in other maritime provinces of the Netherlands, locks and keys were unknown, till the inhabitants became rich by commerce: they contented themselves with bare necessaries, which every one had in plenty. The Laplanders have

have no notion of theft. When they make an excursion into Norway, which is performed in the summer months, they leave their huts open, without fear that any thing will be purloined. Formerly they were entirely upright in their only commerce, that of bartering the skins of wild beasts for tobacco, brandy, and coarse cloth. But being often cheated by strangers, they begin to be more cunning. Theft was unknown among the Caribbees till Europeans came among them. When they lost any thing, they said innocently, "The Christians have been here." Crantz, describing the inhabitants of Iceland before they were corrupted by commerce with strangers, says, that they lived under the same roof with their cattle; that every thing was common among them except their wives and children; and that they were simple in their manners, having no appetite but for what nature requires. In the reign of Edwin King of Northumberland, a child, as historians report, might have travelled with a purse of gold, without hazard of robbery: in our days of luxury, want is so intolerable, that even fear of death is not sufficient to deter us. All travellers agree, that the native Canadians are perfectly disinterested, abhorring deceit and lying. The Californians are fond of iron and sharp instruments; and yet are so strictly honest, that carpenter-tools left open during night, were safe. The savages of North America had no locks for their goods: they probably

bably

bably have learned from Europeans to be more circumspect. Procopius bears testimony *, that the Sclavi, like the Huns, were innocent people, free of malice. Plan Carpin, the Pope's ambassador to the Cham of Tartary, *anno* 1246, says, that the Tartars are not addicted to thieving; and that they leave their goods open without a lock. Nicholas Damascenus reports the same of the Celtæ. The original inhabitants of the island Borneo, expelled by the Mahometans from the sea-coast to the centre of the country, are honest, industrious, and kindly to each other: they have some notion of property, but not such as to render them covetous. Pagans in Siberia are numerous; and, though grossly ignorant, especially in matters of religion, they are a good moral people. It is rare to hear among them of perjury, thieving, fraud, or drunkenness; if we except those who live among the Russian Christians, with whose vices they are tainted. Strahlenberg † bears testimony to their honesty. Having employed a number of them in a long navigation, he slept in the same boat with men whose names he knew not, whose language he understood not, and yet lost not a particle of his baggage. Being obliged to remain a fortnight among the Ostiaks, upon the river Oby, his baggage lay open in a hut inhabited by a large family, and yet nothing was purloined. The following

* *Historia Gothica*, lib. 3.

† *Description of Russia, Siberia, &c.*

lowing incident, which he also mentions, is remarkable. A Russian of Tobolski, in the course of a long journey, lodged one night in an Ostiac's hut, and the next day on the road missed his purse with a hundred rubles. His landlord's son, hunting at some distance from the hut, found the purse, but left it there. By his father's order, he covered it with branches, to secure it in case an owner should be found. After three months, the Russian returning, lodged with the same Ostiac; and mentioning occasionally the loss of his purse, the Ostiac, who at first did not recollect his face, cried out with joy, "Art thou the man who lost that purse?" "my son shall go and show thee where it lies," "that thou mayest take it up with thine own hand." The Hottentots* have not the least notion of theft: though immoderately fond of tobacco and brandy, they are employed by the Dutch for tending warehouses full of these commodities. Here is an instance of probity above temptation, even among savages in the first stage of social life. Some individuals are more liberally endued than others with virtuous principles: may it not be thought, that in that respect nature has been more kind to the Hottentots than to many other tribes? Spaniards, settled on the sea-coast of Chili, carry on a commerce with neighbouring savages, for bridles, spurs, knives, and other manufactures of iron; and in return receive oxen, horses,

* Kolben.

horses, and even children for slaves. A Spaniard carries his goods there; and after obtaining liberty to dispose of them, he moves about, and delivers his goods, without the least reserve, to every one who bargains with him. When all is sold, he intimates his departure; and every purchaser hurries with his goods to him; and it is not known that any one Indian ever broke his engagement. They give him a guard to carry him safe out of their territory, with all the slaves, horses, and cattle he has purchased. The savages of Brazil are faithful to their promises, and to the treaties they make with the Portuguese. Upon some occasions, they may be accused of error and wrong judgment, but never of injustice nor of duplicity.

While the earth was thinly peopled, plenty of food, procured by hunting and fishing, promoted population; but as population lessens the stock of animal food, a savage nation, increasing in numbers, must spread wider and wider for more game. Thus tribes, at first widely separated from each other, approach gradually till they become neighbours. Hence a new scene with respect to morality. Differences about their hunting-fields, about their game, about personal injuries, multiply between neighbours; and every quarrel is blown into a flame, by the aversion men naturally have to strangers. Anger, hatred, and revenge, now find vent, which formerly lay latent without an object: dissocial passions prevail without control,

trial, because among savages morality is no match for them; and cruelty becomes predominant in the human race. Ancient history accordingly is full of enormous cruelties; witness the incursions of the northern barbarians into the Roman empire; and the incursions of Genghizean and Tamerlane into the fertile countries of Asia, spreading destruction with fire and sword, and sparing neither man, woman, nor infant.

Malevolent passions, acquiring strength by daily exercise against persons of a different tribe, came to be vented against persons even of the same tribe; and the privilege long enjoyed by individuals of avenging the wrongs done to them, bestowed irresistible force upon such passions*. The history of ancient Greece presents nothing to the reader but usurpations, assassinations, and other horrid crimes. The names of many famous for wickedness, are still preserved; Atreus, for example, Eteocles, Alcmeon, Phedra, Clytemnestra. The story of Pelops and his descendants, is a chain of criminal horrors: during that period, parricide and incest were ordinary incidents. Euripides represents Medea vowing revenge against her husband Jason, and laying a plot to poison him. Of that infamous plot the chorus express their approbation, justifying every woman who, in like circumstances, acts the same part.

The

* See Historical Law Tracts, tract i.

The frequent incursions of northern barbarians into the Roman empire, spread desolation and ruin through the whole. The Romans, from the highest polish degenerating into savages, assumed by degrees the cruel and bloody manners of their conquerors, and the conquerors and conquered blended into one mass, equalled the grossest barbarians of ancient times in ignorance and brutality. Clovis, King of the Franks, even after his conversion to Christianity, assassinated without remorse his nearest kinsman. The children of Clovis, 497-530, were assassinated by their two uncles. In the thirteenth century, Ezzelino de Armano obtained the sovereignty of Padua, by massacring 12,000 of his fellow-citizens. Galeas Sforza, Duke of Milan, was assassinated 1476 in the cathedral church of Milan, after the assassins had put up their prayers for courage to perpetrate the deed. It is a still stronger proof how low morality was in those days, that the Pope himself, Sixtus IV., attempted to assassinate the two brothers, Laurent and Julien de Medicis, choosing the elevation of the host as a proper time, when the people would be busy about their devotions. Nay more, that very Pope, with unparalleled impudence, excommunicated the Florentines for doing justice upon the intended assassins. The most sacred oaths were in vain employed as a security against that horrid crime. Childerbert II, King of the Franks, enticed Magnovald

to his court, by a solemn oath that he should receive no harm; and yet made no difficulty to assassinate him during the gaiety of a banquet. But these instances, however horrid, make no figure compared with the massacre of St Bartholomew, where many thousands were inhumanly and treacherously butchered. Even so late as the fourteenth and fifteenth centuries, assassination was not held in every case to be criminal. Many solicitous applications were made to general councils of Christian clergy, to declare it criminal in every case; but without success. Ferdinand, King of Aragon and Navarre, after repeated assassinations and acts of perfidy, obtained the appellation of *Great*: so little authority had the moral sense, during these dark and sanguinary ages.

But it is scarce necessary to mention particular instances of the overbearing power of malevolent passions during these ages. An opinion, once universal, that the innocent may be justly involved in the same punishment with the guilty, is of itself irrefragable evidence, that morality formerly had very little influence when opposed by revenge. There is no moral principle more evident, than that punishment cannot be inflicted with justice but upon the guilty; and yet in Greece, the involving of the innocent with the guilty in the same punishment, was authorised even by positive law. By an Athenian law, a man committing sacrilege, or betraying his country, was banished with all
his

his children*. And when a tyrant was put to death, his children suffered the same fate†. The punishment of treason in Macedon, was extended against the criminal's relations‡. Hanno, a citizen of Carthage, formed a plot to enslave his country, by poisoning the whole senate at a banquet. He was tortured to death; and his children, with all his relations, were cut off without mercy, though they had no accession to his guilt. Among the Japanese, a people remarkably ferocious, it is the practice to involve children and relations in the punishment of capital crimes. Even Cicero, the chief man for learning in the most enlightened period of the Roman republic, and a celebrated moralist, approves that practice: “Nec vero me
 “fugit, quam sit acerbum parentum scelera filio-
 “rum pœnis lui: sed hoc præclare legibus com-
 “paratum est, ut caritas liberorum amiciores pa-
 “rentes reipublicæ redderet § ||.” In Britain,

 “of the state by the strongest of all ties, the affection to his
 “offspring.”

|| Ep. 12. ad Brutum.

every one knows, that murder was retaliated, not only upon the criminal and his relations, but upon his whole clan ; a practice so common as to be distinguished by a peculiar name, that of *deadly feud*. As late as the days of King Edmund, a law was made in England, prohibiting deadly feud, except between the relations of the person murdered and the murderer himself.

I embrace the present opportunity to honour the Jews, by observing, that they were the first people we read of, who had correct notions of morality with respect to the present point. The following law is express : “ The fathers shall not be put to death for the children, neither shall the children be put to death for the fathers : every man shall be put to death for his own sin *.” Amaziah, King of Judah, gave strict obedience to that law, in avenging his father’s death : “ And it came to pass as soon as the kingdom was confirmed in his hand, that he slew his servants which had slain the king his father, But the children of the murderers he slew not ; according to that which is written in the book of the law of Moses †.” There is an elegant passage in Ezekiel to the same purpose ‡ : “ What mean ye, that ye use this proverb concerning the land of Israel, saying, The fathers have eaten sour grapes,

* Deuteronomy xxiv. 16.

† 2 Kings, chap. xiv.

‡ Chap. xviii.

“ grapes, and the children’s teeth are set on edge ?
 “ As I live, saith the Lord God, ye shall not have
 “ occasion any more to use this proverb in Israel,
 “ The soul that sinneth, it shall die : the son shall
 “ not bear the iniquity of the father, neither shall
 “ the father bear the iniquity of the son ; the
 “ righteousness of the righteous shall be upon him,
 “ and the wickedness of the wicked shall be upon
 “ him.” Among the Jews, however, as among
 other nations, there are instances without num-
 ber, of involving innocent children and rela-
 tions in the same punishment with the guilty.
 Such power has revenge, as to trample upon con-
 science, and upon the most express laws. Instiga-
 ted with rage for Nabal’s ingratitude, King David
 made a vow to God, not to leave alive of all who
 pertained to Nabal any that pisseth against the
 wall. And it was not any compunction of con-
 science that diverted him from his cruel purpose,
 but Nabal’s beautiful wife, who pacified him *.
 But such contradiction between principle and prac-
 tice, is not peculiar to the Jews. We find exam-
 ples of it in the laws of the Roman empire. The
 true principle of punishment is laid down in an
 edict of the Emperors Arcadius and Honorius †.
 “ Sancimus, ibi esse poenam, ubi et noxia est. Pro-
 “ pinquos, notos, familiares, procul a calumnia sub-
 “ movemus, quos reos sceleris societas non facit.
 “ Nec

 “ men admittunt. Peccata igitur suos teneant auc-
 “ tores : nec ulterius progrediatur metus quam
 “ reperiatur delictum. Hoc singulis quibusque
 “ iudicibus intimescit *.” These very Emperors,
 with respect to treason, which touched them near-
 er than other crimes, talk a very different language.
 After observing, that will and purpose alone with-
 out an overt act, is treason, subjecting the criminal
 to capital punishment and to forfeiture of all that
 belongs to him, they proceed in the following
 words †. “ Filii vero ejus, quibus vitam Impera-
 “ toria specialiter lenitate concedimus, (paterno
 “ enim deberent perire supplicio, in quibus pater-
 “ ni, hoc est, hæreditarii criminis exempla me-
 “ tuuntur), a materna, vel avita, omnium etiam

 “ ant : sint postremo tales, ut his, perpetua egesta-
 “ te

* “ We ordain, that the punishment of the crime shall ex-
 “ tend to the criminal alone. We hold his relations, his
 “ friends, and his acquaintances, unsuspected ; for intimacy,
 “ friendship, or connection, are no proof or argument of
 “ guilt. The consequences of the crime shall pursue only
 “ its perpetrator. Let this statute be intimated to all our
 “ judges.”

† L. 5. Cod. ad leg. Jul. majest.

“ te sordentibus, sit et mors solatium et vita sup-
 “ plicium *.”

Human nature is not so perverse, as without veil or disguise to punish a person acknowledged to be innocent. An irregular bias of imagination, which extends the qualities of the principal to its accessories, paves the way to that unjust practice †. That bias, strengthened by indignation against an atrocious criminal, leads the mind hastily to conclude, that all his connections are partakers of his guilt. In an enlightened age, the clearness of moral principles fetters the imagination from confounding the innocent with the guilty. There remain traces however of that bias, though not carried so far as murder. The sentence pronounced against Ravilliac for assassinating Henry IV. of France,

* “ By a special extension of our imperial clemency, we
 “ allow the sons of the criminal to live ; although, from a rea-
 “ sonable suspicion of their inheriting his vicious nature, it
 “ were not unwise to doom them to suffer the punishment of
 “ their father. But it is our will, that they shall be incapable
 “ of all inheritance, either from the mother, the grandfather,
 “ or any of their kindred ; that they shall be deprived of the
 “ power of inheriting by the testament of a stranger ; that
 “ they shall be abandoned to the extreme of poverty and per-
 “ petual indigence ; that the infamy of their father shall ever
 “ attend them, incapable of honours, and excluded from the
 “ participation of religious rites ; that such, in fine, shall be
 “ the misery of their condition, that life shall be a punishment,
 “ and death a comfort.”

† Elements of Criticism, chap. 2. sect. 5.

France, ordains, "That his house be crazed to the ground, and that no other building be ever erected upon that spot." Was not this in imagination punishing a house for the proprietor's crime?

Murder and assassination are not only destructive in themselves, but, if possible, still more destructive in their consequences. The practice of shedding blood unjustly and often wantonly, blunts conscience, and paves the way to every crime. This observation is verified in the ancient Greeks: their cruel and sanguinary character, rendered them little regardful of the strict rules of justice. Right was held to depend on power, among men as among wild beasts: it was conceived to be the will of the gods, that superior force should be a lawful title to dominion; "for what right can the weak have to what they cannot defend?" Were that maxim to obtain, a weak man would have no right to liberty nor to life. That impious doctrine was avowed by the Athenians, and publicly asserted by their ambassadors in a conference with the Melians, reported by Thucydides*. Many persons act as if force and right were the same; but a barefaced profession of such a doctrine is uncommon. In the *Eumenides*, a tragedy of *Æschylus*, *Orestes* is arraigned in the *Areopagus* for killing his mother. *Minerva*, president of the court, decrees in favour of the *Orestes*: and for what reason?

* Lib. 5.

son? “ Having no mother myself, the murder of
 “ a mother toucheth not me *.” In the tragedy
 of *Electra*, Orestes, consulting the Delphic oracle
 about means to avenge his father’s murder, was en-
 joined by Apollo to forbear force, but to employ
 fraud and guile. Obedient to that injunction,
 Orestes commands his tutor to spread in Argos the
 news of his death, and to confirm the same with a
 solemn oath. In Homer, even the great Jupiter
 makes no difficulty to send a lying dream to Aga-
 memnon, chief of the Greeks. Diffimulation is
 recommended by the goddess Minerva †. Ulysses
 declares his detestation at using freedom with
 truth ‡: and yet no man deals more in feigned sto-
 ries §. In the 22d book of the *Iliad*, Minerva is
 guilty of gross deceit and treachery to Hector.
 When he flies from Achilles, she appears to him
 in the shape of his brother Deiphobus, exhorts
 him

* Athens, from the nature of its government, as establish-
 ed by Solon, was rendered incapable of any regular or con-
 sistent body of laws. In every case, civil and criminal, the
 whole people were judges in the last resort. And what sort
 of judges will an ignorant multitude make, who have no guide
 but passion and prejudice? It is vain to make good laws,
 when such judges are the interpreters. Anacharsis, the Scy-
 thian, being present at an assembly of the people, said, “ It
 “ was singular, that in Athens, wise men pleaded causes, and
 “ fools determined them.”

† *Odysses*, Book 13.

‡ Book 14.

§ Book 14. Book 15.

him to turn upon Achilles, and promises to assist him. Hector accordingly, returning to the fight, darts his lance ; which rebounds from the shield of Achilles, for by Vulcan it was made impenetrable. Hector calls upon his brother for another lance ; but in vain, for Deiphobus was not there. The Greeks in Homer's time must have been strangely deformed in their morals, when such a story could be relished *. A nation begins not to polish nor to advance in morality, till writing be common ; and writing was not known among the Greeks at the siege of Troy. Nor were the morals of that people, as we see, much purified for a long time after writing became common. When Plautus wrote, the Roman system of morals must have been extremely impure. In his play termed *Menæchmi*, a gentleman of fashion having accidentally got into his hands a lady's robe with a gold clasp ; instead of returning them to the owner, endeavours to sell them without shame or remorse. Such a scene would not be endured at present, except among pickpockets. Both the Greeks and Carthaginians

* Upon the story of Jupiter being deceived by Juno, in the 14th book of the Iliad, Pope says, " That he knows not a bolder fiction in all antiquity, nor one that has a greater air of impiety." Pope, it would seem was little acquainted with antiquity : for such acts of impiety were common among the Greeks ; and in particular the incident mentioned in the text, is not only more impious, but also a more gross violation of the laws of morality.

thaginians were held by the Romans to be artful and cunning. The Romans continued a plain people, with much simplicity of manners, when the nations mentioned had made great progress in the arts of life ; and it is a sad truth, that morality declines in proportion as a nation polishes. But if the Romans were later than the Greeks and Carthaginians in the arts of life, they soon surpassed them in every sort of immorality. For this change of manners, they were indebted to their rapid conquests. The sanguinary disposition both of the Greeks and Romans, appears from another practice, that of exposing their infant children, which continued till humanity came in some measure to prevail. The practice continues in China to this day, the populousness of the country throwing a veil over the cruelty ; but from the humanity of the Chinese, I conjecture, that the practice is rare. The Jews, a cloudy and peevish tribe, much addicted to bloodshed, were miserably defective in moral principles. Take the following examples out of an endless number recorded in the books of the Old Testament. Jael, wife of Heber, took under her protection Sisera, general of the Canaanites, and engaged her faith for his security. She put him treacherously to death when asleep ; and was applauded by Deborah the prophetess for the meritorious action *. That horrid deed would probably have appeared to her in a different light, had it

* Judges iv. 5.

it been committed against Barak, general of the Israelites. David, flying from Saul, took refuge with Achish, King of Gath; and, though protected by that King, made war against the King's allies, saying, that it was against his own countrymen of Judah. "And David saved neither man nor woman alive to bring tidings to Gath. And Achish believed David, saying, He hath made his people Israel utterly to abhor him: therefore he shall be my servant for ever*." This was a complication of ingratitude, lying and treachery. Ziba, by presents to King David, and by defaming his master Mephibosheth, procured from the King a gift of his master's inheritance; though Mephibosheth had neither trimmed his beard, nor washed his clothes, from the day the King departed till he returned in peace. "And it came to pass, when Mephibosheth was come to Jerusalem to meet the king, that the king said unto him, Wherefore wentest thou not with me, Mephibosheth? And he answered, My lord, O king, my servant deceived me; for thy servant said, I will saddle me an ass, that I may ride thereon, and go to the king; because thy servant is lame, and he hath slandered thy servant unto my lord the king. But my lord the king is as an angel of God: do therefore what is good in thine eyes. For all my father's house were but dead men before my lord the king: yet

"didst

* I Samuel xxvii. 11.

“ didst thou set thy servant among them that did
 “ eat at thine own table : what right therefore
 “ have I to cry any more unto the king ?” David
 could not possibly atone for his rashness, but by
 restoring Mephibosheth his inheritance, and pu-
 nishing Ziba in an exemplary manner. But hear
 the sentence : “ And the king said unto him, Why
 “ speakest thou any more of thy matters ? I have
 “ said, Thou and Ziba divide the land *.” The
 same king, after pardoning Shimei for cursing him,
 and swearing that he should not die ; yet upon
 deathbed enjoined his son Solomon to put Shimei
 to death : “ Now, therefore, hold him not guiltless ;
 “ but his hoary head bring thou down to the
 “ grave with blood †.” I wish not to be misap-
 prehended, as intending to censure David in parti-
 cular. If the best king the Jews ever had, was
 so miserably deficient in morality, what must be
 thought of the nation in general ? When David
 was lurking to avoid the wrath of Saul, he be-
 came acquainted with Nabal, who had a great stock
 of cattle. “ He discharged his followers,” says
 Josephus ‡, “ either for avarice, or hunger, or any
 “ pretext whatever, to touch a single hair of
 “ them ; preaching still on the text of doing jus-
 “ tice to all men, in conformity to the will of
 “ God, who is not pleased with any man that co-
 “ vets, or lays violent hands on the goods of his
 “ neighbour.”

* 2 Samuel xix. 24. † 1 Kings ii. 9.

‡ Antiquities, book vi.

“neighbour.” Our author proceeds to acquaint us, that Nabal having refused to supply David with provisions, and having sent back the messengers with a scoffing answer, David, in rage made a vow, that he would destroy Nabal with his house and family. Our author observes, that David’s indignation against Nabal, was not so much for his ingratitude, as for the virulence of an insolent outrage against one who had never injured him. And what was the outrage? It was, says our author, that Nabal, inquiring who the said David was, and being told that he was one of the sons of Jesse, “Yes, yes”, says Nabal, “your run-away servants look upon themselves to be brave fellows, “I warrant you.” Strange looseness of morals! I mean not David, who was in wrath, but Josephus writing sedately in his closet. He every where celebrates David for his justice and piety, composes for him the very warm exhortation mentioned above: and yet thinks him not guilty of any wrong, in vowing to break every rule of justice and humanity, upon so slight a provocation as a scoffing expression, such as no man of temper will regard.

European nations, who originally were fierce and sanguinary like the Greeks and Jews, had the same cloudy and incorrect notions of right and wrong. It is scarce necessary to give instances, the low state of morality during the dark ages of Christianity being known to all. In the time of
Louis

Louis XI. of France, promises and engagements were utterly disregarded, till they were sanctified by a solemn oath : nor were such oaths long regarded ; they lost their force, and were not relied on more than simple promises. All faith among men seemed to be at an end. Even those who appeared the most scrupulous about character, were however ready to grasp at any subterfuge to excuse their breach of engagement. And it is a still clearer proof of self-deceit, that such subterfuges were frequently prepared beforehand, in order to furnish an excuse. It was a common practice some ages ago, to make private protestations, which were thought sufficient to relieve men in conscience from being bound by a solemn treaty. The Scotch nation, as an ally of France, being comprehended in a treaty of peace between the French King and Edward I. of England, the latter ratified publicly the treaty, after having secretly protested before notaries against the article that comprehended Scotland. Charles, afterward Emperor of Germany, during his minority, gave authority to declare publicly his accession to a treaty of peace, between his grandfather Maximilian and the King of France : but at the same time protested privately, before a notary and witnesses, “ That, notwithstanding his public accession to the said
“ treaty, it was not his intention to be bound by
“ every article of it ; and particularly, that the
“ clause reserving to the King of France the so-
VOL. III. P “ vereignty

“vereiignty of certain territories in the Nether-
“lands, should not be binding.” Is it possible
Charles could be so blind as not to see, that such
a protestation, if sufficient to relieve from an en-
gagement, must destroy all faith among men? Fran-
cis I. of France, while prisoner in Spain, engaged
Henry VIII. of England in a treaty against the
Emperor, submitting to very hard terms in order
to gain Henry’s friendship. The King’s ministers
protested privately against some of the articles;
and the protest was recorded in the secret register
of the parliament of Paris, to serve as an excuse
in proper time, for breaking the treaty. At the
marriage of Mary Queen of Scotland to the Dau-
phin of France, the King of France ratified every
article insisted on by the Scotch parliament, for
preserving the independence of the nation, and for
securing the succession of the crown to the house
of Hamilton; confirming them by deeds in form
and with the most solemn oaths. But Mary pre-
viously had been persuaded to subscribe privately
three deeds, in which, failing heirs of her body,
she gifted the kingdom of Scotland to the King
of France; declaring all promises to the contrary
that had been extorted from her by her subjects,
to be void. What better was this than what was
practised by Robert, King of France, in the tenth
century, to free his subjects from the guilt of per-
jury? They swore upon a box of relics, out of
which the relics had been privately taken. Cor-
rea,

rea, a Portuguese general, made a treaty with the King of Pegu; and it was agreed, that each party should swear to observe the treaty, laying his hand upon the sacred book of his religion. Correa swore upon a collection of songs; and thought that by that vile stratagem he was free from his engagement. The inhabitants of Britain were so loose formerly, that a man was not reckoned safe in his own house, without a mastiff to protect him from violence. Mastiffs were permitted even to those who dwelt within the king's forests; and to prevent danger to the deer, there was in England a court for *lawing* or *expeditation* of mastives, *i. e.* for cutting off the claws of their fore-feet to prevent them from running*. The trial and condemnation of Charles I. in a pretended court of justice, however audacious and unconstitutional, was an effort toward regularity and order. In the preceding age, the king would have been taken off by assassination or poison. Every prince in Europe had an officer, whose province it was to secure his master against poison. A lady was appointed to that office by Queen Elizabeth of England; and the form was, to give to each of the servants a mouthful to eat of the dish he brought in. Poison must have been frequent in those days, to make such a regulation necessary. To vouch still more clearly, the low ebb of morality during that period, seldom it happened that a man of

P 2

figure

* Cartade Foresta, cap. 6.

figure died suddenly, or of an unusual disease, but poison was suspected. Men conscious of their own vitious disposition, are prone to suspect others. The Dauphin, son to Francis I. of France, a youth of about eighteen, having overheated himself at play, took a great draught of iced water, and died of a pleurisy in five days. The death was sudden, but none is more natural. The suspicion however of poison was universal; and Montecuculi, who attended the young prince, was formally condemned to death for it, and executed; for no better reason than that he had at all times ready access to the prince.

Considering the low state of morality where dissocial passions bear rule, as in the scenes now displayed, one would require a miracle to recover mankind out of so miserable a state. But, as observed above *, Providence brings order out of confusion. The intolerable distress of a state of things where a promise or even an oath, is a rope of sand, and where all are set against all †, made people at last sensible, that they must either renounce society altogether, or qualify themselves for it by checking their dissocial passions. Finding from experience, that the gratification of social affections exceeds greatly that of cruelty and revenge; men endeavouring to acquire a habit of self-command, and of restraining their stormy passions. The necessity of fulfilling every moral duty was

* Book 2. Sketch 1.

† Hobbes.

was recognized : men listened to conscience, the voice of God in their hearts : and the moral sense was cordially submitted to, as the ultimate judge in all matters of right and wrong. Salutary laws and steady government contributed to perfect that glorious revolution : private conviction alone would not have been effectual, not at least in many ages.

From that revolution is derived what is termed *the law of nations*, meaning certain regulations dictated by the moral sense in its maturity. The laws of our nature refine gradually as our nature refines. From the putting an enemy to death in cold blood, improved nature is averse, though such practice was common while barbarity prevailed. It is held infamous to use poisoned weapons, though the moral sense made little opposition while rancour and revenge were ruling passions. Aversion to strangers is taught to vary its object, from individuals, to the nation that is our enemy : I bear enmity against France ; but dislike not any one Frenchman, being conscious that it is the duty of subjects to serve their king and country *. In distributing justice, we make no distinction between natives and foreigners : if any partiality be indulged, it is in favour of the helpless stranger.

P 3

But

* In one of our ill-concerted descents upon France during the late war, signal humanity appeared, in forbearing to burn a manufactory of sails and ropes, belonging to the king ; because it would have destroyed an adjoining building of the same kind belonging to a private manufacturer.

But cruelty is not the only antagonist to morality. There is another, less violent indeed, but more cunning and undermining ; and that is, the hoarding appetite. Before money was introduced, that appetite was extremely faint : in the first stage of civil society, men are satisfied with plain necessities ; and having these in plenty, they think not of providing against want. But money is a species of property, so universal in operation, and so permanent in value, as to rouse the appetite for hoarding : love of money excites industry ; and the many beautiful productions of industry, magnificent houses, splendid gardens, rich garments, inflame the appetite to an extreme. The people of Whidah, in Guinea, are much addicted to pilfering. Bozman was told by the king, “ That his
“ subjects were not like those of Ardrah, who on
“ the slightest umbrage will poison an European.
“ This, says he, you have no reason to apprehend
“ here : but take care of your goods ; for so ex-
“ pert are my people at thieving, that they will
“ steal from you while you are looking on.” In the thirteenth century, so obscured was the moral sense by rapacity and avarice, that robbery on the highway, and the coining false money, were in Germany held to be privileges of great lords. Cicero somewhere talks of banditti who infested the roads near Rome, and made travelling extremely dangerous. In the days of Henry III. of England, the Chronicle of Dunstable reports, that the
country

country was in great disorder by theft and robbery, that men were not secure in their own houses, and that whole villages were often plundered by bands of robbers, though the kingdom was otherwise at peace. Many of the King's own household were found to be robbers; and excused themselves, that having received no wages from the King, they were obliged to rob for subsistence. That perjury was common in the city of London, especially among jurymen, makes a preamble in more than one statute of Henry VII. In *the Dance of Death*, translated from the French in the said king's reign with additions adapted to English manners, a jurymen is introduced, who, influenced by bribes, had frequently given a false verdict. And the Sheriff was often suspected as accessory to the crime, by returning for jurymen persons of a bad character. Carew, in his account of Cornwall, says, that it was an ordinary article in an attorney's bill, to charge *pro amicitia vice-comitis* *. Perjury in jurors of the city of London is greatly complained of. Stow informs us, that, in the year 1468, many jurors of that city were punished; and papers fixed on their heads declaring their offence of being corrupted by the parties to the suit. He complains of that corruption as flagrant in the reign of Elizabeth, when he wrote his account of London, Fuller, in his *English Worthies*, mentions it as a proverbial say-

P 4

ing,

* " For the friendship of the sheriff."

ing, "That London juries hang half, and save
" half." Grafton, in his Chronicle, mentions,
that the chancellor of the Bishop of London be-
ing indicted for murder, the Bishop wrote a letter
to Cardinal Wolsey, begging his interposition for
having the prosecution stopt, "because London
" juries were so corrupted, that they would find
" Abel guilty of the murder of Cain." Mr Hume,
in the first volume of his History of England,
(page 417. edition 1762), cites many instances from
Madox of bribes given for perverting justice. In
that period, the morals of the low people were in
other particulars equally loose. We learn from
Strype's Annals *, that in the county of Somerset
alone, forty persons were executed in one year for
robbery, theft, and other felonies, thirty-five burnt
in the hand, thirty-seven whipped, one hundred
and eighty-three discharged, though most wicked
and desperate persons ; and yet that the fifth part
of the felonies committed in that county were not
brought to trial, either from cunning in the felons,
indolence in the magistrate, or foolish lenity in the
people ; that other counties were in no better con-
dition, and many in a worse ; and that commonly
there were three or four hundred able-bodied va-
gabonds in every county, who lived by theft and
rapine. Harrison computes, that in the reign of
Henry VIII. seventy-two thousand thieves and
rogues were hanged ; and that in Elizabeth's time
there

* Vol. iv.

there were only hanged yearly between three and four hundred for theft and robbery. At present, there are not forty hanged in a year for these crimes. The same author reports, that in the reign of Elizabeth, there were computed to be in England ten thousand gypsies. In the year 1601, complaints were made in parliament, of the rapine of the justices of peace ; and a member said, that this magistrate was an animal, who, for half-a-dozen of chickens, would dispense with a dozen of penal statutes. The low people in England are greatly improved in their morals since the days of Elizabeth. Laying aside London, there are few places in the world where the common people are more orderly and honest. But we must not conclude, that England has gained much in point of morality. It has lost more by the luxury and loose manners of its nobles, than it has gained by good discipline among their inferiors. The undisciplined manners of our forefathers in Scotland, made a law necessary, that whoever inter-meddled irregularly with the goods of a deceased person, should be subjected to pay all his debts, however extensive. A due submission to legal authority, has in effect abrogated that severe law ; and it is now scarce ever heard of.

To control the hoarding-appetite, which when inflamed is the bane of civil society, the God of nature has provided two efficacious principles ; the moral sense, and the sense of property. The hoarding-

ing-

ing-appetite, it is true, is more and more inflamed by beautiful productions in the progress of art : but, on the other hand, the senses mentioned, arrived at maturity, have a commanding influence over the actions of men ; and, when cherished in a good government, are a sufficient counterbalance to the hoarding-appetite. The ancient Egyptians enjoyed for ages the blessings of good government ; and moral principles were among them carried to a greater degree of refinement than at present even in our courts of equity. It was made the duty of every one, to succour those who were unjustly attacked : even passengers were not exempted. A regulation among them, that a man could not be imprisoned for debt, was well suited to the tenor of their laws and manners : it could not have taken place but among an honest and industrious people. In old Rome, though remarkable for temperance and austerity of manners, a debtor could be imprisoned, and even sold as a slave, for payment of the debt ; but the Patricians were the creditors, and the poor Plebeians were held in woful subjection*. The moderation of the

* A bankrupt in England who pays three-fourths of his debt, and obtains a certificate of his good behaviour, is discharged of all the debts contracted by him before his bankruptcy. Such regulation was perhaps not unsuitable to the moderation and frugality of the period when it was made. But luxury and external show, have now become our ruling passions ; and to supply our extravagance, money must be
procured

the inhabitants of Hamburgh, and their public spirit kept in vigour by a free government, preserve
morality

procured at any rate. Trade in particular has degenerated into a species of gaming; men venturing their all, in hopes of a lucky hit to elevate them above their neighbours. And did they only venture their own, the case would not be deplorable: they venture all they can procure upon credit; and by that means, reduce to beggary many an innocent family: with respect to themselves, they know the worst, which is to be cleared from their debts by a certificate. The morals of our people are indeed at so low an ebb, as to require the most severe laws against bankruptcy. When a man borrows a sum, it is implied in the covenant, that all his effects, present and future, shall lie open to the creditor; for which reason, it is contradictory to justice, that the creditor should be forced to discharge the debt, without obtaining complete payment. Many debtors, it is true, deserve favour; but it ought to be left to the humanity of creditors, and not be forced from them by law. A debtor, at the same time, may be safely left to the humanity of his creditors: for if he have conducted his affairs with strict integrity, and with any degree of prudence, there will scarce be found one man so hard hearted, as to stand out against the laudable and benevolent intentions of his fellow-creditors. Nay, if he have any regard to character, he dare not stand out: he would be held as a monster, and be abhorred by all the world. To leave a bankrupt thus to the mercy of his creditors, would produce the most salutary effects. It would excite men to be strictly just in their dealings, and put an end to gaming, so destructive to credit; because misbehaviour in any of these particulars would set the whole creditors against their debtor, and leave him no hope of favour. In the late bankrupt-statute for Scotland, accordingly, the clause concerning the certificate was wisely left out, as unsuitable to the depraved manners of the present time.

morality among them entire from taint or corruption. I give an illustrious instance. Instead of a tax upon trade or riches, every merchant puts privately into the public chest, what he thinks ought to be his contribution : the total sum seldom falls short of expectation ; and among that numerous body of men, not one is suspected of contributing less than his proportion. But luxury has not yet got footing in that city. A climate not kindly and a soil not fertile, enured the Swiss to temperance and to virtue. Patriotism continues their ruling passion : they are fond of serving their country ; and are honest and faithful to each other : a lawsuit among them is a wonder ; and a door is seldom shut, unless to keep out cold.

The hurtful effects of the hoarding-appetite upon individuals, make no figure compared with what it has upon the public, in every state enriched by conquest or by commerce ; which I have had more than one opportunity to mention. Overflowing riches unequally distributed, multiply artificial wants beyond all bounds : they eradicate patriotism : they foster luxury, sensuality, and selfishness, which are commonly gratified at the expence even of justice and honour. The Athenians were early corrupted by opulence ; to which every thing was made subservient. “ It is an oracle,” says the chorus in the *Agamemnon* of Eschylus, “ that is not purchased with money.” During the infancy of a nation, vice prevails from imbecillity

cillity in the moral sense : in the decline of a nation, it prevails from the corruption of affluence.

In a small state, there is commonly much virtue at home, and much violence abroad. The Romans were to their neighbours more baneful than famine or pestilence ; but their patriotism produced great integrity at home. An oath, when given to fortify an engagement with a fellow-citizen, was more sacred at Rome than in any other part of the world *. The censorian office cannot succeed but among a virtuous people ; because its rewards and punishments have no influence but upon those who are ashamed of vice †. As soon as Asiatic opulence and luxury prevailed in Rome, selfishness, sensuality, and avarice, formed the character of the Romans ; and the censorian power was at an end. Such relaxation of morals ensued, as to make a law necessary, prohibiting the custody of an infant to be given to the heir, for fear of murder. And for the same reason, it was held unlawful to make a covenant *de hæreditate viventis*. These regulations prove the Romans to have been grossly corrupt. Our law is different in both articles ;
because

* L'Esprit des loix, liv. 8. ch. 13.

† In the fifteenth century, the French clergy from the pulpit censured public transactions, and even the conduct of their king, as our British clergy did in the days of Charles I. and II. They assumed the privilege of a Roman censor ; but they were not men of such authority as to do any good in a corrupted nation.

because it entertains not the same bad opinion of the people whom it governs *. Domitius Enobarbus and Appius Pulcher were consuls of Rome in the 699th year ; and Memmius and Calvinus were candidates for succeeding them in that office. It was agreed among these four worthy gentlemen, that they should mutually assist each other. The consuls engaged to promote the election of Memmius and Calvinus : and they, on the other hand, subscribed a bond, obliging themselves, under a penalty of about L. 3000 Sterling, to procure three augurs, who should attest, that they were present in the comitia when a law passed investing the consuls with military command in their provinces ; and also obliging themselves to produce three persons of consular rank, to depose, that they were in the number of those who signed a decree, conferring on the consuls the usual proconsular appointments. And yet the law made in the comitia, and the decree in the senate, were pure fictions. Infamous as this transaction was, Memmius, to answer some political purpose, was not ashamed to divulge it to the senate. This
same

* In the beginning of the present century, attorneys and agents were so little relied on for honesty and integrity, as to be disqualified by the Court of Session from being factors on the estates of bankrupts, (Act of Sederunt, 23d November 1710). At present, the factors chosen are commonly of that profession, writers or agents ; and it appears from experience, that they make the best factors. Such improvement in morals, in so short a time, has not many parallels.

same Memmius, however, continued to be Cicero's correspondent, and his professed friend. *Prob tempora! prob mores!* But the passion for power and riches was at that time prevalent; and the principles of morality were very little regarded.

It cannot be dissembled, that selfishness, sensuality, and avarice, must in England be the fruits of great opulence, as in every other country; and that morality cannot maintain its authority against such undermining antagonists. Customhouse-oaths have become so familiar among us, as to be swallowed without a wry face; and is it certain, that bribery and perjury in electing parliament-members, are not approaching to the same cool state? In the infancy of morality, a promise makes but a slight impression: to give it force, it is commonly accompanied with many ceremonies*; and in treaties between sovereigns, even these ceremonies are not relied on without a solemn oath. When morality arrives at maturity, the oath is thought unnecessary; and at present, morality is so much on the decline, that a solemn oath is no more relied on, than a simple promise was originally. Laws have been made to prevent such immorality, but in vain: because none but patriots have an interest to support them; and when patriotism is banished by corruption, there is no remaining spring in government to make them effectual. The statutes made against gaming, and against bribery
and

* See Historical Law Tracts, Tract ii.

corruption in elections, have no authority over a degenerate people. Nothing is studied, but how to evade the penalties ; and supposing statutes to be made without end for preventing known evasions, new evasions will spring up in their stead. The misery is, that such laws, if they prove abortive, are never innocent with regard to consequences ; for nothing is more subversive of morality as well as of patriotism, than a habit of disregarding the laws of our country *.

But

* Lying and perjury are not in every case equally criminal ; at least are not commonly reckoned so. Lying or perjury, in order to injure a man, is held highly criminal ; and the greater the hurt, the greater the crime. To relieve from punishment, few boggle at a lie or at perjury ; sincerity is not even expected ; and hence the practice of torture. Many men are not scrupulous about oaths, when they have no view but to obtain justice to themselves : the Jacobites, that they might not be deprived of their privileges as British subjects, made no great difficulty to swallow oaths to the present government, though in them it was perjury. It is dangerous to withdraw the smallest peg in the moral edifice ; for the whole will totter and tumble. Men creep on to vice by degrees. Perjury, in order to support a friend, has become customary of late years ; witness fictitious qualifications in the electors of parliament-men, which are made effectual by perjury ; yet such is the degeneracy of the present times, that no man is the worse thought of upon that account. We must not flatter ourselves that the poison will reach no farther. A man, who boggles not at perjury to serve a friend, will in time become such an adept, as to commit perjury in order to ruin a friend when he becomes an enemy.

But pride sometimes happily interposes to stem the tide of corruption. The poor are not ashamed to take a bribe from the rich ; nor weak states from those that are powerful, disguised only under the name of *subsidy* or *pension*. Both France and England have been in the practice of securing the alliance of neighbouring princes by pensions ; and it is natural in the ministers of a pensioned prince, to receive a gratification for keeping their master to his engagement. England never was at any time so inferior to France, as to suffer her king openly to accept a pension from the French king, whatever private transactions might be between the kings themselves. But the ministers of England thought it no disparagement, to receive pensions from France. Every minister of Edward IV. of England received a pension from Louis XI. ; and they made no difficulty of granting a receipt for the sum. The old Earl of Warwick, says Commynes, was the only exception : he took the money, but refused a receipt. Cardinal Wolsey had a pension both from the Emperor and from the King of France : and his master Henry was vain to find his minister so much regarded by the first powers in Europe. During the reigns of Charles II. and of his brother James, England made so despicable a figure, that the ministers accepted pensions from Louis XIV. A king deficient in virtue, is never well served. King Charles, most disgracefully, accepted a pension from France :

what scruple could his ministers have? Britain, governed by a king eminently virtuous and patriotic, makes at present so great a figure, that even the lowest minister would disdain a pension from any foreign prince. Men formerly were so blind, as not to see that a pension creates a bias in a minister, against his master and his country. At present, men clearly see, that a foreign pension to a minister is no better than a bribe; and it would be held so by all the world.

In a nation enriched by conquest or commerce, where selfish passions always prevail, it is difficult to stem the tide of immorality: the decline of virtue may be retarded by wholesome regulations; but no regulations will ever restore it to its meridian vigour. Marcus Aurelius, Emperor of Rome, caused statues to be made of all the brave men who figured in the Germanic war. It has long been a practice in China; to honour persons eminent for virtue, by feasting them annually at the Emperor's expence. A late Emperor made an improvement: he ordered reports to be sent him annually, of men and women, who when alive had been remarkable for public spirit or private virtue, in order that monuments might be erected to their memory. The following report is one of many that were sent to the Emperor. "According to the order of your Majesty, for erecting monuments to the honour of women, who have been celebrated for continence, for filial piety, " or

“ or for purity of manners, the viceroy of Canton reports, that in the town of Sinhoei, a beautiful young woman, named *Leang*, sacrificed her life to save her chastity. In the fifteenth year of our Emperor Canghi, she was dragged by pirates into their ship; and having no other way to escape their brutal lust, she threw herself headlong into the sea. Being of opinion, that to prefer honour before life is an example worthy of imitation, we purpose, according to your Majesty's order, to erect a triumphal arch for that young woman, and to engrave her story upon a large stone, that it may be preserved in perpetual remembrance.” At the foot of the report is written, *The Emperor approves*. Pity it is, that such regulations should ever prove abortive, for their purpose is excellent. But they would need angels to carry them on. Every deviation from a just selection enervates them; and frequent deviations render them a subject of ridicule. But how are deviations to be prevented, when men are the judges? Those who distribute the rewards have friends or flatterers; and those of greater merit will be neglected. Like the censorian power in Rome, such regulations, after many abuses, will sink into contempt.

Two errors, which infested morality in dark times, have occasioned much injustice; and I am not certain, that they are yet entirely eradicated. The first is an opinion, That an action derives its

quality of right and wrong from the event, without regard to intention. The other is, That the end justifies the means ; or, in other words, That means otherwise unlawful, may be lawfully employed to bring about a good end. With an account of these two errors, I shall close the present historical sketch.

That intention is the circumstance which qualifies an action and its author, to be criminal or innocent, is made evident in the first part of the present sketch ; and is now admitted to be so by every moral writer. But rude and barbarous nations seldom carry their thoughts beyond what falls under their external senses : they conclude an action to be right that happens to do good, and an action to be wrong that happens to do harm ; without ever thinking of motives, of will, of intention, or of any circumstance that is not obvious to eye-sight. From many passages in the Old Testament it appears, that the external act only, with its consequences, was regarded. Isaac, imitating his father Abraham, made his wife Rebecca pass for his sister. Abimelech, King of the Philistines, having discovered the imposture, said to Isaac, “ What is this thou hast done unto us ? One of “ the people might lightly have lain with thy “ wife, and thou shouldest have brought guiltiness “ upon us*.” Jonathan was condemned to die for transgressing a prohibition he had never heard of.

* Genesis, chap. xxvi.

of*. A sin of ignorance, *i. e.* an action done without ill intention, required a sacrifice of expiation†. Saul, defeated by the Philistines, fell on his own sword: the wound not being mortal, he prevailed on a young Amalekite, to pull out the sword, and to dispatch him with it. Josephus‡ says, that David ordered the criminal to be delivered up to justice as a regicide.

The Greeks appear to have wavered greatly about intention, sometimes holding it essential to a crime, and sometimes disregarding it as a circumstance of no moment. Of these contradictory opinions, we have pregnant evidence in the two tragedies of Oedipus; the first taking it for granted, that a crime consists entirely in the external act and its consequences; the other holding intention to be indispensable. Oedipus had killed his father Laius, and married his mother Jocasta; but without any criminal intention, being ignorant of his relation to them. And yet history informs us, that the gods punished the Thebans with pestilence, for suffering a wretch so grossly criminal to live. Sophocles, author of both tragedies, puts the following words in the mouth of Tiresias the prophet.

——— Know then,
That Oedipus, in shameful bonds united,

With

* 1 Samuel, xiv. 44.

† Leviticus, chap. iv.

‡ Book 3. of Antiquities.

With those he loves, unconscious of his guilt,
Is yet most guilty.

And that doctrine is espoused by Aristotle in a later period; who holding Oedipus to have been deeply criminal, though without intention, is of opinion, that a more proper subject for tragedy never was brought upon the stage. Nay, as a philosopher he talks currently of any involuntary crime. Orestes, in Euripides, acknowledges himself to be guilty in killing his mother; yet asserts with the same breath, that his crime was inevitable, a necessary crime, a crime commanded by religion.

In Oedipus Coloneus, the other tragedy mentioned, a very different opinion is maintained. A defence is made for that unlucky man, agreeable to sound moral principles; that, having had no bad intention, he was entirely innocent; and that his misfortunes ought to be ascribed to the wrath of the gods.

Thou who upbraid'st me thus for all my woes,
Murder and incest, which against my will,
I had committed; so it pleas'd the gods,
Offended at my race for former crimes.
But I am guiltless: can'st thou name a fault
Deserving this? For, tell me, was it mine,
When to my father, Phœbus did declare,
That he should one day perish by the hand
Of his own child; was Oedipus to blame,

Who

Who had no being then ? If, born at length
 To wretchedness, he met his sire unknown,
 And slew him ; that involuntary deed
 Can'st thou condemn ? And for my fatal marriage,
 Dost thou not blush to name it ? was not she
 Thy sister, she who bore me, ignorant
 And guiltless woman ! afterwards my wife,
 And mother to my children ? What she did, she did un-
 knowing.

But, not for that, nor for my murder'd father,
 Have I deserv'd thy bitter taunts : for, tell me,
 Thy life attack'd, wouldst thou have staid to ask
 Th' assassin, if he were thy father ? No ;
 Self-love would urge thee to revenge the insult.
 Thus was I drove to ill by th' angry gods ;
 This, should my father's soul revisit earth,
 Himself would own, and pity Oedipus.

Again, in the fourth act, the following prayer is
 put up for Oedipus by the chorus :]

————— O grant,
 That not oppress'd by tort'ring pain,
 Beneath the stroke of death he linger long ;
 But swift, with easy steps, descend to Styx's drear abode ;
 For he hath led a life of toil and pain ;
 May the just gods repay his undeserved woe.

The audience was the same in both plays. Did
 they think Oedipus to be guilty in the one play,
 and innocent in the other ? If they did not, how
 could both plays be relished ? if they did, they
 must have been grossly stupid.

The statues of a Roman Emperor were held so sacred, that to treat them with any contempt was high treason. This ridiculous opinion was carried so far out of common sense, that a man was held guilty of high treason, if a stone thrown by him happened accidentally to touch one of these statues. And the law continued in force till abrogated by a rescript of Severus Antoninus*.

In England, so little was intention regarded, that casual homicide, and even homicide in self-defence, were capitally punished. It requires strong evidence to vouch so absurd a law; and I have the strongest, viz. the act 52d Henry III. cap. 26. converting the capital punishment into a forfeiture of moveables. The same absurdity continued much longer to be law in Scotland. By act 19. Parl. 1649, renewed act 22. Parl. 1661, the capital punishment is converted to imprisonment, or a fine to the wife and children. In a period so late as the Restoration, strange blindness it was, not to be sensible, that homicide in self-defence, being a lawful act justified by the strictest rules of morality, subjects not a man to punishment, more than the defending his property against a robber; and that casual homicide, meaning homicide committed innocently without ill intention, may subject him to reparation, but never to any punishment, mild or severe.

The

* L. 5. ad Leg. Jul. Majest.

The Jesuits in their doctrines seem to rest on the external act, disregarding intention. It is with them a matter of perfect indifference, from what motive men obey the laws of God ; consequently that the service of those who obey from fear of punishment, is no less acceptable to the Deity, than of those who obey from a principle of love.

The other error mentioned above, is, That the end justifies the means. In defence of that proposition, it is urged, that the character of the means is derived from the end ; that every action must be right which contributes to a good end ; and that every action must be wrong which contributes to an ill end. According to this reasoning, it is right to assassinate a man who is a declared or concealed enemy to his country. It is right to rob a rich man, in order to relieve a person in want. What becomes then of property, which by all is held inviolable ? It is totally unhinged. The proposition then is untenable as far as light can be drawn from reason. At the same time, the tribunal of reason may be justly declined in this case. Reason is the only touchstone of truth and falsehood : but the moral sense is the only touchstone of right and wrong. And to maintain, that the qualities of right and wrong are discoverable by reason, is no less absurd than that truth and falsehood are discoverable by the moral sense. The moral sense dictates, that on no pretext whatever is it lawful
to

to do an act of injustice, or any wrong* : and men, conscious that the moral sense governs in matters of right and wrong, submit implicitly to its dictates. Influenced, however, by the reasoning mentioned, men, during the nonage of the moral sense, did wrong currently in order to bring about a good end ; witness pretended miracles and forged writings, urged without reserve by every sect of Christians against their antagonists. And I am sorry to observe, that the error is not entirely eradicated : missionaries employed in converting infidels to the true faith, are little scrupulous about the means : they make no difficulty to feign prodigies, in order to convert those who are not moved by argument. Such pious frauds tend to sap the very foundations of morality.

* See the first part of this Sketch, Sect. 3. at the end.

SKETCH

SKETCH III.

PRINCIPLES AND PROGRESS OF THEOLOGY.

AS no other science can vie with theology, either in dignity or importance, it justly claims to be a favourite study with every person endued with true taste and solid judgment. From the time that writing was invented, natural religion has employed pens without number; and yet in no language is there found a connected history of it. The present work will only admit a flight sketch: which I shall glory in, however imperfect, if it excite any one of superior talents to undertake a complete history.

CHAP. I.

Existence of a Deity.

THAT there exist beings, one or many, powerful above the human race, is a proposition universally admitted as true, in all ages, and among
all

all nations. I boldly call it universal, notwithstanding what is reported of some gross savages ; for reports that contradict what is acknowledged to be general among men, require more able vouchers than a few illiterate voyagers. Among many savage tribes, there are no words but for objects of external sense : is it surprising, that such people are incapable to express their religious perceptions, or any perception of internal sense ? and from their silence can it be fairly presumed, that they have no such perception * ? The conviction that men have of superior powers in every country where there are words to express it, is so well vouched, that in fair reasoning it ought to be taken for granted among the few tribes where language is deficient. Even the grossest idolatry affords evidence of that conviction. No nation can be so brutish as to worship a stock or a stone, merely as such : the visible object is always imagined to be connected with some invisible power ; and the worship paid to the former, is as representing the latter, or as in some manner connected with it. Every family
among

* In the language even of Peru, there is not a word for expressing an abstract idea, such as *time, endurance, space, existence, substance, matter, body*. It is no less defective in expressing moral ideas, such as *virtue, justice, gratitude, liberty*. The Yameos, a tribe on the river Oroonoko, described by Condamine, used the word *poettarravincouroac* to express the number three, and have no word for a greater number. The Brazilian language is nearly as barren.

among the ancient Lithuanians, entertained a real serpent as a household-god ; and the same practice is at present universal among the Negroes in the kingdom of Whidah : it is not the serpent that is worshipped, but some deity imagined to reside in it. The ancient Egyptians were not idiots, to pay divine honours to a bull or a cat, as such : the divine honours were paid to a deity, as residing in these animals. The sun is to man a familiar object : being frequently obscured by clouds, and totally eclipsed during night, a savage naturally conceives it to be a great fire, sometimes flaming bright, sometimes obscured, and sometimes extinguished. Whence then sun-worship, once universal among savages ? Plainly from the same cause : it is not properly the sun that is worshipped, but a deity who is supposed to dwell in that luminary.

Taking it then for granted, that our conviction of superior powers has been long universal, the important question is, From what cause it proceeds. A conviction so universal and so permanent, cannot proceed from chance ; but must have a cause operating constantly and invariably upon all men in all ages. Philosophers, who believe the world to be eternal and self-existent, and imagine it to be the only deity, though without intelligence, endeavour to account for our conviction of superior powers, from the terror that thunder and other elementary convulsions raise in savages ;
and

and thence conclude that such belief is no evidence of a deity. Thus Lucretius *,

Præterea, cui non animus formidine divum
Contrahitur? cui non conripunt membra pavore,
Fulminis horribili cum plaga torrida tellus
Contremat, et magnum percurrunt murmura cælum †?

And Petronius Arbiter,

Primus in orbe deos fecit timor: ardua cœlo
Fulmina quum caderent discussaque mœnia flammis,
Atque ictus flagraret Athos ‡.

It will readily be yielded to these gentlemen, that savages, grossly ignorant of causes and effects, are apt to take fright at every unusual appearance, and to think that some malignant being is the cause. And if they mean only, that the first perception of deity among savages is occasioned by fear, I heartily subscribe to their opinion. But if they mean, that such perceptions proceed from fear solely,

* Lib. 5.

† What man can boast that firm undaunted soul,
That hears, unmov'd, when thunder shakes the pole;
Nor shrinks with fear of an offended pow'r,
When lightnings flash, and storms and tempests roar?

‡ When dread convulsions rock'd the lab'ring earth,
And livid clouds first gave the thunder birth,
Instinctive fear within the human breast
The first ideas of a God impress'd.

solely, without having any other cause, I wish to be informed from what source is derived the belief we have of benevolent deities. Fear cannot be the source : and it will be seen anon, that tho' malevolent deities were first recognised among savages, yet that in the progress of society, the existence of benevolent deities was universally believed. The fact is certain ; and therefore fear is not the sole cause of our believing the existence of superior beings.

It is beside to me evident, that the belief even of malevolent deities, once universal among all the tribes of men, cannot be accounted for from fear solely. I observe, first, That there are many men, to whom an eclipse, an earthquake, and even thunder, are unknown : Egypt, in particular, though the country of superstition, is little or not at all acquainted with the two latter ; and in Peru, though its government was a theocracy, thunder is not known. Nor do such appearances strike terror into every one who is acquainted with them. The universality of the belief, must then have some cause more universal than fear. I observe next, That if the belief were founded solely on fear, it would die away gradually as men improve in the knowledge of causes and effects : instruct a savage, that thunder, an eclipse, an earthquake, proceed from natural causes, and are not threatenings of an incensed deity ; his fear of malevolent beings will vanish ; and with it his belief in them,

them, if founded solely on fear. Yet the direct contrary is true: in proportion as the human understanding ripens, our conviction of superior powers, or of a Deity, turns more and more firm and authoritative; which will be made evident in the chapter immediately following.

Philosophers of more enlarged views and of deeper penetration, may be inclined to think, that the operations of nature and the government of this world, which loudly proclaim a Deity, may be sufficient to account for the universal belief of superior powers. And to give due weight to the argument, I shall relate a conversation between a Greenlander and a Danish missionary, mentioned by Crantz in his History of Greenland. “It is true,” says the Greenlander, “we were ignorant Heathens, and knew little of a God, till you came. “But you must not imagine, that no Greenlander “thinks about these things. A kajak *, with all “its tackle and implements, cannot exist but by “the labour of man; and one who does not understand it, would spoil it. But the meanest “bird requires more skill than the best kajak; “and no man can make a bird. There is still “more skill required to make a man: by whom “then was he made? He proceeded from his parents, and they from their parents. But some “must have been the first parents: whence did “they proceed? Common report says, that they “grew

* A Greenland boat.

“ grew out of the earth : if so, why do not men
“ still grow out of the earth ? And from whence
“ came the earth itself, the sun, the moon, the
“ stars ? Certainly there must be some being who
“ made all these things, a being more wise than
“ the wisest man.” The reasoning here from effects to their causes is stated with great precision ; and were all men equally penetrating with the Greenlander, such reasoning might perhaps be sufficient to account for the conviction of a Deity, universally spread among savages. But such penetration is a rare quality among savages ; and yet the conviction of superior powers is universal, not excepting even the grossest savages, who are altogether incapable of reasoning like our Greenland philosopher. Natural history has made so rapid a progress of late years, and the finger of God is so visible to us in the various operations of nature, that we do not readily conceive how even savages can be ignorant : but it is a common fallacy in reasoning, to judge of others by what we feel in ourselves. And to give juster notions of the condition of savages, I take liberty to introduce the Wogultzoi, a people in Siberia, exhibiting a striking picture of savages in their natural state. That people were baptized at the command of Prince Gagarin, governor of the province ; and Laurent Lange, in his relation of a journey from Petersburg to Peking *anno* 1715, gives the following account of their conversion. “ I had

“curiosity,” says he, “to question them about
“their worship before they embraced Christianity.
“They said, that they had an idol hung upon a
“tree, before which they prostrated themselves,
“raising their eyes to heaven, and howling with
“a loud voice. They could not explain what
“they meant by howling; but only, that every
“man howled in his own fashion. Being interro-
“gated, Whether, in raising their eyes to heaven,
“they knew that a god is there, who sees all the
“actions, and even the thoughts of men; they
“answered simply, That heaven is too far above
“them to know whether a god be there or not;
“and that they had no care but to provide meat
“and drink. Another question being put, Whe-
“ther they had not more satisfaction in worship-
“ping the living God, than they formerly had in
“the darkness of idolatry; they answered, We
“see no great difference, and we do not break our
“heads about such matters.” Judge how little
capable such ignorant savages are, to reason from
effects to their causes, and to trace a Deity from
the operations of nature. It may be added with
great certainty, that could they be made in any
degree to conceive such reasoning, yet so weak and
obscure would their conviction be, as to rest there
without moving them to any sort of worship;
which however among savages goes hand in hand
with the conviction of superior powers.

If

If fear be a cause altogether insufficient for our conviction of a Deity, universal among all tribes; and if reasoning from effects to their causes can have no influence upon ignorant savages; what other cause is there to be laid hold of? One still remains, and imagination cannot figure another: to make this conviction universal, the image of the Deity must be stamped upon the mind of every human being, the ignorant equally with the knowing: nothing less is sufficient. And the original perception we have of Deity, must proceed from an internal sense, which may be termed the *sense of Deity*.

Included in the sense of Deity, is the duty we are under to worship him. And to enforce that duty, the principle of devotion is made a part of our nature. All men accordingly agree in worshipping superior beings, however they may differ in the mode of worship. And the universality of such worship, proves devotion to be an innate principle *.

The perception we have of being accountable agents, arises from another branch of the sense of Deity. We expect approbation from the Deity when we do right; and dread punishment from him when guilty of any wrong; not excepting the most occult crimes, hid from every mortal eye.

R 2

From

* See this principle beautifully explained and illustrated in a sermon upon the love of God, by Dr Butler, Bishop of Durham, a writer of the first rank.

From what cause can dread proceed in that case, but from conviction of a superior being, avenger of wrongs? The dread, when immoderate, disorders the mind, and makes every unusual misfortune pass for a punishment inflicted by an invisible hand. “ And they said one to another, We “ are verily guilty concerning our brother, in that “ we saw the anguish of his soul, when he besought us, and we would not hear: therefore “ is this distress come upon us. And Reuben answered them, saying, Spake I not unto you, saying, Do not sin against the child; and ye would not hear? therefore behold also his blood is required*.” Alphonfus, King of Naples, was a cruel and tyrannical prince. He drove his people to despair with oppressive taxes, treacherously assassinated several of his barons, and loaded others with chains. During prosperity, his conscience gave him little disquiet; but in adversity, his crimes stared him in the face, and made him believe that his distresses proceeded from the hand of God, as a just punishment. He was terrified to distraction, when Charles VIII. of France approached with a numerous army: he deserted his kingdom; and fled to hide himself, from the face of God and of man.

But admitting a sense of Deity, is it evidence to us that a Deity actually exists? It is complete evidence. So framed is man as to rely on the
evidence

* Genesis xlii. 21, 22.

evidence of his senses * ; which evidence he may reject in words ; but he cannot reject in thought, whatever bias he may have to scepticism. And experience confirms our belief ; for our senses, when in order, never deceive us.

The foregoing sense of Deity is not the only evidence we have of his existence : there is additional evidence from other branches of our nature. Inherent in the nature of man are two passions, devotion to an invisible Being, and dread of punishment from him, when one is guilty of any crime. These passions would be idle and absurd, were there no Deity to be worshipped or to be dreaded. Man makes a capital figure ; and is the most perfect being that inhabits this earth : and yet were he endowed with passions or principles that have no end nor purpose, he would be the most irregular and absurd of all Beings. These passions both of them, direct us to a Deity, and afford us irresistible evidence of his existence.

Thus our Maker has revealed himself to us, in a way perfectly analogous to our nature : in the mind of every human creature, he has lighted up a lamp, which renders him visible even to the weakest sight. Nor ought it to escape observation, that here, as in every other case, the conduct of Providence to man, is uniform. It leaves him to be directed by reason, where liberty of choice

R 3

is

* See Essays on Morality and Natural Religion, Part II. sect. 3.

is permitted ; but in matters of duty, he is provided with guides less fallible than reason : in performing his duty to man, he is guided by the moral sense ; in performing his duty to God, he is guided by the sense of Deity. In these mirrors, he perceives his duty intuitively.

It is no slight support to this doctrine, that if there really be a Deity, it is highly presumable, that he will reveal himself to man, fitted by nature to adore and worship him. To other animals, the knowledge of a Deity is of no importance : to man, it is of high importance. Were we totally ignorant of a Deity, this world would appear to us a mere chaos : under the government of a wise and benevolent Deity, chance is excluded ; and every event appears to be the result of established laws : good men submit to whatever happens, without repining ; knowing that every event is ordered by divine Providence : they submit with entire resignation ; and such resignation is a sovereign balsam for every misfortune.

The sense of Deity resembles our other senses, which are quiescent till a proper object be presented. When all is silent about us, the sense of hearing lies dormant ; and if from infancy a man were confined to a dark room, he would be as ignorant of his sense of seeing, as one born blind. Among savages, the objects that rouse the sense of Deity, are uncommon events above the power of man. A savage, if acquainted with no events but what
are

are familiar, has no perception of superior powers; but a sudden eclipse of the sun, thunder rattling in his ears, or the convulsion of an earthquake, rouses his sense of Deity, and directs him to some superior being as the cause of these dreadful effects. The savage, it is true, errs in ascribing to the immediate operation of a Deity, things that have a natural cause: his error however is evidence that he has a sense of Deity, no less pregnant, than when he more justly attributes to the immediate operation of Deity, the formation of man, of this earth, of all the world.

The sense of Deity, like the moral sense, makes no capital figure among savages; the perceptions of both senses being in them faint and obscure. But in the progress of nations to maturity, these senses become and more vigorous, so as among enlightened nations to acquire a commanding influence; leaving no doubt about right and wrong, and as little about the existence of a Deity.

The obscurity of the sense of Deity among savages, has encouraged some sceptical philosophers to deny its existence. It has been urged, That God does nothing by halves; and that if he had intended to make himself known to men, he would have afforded them conviction equal to that from seeing or hearing. When we argue thus about the purposes of the Almighty, we tread on slippery ground, where we seldom fail to stumble. What if it be the purpose of the Deity, to afford

us but an obscure glimpse of his being and attributes? We have reason from analogy to conjecture, that this may be the case. From some particulars mentioned above*, it appears at least probable, that entire submission to the moral sense, would be ill-suited to man in his present state; and would prove more hurtful than beneficial. And to me it appears evident, that to be conscious of the presence of the Great God, as I am of a friend whom I hold by the hand, would be inconsistent with the part that Providence has destined me to act in this life. Reflect only on the restraint one is under, in presence of a superior, suppose the King himself: how much greater our restraint, with the same lively impression of God's awful presence! Humility and veneration would leave no room for other passions: man would be no longer man; and the system of our present state would be totally subverted. Add another reason: Such a conviction of future rewards and punishments as to overcome every inordinate desire, would reduce us to the condition of a traveller in a paltry inn, having no wish but for day-light to prosecute his journey. For that very reason, it appears evidently the plan of Providence, that we should have but an obscure glimpse of futurity. As the same plan of Providence is visible in all, I conclude with assurance, that a certain degree of obscurity, weighs nothing
against

* Book ii. Sketch 1.

against the sense of Deity, more than against the moral sense, or against a future state of rewards and punishments. Whether all men might not have been made angels, and whether more happiness might not have resulted from a different system, lie far beyond the reach of human knowledge. From what is known of the conduct of Providence, we have reason to presume, that our present state is the result of wisdom and benevolence. So much we know with certainty, that the sense we have of Deity and of moral duty, correspond accurately to the nature of man as an imperfect being; and that these senses, were they absolutely perfect, would convert him into a very different being.

A doctrine espoused by several writers ancient and modern, pretends to compose the world without a Deity; that the world, composed of animals, vegetables, and brute matter, is self-existent and eternal; and that all events happen by a necessary chain of causes and effects. It will occur even at first view, that this theory is at least improbable: can any supposition be more improbable than that the great work of planning and executing this universe, beautiful in all its parts, and bound together by the most perfect laws, should be a blind work, performed without intelligence or contrivance? It would therefore be a sufficient answer to observe, that this doctrine, though highly improbable, is however given to the public, like

a foundling, without cover or support. But affirmatively I urge, that it is fundamentally overturned by the knowledge we derive of Deity from our own nature: if a Deity exist, self-existence must be his peculiar attribute; and we cannot hesitate in rejecting the supposition of a self-existent world, when it is so natural to suppose that the whole is the operation of a self-existent Being, whose power and wisdom are adequate to that great work. I add, that this rational doctrine is eminently supported from contemplating the endless number of wise and benevolent effects, displayed every where on the face of this globe; which afford complete evidence of a wise and benevolent cause. As these effects are far above the power of man, we necessarily ascribe them to a superior Being, or in other words to the Deity*.

Some philosophers there are, not indeed so hardened in scepticism as to deny the existence of a Deity: They acknowledge a self-existent Being; and seem willing to bestow on that Being power, wisdom, and every other perfection. But then they maintain, that the world, or matter at least, must also be self-existent. Their argument is, that *ex nihilo nihil fit*, that it is inconsistent for any thing to be made out of nothing, out of a *nonens*. To consider nothing or a *nonens* as a material or substance out of which things can be formed, like a statue out of stone or a sword out of iron, is I acknowledge

* First sketch of this third book, sect. 1.

knowledge a gross absurdity. But I perceive no absurdity nor inconsistency in supposing that matter was brought into existence by Almighty power; and the popular expression, that God made the world out of nothing, has no other meaning. It is true, that in the operations of men nothing can be produced but from antecedent materials; and so accustomed are we to such operations, as not readily to conceive how a thing can be brought into existence without antecedent materials, or made out of nothing, as commonly expressed. But will any man in sober sense venture to set bounds to Almighty power, where he cannot point out a clear inconsistency? It is indeed difficult to conceive a thing so remote from common apprehension; but is there less difficulty in conceiving matter to exist without a cause, and to be entitled to the awful appellation of self-existent, like the Lord of the Universe, to whom a more exalted appellation cannot be given? Now, if it be within the utmost verge of possibility for matter to have been created, I conclude with the highest probability, that it owes its existence to Almighty power. The necessity of one self-existent being is intuitively certain; but I perceive no necessity, nor indeed probability, that there should be more than one. Difficulties about the creation of matter, testify our ignorance; but to argue from our ignorance that a thing cannot be, has always been held very weak reasoning. Our faculties are adapted to our present

sent state, and perform their office in perfection. But to complain that they do not reach the origin of things, is no less absurd than to complain that we cannot ascend to the moon in order to be acquainted with its inhabitants. At the same time, it is a comfortable reflection, that the question, whether matter was created or no, is a pure speculation, and that either side may be adopted without impiety. To me it appears more simple and more natural to hold it to be a work of creation, than to be self-existent, and consequently independent of the Almighty either to create or to annihilate. I cheerfully make the former an article of my Creed ; but without anathematizing those who adopt the latter. I would however have it understood, that I limit my concession to matter in its original rude state. I cannot possibly carry my complaisance so far as to comprehend the world in its present perfection. That immense machine composed of parts without number so artfully combined as to fulfil the intention of the maker, must be the production of a great being, omniscient as well as omnipotent. To assign blind fatality as the cause, is an insufferable absurdity.

Many gross and absurd conceptions of Deity that have prevailed among rude nations, are urged by some writers as an objection against a sense of Deity. That objection shall not be overlooked ; but it will be answered to better purpose, after these
these

these gross and absurd conceptions are examined in the chapter immediately following.

The proof of a Deity from the innate sense here explained, differs materially from what is contained in essays on morality and natural religion*. The proof there given is founded on a chain of reasoning, altogether independent on the innate sense of Deity. Both equally produce conviction; but as sense operates intuitively without reasoning, the sense of Deity is made a branch of human nature, in order to enlighten those who are incapable of a long chain of reasoning; and to such, who make the bulk of mankind, it is more convincing, than the most perspicuous reasoning to a philosopher.

CHAP. II.

Progress of Opinions with respect to Deity.

THE sense of Deity, like many other delicate senses, is in savages so faint and obscure as easily to be biased from truth. Among them, the belief of many superior beings, is universal. And two causes join to produce that belief. The first is,

* Part ii. sect. 7.

is, that being accustomed to a plurality of visible objects, men, mountains, trees, cattle, and such like, they are naturally led to imagine a like plurality in things not visible ; and from that slight bias, slight indeed but natural, is partly derived the system of Polytheism, universal among savages. The other is, that savages know little of the connection between causes and effects, and still less of the order and government of the world : every event that is not familiar, appears to them singular and extraordinary ; and if such event exceed human power, it is without hesitation ascribed to a superior being. But as it occurs not to a savage, nor to any person who is not a philosopher, that the many various events exceeding human power and seemingly unconnected, may all proceed from the same cause ; they are readily ascribed to different beings. Pliny ascribes Polytheism to the consciousness men have of their imbecillity : “ Our
“ powers are confined within narrow bounds : we
“ do not readily conceive powers in the Deity
“ much more extensive : and we supply by number what is wanting in power *.” Polytheism, thus founded, is the first stage in the progress of theology ; for it is embraced by the rudest savages, who have neither capacity nor inclination to pierce deeper into the nature of things.

This

* Plurality of heads or of hands in one idol, is sometimes made to supply plurality of different idols. Hence among savages the grotesque figure of some of their idols.

This stage is distinguishable from others, by a belief that all superior beings are malevolent. Man, by nature weak and helpless, is prone to fear, dreading every new object and every unusual event. Savages, having no protection against storms, tempests, nor other external accidents, and having no pleasures but in gratifying hunger, thirst, and animal love; have much to fear, and little to hope. In that disconsolate condition, they attribute the bulk of their distresses to invisible beings, who in their opinion must be malevolent. This seems to have been the opinion of the Greeks in the days of Solon; as appears in a conversation between him and Croesus King of Lydia, mentioned by Herodotus in the first book of his history. “ Croesus, said Solon, you ask me about human affairs; and I answer as one who thinks, that all the gods are envious and disturbers of mankind.” The negroes on the coast of Guinea, dread their deities as tyrants and oppressors: having no conception of a good deity, they attribute the few blessings they receive, to the soil, to the rivers, to the trees, and to the plants. The Lithuanians continued Pagans down to the fourteenth century; and worshipped in gloomy woods, where their deities were held to reside. Their worship probably was prompted by fear, which is allied to gloominess. The people of Kamiskatka acknowledge to this day many malevolent deities, having little or no notion of a good deity. They believe
the

the air, the water, the mountains, and the woods, to be inhabited by malevolent spirits, whom they fear and worship. The savages of Guiana ascribe to the devil even their most common diseases; nor do they ever think of another remedy, but to apply to a forcerer to drive him away. Such negroes as believe in the devil, paint his images white. Beside the Esquimaux, there are many tribes in the extensive country of Labrador, who believe the Deity to be malevolent, and worship him out of fear. When they eat, they throw a piece of flesh into the fire as an offering to him; and when they go to sea in a canoe, they throw something on the shore to render him propitious. Sometimes, in a capricious fit, they go out with guns and hatchets to kill him; and on their return boast that they have done so.

Conviction of superior beings, who, like men, are of a mixed nature, sometimes doing good, sometimes mischief, constitutes the second stage. This came to be the system of theology in Greece. The introduction of writing among the Greeks, while they were little better than savages, produced a compound of character and manners, that has not a parallel in any other nation. They were acute in science, skilful in fine arts, extremely deficient in morals, gross beyond conception in theology, and superstitious to a degree of folly; a strange jumble of exquisite sense and absurd nonsense. They held their gods to resemble men in their external

ternal figure; and to be corporeal. In the 21st book of the Iliad, Minerva with a huge stone beats Mars to the ground, whose monstrous body covered seven broad acres. As corporeal beings, they were supposed to require the nourishment of meat, drink, and sleep. Homer mentions more than once the inviting of gods to a feast: and Pausanias reports, that in the temple of Bacchus at Athens, there were figures of clay, representing a feast given by Amphyction to Bacchus and other deities. The inhabitants of the island Java are not so gross in their conceptions, as to think that the gods eat the offerings presented to them: but it is their opinion, that a deity brings his mouth near the offering, sucks out all its flavour, and leaves it tasteless like water*. The Grecian gods, as described by Homer, dress, bathe, and anoint, like mortals. Venus, after being detected by her husband in the embraces of Mars, retires to Paphos;

Where to the pow'r an hundred altars rise;
And breathing odours scent the balmy skies;
Conceal'd she bathes in consecrated bow'rs,
The Graces unguents shed, ambrosial show'rs,
Unguents that charm the gods! She last assumes
Her wond'rous robes; and full the goddess blooms.

ODYSSEY, Book VIII.

* All Greek writers, and those in their neighbourhood, form the world out of a chaos. They had no such exalted notion of a deity as to believe, that he could make the world out of nothing.

Juno's dress is most poetically described, *Iliad*, Book xiv. It was also universally believed, that the gods were fond of women, and had many children by them. The ancient Germans thought more sensibly, that the gods were too high to resemble men in any degree, or to be confined within the walls of a temple. The Greeks seem to have thought, that the gods did not much exceed themselves in knowledge. When Agesilaus journeyed with his private retinue, he usually lodged in a temple ; making the gods witnesses, says Plutarch, of his most secret actions. The Greeks thought, that a god, like a man, might know what passed within his own house ; without knowing any thing passing at a distance. " If it be true," says Aristotle, (*Rhetoric*, Book II.) " that even the gods do not know every thing, there is little reason to expect great knowledge among men." Agamemnon in *Eschylus*, putting off his travelling habit, and dressing himself in splendid purple, is afraid of being seen and envied by some jealous god. We learn from *Seneca*, that people strove for the seat next to the image of the deity, that their prayers might be the better heard. But what we have chiefly to remark upon this head, is, that the Grecian gods were, like men, held capable of doing both good and ill. Jupiter, their highest deity, was a ravisher of women, and a notorious adulterer. In the second book of the *Iliad*, he sends a lying dream to deceive Agamemnon.

Mars

Mars seduces Venus by bribes to commit adultery *. In the *Rhesus* of Euripides, Minerva, disguised like Venus, deceives Paris by a gross lie. The ground-work of the tragedy of *Xuthus* is a lying oracle, declaring Ion, son of Apollo and Creusa, to be the son of Xuthus. Orestes in Euripides, having slain his mother Clytemnestra, excuses himself as having been misled by Apollo to commit the crime. "Ah!" says he, "had I consulted the ghost of my father, he would have dissuaded me from a crime that has proved my ruin, without doing him any good." He concludes with observing, that having acted by Apollo's command, Apollo is the only criminal. In a tragedy of Sophocles, Minerva makes no difficulty to cheat Ajax, promising to be his friend, while underhand she is serving Ulysses, his bitter enemy. Mercury, in revenge for the murder of his son Myrtilus, entails curses on Pelops the murderer, and on all his race †. In general, the gods, every where in Greek tragedies, are partial, unjust, tyrannical and revengeful. The Greeks accordingly have no reserve in abusing their gods. In the tragedy of *Prometheus*, Jupiter, without the least ceremony, is accused of being an usurper.

S 2

Eschylus

* *Odyssey*, Book viii.

† The English translator of that tragedy, observes it to be remarkable in the Grecian creed, that the gods punish not only the persons guilty, but their innocent posterity.

Eschylus proclaims publicly on the stage, that Jupiter, a jealous, cruel, and implacable tyrant, had overturned every thing in heaven : and that the other gods were reduced to be his slaves. In the Iliad, Book XIII., Menelaus addresses Jupiter in the following words : “ O Father Jove ! in wisdom, “ they say, thou excellest both men and gods. Yet “ all these ills proceed from thee ; for the wicked “ thou dost aid in war. Thou art a friend to the “ Trojans, whose souls delight in force, who are “ never glutted with blood.” The gods were often treated with a sort of contemptuous familiarity, and employed in very low offices. Nothing is more common, than to introduce them as actors in Greek tragedies ; frequently for trivial purposes : Apollo comes upon the stage most courteously to acquaint the audience with the subject of the play. Why is this not urged by our critics, as classical authority against the rule of Horace, *Nec deus interfit nisi dignus vindice nodus* *. Homer makes very useful servants of his gods. Minerva in particular, is a faithful attendant upon Ulysses. She acts the herald, and calls the chiefs to council †. She marks the place where a great stone fell that was thrown by Ulysses ‡. She assists Ulysses

* Nor let a god in person stand display'd.
Unless the labouring plot deserve his aid.

FRANCIS.

† Odyssey, Book VIII.

‡ Book VIII.

Ulysses to hide his treasure in a cave*, and helps him to wrestle with the beggar †. Ulysses being tost with cares in bed, she descends from heaven to make him fall asleep ‡. This last might possibly be squeezed into an allegory, if Minerva were not frequently introduced where there is no place for an allegory. Jupiter, Book xvii. of the Iliad, is introduced comforting the steeds of Achilles for the death of Patroclus. Creusa keeps it a profound secret from her husband, that she had a child by Apollo. It was held as little honourable in Greece to commit fornication with a god as with a man. It appears from Cicero §, that when Greek philosophers began to reason about the deity, their notions were wonderfully crude. One of the hardest morsels to digest in Plato's philosophy, was a doctrine, That God is incorporeal; which by many was thought absurd, for that, without a body, he could not have senses, nor prudence, nor pleasure. The religious creed of the Romans seems to have been little less impure than that of the Greeks. It was a ceremony of theirs, in besieging a town, to evocate the tutelar deity, and to tempt him by a reward to betray his friends and votaries. In that ceremony, the name of the tutelar deity was thought of importance; and for that reason, the tutelar deity of Rome was a profound se-

S 3

cret.

§ Lib. i. De natura deorum.

cret*. Appian of Alexandria, in his book of the Parthian war, reports, that Anthony, reduced to extremity

* The form of the *evocatio* follows. “Tuo ductu, inquit, Pythie Apollo, tuoque numine instinctus, pergo ad delendam urbem Veios : tibi que hinc decimam partem prædæ voveo. Te simul, Juno Regina, quæ nunc Veios colis, precor, ut nos victores in nostram tuamque mox futuram urbem sequare : ubi te, dignum amplitudine tua, templum accipiat.” *Titus Livius, lib. 5. cap. 21.*—[In English thus : Under thy guidance and divine inspiration, O Pythian Apollo, I march to the destruction of *Veii* ; and to thy shrine I devote a tenth of the plunder. Imperial Juno, guardian of *Veii*, deign to prosper our victorious arms, and a temple shall be erected to thy honour, suitable to the greatness and majesty of thy name.”]—But it appears from Macrobius, that they used a form of evocation even when the name of the tutelar deity was unknown to them. “Si deus, si dea est, cui populus civitasque Carthaginiensis est in tutela, teque maxime ille qui urbis hujus populi que tutelam recipisti, precor, veneror que, veniam que a vobis peto, ut vos populum civitatemque Carthaginiensem deferatis, loca, templa, sacra, urbemque eorum relinquiatis, absque his abeatis, eique populo, civitati que metum, formidinem, oblivionem, injiciatis, proditi que Romam ad me meosque veniatis, nostra que vobis loca, templa, sacra, urbs, acceptior probatior que sit, mihi que populo que Romano militibusque meis præpositi sitis, ut sciamus intelligamusque. Si ita feceritis, voveo vobis templa ludosque facturum.” *Saturnal. lib. 3. cap. 9.*—[In English thus. “That divinity, whether god or goddess, who is the guardian of the state of Carthage, that divinity I invoke, I pray and supplicate, that he will desert that perfidious people. Honour not with thy presence

extremity by the Parthians, lifted up his eyes to heaven, and besought the gods, that if any of them were jealous of his former happiness, they would pour their vengeance upon his head alone, and suffer his army to escape. The story of Paris and the three goddesses gives no favourable impression, either of the morals or religion of the Romans. Juno, and her two sister-deities submit their dispute about beauty to the shepherd Paris, who conscientiously pronounces in favour of Venus. But

————— *manet alta mente repositum*
Judicium Paridis, spreteque injuria formæ.

Juno, not satisfied with wreaking her malice against the honest shepherd, declares war against his whole nation. Not even Eneas, though a fugitive in foreign lands, escapes her fury. Their great god Jupiter is introduced on the stage by Plautus, to deceive Alcmena, and to lie with her in the shape of her husband. Nay, it was the opinion of the Romans, that this play made much for the honour

S 4

of

“ fence their temples, their ceremonies, nor their city; abandon them to all their fears, leave them to infamy and oblivion. Fly hence to Rome, where, in my country, and among my fellow-citizens, thou shalt have nobler temples, and more acceptable sacrifices; thou shalt be the tutelar deity of this army, and of the Roman state. On this condition, I here vow to erect temples and institute games to thine honour.”]

of Jupiter; for in times of national troubles and calamities, it was commonly acted to appease his anger;—a pregnant instance of the gross conceptions of that warlike people in morality, as well as in religion.

A division of invisible beings into benevolent and malevolent, without any mixture of these qualities, makes the third stage. The talents and feelings of men, refine gradually under good government: social amusements begin to make a figure: benevolence is highly regarded; and some men are found without gall. Having thus acquired a notion of pure benevolence, and finding it exemplified in some eminent persons, it was an easy step in the progress of theological opinions, to bestow the same character upon some superior beings. This led men to distinguish their gods into two kinds, essentially different, one entirely benevolent, another entirely malevolent; and the difference between good and ill, which are diametrically opposite, favoured that distinction. Fortunate events out of the common course of nature, were accordingly ascribed to benevolent deities; and unfortunate events of that kind to malevolent. In the time of Pliny the elder, malevolent deities were worshipped at Rome. He mentions a temple dedicated to *Bad Fortune*, another to the disease termed a *Fever*. The Lacedemonians worshipped *Death* and *Fear*; and the people of Cadiz *Poverty* and *Old Age*; in order to deprecate

deprecate their wrath. Such gods were by the Romans termed *Averrunci*, as putting away evil.

Conviction of one supreme benevolent Deity, and of inferior deities, some benevolent, some malevolent, is the fourth stage. Such conviction, which gains ground in proportion as morality ripens, arises from a remarkable difference between gratitude and fear. Willing to show my gratitude for some kindness proceeding from an unknown hand, several persons occur to my conjectures; but I always fix at last upon one person as the most likely. Fear is of an opposite nature: it expands itself upon every suspicious person, and blackens them all. Thus, upon providential good fortune above the power of man, we naturally rest upon one benevolent Deity as the cause; and to him we confine our gratitude and veneration. When, on the other hand, we are struck with an uncommon calamity, every thing that possibly may be the cause raises terror. Hence the propensity in savages to multiply objects of fear; but to confine their gratitude and veneration to a single object. Gratitude and veneration, at the same time, are of such a nature, as to raise a high opinion of the person who is their object; and when a single invisible being is understood to pour out blessings with a liberal hand, good men, inflamed with gratitude, put no bounds to the power and benevolence of that being. And thus one supreme benevolent Deity
comes

comes to be recognized among the more enlightened savages. With respect to malevolent deities, as they are supposed to be numerous, and as there is no natural impulse for elevating one above another; they are all of them held to be of an inferior rank, subordinate to the supreme Deity.

Unity in the supreme Being hath, among philosophers, a more solid foundation, namely, unity of design and of order in the creation and government of this world*. At the same time, the passion of gratitude, which leads even savages to the attribute of unity in the supreme Being, prepares the mind for relishing the proof of that unity, founded on the unity of his works.

The belief of one supreme benevolent Deity, and of subordinate deities benevolent and malevolent, is and has been more universal than any other religious creed. I confine myself to a few instances; for a complete enumeration would be endless. The different savage tribes in Dutch Guiana, agree pretty much in their articles of faith.

* All things in the universe are evidently of a piece. Every thing is adjusted to every thing; one design prevails through the whole: and this uniformity leads the mind to acknowledge one author; because the conception of different authors without distinction of attributes or operations, serves only to perplex the imagination, without bestowing any satisfaction on the understanding. *Natural History of Religion, by David Hume, Esquire.*

faith. They hold the existence of one supreme Deity, whose chief attribute is benevolence; and to him they ascribe every good that happens. But as it is against his nature to do ill, they believe in subordinate malevolent beings, like our devil, who occasion thunder, hurricanes, earthquakes, and who are the authors of death, diseases, and of every misfortune. To these devils, termed in their language *Rowaboos*, they direct every supplication, in order to avert their malevolence; while the supreme Deity is entirely neglected: so much more powerful among savages, is fear than gratitude. The North American savages have all of them a notion of a supreme Deity, creator and governor of the world; and of inferior deities, some good, some ill. These are supposed to have bodies, and to live much as men do, but without being subjected to any distress. The same creed prevails among the negroes of Benin and Congo, among the people of New Zeland, among the inhabitants of Java, of Madagascar, of the Molucca islands, and of the Caribbee islands. The Chingulense, a tribe in the island of Ceylon, acknowledge one God creator of the universe, with subordinate deities who act as his deputies: agriculture is the peculiar province of one, navigation of another. The creed of the Tonquinese is nearly the same. The inhabitants of Otaheité, termed *King George's Island*, believe in one supreme Deity; and in inferior deities without

without end, who preside over particular parts of the creation. They pay no adoration to the supreme Deity, thinking him too far elevated above his creatures to concern himself with what they do. They believe the stars to be children of the sun and moon, and an eclipse to be the time of copulation. The Naudowessies are the farthest remote from our colonies of any of the North Americans whom we are in any degree acquainted with. They acknowledge one supreme Being or giver of life, to whom they look up as the source of good, and from whom no evil can proceed. They acknowledge also a bad spirit of great power, by whom all the evils that befall mankind are inflicted. To him they pray in their distresses; begging that he will either avert their troubles or mitigate them. They acknowledge beside good spirits of an inferior degree, who in their particular departments contribute to the happiness of mortals. But they seem to have no notion of a spirit divested of matter. They believe their gods to be of the human form, but of a nature more excellent than man. They believe in a future state; and that their employments will be similar to what they are engaged in here, but without labour or fatigue; in short, that they shall live for ever in regions of plenty, and enjoy in a higher degree every gratification they delight in here. According to Arnobius, certain Roman deities presided over the various operations of men.

men. Venus presided over carnal copulation; Puta assisted at pruning trees; and Peta in requesting benefits: Nemestrinus was god of the woods, Nodatus ripened corn, and Terentius helped to thrash it; Vibilia assisted travellers: orphans were under the care of Orbona, and dying persons, of Nænia; Ossilago hardened the bones of infants; and Mellonia protected bees, and bestowed sweetness on their honey. The inhabitants of the Island of Formosa recognize two supreme deities in company; the one a male, god of the men, the other a female, goddess of the women. The bulk of their inferior deities are the souls of upright men, who are constantly doing good, and the souls of wicked men, who are constantly doing ill. The inland negroes acknowledge one supreme Being, creator of all things; attributing to him infinite power, infinite knowledge, and ubiquity. They believe that the dead are converted into spirits, termed by them *Iana-nini*, or protectors, being appointed to guard their parents and relations. The ancient Goths and several other northern nations, acknowledged one supreme Being; and at the same time worshipped three subordinate deities; Thor, reputed the same with Jupiter; Oden, or Woden, the same with Mars; and Friga, the same with Venus*. So-
crates

* "Regnator omnium Deus, cætera subjecta atque parentia;" *Tacitus de moribus Germanorum, cap. 39.* [In English thus: "One God the ruler of all; the rest inferior and subordinate."]

crates taking the cup of poison from the executioner, held it up toward heaven, and pouring out some of it as an oblation to the supreme Deity, pronounced the following prayer: "I implore the immortal God that my translation hence may be happy." Then turning to Crito, said, "O Crito! I owe a cock to Esculapius, pay it." From this incident we find that Socrates, soaring above his countrymen, had attained to the belief of a supreme benevolent Deity. But in that dark age of religion, such purity is not to be expected from Socrates himself, as to have rejected subordinate deities, even of the mercenary kind.

Different offices being assigned to the gods, as above mentioned, proper names followed of course. And when a god was ascertained by a name, the busy mind would naturally proceed to trace his genealogy.

As unity in the Deity was not an established doctrine in the countries where the Christian religion was first promulgated, Christianity could not fail to prevail over Paganism; for improvements in the mental faculties lead by sure steps, though slow, to one God.

The fifth stage is, the belief of one supreme benevolent Deity, as in that immediately foregoing, with many inferior benevolent deities, and one only who is malevolent. As men improve in natural knowledge and become skilful in tracing causes from effects, they find much less malice and ill-

ill-design than was imagined: humanity at last prevails, which with improved knowledge banish the suspicion of ill-design, in every case where an event can be explained without it. In a word, a settled opinion of good prevailing in the world, produced conviction among some nations, less ignorant than their neighbours and less brutal, that there is but one malevolent subordinate deity, and good subordinate deities without number. The ancient Persians acknowledged two principles; one all good and all powerful, named *Hormuz*, and by the Greeks corruptly *Oromazes*; the other evil, named *Ahariman*, and by the Greeks *Arimanes*. Some authors assert, that the Persians held these two principles to be co-eternal; others that Oromazes first subsisted alone, that he created both light and darkness, and that he created Arimanes out of darkness. That the latter was the opinion of the ancient Persians, appears from their Bible, termed the *Sadder*; which teaches, That there is one God supreme over all, many good angels, and but one evil spirit. Plutarch acquaints us, that Hormus and Ahariman, ever at variance, formed each of them creatures of their own stamp; that the former created good genii, such as goodness, truth, wisdom, justice; and that the latter created evil genii, such as infidelity, falsehood, oppression, theft. This system of theology, commonly termed the *Manichean System*, is said to be also the religious creed of Pegu, with the following

ing

ing addition, that the evil principle only is to be worshipped; which is abundantly probable, as fear is a predominant passion in barbarians. The people of Florida believe a supreme benevolent Deity, and a subordinate deity that is malevolent: neglecting the former, who, they say, does no harm, they bend their whole attention to soften the latter, who, they say, torments them day and night. The inhabitants of Darien acknowledge but one evil spirit, of whom they are desperately afraid. The Hottentots, mentioned by some writers as altogether destitute of religion, are on the contrary farther advanced toward its purity, than some of their neighbours. Their creed is, That there is a supreme Being, who is goodness itself; of whom they have no occasion to stand in awe, as he is incapable by his nature to hurt them; that there is also a malevolent spirit, subordinate to the former, who must be served and worshipped in order to avert his malice. The Epicurean doctrine with respect to the gods in general, That being happy in themselves they extend not their providential care to men, differs not widely from what the Hottentot believes with respect to the supreme Being.

Having traced the sense of deity, from its dawn in the grossest savages to its approaching maturity among enlightened nations, we proceed to the last stage of the progress, which makes the true system of theology; and that is, conviction of a supreme

preme Being, boundless in every perfection, without subordinate deities, benevolent or malevolent. Savages learn early to trace the chain of causes and effects, with respect to ordinary events: they know that fasting produces hunger, that labour occasions weariness, that fire burns, that the sun and rain contribute to vegetation. But when they go beyond such familiar events, they lose sight of cause and effect: the changes of weather, of winds, of heat and cold, impress them with a notion of chance: earthquakes, hurricanes, storms of thunder and lightning, which fill them with terror, are ascribed to malignant beings of greater power than man. In the progress of knowledge light begins to break in upon them: they discover, that such phenomena, however tremendous, come under the general law of cause and effect; and that there is no ground for ascribing them to malignant spirits. At the same time, our more refined senses ripen by degrees: social affections come to prevail, and morality makes a deep impression. In maturity of sense and understanding, benevolence appears more and more; and beautiful final causes are discovered in many of nature's productions, that formerly were thought useless, or perhaps hurtful: and the time may come, we have solid ground to hope that it will come, when doubts and difficulties about the government of Providence, will all of them be cleared up; and every event be found conducive

to the general good. Such views of Providence banish malevolent deities ; and we settle at last in a most comfortable opinion ; either that there are no such beings ; or that, if they exist and are permitted to perpetrate any mischief, it is in order to produce greater good *. Thus, through a long maze of errors, man arrives at true religion, acknowledging but one Being, supreme in power, intelligence, and benevolence, who created all other beings, to whom all other beings are subjected, and who directs every event to answer the best purposes. This system is true theology †.

Having gone through the different stages of religious belief, in its gradual progress toward truth and purity, I proceed to a very important article, The history of tutelar deities. The belief of tutelar deities preceded indeed several of the stages mentioned, witness the tutelar deities of Greece and Rome ; but as it is not connected with any one of them exclusive of the rest, the clearness of method required it to be postponed to all of them. This belief, founded on selfishness, made

a

* The Abyssinians think that the ascribing to the devil the wicked acts of which the Portuguese declare him to be guilty, is falling into the error of the Manichees, who admit two principles, one good, one evil.

† Pliny seems to relish the doctrine of unity in the Deity : but is at a loss about forming any just conception of him, sometimes considering the world to be our only deity, sometimes the sun.

a rapid progress after property in the goods of fortune was established. The Greeks, the Romans, and indeed most nations that were not mere savages, appropriated to themselves tutelar deities, who were understood to befriend them upon all occasions ; and, in particular, to fight for them against their enemies. The Iliad of Homer is full of miraculous battles between the Greeks and Trojans, the tutelar deities mixing with the contending parties, and partaking of every disaster, death only excepted, which immortals could not suffer. The *lares, penates*, or household-gods, of Indostan, of Greece, and of Rome, bear witness, that every family, perhaps every person, was thought to be under the protection of a tutelar deity. Alexander ab Alexandro gives a list of tutelar deities. Apollo and Minerva were the tutelar deities of Athens ; Bacchus and Hercules of the Bœotian Thebes ; Juno of Carthage, Samos, Sparta, Argos, and Mycené ; Venus of Cyprus ; Apollo of Rhodes and of Delphos ; Vulcan of Lemnos ; Bacchus of Naxos ; Neptune of Tenedos, &c. The poets testify, that even individuals had tutelar deities :

Mulciber in Trojam, pro Troja stabat Apollo :

Æqua Venus Teucris, Pallas iniqua fuit.

Oderat Æneam, propior Saturnia Turno ;

Ille tamen Veneris numine tutus erat.

*Sæpe ferox cautum petiit Neptunus Ulyſſem ;
Eripuit patruo sæpe Minerva ſuo *.*

Though the North-American ſavages recognize a ſupreme Being, wiſe and benevolent, and alſo ſubordinate benevolent beings who are entrusted with the government of the world ; yet as the great diſtance of theſe ſubordinate beings, and the full occupation they have in general government, are ſuppoſed to make them overlook individuals, every man has a tutelar deity of his own, termed *Manitou*, who is conſtantly invoked during war to give him victory over his enemies. The Natches, bordering on the Miſſiſſippi, offer up the ſkulls of their enemies to their god, and depoſite them in his temple. They conſider that Being as their tutelar deity, who aſſiſts them againſt their enemies, and to whom therefore the ſkull of an enemy muſt be an acceptable offering. Though they worship the ſun, who impartially ſhines on all mankind ; yet ſuch is their partiality, that they conſider themſelves as his choſen people, and that their enemies are his enemies.

A

- * “ The rage of Vulcan, and the martial maid,

“ O’er winds and waves Minerva’s power prevails †.”

† Ovid. *Trift.* lib. 1. eleg. 2.

A belief so absurd shews woful imbecillity in human nature. Is it not obvious, that the great God of heaven and earth governs the world by inflexible laws, from which he never can swerve in any case, because they are the best possible in every case? To suppose any family or nation to be an object of his peculiar love, is no less impious, than to suppose any family or nation to be an object of his peculiar hatred: they equally arraign Providence of partiality. Even the Goths had more just notions of the Deity. Totila, recommending to his people justice and humanity, says, "*Quare sic habete, ea quæ amari ab hominibus solent ita vobis salva fore, si justitiæ reverentiam servaveritis. Si transitis in mores alios, etiam Deum ad hostes transiturum. Neque enim ille, aut omnibus omnino hominibus, aut uni alicui genti, addicit se socium *.*"

That God was once the tutelar deity of the Jews, is true; but not in the vulgar acceptation of that term, importing a deity chosen by a people to be their patron and protector. The orthodox

T 3

faith

* "Be assured of this, that while ye preserve your reverence for justice, ye will enjoy all the blessings which are estimable among mankind. If ye refuse to obey her dictates, and your morals become corrupted, God himself will abandon you, and take the part of your enemies. For although the benevolence of that power is not partially confined to tribe or people, yet in the eye of his justice all men are not equally the objects of his approbation."

faith is, “ That God chose the Jews as his peculiar people, not from any partiality to them, but that there might be one nation to keep alive the knowledge of one supreme Deity ; which should be prosperous while they adhered to him, and unprosperous when they declined to idolatry ; not only in order to make them persevere in the true faith, but also in order to exemplify to all nations the conduct of his Providence.” It is certain, however, that the perverse Jews claimed God Almighty as their tutelar deity in the vulgar acceptation of the term. And this error throws light upon an incident related in the Acts of the Apostles. There was a prophecy firmly believed by the Jews, that the Messiah would come among them in person to restore their kingdom. The Christians gave a different sense to the prophecy, namely, that the kingdom promised was not of this world. And they said, that Christ was sent to pave the way to their heavenly kingdom, by obtaining forgiveness of their sins. At the same time, as the Jews held all other nations in abhorrence, it was natural for them to conclude, that the Messiah would be sent to them only, God’s chosen people : for which reason, even the apostles were at first doubtful about preaching the gospel to any but to the Jews*. But the apostles reflecting, that it was one great purpose of the mission, to banish from the Jews their grovelling and

* See the xth and xith chapters of the Acts of the Apostles.

and impure notion of a tutelar deity, and to proclaim a state of future happiness to all who believe in Christ, they proceeded to preach the gospel to all men : “ Then Peter opened his mouth, “ and said, Of a truth I perceive, that God is no “ respecter of persons ; but in every nation, he “ that feareth him, and worketh righteousness, is “ accepted with him *.” The foregoing reasoning, however, did not satisfy the Jews : they could not digest the opinion, that God sent his Messiah to save all nations, and that he was the God of the Gentiles as well as of the Jews. They stormed against Paul in particular, for inculcating that doctrine †.

Considering that religion in its purity was established by the gospel, is it not amazing, that even Christians fell back to the worship of tutelar deities ? They did not indeed adopt the absurd opinion, that the supreme Being was their tutelar deity : but they held, that there are divine persons subordinate to the Almighty, who take under their care nations, families, and even individuals ; an opinion that differs not essentially from that of tutelar deities among the Heathens. That opinion, which flatters self-love, took root in the fifth century, when the deification of saints was introduced, similar to the deification of heroes among

T 4

the

* Acts of the Apostles, chap. x. 34.

† Acts of the Apostles, chap. xiii.

the ancients. People are fond of friends to be their intercessors ; and with regard to the Deity, deified saints were thought the properest intercessors. Temples were built and dedicated to them ; and solemn rites of worship instituted to render them propitious. It was imagined, that the souls of deified saints are at liberty to roam where they list, and that they love the places where their bodies are interred ; which accordingly made the sepulchres of the saints a common rendezvous of supplicants. What paved the way to notions so absurd, was the gross ignorance that clouded the Christian world, after the northern barbarians became masters of Europe. In the seventh century, the bishops were so illiterate, as to be indebted to others for the shallow sermons they preached ; and the very few of that order who had any learning, satisfied themselves with composing insipid homilies, collected from the writings of Augustin and Gregory. In the ninth century, matters grew worse and worse ; for these saints, held at first to be mediators for Christians in general, were now converted into tutelar deities in the strictest sense. An opinion prevailed, that such saints as are occupied about the souls of Christians in general, have little time for individuals ; which led every church and every private Christian, to elect for themselves a particular saint, to be their patron or tutelar deity. That practice made it necessary to deify saints without end, in order to furnish a
tutelar

tutelar deity to every individual. The dubbing of saints, became a new source of abuses and frauds in the Christian world : lying wonders were invented, and fabulous histories composed, to celebrate exploits that never were performed, and to glorify persons who never had a being. And thus religion among Christians, sunk down to as low a state as it had been among Pagans.

There still remains upon hand, a capital branch of our history ; and that is idolatry, which properly signifies the worshipping visible objects as deities. But as idolatry evidently sprung from religious worship, corrupted by the ignorant and brutish ; it will make its appearance with more advantage in the next chapter, of which religious worship is the subject.

We have thus traced with wary steps, the gradual progress of theology through many stages, corresponding to the gradual openings and improvements of the human mind. But though that progress, in almost all countries, appears uniform with respect to the order of succession, it is far otherwise with respect to the quickness of succession : nations, like individuals, make a progress from infancy to maturity ; but they advance not with an equal pace, some making a rapid progress toward perfection in knowledge and in religion, while others remain ignorant barbarians. The religion of Hindostan, if we credit history or tradition,

dition, had advanced to a considerable degree of purity and refinement, at a very early period. The Hindostan Bible, termed *Cbatabbbade* or *Sbastab*, gives an account of the creation, lapse of the angels, and creation of man; instructs us in the unity of the Deity, but denies his prescience, as being inconsistent with free will in man; all of them profound doctrines of an illuminated people, to establish which a long course of time must have been requisite, after wandering through errors without number. Compared with the Hindoos in theology, even the Greeks were mere savages. The Grecian gods were held to be little better than men, and their history, as above mentioned, corresponds to the notion entertained of them.

In explaining the opinions of men with respect to Deity, I have confined my view to such opinions as are suggested by principles or biases that make a part of common nature; omitting many whimsical notions, no better than dreams of a roving imagination. The plan delineated, shows wonderful uniformity in the progress of religion through all nations. That irregular and whimsical notions are far otherwise, is not wonderful. Take the following specimen. The Kamskatkans are not so stupidly ignorant, as to be altogether void of curiosity. They sometimes think of natural appearances.—Rain, say they, is some deity pissing upon them; and they imagine the
the

the rainbow to be a party-coloured garment, put on by him in preparing for that operation. They believe wind to be produced by a god shaking with violence his long hair about his head. Such tales will scarce amuse children in the nursery. The inhabitants of the island Celebes formerly acknowledged no gods but the sun and the moon, which were held to be eternal. Ambition for superiority made them fall out. The moon being wounded in flying from the sun, was delivered of the earth.

Hitherto of the gradual openings of the human mind with respect to Deity. I close this section with an account of some unsound notions concerning the conduct of Providence, and concerning some speculative matters. I begin with the former.

In days of ignorance, the conduct of Providence is very little understood. Far from having any notion, that the government of this world is carried on by general laws, which are inflexible because they are the best possible, every important event is attributed to an immediate interposition of the Deity. As the Grecian gods were thought to have bodies like men, and like men to require nourishment; they were imagined to act like men, forming short-sighted plans of operation, and varying them from time to time, according to exigencies. Even the wise Athenians had an utter aversion at philosophers who attempted to account
for

for effects by general laws: such doctrine they thought tended to fetter the gods, and to prevent them from governing events at their pleasure. An eclipse being held a prognostic given by the gods of some grievous calamity, Anaxagoras was accused of Atheism for attempting to explain the eclipse of the moon by natural causes: he was thrown into prison, and with difficulty was relieved by the influence of Pericles. Protagoras was banished Athens for maintaining the same doctrine. Procopius overflows with signal interpositions of Providence; and Agathias, beginning at the battle of Marathon, sagely maintains, that from that time downward, there was not a battle lost but by an immediate judgment of God, for the sins of the commander, or of his army, or of one person or other. Our Saviour's doctrine with respect to those who suffered by the fall of the tower of Siloam, ought to have opened their eyes; but superstitious eyes are never opened by instruction. At the same time, it is deplorable that such belief has no good influence on manners: on the contrary, never doth wickedness so much abound as in dark times. A curious fact is related by Procopius * with respect to that sort of superstition. When Rome was besieged by the Goths and in danger of destruction, a part of the town-wall was in a tottering condition. Belisarius, proposing to fortify it, was opposed by the citizens, affirming,

* *Historia Gothica*, lib. 1.

ing, that it was guarded by St Peter. Procopius observes, that the event answered expectation ; for that the Goths, during a tedious siege, never once attempted that weak part. He adds, that the wall remained in the same ruinous state at the time of his writing. Here is a curious conceit,—Peter created a tutelar deity, able and willing to counteract the laws by which God governs the material world. And for what mighty benefit to his votaries ? Only to save them five or fifty pounds in rebuilding the crazy part of the wall.

It is no less inconsistent with the regular course of Providence, to believe, as many formerly did, that in all doubtful cases the Almighty, when appealed to, never fails to interpose in favour of the right side. The inhabitants of Constantinople, ann. 1284, being split into parties about two contending patriarchs, the Emperor ordered a fire to be made in the church of St Sophia, and a paper for each party to be thrown into it ; never doubting, but that God would save from the flames the paper given in for the party whose cause he espoused. But, to the utter astonishment of all beholders, the flames paid not the least regard to either. The same absurd opinion gave birth to the trial by fire, by water, and by single combat. And it is not a little remarkable, that such trials were common among many nations that had no intercourse one with another : even the enlightened people of Indostan try crimes by dipping the hand of a suspected

spected person in boiling oil. In cases of doubtful proof, they recur in the kingdom of Siam, as in many other countries, to artificial proofs. One is to walk barefoot through fire. As the Siamites are accustomed to walk barefooted, their soles become hard ; and those who have skill have a good chance to escape without burning. The art is to set down their feet on the fire with all their weight, which excludes the air, and prevents the fire from burning. Another proof is by water. The accuser and accused are thrown into a pond ; and he who keeps the longest under water is declared to be in the right.—Such uniformity is there with respect even to superstitious opinions. Pope Gregory VII. insisting that the Kings of Castile and Aragon should lay aside their Gothic liturgy for the Romish, the matter was put to trial by single combat ; and two champions were chosen to declare by victory the opinion of God Almighty. The Emperor Otho I. observing the law-doctors to differ about the right of representation in land-estates, appointed a duel ; and the right of representation gained the victory. If any thing can render such a doctrine palatable, it is the believing in a tutelar deity, who with less absurdity may interpose in behalf of a favourite opinion, or of a favourite people. Appian gravely reports, that when the city of Rhodes was besieged by Mithridates, a statue of the goddess Isis was seen to dart flames of fire upon a bulky engine, raised by the besiegers to overtop the wall.

Historians

Historians mention an incident that happened in the island Celebes, founded on a belief of the same kind with that above mentioned. About two centuries ago, some Christian and some Mahometan missionaries made their way to that island. The chief king, struck with the fear of hell taught by both, assembled a general council ; and stretching his hands towards heaven, addressed the following prayer to the supreme Being. “ Great God, from
“ thee I demand nothing but justice, and to me
“ thou owest it. Men of different religions have
“ come to this island, threatening eternal punish-
“ ment to me and my people if we disobey thy
“ laws. What are thy laws? Speak, O my God,
“ who art the author of nature : thou knowest the
“ bottom of our hearts, and that we can never in-
“ tentiously disobey thee. But if it be unwor-
“ thy of thy essence to employ the language of
“ men, I call upon my whole people, the sun
“ which gives me light, the earth which bears me,
“ the sea which surrounds my empire, and upon
“ thee thyself, to bear witness for me, that in the
“ sincerity of my heart I wish to know thy will ;
“ and this day I declare, that I will acknowledge
“ as the depositaries of thy oracles, the first mini-
“ sters of either religion that shall land on this
“ island.”

It is equally erroneous to believe, that certain ceremonies will protect one from mischief. In the dark ages of Christianity, the signing with the
figure

figure of a cross, was held not only to be an antidote against the snares of malignant spirits, but to inspire resolution for supporting trials and calamities: for which reason no Christian in those days undertook any thing of moment, till he had used that ceremony. It was firmly believed in France, that a gold or silver coin of St Louis, hung from the neck, was a protection against all diseases: and we find accordingly a hole in every remaining coin of that king, for fixing it to a ribband. In the minority of Charles VIII. of France, the three estates, ann. 1484, supplicated his Majesty, that he would no longer defer the being anointed with the holy oil, as the favour of Heaven was visibly connected with that ceremony. They affirmed, that his grandfather Charles VII. never prospered till he was anointed; and that Heaven afterward fought on his side, till the English were expelled out of his kingdom*. The high altar of St Margaret's church

* That ridiculous ceremony is kept up to this day: such power has custom. Take the following sample of it: "The
 " Grand Prior of St Remi opens the holy phial, and gives
 " it to the Archbishop, who with a golden needle takes
 " some of the precious oil, about the size of a grain of
 " wheat, which he mixes with consecrated ointment. The
 " King then prostrates himself before the altar on a violet-
 " coloured carpet, embroidered with fleurs de lys, while
 " they pray. Then the King rises, and the Archbishop
 " anoints him on the crown of the head, on the stomach,
 " on the two elbows, and on the joints of the arms. Af-
 " ter

church in the island of Icolmkill, was covered with a plate of blue marble finely veined ; which has suffered from a superstitious conceit, that the smallest bit of it will preserve a ship from sinking. It has accordingly been carried off piece-meal ; and at present there is scarce enough left to make an experiment. In the Sadder, certain prayers are enjoined when one sneezes or pisses, in order to chase away the devil. Cart-wheels in Lisbon, are composed of two clumsy boards nailed together in a circular form. Though the noise is intolerable, the axles are never greased ; the noise, say they, frightens the devil from hurting their oxen.

Nay, so far has superstition been carried, as to found a belief, that the devil by magic can controul the course of Providence. A Greek bishop having dreamed that a certain miracle had failed by magic, the supposed magician and his son were condemned to die, without the least evidence but the dream. Montesquieu collects a number of circumstances, each of which, though all extremely improbable, ought to have been clearly made out, in

“ ter the several anointings, the Archbishop of Rheims,
 “ the Bishops of Laon and Beauvais close the openings of the
 “ shirt ; the High Chamberlain puts on the tunic and the
 “ royal mantle ; the King then kneels again, and is a-
 “ nointed in the palms of his hands.” Is this farce less
 ludicrous than that of an English King curing the King’s
 evil with a touch ?

in order to prove the crime*. The Emperor Theodore Lascaris, imagining magic to be the cause of his distemper, put the persons suspected to the trial of holding a red-hot iron without being burnt. In the capitularies of Charlemagne, in the canons of several councils, and in the ancient laws of Norway, punishments are enacted against those who are supposed able to raise tempests, termed *Tempestarii*. During the time of Catharine de Medicis, there was in the court of France a jumble of politics, gallantry, luxury, debauchery, superstition, and atheism. It was common to take the resemblance of enemies in wax, in order to torment them by roasting the figure at a slow fire, and pricking it with needles. If an enemy happened in one instance of a thousand to pine and die, the charm was established for ever. Sorcery and witchcraft were so universally believed in England, that in a preamble to a statute of Henry VIII. ann. 1511, it is set forth, “ That smiths, weavers, “ and women, boldly take upon them great cures, “ in which they partly use forcery and witch- “ craft.” The first printers, who were Germans, having carried their books to Paris for sale, were condemned by the parliament to be burnt alive as forcerers; and did not escape punishment but by a precipitate flight. It had indeed much appearance of forcery, that a man could write so many copies of a book, without the slightest variation.

Superstition

* L'Esprit des loix, lib. 12. ch. 5.

Superstition flourishes in times of danger and dismay. During the civil wars of France and of England, superstition was carried to extravagance. Every one believed in magic, charms, spells, sorcery, witchcraft, &c. The most absurd tales past current as gospel truths. Every one is acquainted with the history of the Duchess of Beaufort, who was said to have made a compact with the devil, to procure Henry IV. of France for her lover. This ridiculous story was believed through all France; and is reported as a truth by the Duke de Sully. Must not superstition have been at a high pitch, when that great man was infected with it? James Howel, eminent for knowledge and for the figure he made during the civil wars of England, relates as an undoubted truth an absurd fiction concerning the town of Hamelen, that the devil with a bagpipe enticed all the rats out of the town, and drowned them in a lake; and because his promised reward was denied, that he made the children suffer the same fate. Upon a manuscript doubting of the existence of witches, ~~he~~ observes, “ that there are some men of a mere negative genius, who cross and puzzle the clearest truths with their *but, yet, if*: they will flap the lie in Truth’s teeth, though she visibly stands before their face without any vizard. Such perverse cross-grained spirits are not to be dealt with by arguments, but palpable proofs: as if one deny that the fire burns, or that he hath a nose on his

U 2

“ face ;

“ face ; there is no way to deal with him, but
“ to pull him by the tip of the one and put his
“ finger into the other.”

In an age of superstition, men of the greatest judgment are infected : in an enlightened age, superstition is confined among the vulgar. Would one imagine that the great Louis of France is an exception. It is hard to say, whether his vanity or his superstition was the most eminent. The Duke of Luxembourg was his favourite and his most successful general. In order to throw the Duke out of favour, his rivals accused him of having a compact with the devil. The King permitted him to be treated with great brutality, on evidence no less foolish and absurd, than that on which old women were some time ago condemned as witches.

There are many examples of the attributing extraordinary virtue to certain things, in themselves of no significance. The Hungarians were possessed of a golden crown, sent from heaven with the peculiar virtue, as they believed, of bestowing upon the person who wore it, an undoubted title to be their king.

But the most extraordinary effort of absurd superstition, is a persuasion, that one may controul the course of Providence, by making a downright bargain with God Almighty to receive from him *quid pro quo*. A herd of Tartars in Siberia, named by the Russians *Baravinskoi*, have in every hut a wooden

en

en idol about eighteen inches high ; to which they address their prayers for plenty of game in hunting, promising it, if successful, a new coat or a new bonnet : a sort of bargain abundantly brutish ; and yet more excusable in mere savages, than what is made with the Virgin Mary by enlightened Roman Catholics ; who, upon condition of her relieving them from distress, promise her a waxen taper to burn on her altar. Philip II. of Spain made a vow, that, upon condition of gaining the battle of St Quintin, he would build the monastery of Escorial ; as if an establishment for some idle monks, could be a motive with the Great God to vary the course of his Providence *. Beside the absurdity of thinking that such vows can have the effect to alter the established laws of Providence ; they betray a most contemptible notion of the Deity, as if his favours, like a horse or a cow, could be purchased with money.

But, however loose and disjointed events appear to the ignorant, when viewed as past or as passing ; future events take on a very different appearance. The doctrine of prognostics, is evidently founded

U 3

upon

* Having gained the battle of St Quintin on the festival of St Laurence, Philip reckoned himself obliged to the saint for this victory, as much as to God Almighty ; and accordingly, he not only built the monastery he had vowed, but also a church for the saint, and a palace for himself, all under one roof : and, what is not a little ludicrous, the edifice is built in resemblance of a gridiron, which, according to the legend, was the instrument of Laurence's martyrdom.

upon a supposition that future events are unalterably fixed ; for otherwise that doctrine would appear absurd, even to the ignorant. No bias in human nature has greater influence, than curiosity about futurity ; which in dark ages governs without controul : men with no less folly than industry have ransacked the earth, the sea, the air, and even the stars, for prognostics of future events. The Greeks had their oracles, the Romans their augurs, and all the world their omens. The Grecian oracles and the Roman auguries, are evidently built upon their belief of tutelar deities ; and the numberless omens that influence weak people in every country, seem to rest upon the same foundation *. Ancient histories are stuffed with omens, prodigies, and prognostics : Livy overflows with fooleries of that kind. Endless are the adverse omens reported by Appian of Alexandria, that are said to have given warning of the defeat of Crassus by the Parthians ; and no fewer in number are those which happened at the death of the Emperor Hadrian, if we believe Spartianus. Lampri- dius, with great gravity, recites the omens which prognosticated

* It is no wonder that the Romans were superstitiously addicted to omens and auguries : like mere savages, they put no value upon any science but that of war ; and, for that reason, they banished all philosophers, as useless members of society. Thus, that nation, so fierce and so great in war, surrendered themselves blindly to superstition, and became slaves to imaginary evils. Even their gravest historians were deeply tainted with that disease.

prognosticated that Alexander Severus would be Emperor : he was born the same day on which Alexander the Great died : he was brought forth in a temple dedicated to Alexander the Great : he was named *Alexander* ; and an old woman gave to his mother, a pigeon's egg of a purple colour produced on his birth-day. A comet is an infallible prognostic of the death of a king. But of what king ? Why, of the king who dies next.—Suetonius, with the solemnity of a pulpit-instructor, informs us, that the death of the Emperor Claudius was predicted by a comet ; and of Tiberius, by the fall of a tower during an earthquake *. Such opinions, having a foundation in our nature, take fast hold of the mind, when invigorated by education and example. Even philosophy is not sufficient to eradicate them but by slow degrees : witness Tacitus, the most profound of all historians, who cannot forbear to usher in the death of the Emperor Otho, with a foolish account of a strange unknown bird appearing at that time. He indeed, with decent reserve, mentions it only as a fact reported by others ; but from the glow of his narrative it is evident, that the story had made an impression upon him. When Onofander wrote his military institutions, which was in the fourth century, the intrails of an animal sacrificed were still depended on as a prognostic of good or bad fortune.

U 4

* Charlemagne, though an eminent astronomer for his time, was afraid of comets and eclipses.

fortune. And in chap. 15. he endeavours to account for the misfortunes that sometimes happened after the most favourable prognostics; laying the blame, not upon the prognostic, but upon some cross accident that was not foreseen by the tutelar deity. The ancient Germans drew many of their omens from horses: “*Proprium gentis, equorum*
 “*præfagia ac monitus experiri. Publicè aluntur*
 “*iisdem nemoribus ac lucis, candidè, et nullo*
 “*mortali opere contacti, quos pressos sacro curru,*
 “*facerdos, ac rex, vel princeps civitatis, comitan-*
 “*tur, hinnitusque ac fremitus observant. Nec*
 “*ulli auspicio major fides, non solum apud ple-*
 “*bem, sed apud procures, apud sacerdotes* †.*”
 There is scarce a thing seen or imagined, but what the inhabitants of Madagascar consider as a prognostic of some future event. The Hindoos rely on the augury of birds, precisely as the old Romans did. Though there is not the slightest probability, that an impending misfortune was ever prevented by such prognostics; yet the desire of knowing future events is so deeply rooted in our nature,

* “It is peculiar to that people, to deduce omens and præfages from horses. These animals are maintained at the public expence, in groves and forests, and are not allowed to be polluted with any work for the use of man; but being yoked in the sacred chariot, the priest, and the king, or chief of the state, attend them, and carefully observe their neighings and snortings. The greatest faith is given to this method of augury, both among the vulgar and the nobles.”

† Tacitus *De moribus Germanorum*, cap. 10. ;

nature, that omens will always prevail among the vulgar, in spite of the clearest light of philosophy *.

With respect to prophecies in particular, one apology may be made for them, that no other prognostic of futurity is less apt to do mischief. What Procopius † observes of the Sybilline oracles, is equally applicable to all prophecies, “ That it is
 “ above the sagacity of man to explain any of
 “ them before the event happen. Matters are
 “ there handled, not in any order, nor in a continued discourse: but after mentioning the distresses of Africa, for example, they give a slight touch at the Persians, the Romans, the Assyrians; then returning to the Romans, they fall
 “ flap-dash upon the calamities of Britain.” A curious example of this observation, is a book of prophecies composed in Scotland by Thomas Learmont, commonly called *Thomas the Rhymer*, because the book is in rhyme. Plutarch in the life of Cicero reports, that a spectre appeared to Cicero’s nurse, and foretold, that the child would become a great support to the Roman state; and
 most

* Is it not mortifying to human pride, that a great philosopher [*Bacon*] should think like the vulgar upon this subject? With respect to rejoicings in London upon the marriage of the daughter of Henry VII. of England to James IV. of Scotland, he says, “ not from any affection to the Scots, but from
 “ a secret instinct and inspiration of the advantages that would
 “ accrue from the match.”

† *Gothica Historia*, lib. i.

most innocently he makes the following reflection, " This might have passed for an idle tale, had not Cicero demonstrated the truth of the prediction." At that rate, if a prediction happen to prove true, it is a real prophecy ; if otherwise, it is an idle tale. There have been prophecies not altogether so well guarded as the Sybilline oracles. Napier, inventor of the logarithms, found the day of judgment to be predicted in the Revelation ; and named the very day, which unfortunately he survived. He made another prediction, but prudently named a day so distant as to be in no hazard of blushing a second time. Michel Stifels, a German clergyman, spent most of his life in attempting to discover the day of judgment ; and at last announced to his parishioners, that it would happen within a year. The parishioners, resolving to make the best of a bad bargain, spent their time merrily, taking no care to lay up provisions for another year ; and so nice was their computation, as at the end of the year to have not a morsel remaining, either of food or of industry. The famous Jurieu has shewn great ingenuity in explaining prophecies ; of which take the following instance. In his book, intituled *Accomplishment of the Prophecies*, he demonstrates, that the beast in the Apocalypse, which held the *poculum aureum plenum abominationum* *, is the Pope ; and his reason is, that the initial letters of these four Latin words compose

* " The golden cup full of abominations."

compose the word *papa*; a very singular prophecy indeed, that is a prophecy in Latin, but in no other language. The candid reader will advert, that such prophecies as relate to our Saviour and tend to ascertain the truth of his mission, fall not under the foregoing reasoning; for they do not anticipate futurity, by producing foreknowledge of future events. They were not understood till our Saviour appeared among men; and then they were clearly understood as relative to him.

There is no end of superstition in its various modes. In dark times it was believed universally, that by certain forms and invocations, the spirits of the dead could be called upon to reveal future events. A lottery in Florence, gainful to the government and ruinous to the people, gives great scope to superstition. A man who purposes to purchase tickets, must fast six and thirty hours, must repeat a certain number of Ave Marias and Pater Nosters, must not speak to a living creature, must not go to bed, must continue in prayer to the Virgin and to saints, till some propitious saint appear and declare the numbers that are to be successful. The man, fatigued with fasting, praying, and expectation, falls asleep. Occupied with the thoughts he had when awake, he dreams that a saint appears, and mentions the lucky numbers. If he be disappointed, he is vexed at his want of memory; but trusts in the saint as an infallible oracle. Again
he

he falls asleep, again sees a vision, and again is disappointed.

Lucky and unlucky days, which were so much relied on as even to be marked in the Greek and Roman kalendars, make an appendix to prophecies. The Tartars never undertake any thing of moment on a Wednesday, being held by them unlucky. The Nogayan Tartars hold every thirteenth year to be unlucky: they will not even wear a sword that year, believing that it would be their death; and they maintain, that none of their warriors ever returned who went upon an expedition in one of these years. They pass that time in fasting and prayer, and during it never marry. —The inhabitants of Madagascar have days fortunate and unfortunate with respect to the birth of children: they destroy without mercy every child that is born on an unfortunate day.

There are unlucky names as well as unlucky days. Julien Cardinal de Medicis, chosen Pope, was inclined to keep his own name. But it being observed to him by the cardinals, says Guichardin, that the popes who retained their own name had all of them died within the year, he took the name of Clement, and was Clement VII. As John was held an unlucky name for a king, John, heir to the Crown of Scotland, was persuaded to change his name into Robert; and he was Robert III.

I close this important article with a reflection that will make an impression upon every rational person.

person. The knowledge of future events, as far as it tends to influence our conduct, is inconsistent with a state of activity, such as Providence has allotted to man in this life. It would deprive him of hopes and fears, and leave him nothing to deliberate upon, nor any end to prosecute. In a word, it would put an end to his activity, and reduce him to be merely a passing being. Providence therefore has wisely drawn a veil over future events, affording us no light for prying into them but sagacity and experience.

These are a few of the numberless absurd opinions about the conduct of Providence, that have prevailed among Christians, and still prevail among some of them. Many opinions no less absurd have prevailed about speculative points. I confine myself to one or two instances ; for to make a complete list would require a volume. The first I shall mention, and the most noted, is transubstantiation ; a doctrine in which it is asserted, first, that the bread and wine in the sacrament are converted into the body and blood of our Saviour ; next, that his body and blood exists wholly and entirely in every particular sacrament administered in the Christian world even at the same instant of time. This article of faith, though it has not the least influence on practice, is reckoned so essential to salvation, as to be placed above every moral duty. The following text is appealed to as its sole foundation. “ And as they were eating, Jesus took
“ bread,

“ bread, and blessed it, and brake it, and gave it to
 “ the disciples, and said, Take, eat; this is my
 “ body. And he took the cup, and gave thanks,
 “ and gave it to them, saying, Drink ye all of it :
 “ for this is my blood of the new testament, which
 “ is shed for many for the remission of sins. But
 “ I say unto you, I will not drink henceforth of
 “ this fruit of the vine, until that day when I
 “ drink it new with you in my Father’s king-
 “ dom *.” That this is a metaphor, must strike
 every one: the passage cannot even bear a literal
 meaning, considering the final clause; for surely
 the most zealous Roman Catholic believes not,
 that Christians are to drink new wine with their
 Saviour in the kingdom of heaven. At the same
 time, it is not so much, as insinuated, that there
 was here any miraculous transubstantiation of the
 bread and wine into the body and blood of our
 Saviour; nor is it insinuated, that the apostles be-
 lieved they were eating the flesh of their master,
 and drinking his blood. St John, the favourite
 apostle, mentions not a word of this ceremony,
 which he certainly would not have omitted, had
 he imagined it an essential article of faith.

But supposing transubstantiation were clearly ex-
 pressed in this text, yet men of understanding will
 be loth to admit a meaning that contradicts their
 five senses. They will reflect, that no man now
 living ever saw the original books of the New
 Testament;

* St Matthew, xxvi. 26. &c.

Testament; nor are they certain, that the editions we have, are copied directly from the originals. Every remove from them is liable to errors, which may justly create a suspicion of texts that contradict reason and common sense. Add, that the bulk of Christians have not even a copy from the original to build their faith upon; but only a translation into another language. But the second branch of this article is obvious to a still stronger objection than of its contradicting our senses: it is a direct inconsistency, as we cannot even conceive it possible that the same body or thing can be in two different places at the same time.

And this leads to what chiefly determined me to select that instance. God and nature have bestowed upon us the faculty of reason, for distinguishing truth from falsehood. If, by reasoning with candour and impartiality, we discover a proposition to be true or false, it is not in our power to remain indifferent: we must judge, and our belief must be regulated by our judgment. I say more, to judge is a duty we owe our Maker; for to what purpose has he bestowed reason upon us, but in order to direct our judgment? At the same time, we may depend on it as an intuitive truth, that God will never impose any belief on us, contradictory, not only to our reason, but to our senses.

The following objection however will perhaps relish more with people of plain understanding.

Transubstantiation

Transubstantiation is a very extraordinary miracle, reiterated every day and in every corner of the earth, by priests not always remarkable either for piety or for morality. Now I demand an answer to the following plain question : To what good end or purpose is such a profusion of miracles subservient ? I see none. But I discover a very bad one, if they have any influence ; which is, that they accustom the Roman Catholics to more cruelty and barbarity, than even the grossest savages are ever guilty of : some of these indeed devour the flesh of their enemies ; but none of them the flesh of their friends, especially of their greatest friend. But to do justice to people of that religion, I am confident, that this supposed miracle has no influence whatever upon their manners : to me it appears impossible for any man seriously to believe, that the bread and wine used at the Lord's supper, is actually converted into the body and blood of our Saviour. The Romish church requires the belief of transubstantiation ; and a zealous Catholic, out of pure obedience, thinks he believes it. Convince once a man that salvation depends on belief, and he will believe any thing ; that is, he will imagine that he believes : *Credo quia impossibile est* *.

That

* A traveller describing the Virgin Mary's house at Loretto, has the following reflection. " When there are so many saints
" endued with such miraculous powers, so many relics, and
" so

That our first reformers, who were prone to differ from the Romish faith, should adopt this doctrine, shews the supreme influence of superstition. The Lutherans had not even the excuse of inattention : after serious examination, they added one absurdity more ; teaching, that the bread and wine are converted into the body and blood of our Saviour, and yet remain bread and wine as at first ; which is termed by them *consubstantiation*. I am persuaded, that at this time not a single man of them harbours such a thought,

Many

“ so many impregnated wells, each of them able to cure the
 “ most dangerous diseases ; one would wonder, that physi-
 “ cians could live there, or others die. But people die here as
 “ elsewhere ; and even churchmen, who preach upon the
 “ miracles wrought by relics, grow sick and die like other
 “ men.” It is one thing to believe : it is another thing to
 fancy that we believe. In the year 1666 a Jew named *Sabatai Levi* appeared at Smyrna, pretending to be the true Messiah, and was acknowledged to be so by many. The Grand Signior, for proof of his mission, insisted for a miracle ; proposing that he should present himself as a mark to be shot at, and promising to believe that he was the Messiah, if he remained unwounded. Sabatai, declining the trial, turned Mahometan to save his life. But observe the blindness of superstition : though Sabatai was seen every day walking the streets of Constantinople in the Turkish habit, many Jews insisted that the true Sabatai was taken up into heaven, leaving only behind him his shadow ; and probably they most piously fancied that they believed so.

Many persons, impenetrable by a serious argument, can discover falsehood when put in a ridiculous light. It requires, I am sensible, a very delicate hand to attack a grave subject with ridicule as a test of truth; and for that reason, I forbear to offer any thing of my own. But I will set before my readers some excerpts from a book of absolute authority with Roman Catholics. Though transubstantiation be there handled in the most serious manner, with all the ceremonies and punctilios that naturally flow from it, yet in my judgment it is happily contrived to give it a most ridiculous appearance. The book is the Roman Missal, from which the following is a literal translation.

“ Mass may be deficient in the matter, in the
“ form, in the minister, or in the action. First,
“ in the matter. If the bread be not of wheat,
“ or if there be so great a mixture of other grain
“ that it cannot be called wheat-bread, or if any
“ way corrupted, it does not make a sacrament.
“ If it be made with rose-water, or any other
“ distilled water, it is doubtful whether it make a
“ sacrament or not. Though corruption have
“ begun, or though it be leavened, it makes a sa-
“ crament, but the celebrator sins grievously.

“ If the celebrator, before consecration, ob-
“ serve that the host is corrupted, or is not
“ of wheat, he must take another host: if af-
“ ter consecration, he must still take another and
“ swallow

“ swallow it, after which he must also swallow the
 “ first, or give it to another, or preserve it in some
 “ place with reverence. But if he have swal-
 “ lowed the first before observing its defects, he
 “ must nevertheless swallow also the perfect host ;
 “ because the precept about the perfection of the
 “ sacrament, is of greater weight than that of ta-
 “ king it fasting. If the consecrated host disap-
 “ pear by an accident, as by wind, by a miracle,
 “ or by some animal, another must be consecra-
 “ ted.

“ If the wine be quite sour or putrid, or made
 “ of unripe grapes, or be mixed with so much
 “ water as to spoil the wine, it is no sacrament.
 “ If the wine have begun to sour or to be cor-
 “ rupted, or be quite new, or not mixed with
 “ water, or mixed with rose-water or other di-
 “ stilled water, it makes a sacrament, but the ce-
 “ lebrator sins grievously.

“ If the priest, before consecration, observe that
 “ the materials are not proper, he must stop, if
 “ proper materials cannot be got ; but after con-
 “ secration, he must proceed, to avoid giving scan-
 “ dal. If proper materials can be procured by
 “ waiting, he must wait for them, that the sacri-
 “ fice may not remain imperfect.

“ Second, in form. If any of the words of
 “ consecration be omitted, or any of them be
 “ changed into words of a different meaning, it
 “ is no sacrament : if they be changed into words

“ of the same meaning, it makes a sacrament ;
 “ but the celebrator sins grievously :

“ Third, in the minister. If he does not in-
 “ tend to make a sacrament, but to cheat ; if
 “ there be any part of the wine, or any wafer that
 “ he has not in his eye, and does not intend to
 “ consecrate ; if he have before him eleven wafers,
 “ and intends to consecrate only ten, not deter-
 “ mining what ten he intends : in these cases the
 “ consecration does not hold, because intention
 “ is requisite. If he think there are ten only,
 “ and intends to consecrate all before him, they
 “ are all consecrated ; therefore priests ought al-
 “ ways to have such intention. If the priest,
 “ thinking he has but one wafer, shall, after the
 “ consecration, find two sticking together, he must
 “ take them both. And he must take off all the
 “ remains of the consecrated matter ; for they all
 “ belong to the same sacrifice. If in consecra-
 “ ting, the intention be not actual by wandering
 “ of mind, but virtual in approaching the altar,
 “ it makes a sacrament : though priests should be
 “ careful to have intention both virtual and ac-
 “ tual.

“ Beside intention, the priest may be deficient
 “ in disposition of mind. If he be suspended, or
 “ degraded, or excommunicated, or under mortal
 “ sin, he makes a sacrament, but sins grievously.
 “ He may be deficient also in disposition of body.
 “ If he have not fasted from midnight, if he have
 “ tasted

“tasted water, or any other drink or meat, even
 “ in the way of medicine, he cannot celebrate
 “ nor communicate. If he have taken meat or
 “ drink before midnight, even though he have not
 “ slept nor digested it, he does not sin. But on
 “ account of the perturbation of mind, which bars
 “ devotion, it is prudent to refrain.

“ If any remains of meat, sticking in the mouth,
 “ be swallowed with the host, they do not prevent
 “ communicating, provided they be swallowed,
 “ not as meat, but as spittle. The same is to
 “ be said, if in washing the mouth a drop of
 “ water be swallowed, provided it be against our
 “ will.

“ Fourth, in the action. If any requisite be
 “ wanting, it is no sacrament; for example, if it
 “ be celebrated out of holy ground, or upon an
 “ altar not consecrated, or not covered with three
 “ napkins: if there be no wax candles; if it be
 “ not celebrated between day-break and noon;
 “ if the celebrator have not said matins with
 “ lauds; if he omit any of the sacerdotal robes;
 “ if these robes and the napkins be not blessed by
 “ a bishop; if there be no clerk present to serve,
 “ or one who ought not to serve, a woman, for
 “ example; if there be no chalice, the cup of
 “ which is gold, or silver, or pewter; if the vest-
 “ ment be not of clean linen adorned with silk
 “ in the middle, and blessed by a bishop; if
 “ the priest celebrate with his head covered; if

“ there be no missal present, though he have it by
“ heart.

“ If a gnat or spider fall into the cup after con-
“ secration, the priest must swallow it with the
“ blood, if he can : otherwise, let him take it
“ out, wash it with wine, burn it, and throw it
“ with the washings into holy ground. If poison
“ fall into the cup, the blood must be poured on
“ tow or on a linen cloth, remain till it be dry,
“ then be burnt, and the ashes be thrown upon
“ holy ground. If the host be poisoned, it must
“ be kept in a tabernacle till it be corrupted.

“ If the blood freeze in winter, put warm cloths
“ about the cup : if that be not sufficient, put the
“ cup in boiling water.

“ If any of Christ's blood fall on the ground by
“ negligence, it must be licked up with the tongue,
“ and the place scraped : the scrapings must be
“ burnt, and the ashes buried in holy ground.

“ If the priest vomit the eucharist, and the spe-
“ cies appear entire, it must be licked up most re-
“ verently. If a nausea prevent that to be done,
“ it must be kept till it be corrupted. If the
“ species do not appear, let the vomit be burnt,
“ and the ashes thrown upon holy ground.”

As the foregoing article has beyond intention
swelled to an enormous size, I shall add but one
other article, which shall be extremely short ; and
that is the creed of Athanasius. It is a heap of
unintelligible jargon ; and yet we are appointed
to

to believe every article of it, under the pain of eternal damnation. As it enjoins belief of rank contradictions, it seems purposely calculated to be a test of slavish submission to the tyrannical authority of a proud and arrogant priest*.

CHAP. III.

Religious Worship.

IN the foregoing chapter are traced the gradual advances of the sense of Deity, from its imperfect state among savages to its maturity among enlightened nations; displaying to us one great Being, to whom all other beings owe their existence, who made the world, and who governs it by perfect laws. And our perception of Deity, arising from that sense, is fortified by an intuitive proposition, that there necessarily must exist some being who had no beginning. Considering the Deity as the author of our existence, we owe him gratitude;

X 4

* Bishop Burnet seems doubtful whether this creed was composed by Athanasius. His doubts, in my apprehension, are scarce sufficient to weigh against the unanimous opinion of the Christian church.

tude; considering him as governor of the world, we owe him obedience: and upon these duties is founded the obligation we are under to worship him. Further, God made man for society, and implanted in his nature the moral sense to direct his conduct in that state. From these premises, may it not with certainty be inferred to be the will of God, that men should obey the dictates of the moral sense in fulfilling every duty of justice and benevolence? These moral duties, it would appear, are our chief business in this life; being enforced not only by a moral but by a religious principle.

Morality, as laid down in a former sketch, consists of two great branches, the moral sense which unfolds the duty we owe to our fellow-creatures, and an active moral principle which prompts us to perform that duty. Natural religion consists also of two great branches, the sense of Deity which unfolds our duty to our Maker, and the active principle of devotion which prompts us to perform our duty to him. The universality of the sense of Deity proves it to be innate; the same reason proves the principle of devotion to be innate; for all men agree in worshipping superior beings, whatever difference there may be in the mode of worship.

Both branches of the duty we owe to God, that of worshipping him, and that of obeying his will with respect to our fellow-creatures, are summed up

up by the Prophet Micah in the following emphatic words: "He hath shewed thee, O man, what is good: and what doth the Lord require of thee, but to do justly, to love mercy, and to walk humbly with thy God?" The two articles first mentioned, are moral duties regarding our fellow-creatures: and as to such, what is required of us is to do our duty to others; not only as directed by the moral sense, but as being the will of our Maker, to whom we owe absolute obedience. That branch of our duty is reserved for a second section: at present we are to treat of religious worship, included in the third article, the walking humbly with our God.

SECT. I.

Religious Worship respecting the Deity singly.

THE obligation we are under to worship God, or to walk humbly with him, is, as observed above, founded on the two great principles of gratitude and obedience; both of them requiring fundamentally a pure heart, and a well-disposed mind. But heart-worship is alone not sufficient: there are over and above required external signs, testifying to others the sense we have of these duties, and a firm resolution to perform them. That
such

such is the will of God, will appear, as follows. The principle of devotion, like most of our other principles, partakes of the imperfection of our nature: yet, however faint originally, it is capable of being greatly invigorated by cultivation and exercise. Private exercise is not sufficient. Nature, and consequently the God of nature, require public exercise or public worship: for devotion is communicative, like joy or grief*; and by mutual communication in a numerous assembly, is greatly invigorated. A regular habit of expressing publicly our gratitude and resignation, never fails to purify the mind, tending to wean it from every unlawful pursuit. This is the true motive of public worship; not what is commonly inculcated, That it is required from us, as a testimony to our Maker of our obedience to his laws: God, who knows the heart, needs no such testimony†.

The

* Elements of Criticism, vol. i. p. 180. edit. 5.

† Arnobius (*Adversus gentes, lib. 1.*) accounts rationally for the worship we pay to the Deity: “ Huic omnes ex more
 “ prosternimur, hunc collatis precibus adoramus, ab hoc justa,
 “ et honesta, et auditu ejus condigna, deprecimur. Non quo
 “ ipse desideret supplices nos esse, aut amet subterni tot mil-
 “ lium venerationem videre. Utilitas hæc nostra est, et com-
 “ modi nostri rationem spectans. Nam quia proni ad culpas,
 “ et ad libidinis varios appetitus, vitio sumus, infirmitatis in-
 “ genitæ, patitur se semper nostris cogitationibus concipi: ut
 “ dum illum oramus, et mereri ejus contendimus munera, ac-
 “ cipiamus

The setting apart one day in seven for public worship is not a pious institution merely, but highly moral. With regard to the latter, all men are equal in the presence of God ; and when a congregation pray for mercy and protection, every one must be inflamed with good-will and brotherly love to every one.

In the next place, the serious and devout tone of mind inspired by public worship, suggests naturally self-examination. Retired from the bustle of the world on that day of rest, the errors we have been guilty of are recalled to memory : we are afflicted for these errors, and are firmly resolved to be more on our guard in time coming. In short, Sunday is only a day of rest from worldly concerns, in order to be more usefully employed upon those that are internal. Sunday accordingly is a day of account ; and a candid account every

“ cipiamus innocentiae voluntatem, et ab omni nos labe de-
 “ liſſorum omnium amputatione purgemus.”—[*In English*
thus : “ It is our custom, to prostrate ourselves before him ;
 “ and we ask of him such gifts only as are consistent with
 “ justice and with honour, and suitable to the character of
 “ the Being whom we adore. Not that he receives pleasure
 “ or satisfaction from the humble veneration of thousands of
 “ his creatures. From this we ourselves derive benefit and
 “ advantage ; for being the slaves of appetite, and prone to
 “ err from the weakness of our nature, when we address our-
 “ selves to God in prayer, and study by our actions to merit
 “ his approbation, we gain at least the wish, and the inclina-
 “ tion, to be virtuous.”]

every seventh day, is the best preparation for the great day of account. A person who diligently follows out this preparatory discipline, will seldom be at a loss to answer for his conduct, called upon by God or man. This consideration leads me necessarily to condemn a practice authorised among Christians with very few exceptions, that of abandoning to diversion and merriment what remains of Sunday after public worship, parties of pleasure, dancing, gaming, any thing that trifles away the time without a serious thought ; as if the purpose were to cancel every virtuous impression made at public worship.

Unhappily, this salutary institution can only be preserved in vigour during the days of piety and virtue. Power and opulence are the darling objects of every nation ; and yet in every nation possessed of power and opulence virtue subsides, selfishness prevails, and sensuality becomes the ruling passion. Then it is, that the most sacred institutions, first, lose their hold, next, are disregarded, and at last are made a subject for ridicule.

I shall only add upon the general head, that lawgivers ought to avoid with caution the enforcing public worship by rewards and punishments : human laws cannot reach the heart, in which the essence of worship consists : they may indeed bring on a listless habit of worship, by separating the external act from the internal affection, than which nothing is more hurtful to true religion. The utmost

most that can be safely ventured, is to bring public worship under censorian powers, as a matter of police, for preserving good order, and for preventing bad example.

The religion of Confucius, professed by the *literati* and persons of rank in China and Tonquin, consists in a deep inward veneration for the God or King of heaven, and in the practice of every moral virtue. They have neither temples, nor priests, nor any settled form of external worship: every one adores the supreme Being in the manner he himself thinks best. This is indeed the most refined system of religion that ever took place among men; but it is not fitted for the human race; an excellent religion it would be for angels; but is far too refined even for sages and philosophers.

Proceeding to deviations from the genuine worship required by our Maker, and gross deviations there have been, I begin with that sort of worship which is influenced by fear, and which for that reason is universal among savages. The American savages believe, that there are inferior deities without end, most of them prone to mischief; they neglect the supreme Deity because he is good; and direct their worship to soothe the malevolent inferior deities from doing harm. The inhabitants of the Molucca islands, who believe the existence of malevolent beings subordinate to the supreme benevolent Being, confine their worship
to

to the former, in order to avert their wrath; and one branch of their worship is, to set meat before them, hoping that when the belly is full, there will be less inclination to mischief. The worship of the inhabitants of Java is much the same. The Negroes of Benin worship the devil, as Drapper expresses it, and sacrifice to him both men and beasts. They acknowledge indeed a supreme Being, who created the universe, and governs it by his providence: but they regard him not: "for," say they, "it is needless, if not impertinent, to invoke a being, who, good and gracious, is incapable of injuring or molesting us." Gratitude, it would appear, is not a ruling principle among savages.

The austerities and penances that are practised in almost all religions, spring from the same root. One way to please invisible malignant powers, is to make ourselves as miserable as possible. Hence the horrid penances of the Faquirs in Hindostan, who outdo in mortification whatever is reported of the ancient Christian Anchorites. Some of these Faquirs continue for life in one posture: some never lie down: some have always their arms raised above their head: and some mangle their bodies with knives and scourges. The town of Jagrenate in Hindostan is frequented by pilgrims, some of them from places 300 leagues distant; and they travel, not by walking or riding, but by measuring the road with the length of their bodies;

bodies; in which mode of loco-motion, some of them consume years before they complete their pilgrimage. A religious sect made its way some centuries ago into Japan, termed *Budsoists*, from *Buds*, the founder. This sect has prevailed over the ancient sect of the Sintos, chiefly by its austerity and mortifications. The spirit of this sect inspires nothing but excessive fear of the gods, who are painted prone to vengeance and always offended. These sectaries pass most of their time in tormenting themselves, in order to expiate imaginary faults; and they are treated by their priests with a degree of despotism and cruelty, that is not paralleled but by the inquisitors of Spain. Their manners are fierce, cruel, and unrelenting, derived from the nature of their superstition. The notion of invisible malevolent powers, formerly universal, is not to this hour eradicated, even among Christians; for which I appeal to the fastings and flagellations among Roman Catholics, held by them to be an essential part of religion. People infected with religious horrors, are never seriously convinced that an upright heart and sound morality make the essence of religion. The doctrine of the Jansenists concerning repentance and mortification, shows evidently, however they may deceive themselves, that they have an impression of the Deity as a malevolent being. They hold the guilt contracted by Adam's fall to be a heinous sin, which ought to be expiated by acts of mortification,

mortification, such as the torturing and macerating the body with painful labour, excessive abstinence, continual prayer and contemplation. Their penances, whether for original or voluntary sin, are carried to extravagance; and those who put an end to their lives by such severities, are termed the sacred victims of repentance, consumed by the fire of divine love. Such suicides are esteemed peculiarly meritorious in the eye of Heaven; and it is thought, that their sufferings cannot fail to appease the anger of the Deity. That celibacy is a state of purity and perfection, is a prevailing notion in many countries: among the Pagans, a married man was forbidden to approach the altar, for some days after knowing his wife; and this ridiculous notion of pollution, contributed to introduce celibacy among the Roman Catholic priests *. The Emperor Otho, *anno* 1218, became a signal penitent: but instead of atoning for his sins by repentance and restitution, he laid himself down to be trodden under foot by the boys of his kitchen; and frequently submitted to the discipline of the whip, inflicted by monks. The Emperor Charles V. toward the end of his days, was sorely depressed in spirit with fear of hell. Monks were his only companions, with whom he spent his time in chanting hymns.

As

* Fasting and celibacy were by Zoroaster condemned with abhorrence, as a criminal rejection of the best gifts of Providence.

As an expiation for his sins, he in private disciplined himself with such severity, that his whip, found after his death, was tinged with his blood. Nor was he satisfied with these acts of mortification: timorous and illiberal solicitude still haunting him, he aimed at something extraordinary, at some new and singular act of piety, to display his zeal, and to merit the favour of heaven. The act he fixed on, was as wild as any that superstition ever suggested to a distempered brain: it was to celebrate his own obsequies. He ordered his tomb to be erected in the chapel of the monastery: his domestics marched there in funeral procession, holding black tapers: he followed in his shroud: he was laid in his coffin with much solemnity: the service of the dead was chanted; and he himself joined in the prayers offered up for his *requiem*, mingling his tears with those of his attendants. The ceremony closed with sprinkling holy water upon the coffin; and the assistants retiring, the doors of the chapel were shut. Then Charles rose out of the coffin, and stole privately to his apartment.

The history of ancient sacrifices is not so accurate, as in every instance to ascertain upon what principle they were founded, whether upon fear, upon gratitude for favours received, or to solicit future favour. Human sacrifices undoubtedly belong to the present head: for being calculated to deprecate the wrath of a malevolent deity, they

could have no other motive but fear ; and indeed they are a most direful effect of that passion *. It is needless to lose time in mentioning instances, which are well known to those who are acquainted with ancient history. A number of them are collected in Historical Law-tracts † : and to these I take the liberty of adding, that the Cimbrians, the Germans, the Gauls, particularly the Druids, practised human sacrifices ; for which we have the authority of Julius Cæsar, Strabo, and other authors. A people on the bank of the Mississippi, named *Tensas*, worship the sun ; and, like the Natches their neighbours, have a temple for that luminary, with a sacred fire in it, continually burning. The temple having been set on fire by thunder, was all in flames when some French travellers saw them throw children into the fire, one after another, to appease the incensed deity. The Prophet Micah ‡, in a passage partly quoted above, inveighs bitterly against such sacrifices :
 “ Wherewith shall I come before the Lord, and
 “ bow myself before the high God ; shall I come
 “ before him with burnt-offerings, with calves of
 “ a year old ? will the Lord be pleased with
 “ thousands of rams, or with ten thousands of
 “ rivers

* The Abbé de Boissy derives human sacrifices from the history of Abraham preparing to sacrifice his son Isaac, which, says he, was imitated by others. A man who is so unlucky at guessing had better be silent.

† Tract i.

‡ Chap. vi.

“ rivers of oil ? shall I give my first-born for my
 “ transgression, the fruit of my body for the sin
 “ of my soul ? He hath shewed thee, O man,
 “ what is good : and what doth the Lord require
 “ of thee, but to do justly, to love mercy, and to
 “ walk humbly with thy God !”

The ancient Persians acknowledged Oromazes and Arimanes as their great deities, authors of good and ill to men. But I find not that Arimanes, the evil principle, was ever an object of any religious worship: The Gaures, who profess the ancient religion of Persia, address no worship but to one God, all-good and all-powerful.

Next, of worshipping the Deity in the character of a mercenary being. Under that head come sacrifices and oblations, whether prompted by gratitude for favours received, or by self-interest to procure future favours : which, for the reason mentioned, I shall not attempt to distinguish. As the deities of early times were thought to resemble men, it was a natural endeavour in men to conciliate their favour by such offerings as were the most relished by themselves. It is probable, that the first sacrifices of that kind, were of sweet-smelling herbs, which in the fire emitted a flavour that might reach the nostrils of a deity, even at a distance. The burning incense to their gods, was practised in Mexico and Peru ; and at present is practised in the peninsula of Corea. An opportunity so favourable for making religious zeal a

fund of riches to the priesthood, is seldom neglected. There was no difficulty to persuade ignorant people, that the gods could eat as well as smell: what was offered to a deity for food, being carried into the temple, was understood to be devoured by him.

With respect to the Jewish sacrifices of burnt-offerings, meat-offerings, sin-offerings, peace-offerings, heave-offerings, and wave-offerings, these were appointed by God himself, in order to keep that stiff-necked people in daily remembrance of their dependance on him, and to preserve them if possible from idolatry. But that untractable race did not adhere to the purity of the institution: they insensibly degenerated into the notion that their God was a mercenary being; and in that character only, was the worship of sacrifices performed to him. The offerings mentioned were liberally bestowed on him, not singly as a token of their dependance, but chiefly in order to avert his wrath, or to gain his favour *.

The religious notions of the Greeks were equally impure: they could not think of any means
for

* There is no mention in ancient authors of fish being offered to the gods in sacrifice. The reason I take to be, that the most favourable food of man was reckoned the most agreeable to their gods; that savages never thought of fish till land-animals became scarce; and that the matter as well as form of sacrifices were established in practice, long before men had recourse to fish for food.

for conciliating the favour of their gods, more efficacious than gifts. Homer paints his gods as excessively mercenary. In the fourth book of the Iliad, Jupiter says, “ Of these cities, honoured the
 “ most by the soul of Jove, is sacked Troy. Ne-
 “ ver stands the altar empty before me, oblations
 “ poured forth in my presence, favour that as-
 “ cends the skies.” Speaking in the fifth book of a warrior, known afterward to be Diomedes,
 “ Some god he is, some power against the Tro-
 “ jans enraged for vows unpaid: destructive is
 “ the wrath of the gods.” Diomedes prays to Minerva, “ With thine arm ward from me the
 “ foe: a year-old heifer, O Queen, shall be thine,
 “ broad-fronted, unbroken, and wild: her to thee
 “ I will offer with prayer, gilding with gold her
 “ horns.” Precisely of the same kind, are the offerings made by superstitious Roman Catholics to the Virgin Mary, and to saints. Electra, in the tragedy of that name, supplicates Apollo in the following terms:

——— O! hear Electra too,
 Who, with unsparing hand, her choicest gifts
 Hath never fail'd to lay before thy altars;
 Accept the little All that now remains
 For me to give.

The people of Hindostan, as mentioned above, atone for their sins by austere penances; but they
 Y 3 have

have no notion of presenting gifts to the Deity, nor of deprecating his wrath by the flesh of animals. On the contrary, they reckon it a sin to slay any living creature; which reduces them to vegetable food. This is going too far; for the Deity could never mean to prohibit animal food, when originally man's chief dependance was upon it. The abstaining however from animal food, shows greater humanity in the religion of Hindostan, than of any other known country. The inhabitants of Madagascar are in a stage of religion, common among many nations, which is, the acknowledging one supreme benevolent deity, and many malevolent inferior deities. Most of their worship is indeed addressed to the latter; but they have so far advanced before several other nations, as to offer sacrifices to the supreme Being, without employing either idols or temples.

Philosophy and sound sense in polished nations, have purified religious worship, by banishing the profession, at least, of oblations and sacrifices. The Being that made the world, governs it by laws that are inflexible, because they are the best; and to imagine that he can be moved by prayers, oblations, or sacrifices, to vary his plan of government, is an impious thought, degrading the Deity to a level with ourselves: "Hear O my people, —
" and I will testify against thee: I am God, even
" thy God. I will take no bullock out of thy
" house, nor he-goat out of thy fold: for every
" beast

“ beast of the forest is mine, and the cattle upon
 “ a thousand hills. Will I eat the flesh of bulls,
 “ or drink the blood of goats? Offer unto God
 “ thanksgiving, and pay thy vows to the Most
 “ High. Call upon me in the day of trouble: I
 “ will deliver thee, and thou shalt glorify me *.”
 “ Thou desirest not sacrifice, else would I give it;
 “ thou delightest not in burnt-offering. The sa-
 “ crifices of God are a broken spirit: a broken
 “ and a contrite heart, O God, thou wilt not de-
 “ spise †.” “ For I desired mercy, and not sacri-
 “ fice; and the knowledge of God more than
 “ burnt-offerings ‡.” In dark ages, there is a great
 shew of religion, with little heart-worship: in ages
 of philosophy, warm heart-worship, with little
 shew §.

‡ Hosea vi. 6.

§ Agathias urges a different reason against sacrifices.—
 “ Ego nullam naturam esse existimo, cui voluptati sint fœda-
 “ ta sanguine altaria, et animantium lanienæ. Quod si qua
 “ tamen est cui ista sint cordi, non ea mitis et benigna est ali-
 “ qua, sed fera ac rabida, qualem pavorem poëtæ fingunt, et
 “ Metum, et Bellonum, et Malam Fortunam, et Discordiam,
 “ quam indomitam appellant.”—[In English thus: “ I cannot
 “ conceive, that there should exist a superior being, who takes
 “ delight in the sacrifice of animals, or in altars stained with
 “ blood. If such there be, his nature is not benevolent, but
 “ barbarous and cruel. Such indeed were the gods whom
 “ the poets have created: such were Fear and Terror, the
 “ goddesses

This is a proper place for the history of idolatry ; which, as will anon appear, sprung from religious worship corrupted by men of shallow understanding and gross conceptions, upon whom things invisible make little impression.

Savages, even of the lowest class, have an impression of invisible powers, though they cannot form any distinct notion of them. But such impression is too faint for the exercise of devotion. Whether inspired

“ goddess of War, of Evil Fortune, and of Discord.”]—
 Arnobius batters down bloody sacrifices with a very curious argument. “ *Eccæ si bos aliquis, aut quodlibet ex his animal, quod ad placandas creditur mitigandasque numinum furias, vocem hominis sumat, eloquaturque his verbis : Er, gone, O Jupiter, aut quis alius deus es, humanum est istud et rectum, aut æquitatis alicujus in æstimatione ponendum, ut cùm alius peccaverit, ego occidar, et de meo sanguine fieri tibi patiaris satis, qui nunquam te læserim, nunquam sciens aut nesciens, tuum numen majestatemque violarim, animal, ut scis, mutum, naturæ meæ simplicitatem sequens, nec multiformium morum varietatibus lubricum ?*”—[*In English thus* : “ What if the ox, while he is led out to slaughter to appease the fancied wrath of an offended deity, should assume the human voice, and in these words astonish his conductors : Are these, O merciful God, are these the dictates of humanity, or of justice, that for the crime of another I should forfeit my life. I have never by my will offended thee, and, dumb as I am, and uninformed by reason, my actions, according to the simplicity of my nature, cannot have given thee displeasure, who hast made me as I am.”]—If this argument were solid, it would be equally conclusive against animal food.

inspired with love to a good being, or impressed with fear of an ill being, savages are not at ease without some sort of visible object to fix their attention. A great stone served that purpose originally; a very low instrument indeed of religious worship; but not altogether whimsical, if it was introduced, which is highly probable, in the following manner. It was an early and a natural custom among savages, to mark with a great stone, the place where their worthies were interred; of which we have hints every where in ancient history, particularly in the poems of Ossian. “Place
 “ me,” says Calmar mortally wounded, “ at the
 “ side of a stone of remembrance, that future times
 “ may hear my fame, and the mother of Calmar
 “ rejoice over the stone of my renown.” Superstition in later times having deified these worthies, their votaries, rejoicing as formerly over the stones dedicated to them, held these stones to be essential in every act of religious worship performed to their new deities*. Tradition points out many stones
 in

* Frequent mention is made of such stones in the poems of Ossian. “ But remember, my son, to place this sword, this
 “ bow, and this horn, within that dark and narrow house
 “ marked with one gray stone;” p. 55.—“ Whose fame is
 “ in that dark-green tomb? Four stones with their heads of
 “ moss stand there, and mark the narrow house of death;”
 p. 67.—“ Let thy bards mourn those who fell. Let Erin
 “ give the sons of Lochlin to earth, and raise the mossy stones
 “ of

in different parts of the world, that were used in religious worship. The sun was worshipped at Emesa in Syria by the name of *Elagabalus*, and under the form of a black conical stone, which, as universally believed, had fallen from heaven on that sacred place. A large stone, worshipped by the Pessenuntians, a people of Phrygia, under the name of *Idæa mater*, was, upon a solemn embassy to that people, brought to Rome: it being contained in the Sybilline books, that unless the Romans got possession of that goddess, they never would prevail over Hannibal. And Pausanias mentions many stones in Greece, dedicated to different divinities; particularly thirty square stones in Achaia, on which were engraved the names of as many gods. In another place, he mentions a very ancient statue of Venus in the island Delos, which, instead of feet, had only a square stone. This may appear a puzzling circumstance in the history of Greece, considering that all the Grecian gods were

“ of their fame; that the children of the north hereafter
 “ may behold the place where their fathers fought;” p. 78.—
 “ Earth here incloses the loveliest pair on the hill: grass
 “ grows between the stones of the tomb;” page 208.—In
 the same poems we find stones made instruments of worship.
 The spirit of Loda is introduced threatening Fingal. “ Fly
 “ to thy land, replied the form; receive the wind and fly.
 “ The blasts are in the hollow of my hand; the course of the
 “ storm is mine. The King of Sora is my son; he bends at
 “ the stone of my power;” p. 200.

were originally mortals, whom it was easy to represent by statues: but in that early period, the Greeks knew no more of statuary than the most barbarous nations. It is perhaps not easy to gather the meaning of savages, with respect to such stones: the most natural conjecture is, that a great stone, dedicated to the worship of a certain deity, was considered as belonging to him. This notion of property had a double effect: the worshippers, by connection of ideas, were led from the stone to the deity: and the stone tended to fix their wandering thoughts. It was probably imagined, over and above, that some latent virtue communicated to the stone, made it holy or sacred. Even among enlightened people, a sort of virtue or sanctity is conceived to reside in the place of worship: why not also in a stone dedicated to a deity? The ancient Ethiopians, in their worship, introduced the figure of a serpent as a symbol of the deity: two sticks laid cross represented Castor and Pollux, Roman divinities: a javelin represented their god Mars; and in Tartary formerly, the god of war was worshipped under the symbol of an old rusty sabre. The ancient Persians used consecrated fire, as an emblem of the great God. Though the negroes of Congo and Angola have images without number, they are not however idolaters in any proper sense: their belief is, that these images are only organs by which the deities signify their will to their votaries.

If

If the use that was made of stones and of other symbols in religious worship, be fairly represented, it may appear strange, that the ingenious Greeks sunk down into idolatry, at the very time they were making a rapid progress in the fine arts. Their improvements in statuary, one of these arts, was the cause. They began with attempting to carve heads of men and women, representing their deified heroes; which were placed upon the stones dedicated to these heroes. In the progress of the art, statues were executed complete in every member; and at last, statues of the gods were made, expressing such dignity and majesty, as insensibly to draw from beholders a degree of devotion to the statues themselves. Hear Quintilian upon that subject. “ At quæ Polycleto defuerunt, Phidiæ
 “ atque Alcameni dantur. Phidias tamen diis
 “ quàm hominibus efficiendis melior artifex tra-
 “ ditur: in ebore vero, longè citra æmulum, vel
 “ si nihil nisi Minervam Athenis aut Olympium
 “ in Elide Jovem fecisset, cujus pulchritudo adje-
 “ cisse aliquid etiam receptæ religioni videtur;
 “ adeo majestas operis deum æquavit*.” Here
 is^d

* “ The deficiencies of Polycletus were made up in Phidias
 “ and Alcamenes. Phidias is reckoned to have had more
 “ skill in forming the statues of gods than of men. In works
 “ of ivory he was unrivalled, although there had been no
 “ other proofs of his excellence than the statue of Minerva at
 “ Athens, and the Jupiter Olympius in Ellis. Of the latter,
 “ so

is laid a foundation for idolatry : let us trace its progress. Such statues as are represented by Quincilian, serve greatly to inflame devotion ; and during a warm fit of the religious passion, the representation is lost, and the statue becomes a deity ; precisely as where King Lear is represented by Garrick : the actor vanishes ; and, behold ! the King himself. This is not singular. Anger occasions a metamorphosis still more extraordinary : if I happen to strike my gouty toe against a stone, the violence of the pain converts the stone for a moment into a voluntary agent ; and I wreak my resentment on it, as if it really were so. It is true, the image is only conceived to be a deity during the fervour of devotion ; and when that subsides, the image falls back to its original representative state. But frequent instances of that kind, have at last the effect among illiterate people, to convert the image into a sort of permanent deity : what such people see, makes a deep impression ; what they see not, very little. There is another thing that concurs with eye-sight, to promote this delusion : devotion, being a vigorous principle in the human breast, will exert itself upon the meanest object, when none more noble is in view.

The ancient Persians held the consecrated fire to be an emblem only of the great God : but such
veneration

“ so transcendent was the beauty, that it heightened every
“ sentiment of the received religion ; the majesty of the image
“ appearing to rival that of the god himself.”

veneration was paid to that emblem, and with so great ceremony was it treated, that the vulgar came at last to worship it as a sort of deity. The priests of the Gaures watch the consecrated fire day and night : they keep it alive with the purest wood, without bark : they touch it not with sword nor knife : they blow it not with bellows, nor with the mouth : even the priest is prohibited to approach it, till his mouth be covered with fine linen, lest it be polluted with his breath : if it happen to go out, it must be rekindled by striking fire from flint, or by a burning glass.

The progress of idolatry will more clearly appear, from attending to the religion of the Greeks and Romans. The Greeks, as mentioned above, made use of stones in divine worship, long before idolatry was introduced : and we learn from Varro, that for a hundred and seventy years after Numa, the Romans had no statues nor images in their temples. After statues of the gods became fashionable, they acquired by degrees more and more respect. The Greek and Roman writers talk of divine virtue being communicated to statues ; and some Roman writers talk familiarly, of the *numen* of a deity residing in his statue. Arnobius, in his book against the Gentiles, introduces a Gentile delivering the following opinion. “ We do not believe, that the metal which composes a statue, whether gold, or silver, or brass, is a god. But we believe, that a solemn dedication brings down
“ the

“ the god to inhabit his image ; and it is the god
“ only that we worship in that image.” This explains the Roman ceremony, of inviting to their side the tutelar deities of towns besieged by them, termed *evocatio tutelarium deorum*. The Romans, cruel as they were, overflowed with superstition ; and as they were averse from combating the tutelar deities even of their enemies, they endeavoured to gain these deities by large promises, and assurance of honourable treatment. As they could not hope that a statue would change its place, their notion must have been, that by this ceremony, the tutelary deity might be prevailed upon to withdraw its *numen*, and leave the statue a dead lump of matter. When Stilpo was banished by the Areopagus of Athens, for affirming, that the statue in the temple of Minerva, was not the goddess, but a piece of matter carved by Phidias ; he surely was not condemned for saying, that the statue was made by Phidias, a fact universally known : his heresy consisted in denying that the *numen* of Minerva resided in the statue. Augustus, having twice lost his fleet by storm, forbade Neptune to be carried in procession along with the other gods ; imagining he had avenged himself of Neptune, by neglecting the favourite statue in which his *numen* resided.

When saints in the Christian church were deified, even their images became objects of worship ; from a fond imagination, that such worship
draws

draws down into the images the souls of the saints they represent ; which is the same belief that Arnobius, in the passage above mentioned, ascribes to the Gentiles ; and is not widely different from the belief of the Pagan Tartars and Ostiaks, by and by to be mentioned. In the eleventh century, there was a violent dispute about images in the Greek church ; many asserting, that in the images of our Saviour and of the saints, there resides an inherent sanctity which is a proper object of worship ; and that Christians ought not to confine their worship to the persons represented, but ought also to extend it to their images.

As ignorant and savage nations can form no conception of Deity but of a being like a man, only superior in power and greatness ; many images have been made of the Deity conformable to that conception. It is easy to make some resemblance of a man ; but how is power and greatness to be represented ? To perform this with success, would require a Phidias. Savages go more bluntly to work : they endeavour to represent a man with many heads, and with a still greater number of hands. The northern Tartars seem to have no deities but certain statues or images coarsely formed out of wood, and bearing some distant resemblance to the human figure. To palliate so gross an absurdity as that a god can be fabricated by the hands of man, they imagine this image to be endued with a soul : to say whence that soul came would

would puzzle the wisest of them. That soul is conceived to be too elevated for dwelling constantly in a piece of matter: they believe that it resides in some more honourable place; and that it only visits the image or idol, when it is called down by prayers and supplications. They sacrifice to this idol, by rubbing its mouth with the fat of fish, and by offering it the warm blood of some beast killed in hunting. The last step of the ceremony is, to honour the soul of the idol with a joyful shout, as a sort of convoy to it when it returns home. The Ostiaks have a wooden idol, termed *The Old Man of Oby*, who is guardian of their fishery: it hath eyes of glass, and a head with short horns. When the ice dissolves, they crowd to this idol, requesting that he will be propitious to their fishery. If unsuccessful, he is loaded with reproaches: if successful, he is entitled to a share of the capture. They make a feast for him, rubbing his snout with choice fat; and when the entertainment is over, they accompany the soul of the idol a little way, beating the air with their cudgels. The Ostiaks have another idol, that is fed with milk so abundantly, as to come out on both sides of the spoon, and to fall down upon the vesture; which however is never washed, so little is cleanness thought essential to religion by that people. It is indeed strangely absurd, to think, that invisible souls require food like human crea-

tures ; and yet the same absurdity prevailed in Greece.

The ancient Germans, a sober and sensible people, had no notion of representing their gods by statues, or of building temples to them. They worshipped in consecrated groves *. The Egyptians, from a just conception that an invisible being can have no resemblance to one that is visible, employed hieroglyphical figures for denoting metaphorically the attributes of their gods ; and they employed, not only the figures of birds and beasts, but of vegetables ; leeks, for example, and onions. This metaphorical adjunct to religion, innocent in itself, sunk the Egyptians into the most groveling idolatry. As hieroglyphical figures, composed frequently of heterogeneous parts, resemble not any being human or divine ; the vulgar, losing sight of the emblematic signification understood by poets and philosophers only, took up with the plain figures as real divinities. How otherwise can it be accounted for, that the ox, the ape, the onion, were in Egypt worshipped as deities ? Plutarch, it is true, in his chapter upon Isis and Osiris observes, that the Egyptians worshipped the bull, the cat, and other animals, not as divinities, but as representatives of them, like an image seen in a glass ; or, as he expresses it in another part of the same chapter, “ just as we see the resemblance of the sun in a drop of water.” But that this must be understood

* Tacitus, *De moribus Germanorum*, cap. 9.

understood of Philosophers only, will be probable from what is reported by Diodorus Siculus; that in a great famine, the Egyptians ventured not to touch the sacred animals, though they were forced to devour one another. A snake of a particular kind, about a yard long, and about the thickness of a man's arm, is worshipped by the Whidans in Guinea. It has a large round head, piercing eyes, a short pointed tongue, and a smooth skin, beautifully speckled. It has a strong antipathy to all the venomous kind; in other respects, innocent and tame. To kill these snakes being a capital crime, they travel about unmolested, even into bed-chambers. They occasioned, anno 1697, a ridiculous persecution. A hog, teased by one of them, tore it with his tusks till it died. The priests carried their complaint to the king; and no one presuming to appear as counsel for the hogs, orders were issued for slaughtering the whole race. At once were brandished a thousand cutlasses; and the race would have been extirpated, had not the king interposed, representing to the priests, that they ought to rest satisfied with the innocent blood they had spilt. Rancour and cruelty never rage more violently, than under the mask of religion.

It is amazing how prone even the most polished nations were to idolatry. A statue of Hercules was worshipped at Tyre, not as a representative of the deity, but as the deity himself. And accordingly, when Tyre was besieged by Alexander, the

deity was fast bound in chains, to prevent him from deserting to the enemy. The city of Ambracia being taken by the Romans, and every statue of their gods being carried to Rome ; the Ambracians complained bitterly, that not a single divinity was left them to worship. How much more rational are the Hindostan Bramins, who teach their disciples, that idols are emblems only of the Deity, intended merely to fix the attention of the populace !

The first statues in Greece and Tuscany were made with wings, to signify the swift motion of the gods. These statues were so clumsy, as scarce to resemble human creatures, not to talk of a divinity. But the admirable statues executed in later times, were imagined to resemble most accurately the deities represented by them ; whence the vulgar notion, that gods have wings, and that angels have wings.

I proceed to what in the history of idolatry may be reckoned the second part. Statues, we have seen, were at first used as representatives only of the Deity ; but came afterward to be metamorphosed into Deities. The absurdity did not stop there. People, not satisfied with the visible deities erected in temples for public worship, became fond to have private deities of their own, whom they worshipped as their own tutelar deities ; and this practice spread so wide, that among many nations every family had household gods cut in wood or stone.

stone. Every family in Kamskatka has a tutelar deity in the shape of a pillar, with the head of a man, which is supposed to guard the house against malevolent spirits. They give it food daily, and anoint the head with the fat of fish. The Prophet Isaiah* puts this species of deification in a most ridiculous light: “He burneth part thereof
“ in the fire: with part thereof he roasteth flesh:
“ of the residue he maketh a god, even his graven
“ image: he falleth down, worshipping, and pray-
“ ing to it, and saith, Deliver me, for thou art my
“ god.” Multiplication could not fail to sink household-gods into a degree of contempt: some slight hope of good from them, might produce some cold ceremonial worship; but there could be no real devotion at heart. The Chinese manner of treating their household-gods, will vouch for me. When a Chinese does not obtain what he prays for, “Thou spiritual dog,” he will say, “I
“ lodge thee well, thou art beautifully gilded,
“ treated with perfumes and burnt-offerings; and
“ yet thou withholdest from me the necessaries of
“ life.” Sometimes they fasten a cord to the idol, and drag it through the dirt. The inhabitants of Ceylon treat their idols in the same manner. Thor, Woden, and Friga, were the great deities of the Scandinavians. They had at the same time inferior deities, who were supposed to have been men translated into heaven for their good works. These

* Chap. xlv.

they treated with very little ceremony, refusing to worship them if they were not propitious; and even punishing them with banishment; but restoring them after a time, in hopes of amendment. Domestic idols are treated by the Oſtiacs with no greater reverence than by the people mentioned. But they have public idols, some particularly of brass, which are highly revered: the solidity of the metal is, in their imagination, connected with immortality; and great regard is paid to these idols, for the knowledge and experience they must have acquired in an endless course of time.

When by philosophy and improvement of the rational faculty, the Pagan religion in Rome was sinking into contempt, little regard was had to tutelary deities, to auguries, or to prophecies. Ptolemy, King of Egypt, being thrust out of his kingdom by a powerful faction, applied to the Senate of Rome to be restored. Lentulus, proconsul of Syria, was ambitious to be employed; but he had enemies who made violent opposition. They brought religion into the quarrel, alleging a Sybilline oracle, prophesying that Ptolemy should be restored, but not by an army. Cicero, in a letter still extant, gave Lentulus the following advice, that with his Syrian army he should invade Egypt, beat down all opposition, and when the country was quieted, that Ptolemy should be at hand to take possession. And this the great Cicero thought
might

might be piously done without contradicting the oracle.

Saints, or tutelar deities, are sometimes not better treated among Roman Catholics, than among Pagans. “When we were in Portugal,” says Captain Brydone, “the people of Castelbranco were
 “so enraged at St Antonio, for suffering the Spaniards to plunder their town, contrary, as they
 “affirmed, to his express agreement with them,
 “that they broke many of his statues to pieces;
 “and one that had been more revered than the
 “rest, they took the head off, and in its stead placed one of St Francis. The great St Januarius
 “himself was in imminent danger, during the last
 “famine at Naples. They loaded him with abuse
 “and invective; and declared point-blank, that
 “if he did not procure them corn by such a time,
 “he should be no longer their saint.” The Tutelar saint of Cattania, at the foot of Mount Etna, is St Agatha. A torrent of lava burst over the walls, and laid waste great part of that beautiful city. Where was St Agatha at that time? The people say, that they had given her just provocation; but that she has long ago been reconciled to them, and has promised never to suffer the lava to hurt them again. At the foot of Mount Etna, a statue of a saint is placed as a memorial for having prevented the lava from running up the mountain of Taurominum, and destroying that town; the

saint having conducted the lava down a low valley to the sea.

Let a traveller once deviate from the right road, and there is no end of wandering. Porphyrius reports, that in Anubis, an Egyptian city, a real man was worshipped as a god ; which is also asserted by Minutius Fælix, in his apology for the Christians. A thousand writers have said, that the Tartars believe their high-priest, termed *Dalai Lama*, to be immortal. But this is a mistake : his death is published through the whole country ; and couriers intimate it even to the Emperor of China : his effigy is taken down from the portal of the great church, and that of his successor is put in its stead. The system of the metempsychosis, adopted in that country, has occasioned the mistake.— They believe, that the holy spirit, which animates a Dalai Lama, passes upon his death into the body of his successor. The spirit, therefore, is believed to be immortal, not the body. The Dalai Lama, however, is the object of profound veneration. The Tartar Princes are daily sending presents to him, and consulting him as an oracle : they even undertake a pilgrimage in order to worship him in person. In a retired part of the temple, he is shown covered with precious stones, and sitting cross-legged. They prostrate themselves before him at a distance, for they are not permitted to kiss his toe. The priests make traffic even of his excrements, which are greedily purchased at a high price,

price, and are kept in a golden box hanging from the neck, as a charm against every misfortune. Like the cross of Jesus, or the Virgin's milk, we may believe, there never will be wanting plenty of that precious stuff to answer all demands: the priests, out of charity, will furnish a quota, rather than suffer votaries to depart with their money for want of goods to purchase. The person of the Japan Pope, or Ecclesiastical Emperor, is held so sacred, as to make the cutting his beard or his nails, a deadly sin. But absurd laws are never steadily executed. The beard and the nails are cut in the night-time, when the Pope is supposed to be asleep; and what is taken away by that operation, is understood to be stolen from him, which is no impeachment upon his Holiness.

That the Jews were idolaters when they sojourned in the land of Goshen, were it not presumable from their commerce with the Egyptians, would, however, be evident from the history of Moses. Notwithstanding their miraculous deliverance from the Egyptian king, notwithstanding the daily miracles wrought among them in the wilderness; so addicted were they to a visible deity, that during even the momentary absence of Moses conversing with God on the mount, they fabricated a golden calf, and worshipped it as their god. "And the Lord said unto Moses, Go, get thee down: for thy people which thou broughtest out of the land of Egypt, have corrupted themselves: they
" have

“ have turned aside quickly out of the way
“ which I commanded them : they have made
“ them a molten calf, have worshipped it, have sa-
“ crificed thereunto, and said, “ These be thy
“ gods, O Israel, which have brought thee up out
“ of the land of Egypt *.” The history of the
Jews, shews how difficult it is to reclaim from ido-
latry a brutish nation, addicted to superstition, and
fettered by inveterate habit. What profusion of
blood, to bring that obstinate and perverse people
to the true religion ! all in vain. The book of
Judges, in particular, is full of reiterated relapses,
from their own invisible God, to the visible gods
of other nations. And in all probability, their
anxious desire for a visible king, related in the first
book of Samuel, arose from their being deprived
of a visible god. There was a necessity for pro-
hibiting images † ; which would have soon been
converted into deities visible : and it was extreme-
ly prudent, to supply the want of a visible god,
with endless shews and ceremonies ; which accord-
ingly became the capital branch of the Jewish
worship.

It appears to me from the whole history of the
Jews, that a gross people are not susceptible but
of a gross religion ; and without an enlightened
understanding, that it is vain to think of eradica-
ting superstition and idolatry. And after all the
covenants made with the Jews, after all the chas-
tisements

* Exod. xxxii. 7.

† Deut. xvi. 22.

tisements and all the miracles lavished on them, that they were not however reclaimed from the most groveling idolatry, is evident from the two golden calves fabricated by Jeroboam, saying, "Behold thy gods, O Israel, which brought thee up out of the land of Egypt *." The people also of Judah fell back to idol-worship under Rehoboam, son of Solomon †. Jehu, king of the ten tribes, did not tolerate the worship of other gods ‡; but he continued to worship the two golden calves fabricated by Jeroboam §. Down to the days of King Hezekiah, the Jews worshipped the brazen serpent erected by Moses in the wilderness. The Jews seem indeed to have been a very perverse people: the many promises and threatenings announced by their prophets, and the many miracles wrought among them, had no permanent effect to restrain them from idolatry; and yet, during their captivity in Babylon, several of them submitted to be burnt alive, rather than to join in idol-worship ||. Captivity cured them radically of idolatry; and from that period to this day, they have not been guilty of a single relapse. Xiphilin, in his abridgment of Dion Cassius, relating their war with Pompey many centuries after the Babylonish captivity, gives the following account of them. "Their customs are quite different from those of o-
 " ther

* 1 Kings, xii. 28.

§ 2 Kings, x. 29.

|| Daniel, chap. iii.

“ther nations. Besides a peculiar manner of li-
 “ving, they acknowledge none of the common
 “deities: they acknowledge but one, whom they
 “worship with great veneration. There never
 “was an image in Jerusalem; because they be-
 “lieve their God to be invisible and ineffable.
 “They have built him a temple of great size and
 “beauty, remarkable in the following particular,
 “that it is open above, without any roof.”

There lies no solid objection against images among an enlightened people, when used merely to rouse devotion; but as images tend to pervert the vulgar, they ought not to be admitted into churches. Pictures are less liable to be misapprehended; and the Ethiopians accordingly indulge pictures in their churches, though they prohibit statues. The general council of Frankfort permitted the use of images in churches; but strictly prohibited any worship to be addressed to them. So prone, however, to idolatry are the low and illiterate, that the prohibition lost ground both in France and in Germany; and idol-worship became again general.

It is probable, that the sun and moon were early held to be deities, and that they were the first visible objects of worship. Of all the different kinds of idolatry, it is indeed the most excusable. Upon the sun depends health, vigour, and cheerfulness: during his retirement, all is dark and dismal; when he performs his majestic round, to bless his subjects

... and

and to bestow fecundity, can a mere savage withhold gratitude and veneration ! Hear an old Pagan bard upon that subject. “ O thou who rollest
“ above, round as the shield of my fathers ! Whence
“ are thy beams, O sun, thy everlasting light ?
“ Thou comest forth in thy awful beauty, and the
“ stars hide their face : thou movest alone, for who
“ can be a companion of thy course ! The oaks of
“ the mountain fall : the mountains decay with
“ years : the ocean shrinks and grows again : the
“ moon herself is lost in heaven : but thou art
“ for ever the same, rejoicing in the brightness of
“ thy course. When tempests darken the world,
“ when thunder rolls, and lightning flies, thou
“ lookest in thy beauty from the clouds, and
“ laughest at the storm *.” Worship to the sun as a real deity, was in former times universal ; and prevails in many countries even at present. The American savages worship the sun as sovereign of the universe, known by the name of *Aris-koui* among the Hurons, and of *Agri-skoué* among the Iroquois. They offer him tobacco, which they term *smoking the sun* : the chief man in the assembly lights the calumet, and offers it thrice to the rising sun ; imploring his protection, and recommending the tribe to his care. The chief proceeds to smoke ; and every one smokes in his turn. This ceremony is performed on important occasions only ; less matters are reserved for their Manitou.

The

* Ossian.

The Mississippi people offer to the sun the first of what they take in hunting; which their commander artfully converts to his own use. The Apalachites, bordering on Florida, worship the sun; but sacrifice nothing to him that has life; they hold him to be the parent of life, and think that he can take no pleasure in the destruction of any living creature: their devotion is exerted in perfumes and songs. The Mexicans, while a free people, presented to the sun a share of their meat and drink. The inhabitants of Darien believe in the sun as their god, and in the moon as his wife, paying them equal adoration. The people of Borneo worship the sun and moon as real divinities. The Samoides worship both, bowing to them morning and evening in the Persian manner.

But if the sun and moon were the first objects of idolatry, knowledge and reflection reformed many from the error of holding these luminaries to be deities. "That original Intelligence," say the Magians, "who is the first principle of all things, discovers himself to the mind and understanding only: but he hath placed the sun as his image in the visible universe; and the beams of that bright luminary, are but a faint copy of the glory that shines in the higher heavens." The Persians, as Herodotus reports, had neither temples, nor altars, nor images: for, says that author, they do not think, like the Greeks, that there is any resemblance between gods and men.

men. The Gaures, who to this day profess the ancient religion of Persia, celebrate divine worship before the sacred fire, and turn with peculiar veneration toward the rising sun, as the representative of God; but they adore neither the sun, nor the sacred fire. They are professed enemies to every image of the Deity cut with hands: and hence the havock made by the ancient Persians, upon the statues and temples of the Grecian goods. Such sublimity of thought was above the reach of other uninspired nations, excepting only the Hindoos and Chinese.

I close the history of idolatry with a brief recapitulation of the outlines. Admitting the sun and moon to have been the first objects of idolatry, yet as Polytheism was once universal, they make only two of the many gods that were every where worshipped. We have seen, that the sacred fire was employed in the worship of the sun, and that images were employed in the worship of other deities. Images were originally used for the sole purpose of animating devotion: such was their use in Persia and Hindostan; and such was their use in every country among philosophers. The Emperor Julian, in an epistle to Theodore concerning the images of the gods, says, “We believe not that these images are gods: we only use them in worshipping the gods.” In the progress toward idolatry, the next step is, to imagine, that a deity loves his image, that he makes.

makes it his residence, or at least communicates some virtue to it. The last step is, to fancy the image itself to be a deity; which gained ground imperceptibly as statuary advanced toward perfection. It would be incredible that men of sense should ever suffer themselves to be impressed with so wild a delusion, were it not the overbearing influence of religious superstition. *Credo quia impossibile est*, is applicable to idolatry as well as to transubstantiation. The worshipping of the sun and moon as deities, is idolatry in the strictest sense. With respect to images, the first step of the progress is not idolatry: the next is mixed idolatry: and the last is rank idolatry.

So much upon idolatry. I proceed to what approaches the nearest to it, which is worship addressed to deified mortals. The ancient gods were exalted so little above men, that it was no hard task for the imagination to place in heaven, men who had made a figure on earth. The Grecian heaven was entirely peopled with such men, as well as that of many other nations. Men are deified every day by the Romish church, under the denomination of saints; persons are frequently selected for that honour who scarce deserved a place on earth, and some who never had a place there. The Roman Catholics copy the pagans, in worshipping these saints in quality of tutelar deities. One branch of the office bestowed on them, is to explain the wants of their votaries to the King of heaven,

heaven, and to supplicate for them. The mediatorial office prevails with respect to earthly potentates, as well as heavenly : being struck with awe and timidity in approaching those exalted above us, we naturally take hold of some intermediate person to solicit with us. In approaching the Almighty, the mind sinking down into humility and profound veneration, stops short, relying upon some friend in heaven to intercede in its behalf. Temples among the Cochin-Chinese are constructed with a deep and dark niche, which is their *sanctum sanctorum*. They hold, that no representation, whether by painting or sculpture, can be made of God, who is invisible. The niche denotes his incomprehensibility ; and the good men placed by them in heaven, are believed to be their intercessors at the throne of grace. The prayers of the Chinguliese are seldom directed to the Supreme Being, but to his vicegerents. Intercessors, at the same time, contribute to the ease of their votaries : A Roman Catholic need not assume a very high tone, in addressing a tutelar saint chosen by himself.

False notions of Providence have prompted groveling mortals to put confidence in mediators and intercessors of a still lower class, namely, living mortals, who by idle austerities have acquired a reputation for holiness. Take the following instance, the strongest of the kind that can be figured. Louis XI. of France, sensible of the approach of death, sent for a hermit of Calabria, named *Francisco Martarillo* ;

rillo; and throwing himself at the hermit's feet in a flood of tears, entreated him to intercede with God, that his life might be prolonged; as if the voice of a Calabrian friar, says Voltaire, could alter the course of Providence, by preserving a weak and perverse soul in a worn-out body.

Having discussed the persons that are the objects of worship, the next step in order is, to take under view the forms and ceremonies employed in religious worship. Forms and ceremonies illustrate a prince in his own court; they are necessary in a court of law for expediting business; and they promote seriousness and solemnity in religious worship. At the same time, in every one of these a just medium ought to be preserved between too many and too few. With respect to religious worship in particular, superfluity of ceremonies quenches devotion, by occupying the mind too much upon externals. The Roman Catholic worship is crowded with ceremonies; it resembles the Italian opera, which is all sound and no sentiment. The presbyterian form of worship is too naked: it is proper for philosophers more than for the populace. This is fundamentally the cause of the numerous secessions from the church of Scotland that have made a figure of late: people dislike the established forms, when they find less animation in public worship than is desired; and without being sensible of the real cause, they chuse pastors for themselves, who supply the want of ceremonies by loud speaking,

speaking, with much external fervor and devotion *.

A a 2

The

* External show figures greatly in dark times, when nothing makes an impression but what is visible. A German traveller (Hentzner) talking of Queen Elizabeth, thus describes the solemnity of her dinner : “ While she was
 “ at prayers, we saw her table set out in the following solemn manner. A gentleman entered the room bearing
 “ a rod, and along with him another who had a table-cloth, which, after they had both kneeled three times
 “ with the utmost veneration, he spread upon the table,
 “ and after kneeling again, they both retired. Then came
 “ two others, one with the rod again, the other with a salt-cellar, a plate and bread; when they had kneeled,
 “ as the others had done, and placed what was brought
 “ upon the table, they too retired with the same ceremonies performed by the first. At last came an unmarried
 “ lady, (we were told she was a Countess), and along with
 “ her a married one, bearing a tasting knife; the former
 “ was dressed in white silk; who when she had prostrated
 “ herself three times, in the most graceful manner, approached the table, and rubbed the plates with bread
 “ and salt, with as much awe as if the Queen had been
 “ present: when they had waited there a little while, the
 “ yeomen of the guard entered, bareheaded, clothed in
 “ scarlet, with a golden rose upon their backs, bringing
 “ in at each turn a course of twenty-four dishes, served in
 “ plate most of it gilt; these dishes were received by a
 “ gentleman in the same order they were brought, and
 “ placed upon the table, while the lady-taster gave to
 “ each of the guard a mouthful to eat, of the particular
 “ dish

The frequent ablutions or washings among the Mahometans and others, as acts of devotion, show the influence that the slightest resemblances have on the ignorant. Because purification, in several languages, is a term applicable to the mind as well as

“ dish he had brought, for fear of any poison. During
 “ the time that this guard, which consists of the tallest
 “ and stoutest men that can be found in all England, were
 “ bringing dinner, twelve trumpets and two kettle-drums
 “ made the hall ring for half an hour together. At the
 “ end of this ceremonial, a number of unmarried ladies
 “ appeared, who, with particular solemnity, lifted the
 “ meat off the table, and conveyed it into the Queen’s
 “ inner and more private chamber, where, after she had
 “ chosen for herself, the rest goes to the ladies of the
 “ court.” Forms were greatly regarded among the old
 Romans, dresses appropriated to different ranks; lictors,
 axes, bundles of rods, and other ensigns of power; mili-
 tary merit rewarded with triumphs, ovations, crowns of
 gold, of leaves, &c. &c. Such appearances strike the mul-
 titude with respect and awe: they are indeed despised by
 men of plain sense; but they regain their credit with phi-
 losophers. Excessive courage, the exertion of which is vi-
 sible, was the heroism of the last age: “ I shall never
 “ esteem a king,” said the great Gustavus Adolphus,
 “ who in battle does not expose himself like a private
 “ man.” By acuteness of judgment and refinement of
 taste, we cling to the substance and disregard forms and ce-
 remonies. External show, however, continues to prevail
 in many instances. A young man is apt to be captivated
 with beauty or dress; a young woman, with equipage or
 a title. And hence, many an ill-sorted match.

as to the body, shallow thinkers, misled by the double meaning, imagine that the mind, like the body, is purified by water.

The sect of Ali use the Alcoran translated into the Persian language, which is their native tongue. The sect of Omar esteem this to be a gross impiety ; being persuaded, that the Alcoran was written in Arabic, by the Angel Gabriel, at the command of God himself. The Roman Catholics are not then the only people who profess to speak nonsense to God Almighty ; or, which is the same, who profess to pray in an unknown tongue.

At meals, the ancients poured out some wine, as a libation to the gods : Christians pronounce a short prayer, termed a *grace*.

The gross notion of Deity entertained by the ancients, is exemplified in their worshipping and sacrificing on high places ; in order, as they thought, to be more within sight. Jupiter, in Homer, praises Hector for sacrificing to him frequently upon the top of Ida ; and Strabo observes, that the Persians, who used neither images nor altars, sacrificed to the gods in high places. Balak carried Balaam the prophet to the top of Pisgah and other mountains, to sacrifice there, and to curse Israel. The votaries of Baal always worshipped in high places. Even the sage Tacitus was infected with that absurdity. Speaking of certain high mountains where the gods were worshipped, he expresses himself thus : *Maxime cælo*

appropinquare, precesque mortalium a Deo nusquam propius audiri *.

Ceremonies that tend to unhinge morality, belong more properly to the following section, treating of the connection between religion and morality.

It is now full time to take under consideration an objection to the sense of Deity hinted above, arguing from the gross conceptions of deity among many nations, that this sense cannot be innate. The objection is not indeed directly stated in the following passage, borrowed from a justly-celebrated author ; but as it perhaps may be implied, the passage shall be fairly transcribed. “ The universal propensity to believe invisible intelligent power, being a general attendant on human nature, if not an original instinct, may be considered as a kind of stamp which the Deity has set upon his work ; and nothing surely can more dignify mankind, than to be the only earthly being who bears the stamp or image of the universal Creator. But consult this image as it commonly is in popular religions : How is the Deity disfigured ! what caprice, absurdity, and immorality, are attributed to him † ! ” A satisfactory answer to the objection implied in this passage,

* “ As approaching nearer to heaven, the prayers of mortals are there more distinctly heard.”

† Natural History of Religion.

passage, will occur, upon recollecting the progress of men and nations from infancy to maturity. Our external senses, necessary for self-preservation, soon arrive at perfection: the more refined senses of propriety, of right and wrong, of Deity, of being accountable creatures, and many others of the same kind, are of slower growth: the sense of right and wrong in particular, and the sense of Deity, seldom reach perfection but by good education and much study. If such be the case among enlightened nations, what is to be expected from savages who are in the lowest stage of understanding? To a savage of New Holland, whose sense of deity is extremely obscure, one may talk without end of a being who created the world, and who governs it by wise laws; but in vain, for the savage will be never the wiser. The same savage hath also a glimmering of the moral sense, as all men have; and yet in vain will you discourse to him of approbation and disapprobation, of merit and demerit: of these terms he has no clear conception. Hence the endless aberrations of rude and barbarous nations, from pure religion as well as from pure morality. Of the latter, there are many instances collected in the preceding tract; and of the former, still more in the present tract. The sense of deity in dark times has indeed been strangely distorted, by certain biases and passions that enslave the rude and illiterate: but these yield gradually to the rational faculty as it ripens, and

at last leave religion free to sound philosophy. Then it is, that men, listening to the innate sense of deity purified from every bias, acquire a clear conviction of one supreme Deity who made and governs the world.

The foregoing objection then weighs not against the sense of deity more than against the moral sense. If it have weight, it resolves into a complaint against Providence for the weakness of the sense of deity in rude and illiterate nations. If such complaint be solidly founded, it pierces extremely deep : why have not all nations, even in their nascent state, the sense of deity and the moral sense in purity and perfection ? why do they not possess all the arts of life without necessity of culture or experience ? why are we born poor and helpless infants, instead of being produced complete in every member, internal and external, as Adam and Eve were ? The plan of Providence is far above the reach of our weak criticisms : it is but a small portion that is laid open to our view ; can we pretend to judge of the whole ? I venture only to suggest, that as, with respect to individuals, there is a progress from infancy to maturity ; so there is a similar progress in every nation, from its savage state to its maturity in arts and sciences. A child that has just conceptions of the Deity and of his attributes, would be a great miracle ; and would not such knowledge in a savage be equally so ? Nor can I discover what benefit a child or a
savage

savage could reap from such knowledge ; provided it remained a child or a savage in every other respect. The genuine fruits of religion, are gratitude to the Author of our being, veneration to him as the Supreme Being, absolute resignation to the established laws of his providence, and cheerful performance of every duty : but a child has not the slightest idea of gratitude nor of veneration, and very little of moral duties ; and a savage, with respect to these, is not much superior to a child. The formation and government of the world, as far as we know, are excellent : we have great reason to presume the same with respect to what we do not know ; and every good man will rest satisfied with the following reflection, That we should have been men from the hour of our birth, complete in every part, had it been conformable to the system of unerring Providence.

SECT. II.

Morality considered as a branch of duty to our Maker.

HAVING travelled long on a rough road, not a little fatiguing, the agreeable part lies before us ; which is, to treat of morality as a branch of religion. It was that subject which induced me to undertake the history of natural religion ; a subject that will afford salutary instruction ; and will

will inspire true piety, if instruction can produce that effect.

Bayle states a question, Whether a people may not be happy in society, and be qualified for good government, upon principles of morality singly, without any sense of religion. The question is ingenious, and may give opportunity for subtle reasoning; but it is useless, because the fact supposed cannot happen. The principles of morality and of religion are equally rooted in our nature: they are indeed weak in children and in savages; but they grow up together, and advance toward maturity with equal steps. Where the moral sense is entire, there must be a sense of religion; and if a man who has no sense of religion live decently in society, he is more indebted for his conduct to good temper than to sound morals.

We have the authority of the Prophet Micah, formerly quoted, for holding, that religion, or, in other words, our duty to God, consists in doing justice, in loving mercy; and in walking humbly with him. The last is the foundation of religious worship, discussed in the foregoing section: the two former belong to the present section. And if we have gratitude to our Maker and Benefactor, if we owe implicit obedience to his will as our rightful sovereign, we ought not to separate the worship we owe to him, from justice and benevolence to our fellow-creatures; for to be unjust to
them,

them, to be cruel or hard-hearted, is a transgression of his will, no less gross than a total neglect of religious worship. “ Master, which is the great
 “ commandment in the law? Jesus said unto him,
 “ Thou shalt love the Lord thy God with all thy
 “ heart, with all thy soul, and with all thy mind:
 “ This is the first and great commandment. And
 “ the second is like unto it, Thou shalt love thy
 “ neighbour as thyself. On these two command-
 “ ments hang all the law and the prophets*.”
 “ Then shall the King say unto them on his right
 “ hand, Come, ye blessed of my Father, inherit
 “ the kingdom prepared for you. For I was
 “ hungry, and ye gave me meat: I was thirsty,
 “ and ye gave me drink: I was a stranger, and
 “ ye took me in: naked, and ye clothed me:
 “ sick, and ye visited me: in prison, and ye came
 “ unto me. Then shall the righteous answer,
 “ saying, Lord, when saw we thee hungry, and
 “ fed thee? or thirsty, and gave thee drink?
 “ When saw we thee a stranger, and took thee
 “ in? or naked, and clothed thee? When saw
 “ we thee sick, or in prison, and came unto thee?
 “ And the King shall answer, Verily I say unto
 “ you, in as much as ye have done it unto one of
 “ the least of these my brethren, ye have done it
 “ unto me†.” “ Pure religion and undefiled be-
 “ fore God, is this, To visit the fatherless and
 “ widow

* Matthew, xxii. 36.

† Matthew, xxv. 34.

“ widow in their affliction ; and to keep himself
 “ unspotted from the world *.” “ Hostias et vic-
 “ timas Domino offeram quas in usum mei pro-
 “ tulit, ut rejiciam ei suum munus? Ingratum
 “ est ; cùm sit litabilis hostia bonus animus, et
 “ pura mens, et sincera conscientia. Igitur qui
 “ innocentiam colit, Domino supplicat ; qui justi-
 “ tiam, Deo libat ; qui fraudibus abstinet, pro-
 “ pitiat Deum ; qui hominem periculo subripit,
 “ optimam victimam cædit. Hæc nostra sacrificia,
 “ hæc Dei sacra sunt. Sic apud nos religiosior est
 “ ille, qui justior †.” The laws of Zaleucus, law-
 giver to the Locrians, who lived before the days
 of Pythagoras, are introduced with the following
 preamble. “ No man can question the existence
 “ of Deity who observes the order and harmony
 “ of the universe, which cannot be the production
 “ of chance. Men ought to bridle their passions,
 “ and

* James, i. 27.

† “ Shall I offer to God for a sacrifice those creatures
 “ which his bounty has given me for my use? It were
 “ ingratitude to throw back the gift upon the giver. The
 “ most acceptable sacrifice is an upright mind, an un-
 “ tainted conscience, and an honest heart. The actions of
 “ the innocent ascend to God in prayer ; the observance
 “ of justice is more grateful than incense ; the man who
 “ is sincere in his dealings, secures the favour of his Crea-
 “ tor ; and the delivery of a fellow-creature from danger
 “ or destruction, is dearer in the eyes of the Almighty
 “ than the sacrifice of blood.”—*Minucius Felix*.

“ and to guard against every vice. God is pleased
 “ with no sacrifice but a sincere heart ; and dif-
 “ fers widely from mortals, whose delight is splen-
 “ did ceremonies and rich offerings. Let justice
 “ therefore be studied ; for by that only can a
 “ man be acceptable to the Deity. Let those who
 “ are tempted to do ill, have always before their
 “ eyes the severe judgments of the gods against
 “ wicked men. Let them always keep in view
 “ the hour of death, that fatal hour which is at-
 “ tended with bitter remorse for transgressing the
 “ rules of justice. If a bad disposition incline you
 “ to vice, pray to Heaven, at the foot of the altar,
 “ to mend your heart.”

Morality is thus included in religion. Some na-
 tions, however, leave not this proposition to rea-
 soning or conviction, but engross many moral du-
 ties in their religious creed. In the 67th chapter
 of the Sadder, a lie is declared to be a great sin,
 and is forbid even where it tends to bring about
 good. So much purer is the morality of the an-
 cient Persians than of the present Jesuits. The
 religion of the people of Pegu, inculcates charity,
 forbids to kill, to steal or to injure others. Attend
 to the consequence : that people, fierce originally,
 have become humane and compassionate. In a sa-
 cred book of the ancient Persians, it is written,
 “ If you incline to be a saint, give good education
 “ to your children ; for their virtuous actions will
 “ be imputed to you.” The people of Japan pay
 great

great respect to their parents ; it being an article in their creed, That those who fail in duty to their parents, will be punished by the gods. In these two instances, religion tends greatly to connect parents and children in the most intimate tie of cordial affection. The reverence the Chinese have for their ancestors and the ceremonies performed annually at their tombs, tend to keep them at home, and prevent their wandering into foreign countries.

Ancient Persia was fertile and populous : at present it is barren and thin of inhabitants. Sir John Chardin accounts for the difference. The climate of Persia is so dry, that scarce a shower falls during summer : even grass will not grow without being watered. This defect of climate was remedied by the ancient inhabitants, termed *Gaures* ; among whom it was a religious act, to cultivate waste land and to plant trees for fruit. It was a maxim in the sacred book of that religion, That he who cultivates the ground with care and diligence, acquires a greater stock of religious merit, that can be acquired by ten thousand prayers. The religion, on the contrary, of the present Mahometan inhabitants, leads them to take no care for tomorrow : they grasp at present enjoyment, and leave all the rest to fate.

Superstitious rites in some religions, are successfully employed to enforce certain moral duties. The Romans commonly made their solemn covenants in the Capitol, before the statue of Jupiter ;
by

by which solemnity he was understood to guarantee the covenant, ready to pour out vengeance upon the transgressor. When an oath enters into any engagement, the Burates, a people in Grand Tartary, require it to be given upon a mountain, held to be sacred : they are firmly persuaded, that the person who swears a falsehood, will not come down alive. The Essenes, a Jewish sect, bound themselves by a solemn oath, to shun unlawful gain, to be faithful to their promises, not to lie, and never to harm any one. In Cochin-China, the souls of those who have been eminent for arts or arms, are worshipped. Their statues are placed in the temples ; and the size of a statue is proportioned to the merit of the person represented. If that be impartially executed, there cannot be a nobler incitement to public spirit. The Egyptians did not reach the thought of honouring virtue after death ; but they dishonoured vice, by excluding it from the Elysian fields.

The salutary influence of religion on morality, is not confined to pure religion, whether by its connection with morality in general, or by inculcating particular moral duties. There are many religious doctrines, doubtful or perhaps erroneous, that contribute also to enforce morality. Some followers of Confucius ascribe immortality to the souls of the just only ; and believe that the souls of the wicked perish with their bodies. The native Hindoos are gentle and humane : the metempsychosis

chosis or transmigration of souls, is an article in their creed ; and hence the prohibition to destroy any living creature, because it might disturb the soul of an ancestor. In the second chapter of the Sadder, it is written, that a man whose good works are more numerous than his sins, will go to paradise ; otherwise that he will be thrust into hell, there to remain for ever. It adds, that a bridge erected over the great abyss where hell is situated, leads from this earth to paradise ; that upon the bridge there stands an angel, who weighs in a balance the merits of the passengers ; that the passenger whose good works are found light in the balance, is thrown over the bridge into hell ; but that the passenger whose good works preponderate, proceeds in his journey to paradise, where there is a glorious city, gardens, rivers, and beautiful virgins, whose looks are a perpetual feast, but who must not be enjoyed. In the fourth chapter of the Sadder, good works are zealously recommended in the following parable. Zeradusht, or Zoroaster, being in company with God, saw a man in hell who wanted his right foot. “ Oh my Creator,” said Zoroaster, “ who is that man who wants the right foot ? God answered, He was the king of thirty-three cities, reigned many years, but never did any good, except once, when, seeing a sheep tied where it could not reach its food, he with his right foot pushed the food to it ; upon which account that foot was saved from hell.” In Japan,

pan, these of the Sinto religion believe, that the souls of good men are translated to a place of happiness, next to the habitation of their gods. But they admit no place of torment; nor have they any notion of a devil, but what animates the fox, a very mischievous animal in that country. What then becomes of the souls of ill men? Being denied entrance into heaven, they wander about to expiate their sins. Those of the Budo religion believe, that in the other world, there is a place of misery as well as of happiness. Of the latter there are different degrees, for different degrees of virtue; and yet, far from envying the happier lot of others, every inhabitant is perfectly satisfied with his own. There are also different degrees of misery; for justice requires, that every man be punished according to the nature and number of his sins. *Jemma O* is the severe judge of the wicked: their vices appear to him in all their horror, by means of a mirror, named *the mirror of knowledge*. When souls have expiated their sins, after suffering long in the prison of darkness, they are sent back into the world, to animate serpents, toads, and such vile animals as resembled them in their former existence. From these they pass into the bodies of more innocent animals; and at last are again suffered to enter human bodies; after the dissolution of which, they run the same course of happiness or misery as at first. The people of Benin, in Africa, believe a man's shadow

to be a real being, that gives testimony after death for or against him ; and that he accordingly is made happy or miserable in another world. The Negroes hold that their own country is delicious above all others ; and it is the belief of several of their tribes, that where-ever they die, they will return to their own country. This is a perpetual source of comfort, and inspires them with humanity above the other tribes. A religious belief in ancient Greece, that the souls of those who are left above ground without rites, have not access to Elysium, tended to promote humanity ; for those who are careful of the dead, will not be altogether indifferent about the living.

Immense are the blessings that proceed from the union of pure religion with sound morality : but however immense, I boldly affirm, that they scarce counterbalance the manifold evils that proceed from impure religion, indulging and even encouraging gross immoralities. A few glaring instances shall be selected. The first I shall mention is, the holding religion to consist in the belief of points purely speculative, such as have no relation to good works. The natural effect of that doctrine is, to divorce religion from morality, in manifest contradiction to the will of God. What avails it, for example, to the glory of God or to the happiness of men, whether the conception of the Virgin Mary, was maculate or immaculate ? The following few instances, selected from a great number,

number, are controversies of that kind, which for ages miserably afflicted the Christian church, and engendered the bitterest enmity, productive of destruction and slaughter among brethren of the same religion. In the fifth century, it was the employment of more than one general council, to determine, whether *the mother of God*, or *the mother of Christ*, is the proper epithet of the Virgin Mary. In the sixth century, a bitter controversy arose whether Christ's body was corruptible. In the seventh century, Christians were divided about the volition of Christ, whether he had one or two Wills, and how his Will operated. In the eighth and ninth centuries, the Greek and Latin churches divided about the Holy Ghost, whether he proceeded from the Father and Son, or only from the Father. In the eleventh century, there arose a warm contest between the Greek and Latin churches about using unleavened bread in the eucharist. In the fourteenth century, it was controverted between Pope John XXII. and the divines of his time, whether souls in their intermediate state see God, or only the human nature of Christ. Franciscans have suffered death in multitudes about the form of their hood. It was disputed between the Dominicans and Franciscans, whether Christ had any property. The Pope pronounced the negative proposition to be a pestilential and blasphemous doctrine, subversive of Catholic faith. Many councils were held at Constantinople, to de-

termine what sort of light it was that the disciples saw on Mount Tabor: it was solemnly pronounced, to be the eternal light with which God is encircled; and which may be termed his energy or operation, but is distinct from his nature and essence. A heap of propositions in the creed of St Athanasius, as far as intelligible, are merely speculative, such as may be adopted or rejected, without the least danger to religion, or to morality; and yet we are commanded to believe every one of them, under the pain of eternal damnation. An endless number of such propositions, adopted by the Romish church, clearly evince, that Christianity was in that church held to consist entirely in belief, without any regard to good works*. Whether the Alcoran be eternal, or whether it were created, is a dispute that has occasioned much effusion of Mahometan blood. The Calif Mamoun, with many doctors, held it to have been created; but the greater number insisted, that being the word of God, it must like him be eternal. This opinion is embraced by the present Mahometans, who hold all who deny it to be infidels. One great maxim of the Brahmins contained in their ancient books, is,

* The great weight that was laid upon orthodoxy, appears from a triumphal arch erected over the tomb of Charlemagne, upon which was the following inscription: "Here lies the body of Charles, a great and orthodox emperor." And yet that orthodox Emperor could not write his name.

is, that it is better to sit than to walk, better to lie than to sit, better to sleep than to wake, better to die than to live. This is directly subversive of industry, and consequently of morality. There is among men great uniformity of opinion in matters of importance. Religious differences are generally about trifles, where liberty ought to be indulged without reserve* ; and yet upon these trifles are founded the bitterest enmities. It ought therefore to be a fundamental law in every church, to abstain from loading its creed with articles that are not essential : for such articles tend to eradicate brotherly love, and to convert into bitter enemies, men who are fundamentally of the same faith. This leads me naturally to say a few words on religion as a branch of education, of all the most important branch. Avoiding all the points disputed among the different sects of Christians, and leaving mysteries to the future sagacity of your children if they shall be inclined to pry into them, let them know that there is a God over all who loves the good, and is an enemy to evil-doers ; that this great Being, though invisible to us, is witness to all our words and actions, and that even our secret thoughts are not hid from him. Take every opportunity to inculcate this great truth, till it make so deep an impression as to be the great regulator of their conduct. With respect to every intended action, train

them

* Elements of Criticism, vol. ii. p. 493. edit. 5.

them up into the habit of inquiring first how it will appear in the sight of their Maker at the great day of judgment. This is true religion, the main support of virtue. It is all that is requisite in point of education ; leaving to those who have penetration and leisure to form a more complete system.

In the next place shall be mentioned, certain articles of faith that tend to sap the very foundation of one or other moral duty. What, for example, can more effectually promote cruelty, than the creed of the Ilaans, a people in the island of Borneo, That every person they put to death must attend them as a slave in the other world ? This belief makes them prone to war, and occasions assassinations without end. According to the creed of the savages in Canada, the killing and burning enemies are what chiefly entitle them to be happy in another world ; and that he who destroys the greatest number, will be the most happy. At the same time, they have no notion of greater happiness there, than plenty of game, great abundance of all things without labour, and full gratification of every sensual appetite. The Scandinavians had no notion of greater bliss in another world, than to drink beer out of the skull of an enemy, in the hall of Woden their tutelar deity : can hatred and revenge indulged in this world be more honourably rewarded ? The doctrine of tutelar deities is equally productive of hatred and revenge :
relying

relying on a superior power who espouses all my quarrels, I put no bounds to my resentment, and every moral duty in opposition is trampled under foot. The following creed of the inhabitants of the Marian or Ladrone islands, is a great encouragement to cowardice. Heaven, according to that creed, is a region under the earth, filled with cocoa-trees, sugar-canes, and variety of other delicious fruits. Hell is a vast furnace, constantly red-hot. Their condition in the other world depends not on good or bad actions, but on the manner of their death. Those who die a natural death, go straight to heaven: they may sin freely, if they can but secure their persons against violence. But war and bloodshed are their aversion, because those who suffer a violent death go straight to hell. In many ancient nations, a goddess was worshipped, whose province it was to promote animal love without regard to matrimony. That goddess was in Greece termed *Aphrodité*, in Rome *Venus*, and in Babylon *Mylitta*. To her was sacrificed, in some countries, the virginity of young women; which, it was believed, did secure their chastity for ever after. Justin mentions a custom in the island of Cyprus, of sending young women at stated times to the sea-shore; where they prostituted themselves as a tribute to Venus, that they might be chaste the rest of their lives. His words are, “ Pro reliqua pudicitiae libamenta Veneri so-

“*luturas**.” In other nations, a small number only were prostituted, in order to secure to the remainder, a chaste and regular life. This explains a custom among the Babylonians, which, far from being thought a religious act, is held as a proof of abandoned debauchery. The custom was, That every woman once in her life should prostitute herself in the temple of the goddess Mylitta. Herodotus reports, that thereby they became proof against all temptation. And Ælian observes the same of the Lydian ladies. *Credat Judæus apella*. Margaret Poretta, who in the fourteenth century made a figure among the Beguines, preached a doctrine not a little favourable to incontinence. She undertook to demonstrate, “That the soul, when absorbed in the love of God, is free from the restraint of law, and may freely gratify every natural appetite, without contracting guilt ;” a cordial doctrine for a lady of pleasure. That crazy person, instead of being laughed at, was burnt alive at Paris. In the fifteenth century, a sect termed *bretbren and sisters of the free spirit*, held, That modesty is a mark of inhering corruption ; and that those only are perfect, who can behold nakedness without emotion. These fanatics appeared at public worship, without the least covering. Many tenets professed by the Jesuits, open a door to every immorality. “Persons truly wicked, and void of the love of God, may expect
“ eternal

* Lib. xviii. cap. 5.

“eternal life in heaven; provided only they be
 “impressed with fear of divine anger, and avoid
 “heinous crimes through the dread of future pu-
 “nishment.” Again, “Persons may transgress
 “with safety, who have any plausible argument
 “for transgressing. A judge, for example, may
 “decide for the least probable side of a question,
 “and even against his own opinion, provided he
 “be supported by any tolerable authority.” A-
 “gain, “Actions intrinsically evil, and contrary to
 “divine law, may however be innocently per-
 “formed, by those who can join, even ideally, a
 “good end to the performance. For example, an
 “ecclesiastic may safely commit simony by pur-
 “chasing a benefice, if to the unlawful act, he
 “join the innocent purpose of procuring to him-
 “self a subsistence. A man who runs another
 “through the body for a slight affront, renders
 “the action lawful, if his motive be honour, not
 “revenge.” A famous Jesuit taught, that a young
 man may, with the death of his father, and even
 rejoice at his death, provided the wish proceed,
 not from hatred, but from fondness of his father’s
 estate. And another Jesuit has had the effrontery
 to maintain, that a monk may lawfully assassinate
 a calumniator, who threatens to charge his order
 with scandalous practices. Among the negroes of
 Sanguin, on the river Sestro in Guinea, it is an ar-
 ticle of faith that dextrous robbery is no less law-
 ful than beneficial.

..... The

The Quakers, a sect generated during the civil wars in the reign of Charles I., contracted such an aversion to war as to declare it unlawful even in self-defence ; a doctrine that soars high above morality, and is contradictory to human nature. But by what magic has a tenet so unnatural subsisted so long ? The Quakers exclude pride, admitting no difference of rank, but considering all men as their brethren. And they exclude vanity by simplicity and uniformity of dress. Thus, by humility and temperance, they have preserved their institutions alive. But these passions cannot always be kept in subjection : vanity is creeping in, especially among the females, who indulge in silks, fine linen, bone-lace, &c. Vanity and pride will reach the males ; and the edifice will totter and fall.

A doctrine that strikes at the root of every moral duty, as well as of religion itself, is, That God will accept a composition for sin ; a doctrine that prevailed universally during the days of ignorance. Compositions for crimes were countenanced by law in every country * ; and men, prone to indulge their passions, flattered themselves, that they might compound with God for sinning against him, as with their neighbours for injuring them : those who have no notion of any motive but interest, naturally think it to be equally powerful with the Deity. An opinion prevailed universally in the
Christian

* Historical Law Tracts, Tract I.

Christian church, from the eighth century down to the Reformation, that liberal donations to God, to a saint, to the church, would procure pardon even for the grossest sins. During that period, the building churches and monasteries was in high vogue. This absurd, or rather impious doctrine, proved a plentiful harvest of wealth to the clergy; for the great and opulent, who are commonly the boldest sinners, have the greatest ability to compound for their sins. There needs nothing but such an opinion, to annihilate every duty, whether moral or religious; for what wicked man will think either of restitution or of reformation, who can purchase a pardon from Heaven with so little trouble? Louis XI. of France was remarkably superstitious, even in a superstitious age. To ingratiate himself with the Virgin Mary, he surrendered to her the county of Boulogne with great solemnity. Voltaire remarks, that godliness consists, not in making the Virgin a Countess, but in abstaining from sin. Composition for sins is a doctrine of the church of Rome, boldly professed without disguise. A book of rates, published by authority of the Pope, contains stated prices for absolutions, not excepting the most heinous sins. So true is the observation of Æneas Silvius, afterwards Pope Paul II. “*Nihil est quod absque*
“*argento Romana curia det: ipsa manuum im-*
“*positio, et Spiritus Sancti dona, venduntur; nec*
“*peccatorum*

“ peccatorum venia nisi nummatis impenditur *.”

Of all the immoral atonements for sin, human sacrifices are the most brutal; deviating no less from the purity of religion, than from the fundamental principles of morality. They were out of use as kindly affections prevailed; and will never again be restored, unless we fall back to the savage manners of our forefathers. Composition for crimes, once universal, is now banished from every enlightened nation. Composition for sins, was once equally universal; and I wish it could be said, that there are now no remains of that poisonous opinion among Christians; the practice of the church of Rome will not permit it to be said. Were men deeply convinced, as they ought to be, that sincere repentance and reformation of manners are the only means for obtaining pardon, they would never dream of making bargains with the Almighty, and of compounding with him for their sins.

In the practice of religion, the laying too great weight on forms, ceremonies, and other external arbitrary acts, tends to the corruption of morals. That error has infected every religion. The Sad-

* “ There is nothing to be obtained from the court of Rome but by the force of money: even the ceremony of consecration, and the gifts of the Holy Ghost, are sold; and the remission of sins is bestowed only on those who can “ pay for it.” ”

der, the Bible of the Gautes, prohibits calumny and detraction, lying, stealing, adultery, and fornication. It, however, enervates morality and religion, by placing many trifling acts on a level with the most important duties. It enjoins the destruction of five kinds of reptiles; frogs, mice, ants, serpents, and flies that sting. It teaches, that to walk barefoot profanes the ground. Great regard for water is enjoined : it must not be used during night ; and when set upon the fire, a third part of the pot must be empty, to prevent boiling over. The Bramins have wofully degenerated from their original institutions, thinking that religion consists in forms and ceremonies. As soon as an infant is born, the word *Oum* must be pronounced over it ; otherwise it will be eternally miserable : its tongue must be rubbed with consecrated meal : the third day of the moon, it must be carried into open air, with its head to the north. The inhabitants of Formosa believe in hell ; but it is only for punishing those who fail to go naked in certain seasons, or who wear cotton instead of silk. In the time of Ghenhizcan, it was held in Tartary a mortal sin, to put a knife into the fire, to whip a horse with his bridle, or to break one bone with another ; and yet these pious Tartars held treachery, robbery, murder, to be no sins. A faction in Ægina, a Greek commonwealth, treacherously assassinated seven hundred of their fellow-citizens. They cut off the hands of a miserable fugitive,

fugitive, who had laid hold of the altar for protection, in order to murder him without the precincts of the temple. Their treacherous assassinations made no impression : but though they refrained from murder in the temple, yet by profaning it with blood, says Herodotus, they offended the gods, and contracted inexpiable guilt. Would one believe, that a tribunal was established by Charlemagne more horrible than the inquisition itself? It was established in Westphalia, to punish with death every Saxon who eat meat in lent. It was established in Flanders and in French-county, the beginning of the seventeenth century. Smollet in his travels into Italy observes, that it is held more infamous to transgress the slightest ceremonial institution of the church of Rome, than to transgress any moral duty ; that a murderer or adulterer will be easily absolved by the church, and even maintain his character in society ; but that a man who eats a pigeon on a Saturday, is abhorred as a monster of reprobation. During the twelfth and thirteenth centuries, long curled hair, of which men of fashion in England were extremely vain, suffered a violent persecution. Anselm, Archbishop of Canterbury, pronounced the sentence of excommunication against those who indulged in that dress ; and was celebrated by his brethren of the clergy, though at that time excommunication was a dreadful punishment. William of Malmesbury relates in lively colours an incident

cident that shows the gross superstition of that age. " A certain knight, who was very proud of
 " his long luxuriant hair, dreamed that a person
 " suffocated him with its curls. As soon as he
 " awoke from his sleep, he cut his hair to a decent
 " length. The report of this spread over all Eng-
 " land ; and almost all the knights reduced their
 " hair to the proper standard. But this reforma-
 " tion was not of long continuance. For in less
 " than a year all who wished to appear fashion-
 " able, returned to their former wickedness, and
 " contended with the ladies in length of hair.
 " Those to whom nature had denied that orna-
 " ment, supplied the defect by art." What can
 be more grossly superstitious than the form used
 in Roman Catholic countries, of baptizing a
 church-bell? The priest, assisted by some of his
 brethren, mumbles over some prayers, and sprin-
 kles the outside with holy water, while they wash
 the inside with the same precious liquor. The
 priest next draws seven crosses on the outside, and
 four on the inside, with consecrated oil. Then a
 censer, full of frankincense, is put under the bell
 to smoke it. And the whole concludes with
 prayer.

Listen to a celebrated writer upon this subject.
 " It is certain, that in every religion, however su-
 " blime, many of the votaries, perhaps the greatest
 " number, will still seek the divine favour, not by
 " virtue and good morals, which alone can be ac-
 " ceptable

“ acceptable to a perfect being, but, either by frivolous
 “ lapses of observance, by intemperate zeal, by rap-
 “ turous ecstasies, or by the belief of mysterious
 “ and absurd opinions. When the old Romans
 “ were attacked with a pestilence, they never
 “ ascribed their sufferings to their vices, or dream-
 “ ed of repentance and amendment. They never
 “ thought that they were the general robbers of
 “ the world, whose ambition and avarice made
 “ desolate the earth, and reduced opulent nations
 “ to want and beggary. They only created a
 “ dictator in order to drive a nail into a door;
 “ and by that means, they thought that they had
 “ sufficiently appeased their incensed deity *.”

Thus, gradually, the essentials of religion wear out of mind, by the attention given to forms and ceremonies: these intercept and exhaust the whole stock of devotion, which ought to be reserved for the higher exercises of religion. The neglect or transgression of mere punctilios, are punished as heinous sins; while sins really heinous are suffered to pass with impunity. The Jews exalted the keeping their Sabbath holy, above every other duty; and it was the general belief, that the strict observance of that day, was alone sufficient to atone for every sin. The command of resting that day, was taken so literally, that they would not on that day defend themselves even against an assassin.

* Natural History of Religion, by David Hume Esq.

assassin. Ptolomy, son of Lagus, entered Jerusalem on the Jewish sabbath, in a hostile manner without resistance. Nor did experience open the eyes of that foolish people. Xiphilin, relating the siege of Jerusalem by Pompey, says, that if the Jews had not rested on the sabbath, Pompey would not have been successful. Every Saturday he renewed his batteries; and having on that day made a breach, he marched into the town without opposition. One cannot help smiling at an Amsterdam Jew, who had no check of conscience for breaking open a house and carrying off money; and yet being stopped in his flight by the sabbath, he most piously rested, till he was apprehended, and led to the gallows. Nor are the Jews to this day cured of that frenzy. In some late accounts from Constantinople, a fire broke out in a Jew's house on Saturday: rather than profane the sabbath, he suffered the flames to spread, which occasioned the destruction of five hundred houses*. We laugh

at

* “ And there was a woman which had a spirit of infirmity eighteen years, and was bowed together. And Jesus laid his hands on her, and immediately she was made straight, and glorified God. And the ruler of the synagogue with indignation said unto the people, There are six days in which men ought to work: in them therefore come and be healed, and not on the sabbath-day. The Lord then said, Thou hypocrite, doth not each one of you on the sabbath loose his ox or his ass from
“ the

at the Jews, and we have reason ; and yet there are many well-meaning Protestants, who lay the whole of religion upon punctual attendance at public worship. Are the Roman Catholics less superstitious with respect to the place of worship, than the Jews are with respect to the day of worship? In the year 1670, some Arabians, watching an opportunity, got into the town of Dieu, when the gates were opened in the morning. They might easily have been expelled by the cannon of the citadel ; but the Portuguese governor was obliged to look on without firing a gun, being threatened with excommunication, if the least mischief should be done to any of the churches. The only doctrine inculcated from the Romish pulpit down to the Reformation, were the authority of holy mother-church ; the merit of the saints, and their credit in the court of heaven ; the dignity and glory of the blessed Virgin ; the efficacy of relics ; the intolerable fire of Purgatory ; and the vast importance of indulgencies. Relying on such pious acts for obtaining remission of sin, all orders of men rushed headlong into vice * ; nor was there a single attempt

“ the stall, and lead him away to watering? and ought
 “ not this woman, whom Satan hath bound, be loosed
 “ from this bond on the sabbath-day? *Luke* xiii. 11.

* An ingenious writer pleasantly observes, “ That a
 “ croisade was the South-Sea project of former times : by
 “ the latter, men hoped to gain riches without industry :
 “ by

attempt to stem the current of immorality ; for the traffic of indulgencies could not but flourish in proportion to the growth of sin. And thus was religion set in direct opposition to morality. St Eloy, bishop of Noyon in the seventh century, and canonized by the church of Rome, delivers the following doctrine. “ He is a good christian who goes
 “ frequently to church ; who presents his obla-
 “ tions upon the altar ; who tastes not the fruit of
 “ his own industry till part be consecrated to
 “ God ; who, when the holy festivals approach,
 “ lives chastely even with his own wife for several
 “ days ; and who can repeat the creed and the
 “ Lord’s prayer. Redeem then your souls from
 “ destruction, while you have the means in your
 “ power : offer presents and tithes to churchmen :
 “ come more frequently to church : humbly im-
 “ plore the patronage of saints. If you observe
 “ these things, you may, in the day of judgment,
 “ go with confidence to the tribunal of the eternal
 “ Judge, and say, Give to us, O Lord, for we have
 “ given unto thee.” A modern author subjoins a proper observation. “ We see here a very ample
 “ description of a good christian, in which there is
 “ not the least mention of the love of God, resigna-
 “ tion to his will, obedience to his laws, nor of
 C c 2 “ justice,

“ by the former, they hoped to gain heaven without re-
 “ pentance, amendment of life, or sanctity of manners.”
Sir David Dalrymple, a Judge in the Court of Session.

“ justice, benevolence, or charity.” Gross ignorance and wretched superstition prevailed so much even in the fourteenth century, that people reckoned themselves secure of salvation, if at the day of judgment they could show any connection with monks. Many at the point of death, made it their last request, to be admitted into the mendicant order, or to be interred in their burial-place. Religion need not associate with morality, if such silly practices be sufficient for obtaining the favour of God. Is this less absurd than the Hindostan belief, That the water of the Ganges hath a sanctifying virtue; and that those who die on its banks, are not only exempted from future punishment, but are wafted straight to paradise?

Forms and ceremonies are visible acts, which make a deep impression on the vulgar. Hence their influence in reasoning and in morality, as we have seen in the two sketches immediately foregoing; and hence also their influence in religion. Forms and ceremonies are useful at public worship: but they ought not to take place of essentials. People however, governed by what they see and hear, are more addicted to external acts of devotion, than to heart worship, which is not known but by reflection.

It will be no excuse for relying so much on forms and ceremonies, that they are innocent. In themselves they may be innocent; but not so in their consequences. For they have by such reliance

ance a vigorous tendency to relax the obligations of morality. “ La pure morale,” says M. Rousseau, “ est si chargée de devoirs sévères que si on
 “ la surcharge encore de formes indifférentes,
 “ c’est presque toujours aux dépens de l’essentiel.
 “ On dit que c’est le cas de la plupart des moines,
 “ qui, soumis à mille règles inutiles, ne savent ce
 “ que c’est qu’honneur et vertu.” Religious rites that contradict not any passion, are keenly embraced, and punctually performed ; and men, flattering themselves that they have thus been punctual in their duty to God, give vent to their passions against men. “ They pay tithes of mint, and anise, and cummin ; but omit the weightier matters of the law, judgment, mercy, and faith *.” Upon such a man religion sits extremely light. As he seldom exercises any act of genuine devotion, he thinks of the Deity with ease and familiarity : how otherwise is it accountable, that the plays, termed *Mysteries*, could be relished, where mean and perhaps dissolute persons are brought on the stage, acting Jesus Christ, the Virgin Mary, and even God himself ? These objects of worship were certainly no more regarded than the Grecian gods, who frequently made part of the *Dramatis personæ* in Greek plays. Many other facts might be urged, to prove the low ebb of religion in those days : I select one or two, which probably will afford some amusement to the reader. Bartolus,

* Matthew xxiii. 23.

merſion, *In name of the Father* ; at the ſecond, *In name of the Son* ; at the third, *In name of the Holy Ghoſt*. This form is bitterly condemned by the Romiſh church, which appoints the three perſons of the Trinity to be joined in the ſame expreſſion, in token of their union. Strahlenberg gives an account of a Chriſtian ſect in Ruſſia, which differs from the eſtabliſhed Greek church in the following particulars : Firſt, In public worſhip they repeat *Halleluia* but twice ; and it is a mortal ſin to repeat it thrice. Second, In celebrating maſs, not five but ſeven loaves ought to be uſed. Third, The croſs ſtamped upon a maſs-loaf ought to have eight corners. Fourth, In ſigning with the croſs at prayers, the end of the ring-finger muſt be joined to the end of the thumb, and the two intermediate fingers be held out at full length. How trifling are theſe differences ! and yet for theſe, all who diſſent from them are held unclean, and no better than Pagans : they will not eat nor drink with any of the eſtabliſhed church ; and, if a perſon of that church happen to ſit down in a houſe of theirs, they waſh and purify the ſeat*.

There

* Chriſtians, occupied too much with external forms, have corrupted ſeveral of the fine arts. They have injured architecture, by erecting magnificent churches in the ugly form of a croſs. And they have injured painting, by withdrawing the beſt hands from proper ſubjects, and employing them on the legendary martyrdom of pretended ſaints, and other ſuch diſagreeable ſubjects.

There are few sects founded upon more trivial differences than the Turkish and Persian Mahometans. The epithets given to the Persians by the Turks are, "Forfaken of God, Abominable, " Blasphemers of the Holy Prophet ;" and so bitter is their enmity to the Persians, That the schools of the seraglio are open to young men of all nations, those of Persia alone excepted. The Persians are held to be such apostates from the true faith, as to be utterly past recovery : they receive no quarter in war, being accounted unworthy of life or slavery : nor do the Persians yield to the Turks in hatred. Whether coffee be or be not prohibited in the Alcoran, has produced much controversy in the Mahometan church, and consequently much persecuting zeal. A mufti, not fond of coffee, declared it to have an inebriating quality, and therefore to be virtually prohibited by Mahomet. Another mufti, fond of coffee for its exhilarating virtue, declared it lawful ; " because," said he, " all things are lawful that are " not exprefsly prohibited in the Alcoran." The coffee-houses in Constantinople were for a long period alternately opened and shut, according to the taste of the reigning mufti ; till coffee at last, surmounting all obstacles, came to be an established Mahometan liquor. Religion thus runs wild, whenever it loses sight of its true ends, worshipping God, and enforcing justice to man. The Hindoos hate the Mahometans for eating the flesh
of

of cows: the Mahometans hate the Hindoos for eating the flesh of swine. The aversion that men of the same religion have at each other for the most trivial differences, converts them frequently into brutal savages. Suppose, for example, that a man, reduced to the extremity of hunger, makes a greedy meal of a dead horse, a case so deplorable would wring every heart. And yet, let this be done in Lent, or on a meagre day——Behold! every zealot is instantly metamorphosed into a devil incarnate. In the records of St Claude, a small district of Burgundy, is engrossed a sentence against a poor gentleman named *Claude Guillon*. The words are: “ Having considered the process, “ and taken advice of the doctors of law, we declare the said Claude Guillon duly convicted “ for having carried away and boiled a piece of “ a dead horse, and of having eat the same on the “ 31st March, being Saturday.” And he was beheaded accordingly 28th July 1629; notwithstanding a defence above all exception, That he committed that irregularity to preserve his life. How was it possible for the monsters to persuade themselves, that this sentence was agreeable to God, who is goodness itself!

No less prejudicial to morality than the relying too much on forms and ceremonies, is the treating some sins with great severity; neglecting others equally heinous, or perhaps more so. In a book of rates for absolution, mentioned above, no just distinction

distinction is made among sins; some venial sins being taxed at a higher rate than many of the deepest dye. For example, the killing father, mother, brother, sister, or wife, is taxed at five grofs; and the same for incest with a mother or sister. The lying with a woman in the church is taxed at six grofs; and, at the same time, absolution for usury is taxed at seven grofs, and for simony at no less than sixteen grofs*.

A maxim adopted by many pious persons, has a smiling appearance, but in its consequences is hurtful both to religion and morality; which is, That to testify our veneration for the Deity, and zeal for his service, the performing public and private worship, and the fulfilling moral duties, are not alone sufficient; that over and above we are bound to fast, to do penance, to honour the priesthood, and to punish the enemies of God, *i. e.* those who differ from us in principle or practice. This maxim, which may be termed *the doctrine of supererogation*, is finely illustrated by an author mentioned above. “ The duties which a man
“ performs as a friend or parent, seem merely
“ owing to his benefactor or children; nor can
“ he be wanting to these duties without breaking
“ through all the ties of nature and morality. A
“ strong inclination may prompt him to the per-
“ formance: a sentiment of order and moral
“ beauty joins its force to these natural ties: and
“ the

* A grofs is the third part of a ducat.

“ the whole man is drawn to his duty without
“ any effort or endeavour. Even with regard to
“ the virtues which are more austere, and more
“ founded on reflection, such as public spirit, filial
“ duty, temperance, or integrity: the moral ob-
“ ligation, in our apprehension, removes all pre-
“ tence to religious merit: and the virtuous con-
“ duct is esteemed no more than what we owe to
“ society, and to ourselves. In all this, a super-
“ stitious man finds nothing which he has pro-
“ perly performed for the sake of his Deity, or
“ which can peculiarly recommend him to the
“ divine favour and protection. He considers not,
“ that the most genuine method of serving the
“ Divinity is, by promoting the happiness of his
“ creatures. He still looks out for some more
“ immediate service of the Supreme Being: and
“ any practice recommended to him, which either
“ serves to no purpose in life, or offers the strong-
“ est violence to his natural inclinations; that
“ practice he will the more readily embrace, on
“ account of those very circumstances, which
“ should make him absolutely reject it. It seems
“ the more purely religious, that it proceeds from
“ no mixture of any other motive or considera-
“ tion. And if for its sake he sacrifices much of
“ his ease and quiet, his claim of merit appears
“ still to rise upon him, in proportion to the zeal
“ and devotion which he discovers. In restoring
“ a loan, or paying a debt, his divinity is nowise
“ beholden

“ beholden to him ; because these acts of justice
“ are what he was bound to perform, and what
“ many would have performed, were there no
“ God in the universe. But if he fast a day, or
“ give himself a sound whipping, this has a di-
“ rect reference, in his opinion, to the service of
“ God. No other motive could engage him to
“ such austerities. By these distinguished marks
“ of devotion, he has now acquired the divine
“ favour ; and may expect in recompense, pro-
“ tection and safety in this world, and eternal
“ happiness in the next*.” My yoke is easy,
faith our Saviour, and my burden is light. So
they really are. Every essential of religion is
founded on our nature, and to a pure heart is
pleasant in the performance: what can be more
pleasant, than gratitude to our Maker, and obe-
dience to his will in comforting our fellow-
creatures ? But enthusiasts are not easily per-
suaded, that to make ourselves happy in the exer-
cises of piety and benevolence, is the most accep-
table service to God that we can perform. In
loading religion with unnecessary articles of faith
and practice, they contradict our Saviour, by ma-
king his yoke severe, and his burden heavy†.
Law,

* Natural History of Religion.

† An old woman walking with others to a sacrament, was
observed to pick out the worst bits of the road : “ I never
“ can do enough,” said she, “ for sweet Jesus.”

Law, who writes on Christian perfection, enjoins such unnatural austerity of manners, as to be subversive both of religion and morality: loose education is not more so. Our passions, when denied proper exercise, are apt to break their fetters, and to plunge us into every extravagance: like the body, which squeezed in one part, swells the more in another. In the same way of thinking, the pious Jeremy Taylor, treating of mortification, prescribes it as the indispensable duty of a Christian, to give no indulgence even to the most innocent emotions; because, says he, the most indifferent action becomes sinful, when there is no other motive for the performance but barely its being pleasant. Could a malevolent deity contrive any thing more severe against his votaries?

In the same spirit of supererogation, holidays have been multiplied without end, depriving the working poor of time, that would be more usefully employed in providing bread for themselves and families. Such a number of holidays, beside contradicting Providence which framed us more for action than contemplation, have several poisonous effects with respect to morality. The moral sense has great influence on the industrious, who have no time for indulging their irregular appetites: the idle, on the contrary, lie open to every temptation. Men likewise are apt to assume great merit from a rigid observance of holidays and other ceremonies; and having thus acquired, in
their

their opinion, the favour of God, they rely on his indulgence in other matters which they think too sweet for sinners.

Monastic institutions are an improvement upon holidays: the whole life of a monk is intended to be a holiday, dedicated entirely to the service of God. The idleness of the monastic state among Christians, opens a wide door to immorality.

In the third section, penances are handled as a mode of worship, for obtaining pardon of sin. But they are sometimes submitted to by the innocent, in order to procure from the Almighty still more favour than innocence alone is entitled to; in which view, they are evidently a work of supererogation. They seem to have no bad effect with respect to religion as distinguished from morality: the body is indeed tortured unnecessarily; but if enthusiasts voluntarily submit to bodily distresses, they have themselves only to blame. With respect to morality, their bad tendency is not slight. Those who perform extraordinary acts of devotion, conceive themselves peculiarly entitled to the favour of God. Proud of his favour, they attach themselves to him alone, and turn indifferent about every other duty. The favourite of a terrestrial potentate assumes authority; and takes liberties that private persons dare not venture upon: shall a favourite of Heaven be less indulged? The Faquirs in Hindostan submit to dreadful penances; and, holding themselves secure of
God's

God's favour, they are altogether indifferent about the duty they owe to a neighbour. So much are they above common decency, as to go about naked, not even concealing what modesty hides. The penances enjoined in the Romish church, such as fasting and flagellation, have evidently the same bad tendency *. With respect to fasting in particular, to what good purpose it can serve, except to gluttons, is not readily conceived. Temperance in eating and drinking is essential to health : too much or too little are equally noxious, though their effects are different †. Fasting, therefore, ought never to be enjoined to the temperate as a religious duty, because it cannot be acceptable to a benevolent Deity. Listen to a great prophet on that subject : " Behold, ye fast for strife and
 " debate, and to smite with the fist of wickedness ;
 " ye shall not fast as ye do this day, to make your
 " voice

* A sect of Christians, styled *Flagellantes*, held, that flagellation is of equal virtue with baptism and the other sacraments ; that it will procure forgiveness of sin ; that the old law of Christ is to be abolished ; and a new law substituted, enjoining the baptism of blood to be administered by whipping.

† The Baron de Manstein observes, that the frequent lents enjoined by the Greek church, contribute greatly to promote diseases in the Russian armies. They are forbidden to touch flesh three-fourths of the year. The synod, it is true, grants a dispensation to soldiers during war ; but such is the superstition of the people, that few take the benefit of the dispensation.

“ voice to be heard on high. / Is it such a fast that
 “ I have chosen? a day for a man to afflict his
 “ soul? Is it to bow down his head as a bulrush,
 “ and to spread sackcloth and ashes under him?
 “ Wilt thou call this a fast, and an acceptable day
 “ to the Lord?—Is not this the fast that I have
 “ chosen, to loose the bands of wickedness, to un-
 “ do the heavy burdens, and to let the oppressed
 “ go free, and that ye break every yoke? Is it not
 “ to deal thy bread to the hungry; and that thou
 “ bring the poor that are cast out to thy house?
 “ When thou seest the naked, that thou cover
 “ him, and that thou hide not thyself from thine
 “ own flesh *?”

The most extraordinary penance of all is celibacy considered as a religious duty. Many fathers of the church declare against matrimony. St Jerome in particular says, That the end of matrimony is eternal death; that the earth, indeed, is filled by it, but heaven by virginity. The intemperate zeal of many primitive Christians led them to abstain from matrimony, and even from conjugal caresses, if they had the misfortune to be married; believing that the carnal appetite is inconsistent with pure religion. Edward the Confessor was fainted, for no better reason than the abstaining from matrimonial duties. Jovian, in the fourth century, taught that all who observe the laws of piety and virtue laid down in the gospel, have an equal title to

VOL. III.

D d

happiness

* Isaiah, lviii. 4. &c.

happiness in another life : consequently, that those who pass their days in celibacy and mortification, are in no respect more acceptable to God than those who live virtuously in marriage without mortification. He published his opinions in a book, against which Jerome wrote a bitter and abusive treatise, still extant. These opinions were condemned by the church, and by St Ambrose, in a council at Milan ; and Jovian was banished by the Emperor Honorius. Such ridiculous self-denial was not confined to Christians. Strabo mentions a sect among the Thracians who made a vow of perpetual virginity ; and were much respected on that account. Garcillasso mentions virgins in Peru consecrated to the sun : a vestal guilty of frailty was buried alive, her lover hanged, and the inhabitants of the town where she lived put to the sword. Among all the absurd acts of mortification, celibacy is the strongest instance of superstition triumphing over common sense ; for what can be more inconsistent with common sense, not to talk of religion, than an endeavour to put an end to the human species ? Barbeyrac, *De la Moriae des Pères*, gives examples of fathers of the church who wished to extinguish by celibacy the human species, and to hasten the day of judgment. Some glimpses of reason have abated the zeal of enthusiasts for celibacy ; but have not totally extirpated it ; for celibacy of the clergy remains to this day a law in the Romish church. It cannot, however,

ever, seriously be thought the will of our benevolent God, that his priests should be denied the exercise of natural powers, bestowed on all for a most valuable purpose. This impious restraint, which contradicts the great law of *Increase and multiply*, has opened the door to gross debauchery in the pastors of the Romish church, though ecclesiastics ought, of all men, to be the most circumspect in their conduct. Men restrained from what is necessary and proper, are more prone than others to break out into gross irregularities*. Marriage is warmly recommended in the laws of Zoroaster. Children are said to be a bridge that conducts men to heaven; and a man who has no children, is held to be under the power of Ahriman. The prayer of a priest who has no children, is held disagreeable to Ormusd.

The celibacy of the clergy was countenanced by the Pope; and enforced from a political consideration,

D d 2

* An ingenious writer, mentioned above, makes the following observation: "The celibacy of ecclesiastics was originally introduced by some superstitious refinements on the law of God and nature. Could men have been kept alive without eating or drinking as well as without marriage, the same refinements would have prohibited ecclesiastics from eating and drinking, and thereby have elevated them so much nearer to the state of angels. In process of time, this fanatical interdiction became an instrument of worldly wisdom: and thus, as frequently happens, what weak men began, politicians completed." *Sir David Dalrymple.*

sideration, That it united the whole clergy into one compact body, under his spiritual Majesty. How short sighted is man ! It was justly esteemed at the time to be the corner-stone of Papal power ; and yet became the chief cause of its downfall. Celibacy precipitated the Romish clergy into adultery, fornication, cunning, dissimulation, and every secret vice. Will men of such manners be listened to, when they preach purity to others ? There was no medium, but either to reform their own manners, or to give every indulgence to the laity. But ignorance and superstition in the latter, made the former think themselves secure. The restoration of learning broke the charm. Men beginning to think for themselves, were provoked at the dissolute lives of their pastors ; and raised a loud cry against them. Reformers were burnt as heretics ; and clergymen were held to be emissaries from Satan, to establish his throne upon earth. Knox, that violent reformer, believed seriously that Cardinal Beaton was *a conjured enemy to Christ Jesus*. Providence brings good out of ill. Had not the clergy been dissolute, poor Christians might have laboured under ignorance and ecclesiastical thralldom to this hour. Our reformers, beginning with their pastors, extended insensibly their hatred to the doctrines taught by their pastors. Every article of faith was sifted : the chaff was separated from the corn : and a reformation was

was established upon the Scriptures, rejecting every innovation of the Romish church.

There is not mentioned in history a more impudent disregard of moral principles, than a privilege assumed by the Bishop of Rome to disengage men from their oaths and promises : it is not a greater stretch to disengage them from every duty, whether of morality or of religion. The barons of Valentia, dreading a persecution against the industrious Moors, their tenants, obtained the following clause to be inserted in their king's coronation-oath : " That he should not expel the Moors, nor force them to be baptized ; that he should never desire to be relieved from the oath by a dispensation from the Pope, nor accept a dispensation if offered." The Emperor Charles V. took this oath solemnly in presence of his nobles ; and yet accepted a dispensation from the Pope, absolving him from the oath, and from the guilt of perjury in breaking it. Augustus King of Poland, in the treaty of Altramstadt, renounced the kingdom of Poland to his competitor Stanislaus. The defeat of the King of Sweden at Poltowa was an inviting opportunity to renew his pretensions. A solemn treaty stood in his way ; but the Pope removed that obstacle, by annulling the treaty, and setting him at liberty. The Pope has been known to bestow that wonderful privilege upon others. Pope Pascal II. having, with a solemn oath, renounced the right of investitures, empower-

ed the cardinals to declare his oath null. Bishops also, imitating their superior, have assumed the privilege of dispensing with moral duties. Instances are not rare, of curates being authorized by their bishop to entertain concubines, paying for each a regular tax of a crown yearly. Nay, in some provincial synods, they are enjoined to keep concubines, in order to prevent scandal. Common prostitutes, licensed in the city of Leghorn, have a church peculiar to themselves, and must not enter into any other. They follow their trade with the utmost freedom; except in Passion-week, during which they must forbear sinning, under pain of banishment*.

The

* Sir David Dalrymple, in his *Annals of Scotland*, vol. ii. page 16., has the following paragraph: " Thus
 " did Edward chastise the Scots for their breach of faith.
 " It is remarkable, that in the preceding year he himself
 " procured a papal bull, absolving him from the oath
 " which he had taken for maintaining the privileges of his
 " people. But the Scots, without papal authority, viola-
 " ted their oaths, and were punished as perjured men. It
 " is a truth not to be disguised, that in those times the
 " common notions of right and wrong were, in some sort,
 " obliterated. Conscience, intoxicated with indulgencies,
 " or stupified by frequent absolution, was no longer a
 " faithful monitor amidst the temptations of interest, am-
 " bition, and national animosities." This author, a few
 pages after, very ingeniously observes, that, in those days,
 an

The power of bestowing kingdoms, assumed by the Bishop of Rome, was an encroachment on the rules of justice, no less bold. Christian princes, not many ages ago, esteemed the Pope's gift to be their best title of property. In the 1346, the Venetians requested the Pope's permission to carry on commerce in Asia, and to purchase there pepper and cinnamon. The Pope not only granted their request, but pronounced anathemas upon any who should dare to interfere in that commerce. Ferdinand and Isabella of Spain applied to Pope Alexander VI. to vest in them the property of America, discovered under their auspices by Columbus. The Pope having formerly granted to the kings of Portugal their discoveries in the East Indies, both grants were held sacred; and it came to be strenuously disputed, under which of the grants the Molucca islands were comprehended. Both grants proceed upon a narrative, of the power bestowed by Almighty God on the Pope, as successor to St Peter and vicar of Christ. To imagine that the Almighty would bestow such powers on the Bishop of Rome, or on any human being, shews gross ignorance of the common rights of mankind, and of the government of Providence.

The grossest of all deviations, not only from sound morality, but from pure religion, and the

D d 4

most

an oath or promise on the honour of knighthood, was the only thing relied on; because the Pope did not pretend to interpose in a point of honour.

most extensive in its baneful effects, is a doctrine embraced by established churches, not many excepted, That, because heretics are odious in the sight of God, it is the duty of the orthodox to extirpate them, root and branch. Observe the consequence : people who differ from the established church are held to be obstinate sinners, deserving punishment here as well as hereafter. The religion of every country is changeable ; and the religion at present dominant may soon be under depression ; which of course subjects all mankind to the rigour of persecution. An invention more effectual for extirpating the human race, is not within the reach of imagination : the horror of human sacrifices is as nothing in comparison.

Persecution for differences in religion can never take place but where the ministers of religion are formed into a class, totally distinct from the rest of the people. They made not a distinct class among the old Romans ; who, far from having any notion of persecution, adopted the gods of every nation they conquered. A learned * writer observes, that, as the number of their gods increased with their conquests, it is possible that they might have worshipped all the gods in the world. Their belief in tutelar deities produced that effect. Titus Livius mentions a sect of Bacchanals spread through Italy. They performed their ceremonies during night ; men and women mixing in the dark, after
intemperate

* Morinus.

intemperate eating and drinking. Never did wicked wretches deserve more exemplary punishment ; yet listen to the following decree of the Roman senate, breathing the true spirit of toleration.

“ Ne qua Bacchanalia Romæ, neve in Italia
“ essent. Si quis tale sacrum, solenne, et neces-
“ sarium duceret, nec sine religione et piaculo se
“ id omittere posse ; apud Prætorem urbanum
“ profiteretur ; Prætor senatum consuleret. Si
“ ei permissum esset, quum in senatu centum non
“ minus essent ; ita id sacrum faceret, dum ne
“ plus quinque sacrificio interessent ; neu qua pe-
“ cunia communis, neu quis magister sacrorum,
“ aut sacerdos esset*.” The Jews were prone to persecution, because their priests formed a distinct body. It is true, they believed in tutelar deities : their hatred, however, of neighbouring nations prevailed to make them hold in abhorrence the worship of every other god. Even among them-
felves

* “ Let there be no Bacchanalian ceremonies performed
“ in the city, nor within Italy. If there be any person
“ who reckons it a matter of conscience to perform these
“ rites, and that he ought not to omit them, let him state
“ his opinion to the city Prætor, who shall thereupon con-
“ sult the senate. If liberty be granted him by the senate
“ when no fewer than a hundred senators are present, let
“ him perform the sacrifice, but privately, in presence of
“ no greater number than five persons. Let there be no
“ public fund for them, nor any who shall preside as priest
“ or master of the rites.”

themselves they were abundantly disposed to war ; and nothing kept within bounds the Pharisees, the Sadducees, and the Essenes, their three sects, but terror of the Roman power. The Christian religion implies toleration in its very nature and principles ; and yet became prone to persecution above all others. Christian sects were inflamed against each other to a degree of brutality ; the most opposite to peace and brotherly love, inculcated in the gospel. It was propagated by the orthodox, that Arius expired in a common jakes, and that his entrails burst out. The same is related of Huneric King of the Vandals, a zealous Arian ; with the following addition, that being possessed with the devil, whom he had glutted with the blood of many martyrs, he tore his flesh with his teeth, and ended his wretched life in the most excruciating, though justly deserved torments. The falsehoods every where spread, during the fourteenth century, against the Jews, such as their poisoning the public fountains, killing Christian infants, and drinking their blood, with many other falsehoods of the same stamp, were invented, and greedily swallowed, through the influence of religious hatred. Through the same influence a law was once made in England, that a Christian marrying a Jew should be burnt alive. The greater part of persecutions have been occasioned in the same manner ; for men are not so desperately wicked, as to approve of persecution, unless when blinded by intemperate

intemperate zeal. The same religious hatred produced the assassination of the Duke of Guise, and of two Henrys, Kings of France; produced the gun-powder plot; and produced the most horrid deed that ever was perpetrated among men, the massacre of St Bartholomew*.

There is no occasion to be particular on the massacre of St Bartholomew, the circumstances of which are universally known. I shall mention another, which happened in Lisbon, 6th April 1506, the effect entirely of bigotry. The day mentioned being Sunday, certain persons in the church of St Dominic, observing that a crucifix in one of the chapels was more than ordinary luminous, the priest cried out, A miracle! a miracle: A new convert, who had been a Jew, saying slightly that it was but the sun shining on the crucifix, he was dragged instantly out of the church, and burnt. The friars, with vehement speeches, encouraged the rabble assembled about the fire to more mischief; while other friars ran about the streets bawling

* Monsieur de Tavannes, afterwards Marechal of France, was a great partisan of the Queen-mother; and so active in the massacre, as with his own hand to murder no fewer than seventeen Huguenots. Having on death-bed made a full confession of his sins, "What," said the priest, "not a word of St Bartholomew?" "Of St Bartholomew!" answered the penitent; "the service I did that memorable day to God and the church, is alone a sufficient atonement for all my transgressions."

bawling out, Heresy, heresy, with crucifixes in their hands. Above 500 men gathered together, and slew every new convert they could find, and burnt them to ashes. Next morning they murdered above 1000 men, women, and children, dragging them from the altars, to which they had fled as a sanctuary. The same fury continued the third day, on which above 400 persons more were massacred.

No false principle in religion has shed more innocent or rather virtuous blood, than that of persecuting heretics ; *i. e.* those who differ in any article from the religion established by law. The doctrine of burning heretics, is in effect the professing to burn men eminently virtuous ; for they must be so, when they submit to be burnt alive, rather than be guilty even of dissimulation. The Mahometan practice, of converting people by the sword, if not more rational, is at least more manly. Louis IX. of France, one of its best princes, would have been a greater blessing to his people had he been less pious : he had an implacable aversion to heretics ; against whom he thought it more proper to employ racks and gibbets, than argument. Torquemada, that infernal inquisitor of Spain, brought into the inquisition, in the space of fourteen years, no fewer than 80,000 persons ; of whom 6000 were condemned to the flames, and burnt alive with the greatest pomp and exultation. Of that vast number, there was perhaps not a single person,

person, who was not more pure in religion, as well as in morals, than their outrageous persecutor. *Hunter*, a young man about nineteen years of age, was one of the unhappy victims to the zeal of Queen Mary of England for Popery. Having been inadvertently betrayed by a priest to deny transubstantiation, he absconded, to keep out of harm's way. Bonner, that arch-hangman of Popery, threatened ruin to the father, if he did not deliver up the young man. Hunter, hearing of his father's danger, made his appearance, and was burnt alive, instead of being rewarded for his filial piety. A woman of Guernsey was brought to the stake, without regard to her big belly ; which bursting by the torture, she was delivered in the midst of the flames. One of the guards snatched the infant from the fire : but the magistrate who attended the execution ordered it to be thrown back ; being resolved, he said, that nothing should survive which sprung from a parent so obstinately heretical. Father Paul * computes, that, in the Netherlands alone, from the time that the edict of Charles V. was promulgated against the reformers, 50,000 persons were hanged, beheaded, buried alive, or burnt, on account of religion. Some Faquirs, crazed with opium and fanaticism, have been known, with poisoned daggers, to fall upon uncircumcised Europeans, and to put every one to death whom they could master. In the last century, a Faquir at
Surat,

* Council of Trent, Book 5.

Surat, murdered, within the space of a minute, seventeen Dutch sailors with seventeen stabs of a dagger. We think with horror of human sacrifices among the ancient Pagans ; and yet we behold them every day, among Christians, rendered still more horrid by the most atrocious torments that religious hatred can devise.

The great motive to such cruelties, is the superstitious and absurd notion, that heretics are God's enemies ; which makes it thought an acceptable service to God, not only to persecute them by fire and sword in this world, but to deliver them over to Satan in the world to come. Another circumstance inflames religious hatred ; which is, that neighbours are either intimate friends or bitter enemies. This holds, with a slight variation, in sects of the same religion : however minute their differences are, they cannot be intimate friends ; and therefore are bitter enemies : the nearer they approach to unison, if not entirely so, the greater in proportion is their mutual hatred. Such hatred, subduing the meek spirit of Christianity, is an additional cause for persecution. Blind zeal for what is believed to be the only true religion, never discovers error nor innocence in those who differ, but perverseness and criminal obstinacy. Two religions totally different, like two countries in opposite parts of the globe, produce no mutual enmity. At the siege of Constantinople by the Turks, anno 1453, the Emperor, in order to procure assistance

sistance from the princes of the Latin church, ordered mass to be celebrated in one of his churches according to the form used in Rome. The people with great indignation protested, that they would rather see the Turks in their churches, than the hat of a cardinal.

The history of the Waldenses, though well known, cannot be too often repeated. In the twelfth century, a merchant of Lyons, named *Peter Valdo*, dissatisfied with the pomp and ceremonies of the Romish church, ill suited, in his opinion, to the humility of a Christian, retired to a desert in the high country of Provence, with several poor people his disciples. There he became their spiritual guide, instructing them in certain doctrines, the same that were afterwards adopted by the Protestants. Their incessant labour subdued the barren soil, and prepared it for grain as well as for pasture. The rent which in time they were enabled to pay for land that afforded none originally, endeared them to their landlords. In 250 years, they multiplied to the number of 18,000, occupying thirty villages, beside hamlets, the work of their own hands. Priests they had none, nor any disputes about religion: neither had they occasion for a court of justice, as brotherly love did not suffer them to go to law: they worshipped God in their own plain way, and their innocence was secured by incessant labour. They had long enjoyed the sweets of peace and mutual affection,
when

when the reformers of Germany and Geneva sent ministers among them ; which unhappily laid them open to religious hatred, the most unrelenting of all furies. In the year 1540, the parliament of Provence condemned nineteen of them to be burnt for heresy, their trees to be rooted up, and their houses to be razed to the ground. The Waldenses, terrified at this sentence, applied in a body to Cardinal Sadolet, bishop of Carpentras ; who received them kindly, and obtained from Francis I. of France, a pardon for the persons under sentence of death, on condition of abjuring heresy. The matter lay over five years ; when the parliament, irritated at their perseverance, prevailed on the King to withdraw his pardon. The sentence was executed with great rigour ; and the parliament, laying hold of that opportunity, broke through every restraint of law, and commenced a violent persecution against the whole tribe. The soldiers began with massacring old men, women, and children, all having fled who were able to fly ; and proceeded to burn their houses, barns, and corn. There remained in the town of Cabriere sixty men and thirty women ; who having surrendered upon promise of life, were butchered all of them without mercy. Some women who had taken refuge in a church, were dragged out and burnt alive. Twenty-two villages were reduced to ashes ; and that populous and flourishing district became once more a desert.

To

To conceive this horrid scene in all its deformity, the people persecuted ought to be compared with the clergy their persecutors; for the civil magistrate was the hand only that executed their vengeance: on the one side, an industrious honest people, pure in their morals, and no less pure in their religion: on the other, proud pampered priests, abandoned without shame to every wickedness, impure in their morals, and still more impure in their religion—the world never furnished such another contrast. Had the scene been reversed, to make these wretches suffer persecution from the Waldenses—but that people were too upright and too religious for being persecutors. The manners of the Christian clergy in general, before the Reformation, enlivens the contrast. The doctrine promulgated during the dark times of Christianity, That God is a mercenary being, and that every person however wicked may obtain pardon of his sins by money, made riches flow into the hands of the clergy in a plentiful stream. And riches had the same effect upon the Christian clergy that they have upon all men, which is, to produce pride, sensuality, and profligacy: these again produced dissipation of money, which prompted avarice, and every invention for recruiting exhausted treasures*. Even as early as the eighth

VOL. III.

E e

century,

* In the eleventh and twelfth centuries, many of the clergy became merchants; and, being free of taxes, engrossed all.

In

century, the Christian clergy, tempted by opulence, abandoned themselves to pleasure, without moderation ; and far exceeded the laity in luxury, gluttony, and lust. When such were the pastors, what must have been the flock ! Rejoice, O Scotland, over the poverty and temperance of thy pastors. During that period, the clergy could read, and, like parrots, they could mumble prayers in Latin : in every other respect, they rivalled the laity in ignorance. They were indeed more cunning than the laity ; and understood their interest better, if to covet riches at the expence of probity, deserve that name. Three articles were established that made religion an easy service. First, That faith is the essence of religion, without regard to good works ; and hence the necessity of being strictly orthodox, which the church only could determine. Second, Religious worship was reduced to a number of external ceremonies and forms, which, being declared sufficient for salvation, absolved Christians from every moral duty. Remark, that a priest is always the chief person in ceremonial worship. The third article, That God is a mercenary being, is mentioned above, with its necessary consequences. These articles brought about a total neglect, both in clergy and laity, not only of morality, but of every essential religious

In the Netherlands particularly, there was a great cry, that monasteries were converted into shops and warehouses, and the mansions of secular priests into tap-houses and inns.

religious duty. In fine, there never was a religion that deviated more from just principles, than that professed by Christians during the dark ages. Persecution reached none but the sincerely pious and virtuous. What a glorious tolerating sentiment doth Arnobius * throw out, and what profusion of blood would have been prevented, had it been adopted by all Christians! “ Da veniam,
 “ Rex summe, tuos persequentibus famulos: et
 “ quod tuæ benignitatis est proprium, fugientibus
 “ ignosce tui nominis et religionis cultum. Non
 “ est mirum, si ignoraris: majoris est admirationis,
 “ si sciaris †.” The following parable against persecution was communicated to me by Dr Franklin of Philadelphia, a man who makes a figure in the learned world. “ And it came to pass after these
 “ things, that Abraham sat in the door of his
 “ tent, about the going down of the sun.
 “ And behold a man, bent with age, coming from
 “ the way of the wilderness leaning on a staff.
 “ And Abraham arose, and met him, and said unto him, Turn in, I pray thee, and wash thy feet,
 “ and tarry all night; and thou shalt arise early

E e 2

“ in

* Lib. 1. Adversus Gentes.

* “ Forgive, Almighty Power, the persecutors of thy servants; and, in the peculiar benevolence of thy nature, pardon those men whose unhappiness it is to be strangers to thy name and worship. That they should be ignorant of thy divine nature, is less the subject of wonder, than that any finite being should presume to know thee aright!”

“ in the morning, and go on thy way. And the
“ man said, Nay ; for I will abide under this tree.
“ But Abraham pressed him greatly : so he turn-
“ ed, and they went into the tent : and Abraham
“ baked unleavened bread, and they did eat.
“ And when Abraham saw that the man blessed
“ not God, he said unto him, Wherefore dost thou
“ not worship the most high God, creator of hea-
“ ven and earth ? And the man answered and said,
“ I do not worship thy God, neither do I call
“ upon his name ; for I have made to myself a god,
“ which abideth always in mine house, and provi-
“ deth me with all things. And Abraham’s zeal
“ was kindled against the man, and he arose, and
“ fell upon him, and drove him forth with blows,
“ into the wilderness. And God called unto A-
“ braham, saying, Abraham, where is the stran-
“ ger ? And Abraham answered and said, Lord, he
“ would not worship thee, neither would he call
“ upon thy name ; therefore have I driven him
“ out from before my face into the wilderness.
“ And God said, Have I borne with him these hun-
“ dred ninety and eight years, and nourished him,
“ and clothed him, notwithstanding his rebellion
“ against me ; and couldst not thou, who art thy-
“ self a sinner, bear with him one night ?” The
historical style of the Old Testament is here finely
imitated ; and the moral must strike every one
who is not sunk in stupidity and superstition. Were
it really a chapter of Genesis, one is apt to think,
that

that persecution could never have shown a bare face among Jews or Christians. But alas! that is a vain thought. Such a passage in the Old Testament, would avail as little against the rancorous passions of men, as the following passages in the New Testament, though persecution cannot be condemned in terms more explicit. “ Him that
“ is weak in the faith, receive you, but not to
“ doubtful disputations. For one believeth that
“ he may eat all things; another, who is weak,
“ eateth herbs. Let not him that eateth, despise
“ him that eateth not; and let not him which
“ eateth not, judge him that eateth. Who art
“ thou that judgest another man’s servant? to his
“ own master he standeth or falleth. One man
“ esteemeth one day above another; another e-
“ steemeth every day alike. Let every man be
“ fully persuaded in his own mind. But why dost
“ thou judge thy brother? or why dost thou set
“ at nought thy brother? for we shall all stand
“ before the judgment-seat of Christ, every one
“ to give an account of himself to God. I know,
“ that there is nothing unclean of itself: but to
“ him that esteemeth any thing unclean, to him it
“ is unclean. The kingdom of God is not meat
“ and drink, but righteousness and peace, and joy
“ in the Holy Ghost. Let us therefore follow af-
“ ter the things which make for peace, and things
“ wherewith one may edify another*.” Our Sa-

E e 3

viour

* Epistle of Paul to the Romans, chap. xiv.

viour himself declared against persecution in the most express terms. The Jews and Samaritans were of the same religion ; but some trivial differences in the ceremonial part of worship, rendered them odious to each other. Our Saviour being refused lodging in a village of Samaria, because he was travelling to Jerusalem, his disciples James and John said, “ Lord, wilt thou that we “ command fire to come down from heaven, and “ consume them, even as Elias did ? But he “ rebuked them, and said, The Son of Man is “ not come to destroy mens’ lives, but to save “ them * †.”

It gives me real concern, that even the hot fire of persecution did not altogether purify our Reformed clergy from that satanical spirit. No sooner were the Dissenters settled in New England, where they fled to avoid persecution, than they set on foot a persecution against the Quakers, no less
furious

* Luke ix. 54.

† Toleration in religion, though obvious to common understanding, was not however the production of reason, but of commerce. The advantage of toleration for promoting commerce, was early discovered by the Portuguese. They were too zealous Catholics to think of so bold a measure in Portugal ; but it was permitted in Goa, and the inquisition in that town was confined to Roman Catholics. There is a singular example of toleration in the Knights of Malta. That fraternity was instituted to make perpetual war against the Turks ; and yet of late years they have erected a mosque for their Turkish prisoners.

furious than what they themselves had suffered at home. Nor did the Reformed clergy in Scotland lose sight of the same magisterial authority that had been assumed by their predecessors of the Romish church, on the ridiculous pretext of being ambassadors to men from Jesus Christ. Upon a representation, anno 1646, from the commission of the kirk of Scotland, James Bell and Colin Campbell, bailies of Glasgow, were committed to prison by the parliament, merely for having said, that kirkmen meddled too much in civil matters. Could a despotic prince have exerted a more arbitrary act? but the church was all-powerful in those days*.

E e 4

I

* The Christian religion is eminent for a spirit of meekness, toleration, and brotherly love; and yet persecution never raged so furiously in any other religion. Such opposition between practice and principle, is a singular phenomenon in the history of man. Let us try to account for it. In the Pagan religion, I discover few traces of persecution. Tutelar deities were universal; and, far from imposing these deities on others, every nation valued itself on being the only favourite of its own deity. Priests by profession have ever been ambitious of imposing on the laity peculiar forms of worship and peculiar religious tenets; but the Greeks and Romans had none such. The Jews had priests by profession; and they were beside a gloomy people naturally inclined to persecution: they hated their neighbours, and were hated by them. The Mahometan religion was sown in a fertile soil. The Arabians were warlike; but ignorant and easily deluded by a warm imagination.

I would do justice to every church, not excepting that of Rome ; and it is doing that church no more

imagination. The Koran is finely contrived to impose upon such a people. The ambition of Mahomet corresponded to the warlike genius of his countrymen ; who were taught to convert all men to his religion, by the simple but effectual argument of fire and sword. This spirit of persecution accompanied that of conquest. The latter is now extinguished by luxury and sensuality ; and there scarce remains any vestige of the former.

Among an illiterate and credulous people, directed by the light of nature to worship the Deity, but without any established form, every innovation is peaceably and cordially admitted. When Christianity was introduced into Britain, the Druids, as appears from Ossian, had lost all authority. The people were prepared for the new religion ; and there could be no persecution where there was none to oppose. Upon that plain people, the Christian religion had its genuine effect : it softened their manners, and produced a spirit of meekness and brotherly love. Never was practice more concordant with principle. The scene is very different where a new religion is introduced in opposition to one long established. Zeal for a new religion inflames its converts ; and as violent passions are infectious, those who adhere to the established worship are by degrees equally inflamed. Mutual hatred and persecution are the never-failing consequences. This was the case in the countries where the Christian religion was first promulgated.

When that religion began to make a figure, the Roman empire was finely prepared for its reception. The fables of Paganism, which pass current as important truths in days of ignorance, were now exploded as childish and ridiculous. The
despotism

more but justice to acknowledge, that the spirit of persecution was not more eminent in it, than zeal
for

despotism of the Roman government, and successive irruptions of barbarians, had sunk the Roman people, had filled them with superstitious terrors, and disposed them to embrace any religion that promised happiness either here or in another world. Luckily, the new religion was that of Jesus Christ. The meek spirit of the gospel would in time have prevailed over a religion that was grossly idolatrous ; but, unhappily, the zeal of the new converts, and their abhorrence of idolatry, was not confined to argument, but was vented with all the violence of religious hatred. Here, the Man got the better of the Christian. Those of the established religion became equally violent, through the infection of passion ; and mutual persecution knew no bounds.

This appears to be a fair account of the mutual persecution between Christians and Pagans. But persecution did not stop there ; it raged among different sects of Christians no less than formerly against the common enemy. This requires to be accounted for. Acuteness and subtilty formed the character of the Greeks. Every man eminent for learning had his followers : in philosophy many sects were formed, and much disputation and wrangling ensued. The Christian religion was early introduced into Greece ; and its votaries were infected with the spirit of the nation : the slightest differences occasioned disputes ; and sects were formed upon the slightest differences. In the gospel, eternal happiness is promised to those who believe in Jesus Christ. The true sense was perverted by the bulk of Christians ; and salvation was annexed to the mere act of belief, without regard to good works. Men are prone to such a doctrine : they conceive belief to be an easy matter, as it puts no restraint upon their passions : they are extremely willing to believe, provided they be left free to act as they please.

• for making converts. The former is retiring out of the world ; and I wish it most profound rest, never

please. Thus as the whole of religion was understood to rest upon belief, the most minute differences in belief, became of the highest importance. That Christ was a divine person sent by God to correct and reform mankind, is the belief of the Arians. This is not believing in Christ, say the orthodox. " You must believe, that he is the Son of God, and equal to the Father." This was a capital dispute. But the spirit of disputation did not rest there ; every trifle was made a subject of wrangling ; and hence persecution without end. Violent passions were thus encouraged among Christians ; and even the most unmanly vices were meritorious to promote the interest of one sect against another. It became a maxim, that ill may be done in order to bring about good ; and accordingly every deceit was put in practice by clergymen, not excepting forgery, in support of their own sect. Such practices were common as early as the third century. The persecuting spirit continues in vigour among the Roman Catholics, against those who deny the infallibility of their sovereign pontiff. It is high treason to disregard his authority ; and rebels are persecuted with fire and sword in this world, and with eternal damnation in the next. No sooner had Protestants renounced the Papal authority, than they gave vent to persecution against one another. America was the refuge of many dissenters from the Church of England, to avoid persecution at home. But scarce were they established there, when they raised a violent persecution against Quakers, the most innocuous of all sects.

• Zeal for a new religion is immoderate. It cools gradually, and at last vanishes where that religion has been long established, and is peaceably submitted to. Then it is, that a salutary truth is discovered, That people of different religions, may

never again to awake. People begin to be ashamed of it, as of a garment long out of fashion. Let the other continue for amusement: it is innocent; and if it do no good, it is not productive of so much harm.

The desire of making converts proceeds from two different causes. In superstitious zealots, it proceeds from an opinion, that all who differ from them are in the road to damnation: for which reason, there is a rage of making converts among Roman Catholics; who, without ceremony, deliver over to the flames of hell, every person who is not of their communion. The other cause is more natural: every man thinks himself in the right, especially in matters of consequence; and, for that reason, he is happy to find others of his opinion *. With respect to the first cause, I beg attention to the following considerations; not with any hope of converting zealots, but to prevent, if possible,

may even of different sects, may live peaceably together. In England and Holland, men are permitted to worship God their own way, provided they give no disturbance to society. Holland has given to mankind a glorious example, not only of universal toleration, but of permitting men, without regard to difference of religion, to enjoy all the privileges of a citizen. Even the Jews in Surinam are admitted to bear a part in the government. And that laudable example is copied by Britain with respect to the Roman Catholics in the island Grenade.

* Elements of Criticism, vol. ii. p. 493. edit. 5.

possible, others from becoming such. In none of the works of God is variety more happily blended with uniformity, than in the formation of man. Uniformity prevails in the human face with respect to eyes, nose, mouth, and other capital parts : variety prevails in the expressions of these parts, serving to distinguish one person from another, without hazard of error. In like manner, the minds of men are uniform with respect to their passions and principles ; but the various tones and expressions of these, form different characters without end. A face destitute of a nose or of a mouth, is monstrous : a mind destitute of the moral sense, or of a sense of religion, is no less so. But variety of expression in different faces is agreeable, because we relish variety ; and a similar variety in the expressions or tones of passion, ought to be equally agreeable. Endless differences in temper, in taste, and in mental faculties, that of reason in particular, produce necessarily variety in sentiment and in opinion. Can God be displeased with such variety, when it is his own work ? He requires no uniformity, except with respect to an upright mind and clear conscience, which are indispensable. Here at the same time is discovered an illustrious final cause. Different countenances in the human race, not only distinguish one person from another, but promote society, by aiding us to chuse a friend, an associate, a partner for life. Differences in opinion and sentiment have still
more

more beneficial effects : they rouse the attention, give exercise to the understanding, and sharpen the reasoning faculty. With respect to religion in particular, perfect uniformity, which furnisheth no subject for thinking nor for reasoning, would produce languor in divine worship, and make us sink into cold indifference. How foolish then is the rage of making profelytes? Let every man enjoy his native liberty, of thinking as well as of acting ; free to act as he pleases, provided only he obey the rules of morality ; equally free to think as he pleases, provided only he acknowledge the Great God as his maker and master, and perceive the necessary connection of religion with morality. Strict uniformity in other matters, may be compared to a spring-day, calm and serene ; neither so hot as to make us drop a garment, nor so cold as to require an addition ; no wind to ruffle, nor rain to make shelter necessary. We enjoy the sweet scene for a moment : we walk, we sit, we muse—but soon fall asleep. Agitation is the element of man, and the life of society. Let us not attempt to correct the works of God : the attempt will betray us into absurd errors. This doctrine cannot be better illustrated than by a conversation, reported by the Jesuit Tachard, between the King of Siam, and a French ambassador, who, in his master's name, urged that king to embrace the Christian religion. “ I am surprised,” said his Majesty of Siam, “ that the King of France, my
“ good

7

“ good friend, should interest himself so warmly
“ in what concerns God only. He hath given to
“ his creatures different minds and different in-
“ clinations, which naturally lead them to differ
“ in opinion. We admire variety in the material
“ world : why not equally admire it in matters of
“ religion ? Have we not then reason to believe,
“ that God takes pleasure in all the different forms
“ of worship ? Had it been the intention of God,
“ to produce uniformity in religion, he would have
“ formed all men with the same mind.” Bernier
introduces some Gentiles of Hindostan defending
their religion much in the same manner : “ That
“ they did not pretend their law to be universal ;
“ that they did not hold ours to be false, as, for
“ ought they knew, it might be a good law for
“ us ; and that God probably made many roads to
“ heaven.”

With respect to the other cause above mention-
ed, the desire of putting people in the right road.
To reason others into our religious principles, is
natural ; but it is not always prudent. I wish my
neighbour to be of my opinion, because I think
my opinion right : but is there no danger of un-
dermining his religious principles, without esta-
blishing better in their stead ? Ought I not to
restrain my desire of making converts, when the
attempt may possibly reduce them to abandon re-
ligion altogether, as a matter of utter uncertain-
ty ? If a man of clear understanding has, by
some

some unhappy means, been led into error, that man may be set right by fair reasoning : but beware of endeavouring to convert people of low parts, who are indebted for their creed to parents, to education, or to example : it is safer to let them rest as they are.

At any rate, let us never attempt to gain proselytes by rewards, or by terror : what other effect can such motives produce, but dissimulation and lying, parents of every secret crime. The Empress of Russia uses a method for converting her Pagan subjects of Kamskatka, no less agreeable than effectual ; which is, to exempt from taxes for ten years, such of them as profess the Christian religion. This practice may be political ; but it tends not to advance religion, and is destructive of morality. Terror, on the other hand, may be equally effectual, but is not altogether so agreeable. The people of Rum, one of the Hebrides, were Papists till the beginning of the present century, when in one day they were all proselyted to the Protestant faith. Maclean of Coll, their chieftain, went to the island with a Protestant minister, and ordered all the inhabitants to appear on Sunday at public worship. They came, but refused to hear a Protestant minister. The chieftain reasoned with them : but finding that his reasonings made no impression, he laid hold of the most forward ; and having made a deep impression on him with his cane,

cane, pushed him into the church. The rest followed like meek lambs ; and from that day have continued firm Protestants. The Protestantism of Rum is styled by their Popish neighbours the faith of the *yellow stick*.

To apply any means for making profelytes, other than fair reasoning, appears to me a strange perversion. Can God be pleased with using rewards or punishments, or can any rational man justify them? What then should move any one to put them in practice? I should be utterly at a loss to answer the question, but for a fact mentioned more than once above, that the rude and illiterate judge by sight only, not by reflection. They lay weight on the external visible act, without thinking of intention, which is not visible. In truth, the bulk of mankind rest upon the external profession of religion : they never think of the heart, nor consider how that stands affected. What else is it but the external act merely that moves the Romish missionaries to baptize the infants of savages even at the moment of expiring? which they prosecute with much pious ardour. Their zeal merits applause, but not their judgment. Can any rational person seriously believe, that the dipping a savage or an infant in water will make either of them a Christian, or that the want of this ceremony will precipitate them into hell? The Lithuanians, before their conversion to Christianity,

stianity, worshipped serpents, every family entertaining one as a household-god. Sigismundus, in his commentaries of Muscovy, reports the following incident. A converted Christian having persuaded a neighbour to follow his example, and, in token of his conversion, to kill his serpent, was surprised, at his next visit, to find his convert in the deepest melancholy, bitterly lamenting that he had murdered his god, and that the most dreadful calamities would befall him. Was this person a Christian more than nominally? At the end of the last century, when Kempfer was in Japan, there remained but about fifty Japan Christians, who were locked up in prison for life. These poor people knew no more of the Christian religion, but the names of our Saviour and of the Virgin Mary; and yet so zealous Christians were they, as rather to die miserably in jail, than to renounce the name of Christ, and be set at liberty. The inhabitants of the island Annaboa, in the gulf of Guinea, have been converted by the Portuguese to Christianity. No more is required of them, as Bosman observes, but to repeat a *Pater Noster*, and *Ave Maria*, confess to the priest, and bring offerings to him.

I cannot with satisfaction conclude this Sketch, without congratulating my present countrymen of Britain upon their knowledge of the intimate connection that true religion has with morality.

May the importance of that connection, always at heart, excite us to govern every action of our lives by the united principles of morality and religion :——what a happy people would we be !

APPEN-

APPENDIX.

SKETCHES

CONCERNING

SCOTLAND.

SKETCH I.

SCOTCH ENTAILS CONSIDERED IN MORAL AND POLITICAL VIEWS.

MAN is by nature a hoarding animal ; and to secure what is acquired by honest industry, the sense of property is made a branch of human nature *. During the infancy of nations, when artificial wants are unknown, the hoarding appetite makes no figure. The use of money produced a great alteration in the human heart. Money having at command the goods of fortune, introduced inequality of rank, luxury, and artificial wants without end. No bounds are set to hoarding, where an appetite for artificial wants is indulged :

F f 2

* Book I. Sketch 2.

ged : love of money becomes the ruling passion : it is coveted by many, in order to be hoarded ; and means are absurdly converted into an end.

The sense of property, weak among savages, ripens gradually till it arrives at maturity in polished nations. In every stage of the progress, some new power is added to property ; and now, for centuries, men have enjoyed every power over their own goods, that a rational mind can desire * : they have the free disposal during life, and even after death, by naming an heir. These powers are sufficient for accomplishing every rational purpose : they are sufficient for commerce, and they are sufficient for benevolence. But the artificial wants of men are boundless : not content with the full enjoyment of their property during life, nor with the prospect of its being enjoyed by a favourite heir, they are anxiously bent to preserve it to themselves for ever. A man who has amassed a great estate in land, is miserable at the prospect of being obliged to quit his hold : to soothe his diseased fancy, he makes a deed securing it for ever to certain heirs ; who must without end bear his name, and preserve his estate entire. Death, it is true, must at last separate him from his idol : it is some consolation, however, that his will governs and gives law to every subsequent proprietor. How repugnant to the frail state of man are such swollen conceptions ! Upon these, however, are founded

ed

* Historical Law-Tracts, Tract 3.

ed entails, which have prevailed in many parts of the world, and unhappily at this day infest Scotland. Did entails produce no other mischief but the gratification of a distempered appetite, they might be endured, though far from deserving approbation : but, like other transgressions of nature and reason, they are productive of much mischief, not only to commerce, but to the very heirs for whose sake alone it is pretended that they are made.

Considering that the law of nature has bestowed on man every power of property that is necessary either for commerce or for benevolence, how blind was it in the English Legislature to add a most irrational power, that of making an entail ! But men will always be mending ; and, when a lawgiver ventures to tamper with the laws of nature, he hazards much mischief. We have a pregnant instance above, of an attempt to mend the laws of God in many absurd regulations for the poor ; and that the law authorising entails is another instance of the same kind, will be evident from what follows.

The mischievous effects of English entails were soon discovered : they occasioned such injustice and oppression, that even the judges ventured to relieve the nation from them by an artificial form, termed *fine and recovery*. And yet, though no moderate man would desire more power over his estate than he has by common law, the legislature of Scotland enabled every land-proprietor to fet-

ter his estate for ever ; to tyrannize over his heirs ; and to reduce their property to a shadow, by prohibiting them to alien, and by prohibiting them to contract debt, were it even to redeem them from death or slavery. Thus, many a man, fonder of his estate than of his wife and children, grudges the use of it to his natural heirs, reducing them to the state of mere liferenters. Behold the consequences ! A number of noblemen and gentlemen among us lie in wait for every parcel of land that comes to market. Intent upon aggrandizing their family, or rather their estate, which is the favourite object, they secure every purchase by an entail ; and the same course will be followed, till no land be left to be purchased. Thus every entailed estate in Scotland becomes in effect a mortmain, admitting additions without end, but absolutely barring alienation ; and if the Legislature interpose not, the period is not distant, when all the land in Scotland will be locked up by entails, and withdrawn from commerce.

The purpose of the present Essay, is to set before our Legislature, coolly and impartially, the destructive effects of a Scotch entail. I am not so sanguine as to hope, that men, who convert means into an end, and avariciously covet land for its own sake, will be prevailed upon to regard, either the interest of their country, or of their posterity : but I would gladly hope, that the Legislature may
be

be roused to give attention to a national object of no slight importance.

I begin with effects of a private or domestic nature. To the possessor, an entail is a constant source of discontent, by subverting that liberty and independence, which all men covet with respect to their goods as well as their persons. What can be more vexatious to a proprietor of a great land-estate, than to be barred from the most laudable acts, suitable provisions, for example, to a wife or children? not to mention numberless acts of benevolence, that endear individuals to each other, and sweeten society. A great proportion of the land in Scotland is in such a state, that, by laying out a thousand pounds or so, an intelligent proprietor may add a hundred pounds yearly to his rent-roll. But an entail effectually bars that improvement: it affords the proprietor no credit; and supposing him to have the command of money independent of the estate, he will be ill-fated if he have not means to employ it more profitably for his own interest. An entail, at the same time, is no better than a trap for an improvident possessor: to avoid altogether the contracting debt, is impracticable; and if a young man be guided more by pleasure than by prudence, which commonly is the case of young men, a vigilant and rapacious substitute, taking advantage of a forfeiting clause, turns him out of possession, and delivers him over to want and misery.

I beg indulgence for introducing a case, which, though particular, may frequently happen. A gentleman, who has a family-seat finely situated, but in the state of nature, is tempted to lay out great sums upon improvements and embellishments, having a numerous issue to benefit by his operations. They all fail; and a stranger, perhaps his enemy, becomes the heir of entail. Fond, however, of his darling seat, he is willing to preserve all entire, upon procuring to his heirs a reasonable sum for his improvements; which is refused. Averse to lay waste the work of his own hands, he restricts his demand to the real value of the growing timber—All in vain. Provoked at the obstinacy of the heir of entail, he cuts down every tree, dismantles the place; and with a sad heart abandons his beloved habitation. In a bare country like Scotland, is it not cruel to deter proprietors by an entail, from improving their land, and embellishing their family-seats? Is it not still more cruel, to force a proprietor, who has no heir of his own blood, to lay all waste, instead of leaving behind him a monument of his taste and industry?

But an entail is productive of consequences still more dismal, even with respect to heirs. A young man upon whom the family-estate is entailed without any power reserved to the father, is not commonly obsequious to advice, nor patiently submissive to the fatigues of education: he abandons himself

self to pleasure, and indulges his passions without controul. In one word, there is no situation more subversive of morals, than that of a young man, bred up from infancy in the certainty of inheriting an opulent fortune.

The condition of the other children, daughters especially, is commonly deplorable. The proprietor of a large entailed estate leaves at his death children who have acquired a taste for sumptuous living. The sons drop off one by one, and a number of daughters remain, with a scanty provision, or perhaps with none at all. A collateral male heir succeeds, who, after a painful search, is discovered in some remote corner, qualified to procure bread by the spade or the plough, but entirely unqualified for behaving as master of an opulent fortune. By such a metamorphosis, the poor man makes a ludicrous figure; while the daughters, reduced to indigence, are in a situation much more lamentable than are the brats of beggars.

Our entails produce another domestic evil, for which no proper remedy is provided. The sums permitted in most entails to younger children, however adequate when the entail is made, become in time too scanty, by a fall in the value of money, and by increase of luxury; which is peculiarly hard upon daughters of great families: the provisions destined for them will not afford them bread; and they cannot hope to be suitably matched, with-
out

out a decent fortune. . If we adhere to entails, nunneries ought to be provided.

But the domestic evils of an entail make no figure, compared with those that respect the public. These in their full extent would fill a volume : they are well known ; and it may be sufficient to keep them in view by some slight hints.

As observed above, few tenants in tail can command money for improvements, however profitable. Such discouragement to agriculture, hurtful to proprietors of entailed estates, is still more so to the public. It is now an established maxim, That a state is powerful in proportion to the product of its land : a nation that feeds its neighbours, can starve them. The quantity of land that is locked up in Scotland by entails, has damped the growing spirit of agriculture. There is not produced sufficiency of corn at home for our own consumption : and our condition will become worse and worse by new entails, till agriculture and industry be annihilated. Were the great entailed estates in Scotland split into small properties of fifty or a hundred pounds yearly rent, we should soon be enabled, not only to supply our own markets, but to spare for our neighbours.

In the next place, our entails are no less subversive of commerce than of agriculture. There are numberless land estates in Scotland of one, two, or three hundred pounds yearly rent. Such an estate cannot afford bare necessities to the proprietor, if
he

he pretend to live like a gentleman. But he has an excellent resource : let him apply to any branch of trade, his estate will afford him credit for what money he wants. The profit he makes, pays the interest of the money borrowed, with a surplus ; and this surplus, added to the rent of his estate, enables him to live comfortably. A number of land-proprietors in such circumstances, would advance commerce to a great height. But alas ! there are not many who have that resource : such is the itch in Scotland for entailing, as even to descend lower than one hundred pounds yearly. Can one behold with patience, the countenance that is given to selfish wrong-headed people, acting in direct opposition to the prosperity of their country ? Commerce is no less hurt in another respect : when our land is withdrawn from commerce by entails, every prosperous trader will desert a country where he can find no land to purchase ; for to raise a family, by acquiring an estate in land, is the ultimate aim of every merchant, and of every man who accumulates money.

Thirdly, An entail is a bitter enemy to population. Population depends greatly on the number of land-proprietors. A very small portion of land, managed with skill and industry, affords bread to a numerous family ; and the great aim of the frugal proprietor, is to provide a fund for educating his children, and for establishing them in business. A numerous issue, at the same time, is commonly
the

the lot of the temperate and frugal ; because luxury and voluptuousness enervate the body, and dry up the sources of procreation. This is no chimaera or fond imagination : traverse Europe ; compare great capitals with distant provinces, and it will be found to hold universally, that children abound much more among the industrious poor, than among the luxurious rich. But, if division of land into small properties, tend to population ; depopulation must be the necessary consequence of an entail, the avowed intent of which is to unite many small properties in one great estate ; and consequently to reduce land-proprietors to a small number.

Let us, in the fourth place, take under consideration the children of landholders with respect to education and industry ; for, unless men be usefully employed, population is of no real advantage to a state. In that respect, great and small estates admit no comparison. Children of great families, accustomed to affluence and luxury, are too proud for business ; and, were they even willing, are incapable to drudge at a laborious employment. At the same time, the father's hands being tied up by his entail from affording them suitable provisions, they become a burden on the family, and on the state, and can do no service to either, but by dying. Yet there are men so blind, or so callous, as to be fond of entails. Let us try whether a more pleasing scene will
have

have any effect upon them. Children of small landholders are from infancy educated in a frugal manner; and they must be industrious, as they depend on industry for bread. Among that class of men, education has its most powerful influence: and upon that class a nation chiefly relies, for its skilful artists and manufacturers, for its lawyers, physicians, divines, and even for its generals and statesmen.

And this leads to consider, in the fifth place, the influence that great and small estates have on manners. Gentlemen of a moderate fortune, connected with their superiors and inferiors, improve society, by spreading kindly affection through the whole members of the state. In such only resides the genuine spirit of liberty, abhorrent equally of servility to superiors, and of tyranny to inferiors. The nature of the British government creates a mutual dependance of the great and small on each other. The great have favours to bestow: the small have many more, by their privilege of electing parliament-men; which obliges men of high rank to affect popularity, however little feeling they may have for the good of their fellow-creatures. This connection produces good manners at least, between different ranks, and perhaps some degree of cordiality. Accumulation of land into great estates, produces opposite manners: when all the land in Scotland is swallowed up by a number of grandees, and a few gentlemen of the middle

middle rank are left ; even the appearance of popularity will vanish, leaving pride and insolence on the one hand, and abject servility on the other. In a word, the distribution of land into many shares, accords charmingly with the free spirit of the British constitution ; but nothing is more repugnant to that spirit, than overgrown estates in land.

In the sixth place, Arts and sciences can never flourish in a country, where all the land is engrossed by a few. Science will never be cultivated by the dispirited tenant, who can scarce procure bread ; and still less, if possible, by the insolent landlord, who is too self-sufficient for instruction. There will be no encouragement for arts : great and opulent proprietors, fostering ambitious views, will cling to the seat of government, which is far removed from Scotland ; and if vanity make them sometimes display their grandeur at their country-seats, they will be too delicate for any articles of luxury but what are foreign. The arts and sciences being thus banished, Scotland will be deserted by every man of spirit who can find bread elsewhere.

In the seventh place, Such overgrown estates will produce an irregular and dangerous influence with respect to the House of Commons. The Parliament-boroughs will be subdued by weight of money ; and, with respect to county-elections, it is a chance if there be left in a county as many
qualified

qualified landholders as to afford a free choice. In such circumstances, will our constitution be in no danger from the ambitious views of men elevated above others by their vast possessions? Is it unlikely, that such men, taking advantage of public discord, will become an united body of ambitious oppressors, overawing their Sovereign as well as their fellow-subjects? Such was the miserable condition of Britain, while the feudal oligarchy subsisted: such at present is the miserable condition of Poland: and such will be the miserable condition of Scotland, if the Legislature do not stretch out a saving hand.

If the public interest only were to be regarded, entails ought to be destroyed root and branch. But a numberless body of substitutes are interested, many of whom would be disinherited, if the tenants in tail had power. To reconcile as much as possible these opposite interests, it is proposed that the following articles be authorised by a statute. First, That the act of Parliament 1685 be repealed with respect to all future operations. Second, That entails already made and completed, shall continue effectual to such substitutes as exist at the date of the act proposed; but shall not benefit any substitute born after it. Third, That power be reserved to every proprietor, after the act 1685 is at an end, to settle his estate upon what heirs he thinks proper, and to bar these heirs from
altering

altering the order of succession; these powers being inherent in property at common law.

At the same time, the prohibiting entails will avail little, if trust-deeds be permitted in their utmost extent, as in England. And therefore, in order to re-establish the law of nature with respect to land-property, a limitation of trust-deeds is necessary. My proposal is, That no trust-deed, directing or limiting the succession of heirs to a land-estate, shall be effectual beyond the life of the heirs in existence at the time.

SKETCH II.

GOVERNMENT OF ROYAL BOROUGHES IN SCOTLAND.

BY a royal borough is in Scotland understood, an incorporation that hold their lands of the Crown, and are governed by magistrates of their own naming. The administration of the annual revenues of a royal borough, termed the *common good*, is trusted to the magistrates; but not without controul. It was originally subjected to the review of the Great Chamberlain; and accordingly the chap. 39. § 45. of the *Iter Camerarii*, contains

contains the following articles, recommended to the Chamberlain, to be inquired into. “ Giff
“ there be an good affedation and uptaking of the
“ common good of the burgh, and giff faithful
“ compt be made thereof to the community of
“ the burgh ; and giff no compt is made, he
“ whom and in quhaes hands it is come, and how
“ it passës by the community.” In pursuance of these instructions, the Chamberlain’s precepts for holding the ayr, or circuit, is directed to the provost and bailies, enjoining them “ to call all those
“ who have received any of the town’s revenues,
“ or used any office within the burgh, since the
“ last chamberlain-ayr, to answer such things as
“ shall be laid to their charge.” *Iter Camer. cap. 1.* And in the third chapter, which contains the forms of the chamberlain-ayr, the first thing to be done after fencing the court, is, to call the bailies and serjeants to be challenged and accused from the time of the last ayr.

This office, dangerous by excess of power, being suppressed, the royal boroughs were left in a state of anarchy. There being now no check or controul, the magistracy was coveted by noblemen and gentlemen in the neighbourhood ; who, under the name of office-bearers, laid their hands on the revenues of the borough, and converted all to their own profit. This corruption was heavily complained of in the reign of James V. ; and a remedy was provided by act 26. Parl. 1535, en-

acting, 1st, That none be qualified to be provost, bailie, or alderman, but an indwelling burgeses. 2dly, " That no inhabitant purchase lordship out of burgh, to the terror of his comburgeses, " And, 3dly, That all provosts, bailies, and aldermen of boroughs, bring yearly to the chequer, at a day certain, the compt-books of their common good, to be seen and considered by the Lords Auditors, giff the same be spended for the common well of the burgh, or not, under the penalty of losing their freedom. And that the saids provosts, bailies, and aldermen, warn yearly, fifteen days before their coming to the chequer, all those who are willing to come for examining the said accounts, that they may impugn the same, in order that all murmur may cease in that behalf." And to enforce these regulations, a brieve was issued from the chancery, commanding the magistrates to present their accounts to the Exchequer, and summoning the burgeses to appear and object to the same.

A defect in this statute made it less effectual than it was intended to be. Magistrates, to avoid the penalty, brought the count-books of their common-good to the Exchequer; but they brought no rental of the common-good to found a charge against them. This defect was remedied by act 28. Parl. 1693, containing the following preamble. " That the royal boroughs, by the mal-administration of their magistrates, have fallen under " great

“ great debts and burdens, to the diminution of
“ their dignity, and the disabling of them to serve
“ the crown and government as they ought; and
“ that the care, oversight, and controul, of the
“ common-good of boroughs, belong to their
“ Majesties by virtue of their prerogative-royal;
“ therefore, for preventing the like abuses and
“ misapplications in all time thereafter, their
“ Majesties statute and ordain, That every burgh-
“ royal shall, betwixt and the first day of No-
“ vember next, bring to the Lords of Treasury
“ and Exchequer an exact account of charge and
“ discharge, subscribed by the magistrates and
“ town-clerk, of their whole public-good and
“ revenues, and of the whole debts and incum-
“ brances that affect the same.” This completed
the remedy, by putting means into the hands of
the Barons of Exchequer, to controul the accounts
enjoined by the former statute to be yearly given
in.

The foregoing regulations are kept in obser-
vance. Every year a precept issues from the Ex-
chequer, signed by one of the Barons, addressed
to the director of the chancery, requiring him to
make out a brieve for every royal borough. The
brieve is accordingly made out, returned to the
Exchequer, and sent to the several sheriffs, to be ser-
ved in all the royal boroughs within their bounds,
as directed by the statute. These brieves are ac-
cordingly so served by the sheriffs; and particu-

larly it is a constant form in most of the royal boroughs, to issue a proclamation, fifteen days before the day named for appearance in Exchequer, warning the inhabitants to repair there, in order to object to the public accounts of the town : and further, in order to give them opportunity to frame objections, the book and counts are laid open for these fifteen days, to be inspected by all the inhabitants.

We learn from the records of Exchequer, that, from the year 1660 to the year 1683, accounts were regularly given in to Exchequer, in obedience to the statute. The town of Edinburgh only having failed for some short time, Captain Thomas Hamilton, merchant there, by an action in Exchequer, compelled the magistrates to produce upon oath their treasurer's accounts, which were accordingly audited. And we also learn, that, from the Restoration down to the Union, a clerk to the borough-roll was appointed by the crown, whose proper business it was to examine and audit the accounts of the boroughs.

Notwithstanding the foregoing salutary regulations, and the form constantly practised to make them effectual, the boroughs of late years have forborn to present their accounts in Exchequer ; hoping that they would be overlooked by the English court of Exchequer, established in Scotland after the Union ; which accordingly happened. This neglect in the Court of Exchequer is
greatly

greatly to be regretted, because it reduces the royal boroughs, by the mal-administration of their magistrates, to the same miserable condition that is so loudly complained of in the statutes above mentioned. It is undoubtedly in the power of the Barons to restore good government to the boroughs, by compelling the magistrates to account yearly in the court of Exchequer, according to the foregoing regulations: no more is necessary, but to signify publicly that they are resolved to put these regulations in execution.

How beneficial that step would be to this country in general, and to the royal boroughs in particular, will appear from considering, first, the unhappy consequences that result from suffering magistrates to dispose of the town's revenues, without any check or controul; and next, the good effects that must result from a regular and careful management, under the inspection of the King's judges.

The unhappy consequences of leaving magistrates without any check or controul, are too visible to be disguised. The revenues of a royal borough are seldom laid out for the good of the town, but in making friends to the party who are in possession of the magistracy; and in rioting and drunkenness, for which every pretext is laid hold of, particularly that of hospitality to strangers. Such mismanagement tends to idleness, and corruption of manners; which accordingly are re-

markable in most royal boroughs. Nor is the contagion confined within the town : it commonly spreads all around.

Another consequence no less fatal, of leaving magistrates to act without controul, is a strong desire in every licentious burgher, of stepping into the magistracy, for his own sake, and for that of his friends. Hence the factions and animosities that prevail in almost all the royal boroughs ; which are violently and indecently pursued, without the least regard to the good of the community.

The greatest evil of all, respects the choice of their representatives in parliament. A habit of riot and intemperance, makes them fit subjects to be corrupted by every adventurer who is willing to lay out money for purchasing a seat in parliament. Hence the infamous practice of bribery at elections, which tends not only to corrupt the whole mass of the people, but, which is still more dreadful, tends to fill the House of Commons with men of dissolute manners, void of probity and honour.

But, turning from scenes so dismal, let us view the beautiful effects that result from an administration regularly carried on, as directed by the statutes above mentioned. The revenues of the royal boroughs are supposed to be above L. 40,000 yearly. And were this sum, or the half of it, prudently expended, for promoting arts and industry among the numerous inhabitants of royal boroughs ; the benefit, in a country so narrow and
poor

poor as Scotland, would be immense : it would tend to population, it would greatly increase industry, manufactures, and commerce, beside augmenting the public revenue. In the next place, as there would be no temptation for designing men to convert the burden of magistracy into a benefit, faction and discord would vanish ; and there would be no less solicitude to shun the burden, than at present is seen to obtain it. None would submit to the burden but the truly patriotic, men who would cheerfully bestow their time, and perhaps their money, upon the public ; and whose ambition it would be to acquire a character, by promoting industry, temperance, and honesty, among their fellow-citizens.

And when the government of the royal boroughs comes to be in so good hands, bribery, which corrupts the very vitals of our constitution, will be banished of course. And considering the proper constitutional dependence of the royal boroughs upon the king's judges, we may have reasonable assurance, that few representatives will be chosen but who are friends to their country and to their sovereign.

SKETCH III.

PLAN FOR IMPROVING AND PRESERVING IN ORDER
THE HIGHWAYS IN SCOTLAND.

PREFACE.

HIGHWAYS have in Scotland become a capital object of police, by the increase of inland commerce, upon which bad roads are a heavy tax. Happily for our country, no person is ignorant of this truth; and we see with pleasure the fruits of their conviction in various attempts, public and private, to establish this valuable branch of police upon the best footing. As this is no easy task, it may reasonably be hoped, that men interested will seriously apply to it, and will freely produce such hints as occur to them. In the latter view, the following plan is offered to the public: and if, from the various proposals that have been or shall be published, an effective plan can be framed, such as completely to answer its purpose, it may safely be pronounced, that it will produce more benefit to this country, than has been produced by any other single improvement since the union of the two kingdoms.

1. **T**HE justices of peace, commissioners of supply, the sheriff or steward depute, and the first magistrate of royal boroughs, shall be commissioners

missioners for making and repairing highways, bridges, and ferries, in the several shires and stewartries. All the powers given by law to the justices of peace, and commissioners of supply, with respect to highways, bridges, and ferries, shall be transferred to them; and any two shall be a quorum, except where a greater number is required by this act.

2. The sheriff or steward depute shall appoint the first day of meeting of the said commissioners, as soon as may conveniently be after the date of the act, by an intimation at each parish-church upon a Sunday, at the close of the forenoon service. And the last Tuesday of March shall yearly thereafter be a day of meeting at the head borough of the shire or stewartry, in place of the first or third Tuesday of May appointed by former acts. The commissioners shall appoint a preses, convener, and clerk: and they shall be empowered to adjourn themselves from time to time.

3. The commissioners, at their first meeting, shall divide the shire or stewartry into two or more districts, as they see convenient. And if they cannot overtake this work at that meeting, they shall appoint proper persons to form a plan of the intended divisions, which plan shall be reported to the commissioners at their next meeting, in order to be approved or altered by them. This being settled, the commissioners shall appoint the heritors in these several districts, or any three of them, to meet on a certain day and place, to make
lists

lifts of the whole public roads within their respective districts, and to settle the order of reparation, beginning with those that are the most frequented. The proceedings of these district meetings must be reported to the commissioners at their next meeting ; who are empowered to settle the order of reparation, in case of variance among the heritors ; and also to add any road that may have been omitted. And they shall record a scheme or plan of the whole roads in the shire, thus enlisted, with their resolutions thereupon, to be seen in the clerk's hands *gratis*. But upon any just cause appearing in the course of administration, the commissioners shall be empowered to alter or vary this plan, provided it be at a meeting previously appointed for that purpose, and where three-fifths at least of the commissioners are present.

4. If the sheriff or steward neglect to appoint the first meeting of the commissioners, he shall incur a penalty of L. 100, upon a summary complaint to the Court of Session by any one heritor of the shire, with costs of suit ; the one-half of the penalty to the plaintiff, and the other half to be applied by the commissioners for the purposes of this act. If the commissioners fail to meet at the day appointed by the sheriff or steward, or fail to divide the shire or stewartry into districts, within six months of their first meeting, the sheriff or steward depute, under the foresaid penalty, shall be bound to do that work himself ; and also to appoint

point the heritors in the several districts, or any three of them, to make lists of the public roads as above mentioned, and to report their resolutions to him; and he is empowered to settle the order of reparation, in case of variance among the heritors. If the heritors fail to meet, and to make a list of the roads as aforesaid, this work shall be performed by the sheriff or steward depute himself. And he shall be indemnified of whatever expences he is at in prosecuting the said work, out of the sums that are to be levied by authority of this act, in manner after mentioned, with an additional sum for his own trouble, to be named by the circuit judges.

5. No person shall act as a commissioner upon this statute, but who has an estate within the county of L. 200 Scots valuation, or is heir-presumptive to such an estate, or is named a commissioner *virtute officii*, under the penalty of L. 20 Sterling *toties quoties*, to be prosecuted before any competent court, by a proper action, with costs of suit; the one-half to the plaintiff, the other half to the purposes of this act.

6. Whereas the sum of 10 d. directed by the act 1669 to be imposed upon each L. 100 of valued rent, is insufficient for the purposes therein expressed; and whereas the fix days statute-work for repairing the highways is in many respects inconvenient; and therefore, instead of the 10 d. and instead of the statute-work, the commissioners,

ers, together with the heritors possessed of L. 200 Scots of valued rent, five, whether commissioners or heritors, making a quorum, shall annually, upon the said last Tuesday of March, assess each heritor, in a sum not exceeding upon each L. 100 valued rent; the assessment imposed on the heritors to be levied by the collector of supply, along with the cess, and by the same legal remedies. The heritors are entitled to relieve themselves of the one-half of the said assessment, by laying the same upon their tenants, in proportion to the rent they pay; an heritor being always considered as a tenant of the land he has in his natural possession.

7. With respect to boroughs of royalty, regality, and barony, and large trading villages, the commissioners are empowered to levy from each householder, a sum not exceeding 2 s. yearly, more or less in proportion to the assessment of the shire, to be paid within forty days after notice given, under the penalty of double, besides expences of process. Provided, that any of these householders who have country-farms, by which they contribute to relieve their landlords as above mentioned, shall be exempted from this part of the assessment.

8. If the commissioners and heritors neglect to assess their shire, or name so small a sum as to be an elusory assessment, insufficient to answer the purposes of this act, the court of Justiciary, or the circuit-judges, are in that case empowered and required

quired to lay on the highest assessment that is made lawful by this act. In case of a total omission, the commissioners and heritors who, by neglecting to convene without a good cause of absence, have occasioned the said omission, shall be subjected each of them to a penalty of L. 20 Sterling. And to make these penalties effectual, the Trustees for fisheries and manufactures are appointed to sue for the same before the Court of Session, and to apply the same, when recovered, to any useful purpose within the shire, especially to the purposes of this act. And to preserve the said fines entire for the public service, the trustees shall be entitled to costs of suit.

9. The sums levied as aforesaid shall be laid out annually upon the highways, bridges, and ferries, for making, repairing, or improving the same; proceeding regularly with the reparation according to the scheme or plan ordered as above to be settled in each shire and stewartry.

10. With respect to roads that are not the first in order, and for which there is no interim provision by this act during reparation of the more frequented roads, the commissioners are empowered to exact from cottars and day-labourers their statute-work, according to the acts presently in force, to be applied to these secondary roads. The statute-work is not to be demanded unless for this purpose; and is to cease totally after the highways have,

have, by means of the present act, been once totally repaired.

11. The commissioners and heritors, at all their meetings, shall bear their own charges.

12. The clause in the act 1661, empowering heritors, at the sight of the sheriff, to cast about highways for their convenience, shall be repealed; and it shall be declared unlawful, in time coming, to turn about or change any highway, unless for the benefit of the public, as by shortening it, carrying it through firmer ground, or making it more level; and to that purpose the commissioners shall be empowered to turn about highways, as also to widen the same, not exceeding thirty feet, free of ditches. But the commissioners shall have no power to carry a road through any house, garden, orchard, or pleasure-ground.

13. The commissioners shall have power to take from the adjacent lands, stones, sand, gravel, or other materials for making the highways, paying always for the damage done.

14. With respect to highways that bound the properties of neighbouring heritors, which it may be found necessary to alter or widen, the commissioners shall be empowered to adjudge to one heritor any small bits of ground cut off from the other by the road so altered; and if land cannot be given for land, to make a compensation in money, valuing the land at the current price of the market.

15. In order to prevent water stagnating on the highways,

highways, the commissioners shall be empowered to make ditches or drains through neighbouring grounds; and such ditches or drains shall be preserved entire by the proprietors of the land, or at their charges.

16. As the foresaid assessment, after repairing the highways, may not be sufficient for building bridges or making ferries, where rivers are large; any five of the commissioners may, for building bridges or making ferries, establish a pontage or toll; so much for horses, so much for horned cattle, and so much for sheep, and the double for each beast in a wheel-carriage. Upon the credit of the toll, the said commissioners may borrow money, to be employed wholly upon the bridge or ferry where the toll is gathered.

But before borrowing, an estimate must be made of the expence of the work. After the work is finished, the sum bestowed on it must be ascertained: an accurate account must be kept of the gradual payments of this sum by the toll; and when it is completely paid, the commissioners must declare the bridge or ferry to be free.

17. The determinations of the commissioners shall be final, unless complained of in manner following.

18. If any heritor apprehend that undue preference is given to a certain highway, or conceive himself aggrieved by any order or sentence of the commissioners, it shall be lawful for him, within
forty

forty days of the act complained of, to enter a complaint in the Court of Session; and the judgment upon such complaint shall be final. But such complaint shall only be effectual for damages, and shall not stay execution of the work. At the same time, no complaint shall be admitted till security be given to pay full costs, in case the plaintiff be found in the wrong.

19. Former laws concerning highways, bridges, or ferries, to continue in force, unless as far as altered by this act.

20. An annual state of what is done by virtue of this act, made by the commissioners, or their clerk, shall, before the last Tuesday of March, be laid before the trustees for fisheries and manufactures, in order to be made a part of their annual report to the King; and these trustees shall direct proper persons to inspect what work is done upon the high-roads, and in what manner. Upon any misapplication or embezzlement of the money levied, any neglect in levying, or any wrong done to the public, contrary to the intention of this act, the trustees are required to set on foot and prosecute what redress is competent in law or equity, provided the prosecution be commenced within a year after the offence.

Query, Ought not broad wheels to be required?

CONSIDERATIONS THAT SUPPORT THE PRECEDING
PLAN.

THE laws in Scotland relating to this branch of public police, are numerous ; some enacted while Scotland was a separate kingdom, some after its union with England. It is not the purpose of this essay to enter into a detail of the various regulations established by these laws : they are generally known ; and in the late abridgment of our statute-law, they are all recapitulated with brevity and precision. It shall suffice cursorily to observe, that the acts made during the reign of Charles II. form the ground-work of our regulations concerning highways : the later acts are little more than explanatory of the former.

It seems to have been the plan of the Legislature, that highways should be repaired by those who are employed in husbandry ; and accordingly, the six days annual labour is, in the statutes of Charles II. imposed upon them only.

This was a measure not ill suited to the state of Scotland at that period. During the last century, we had little inland commerce to require good roads, except that of corn carried to market ; and for that reason, it was natural to impose upon

husbandmen the burden of repairing highways. These persons, at the same time, passing the whole summer in idleness, unless when called to perform personal services to capricious and unfeeling landlords, could not think it a hardship to have some part of their time employed in serving themselves instead of their landlords.

That annual labour upon highways, limited to a few days, should be required from men in that condition, appears not unjust. And why may we not suppose the Legislature at that time capable of such enlarged views, as to prefer this method for repairing highways, in order to bring on gradually a habit of labour and industry? But the condition of Scotland at present differs widely from what it was in the reign of Charles II.; and the regulations for repairing highways which were then proper, have, by alteration of circumstances, become both unjust and inexpedient.

Unjust they have become in a high degree. Inland commerce, which begins to flourish in Scotland, is greatly promoted by good roads; and every dealer, and indeed every traveller, profits by them. But no men are less interested in good roads than day-labourers, or those who are commonly called *cottars*; and yet these chiefly are burdened with the reparation. Such men, at the same time having commonly many children, find it difficult to support their families, even with their utmost industry. Nothing can be more unjust,

just, than to impose upon such men an annual tax of six days labour for repairing roads, the goodness of which contributes little or nothing to their convenience,

Our present laws are inexpedient, as well as unjust. In the first place, a tax of this nature discourages the propagation of children, in which the strength of a state consists: the poor labourer ought to be encouraged with a reward; instead of being discouraged with a tax. In the next place, cottars called out to perform the statute-work, obey with reluctance, and trifle away time without doing any thing effectual. To enforce the law, and to compel such men to labour, is grievous to the gentlemen who are empowered to execute the law: they cannot punish with rigour or firmness men who have so good reason to decline the service: they are soon disgusted with being taskmasters, and the generality desist altogether.

Laws concerning private property are always kept in observance; and they execute themselves, as is commonly expressed, because there are always a multitude of individuals strongly interested to have them executed. But, in making public laws, the great difficulty has ever been, to lay down effectual measures for putting them in execution: by what means to make such laws execute themselves, is one of the most intricate problems in politics. Our laws concerning highways, are eminently defective in that respect: and accordingly,

though most of them have existed near a century, they never have at any period been executed to any extent. Take the following specimen, among many that may be urged, of this defect. Overseers are forced into the service under a penalty, in order to compel the peasants to perform faithfully their six days labour. To hope any good from a reluctant overseer set over a set of reluctant labourers, is a fond conceit : it is much if his resentment tempt him not to encourage their idleness. In vain would we expect, that any overseer, without a suitable reward, will exert himself in promoting the work.

To remedy the hardship of laying the burden of reparation upon those who are least able and least benefited, and at the same time to make this remedy effectual, is the purpose of the foregoing plan. And upon considering the matter in its different views, the only method that promises success, appears to be a county-tax laid upon land according to the valuation, and a capitation-tax on the inhabitants of boroughs. These taxes relieve the labouring poor, and lay the burden where it ought to be laid : and the law will execute itself, if that effect can be hoped from any public law : effectual measures are laid down for levying the tax ; and, if once levied, there is no danger of its being allowed to lie unemployed in the hands of the collector, for every heritor will be anxious to have some part employed for his benefit. The danger
will

will rather be of factious disputes about the distribution. This danger also is attempted to be prevented ; and, it is hoped, with success.

Some narrow-minded persons may possibly grudge a tax, that loads the present generation for the advantage of those who come after : but is it rational to grudge, that others should benefit by measures evidently calculated for advancing our own interest ? Let us suppose, that the heritors of a shire were to concert measures in common, for improving their lands : to make good roads would be one effectual measure ; for, supposing their reparation to cost L. 5000, their estates would be bettered double that sum.

To conclude : it is not to be expected that any regulations concerning highways, or concerning any branch of police, can be so framed as to please every individual. Wise men are practicable men, to use an expression of Lord Bacon, and will make concessions, in order to promote a general good, if without such concessions it cannot be obtained. Better far to have a good law, though, in our opinion, defective in some articles, than to have no law at all ; or, which is worse, a law eminently defective, unjust, and inexpedient.

INDEX.

*In the following Index, the Roman Numerals mark the volume;
the Arabic figures the page.*

A

Actions, human. See *Morality*.

Adultery, how punished among different nations, i. 452.
et seq.

Affection, parental, earlier in the mother than in the father, i. 51. Note; 440.

Age, old, veneration anciently paid to, ii. 58. Note.

Agricultural state, how introduced, i. 73., and where, 74.
Its effect in stopping the migration of barbarians, 77.
Cannot take place in very cold regions, 80. Not obstructed by superfluity of money, 124. Progress of, 136. Instance of its immediately succeeding to hunting, ii. 369.

Albuquerque, his patriotism, ii. 143. Note.

Alcavala, a ruinous Spanish tax, ii. 239.

Aldrovandus, his prolixity, i. 252.

Allegories, remarks on, ii. 458. *et seq.* Nature of, 463. Note.

America, origin and progress of the nations of, ii. 352.
Not peopled from the old world, 354. *et seq.* First parents of the people of, separately created, 360. Where placed, 361. Why the hunting state continued in, *ibid.* Decrease of its native inhabitants, and why, 365.

365. *et seq.* Strange political phenomena in, 369. Account of the Mexicans, 372. *et seq.* Of the Peruvians, 381. *et seq.* Comparison of the Mexican and Peruvian governments, 387. *et seq.* Poverty of the languages of some of the tribes in, iii. 252.

Analytics, account of the *first* of Aristotle, iii. 38. *et seq.* Of the *last*, 73. *et seq.*

Ancients, their ignorance of natural history, and their credulity, i. 54.

Animals classed by Nature into different kinds, i. 3. Utility of this in enabling us to reason concerning their habits, 4. In fitting them for different climates, 6. Those of the torrid zone in the old world different from those of the new, 11. Those of the torrid zone fiercest, 47. All graminivorous, useful for food, 72. Remarks on the pairing, propagation, and care of the young of, 480. *et seq.* Those of prey have no appetite for society, ii. 5. What animals are social, 6. *et seq.* How they unite in tribes, 12. Provide against danger, 13. Their sense of dignity, 16. ; and love of liberty, 17.

Appetite, carnal, remarks on its early appearance, i. 413. Note. Baneful effects of the hoarding, iii. 239. *et seq.*

Apparitions credited only in thin peopled countries, i. 153. Note. Story of one, ii. 454.

Aristides, eulogy of, ii. 152.

Aristotle, his remarks on instinct, i. 489. On bees, ii. 9. Hurtful to the progress of reason, 420. False reasoning of, 422, 431, 476. Remark of Alexander the Great concerning, 475. His definition of motion and time, 479. Account of his logic, iii. 1. *et seq.* History and character of, 5. *et seq.* Additions made to his

- his theory of logic, 51. Quoted, 84. His opinion of the tragedy of Oedipus, 247. See *Syllogism*.
- Army*, first standing, ii. 253. Effects of, 255. Objections to, 257. *et seq.*
- Arnobius*, his argument against sacrifice, iii. 344. Quoted 350, 435.
- Articles* of the English creed. Forged addition to, i. 143.
- Arts*, origin and progress of the useful, i. 127. Rudeness of primitive houses, *ibid.*; and arms, 130. Origin and progress of writing, 134. Of agriculture, 136.; and other arts, 138. Slow progress of, 140. Exemplified, 144. Rise of, often owing to accident, *ibid.* To national emulation, 146.; and struggles, 149.
- Arts, Fine*, have their birth in temperate regions, i. 48. Progress of, 172. Rise of an extraordinary genius fatal to the general pursuit of, 150, 244. Refinement at last fatal to, 221. *et seq.*; and despotism, 239.; and avarice, 242.; and corruption of language, 246. Advantage of a great state to, ii. 101. Corrupted by the Christians, iii. 408. Note.
- Asia*, great empires of, ii. 85. Revolutions frequent in, 106. Note.

Mabomet Bey, his notion of the philosopher's stone, i. 77. Note.

Malice, its difference from resentment, iii. 189. Note.

Mallet attributes the ferocity of the Scandinavians to their climate, i. 42.

Man, progress of, in society, ii. 3. *et seq.* His appetite for this, *ibid.* et 8. Limitation of this appetite, and final causes of this, 19. A principle of malevolence in, 22. Aversion of neighbouring tribes to each other, 25. *et seq.* Variableness of this, 30. How fitted for society, 34. Striking instance of this, 35. Objections to the general principle, 36. *et seq.* The selfish passions of, useful, 44. Not formed for ease and security, 46. *et seq.* Not a merely selfish animal, iii. 123.

Mankind, apparently not all of the same species, i. 15. Considered as probable from their different figure, 19.; and complexion, 21.; and internal disposition, 23. This exemplified in difference of hospitality, 25.; Courage, 31.; Frame of body, 57. Degeneracy of, how introduced, 60. Progress of, with respect to food and population, 67. Adaptation of their external structure to their inward constitution, 68. Wherein the peculiar excellence of consists, 324.

Manners, observations concerning, i. 256. *et seq.* General progress of, 278. Roughness of, fostered by slavery, 298. Indelicacy of, among the Greeks, 303. Romans, 306.; and in the middle ages, 307. Difference between lowness and simplicity of, and instances of the former, 309. Of gallant, 312. *et seq.* Curious mixture of, 318. Change of, by conquest or persecution, 321. Selfish, of barbarians, 322. Of a luxurious people, and effects of opulence in corrupting, 325. *et seq.* General to be distinguished from particular customs, 341. Refinement of the ancient Caledonians, 343. *et seq.* Modified by the soil, 400. Diversity of, enters into the plan of Providence, 401.

Mathematical Reasoning. See *Reason*.

Matrimony

Matrimony, proved to be natural and necessary, i. 407. *et seq.* Curious marriage ceremonies in different nations, 447. *et seq.*

Maupertuis, remark of, ii. 416.

Melody, remarks on, i. 324. *et seq.* Superior to harmony, *ibid.*

Mexico, account of its customs and laws, ii. 372. *et seq.*
See *America*.

Migration, not natural to man, i. 62. How occasioned, 63. Northern, caused by famine, 76.

Militia, remarks on a, ii. 260. Plan of Harrington for, *ibid.* Of Fletcher of Salton, 262. Of the author, for a, 263. *et seq.*

Monk, story of a, iii. 406.

Montesquieu asserts that a cold climate produces courage, i. 46. This controverted, *ibid.* Quoted with regard to the northern migrations, 75. His opinion concerning the standard of valuation, 106. His great genius, 257. An error of, 254. Note. Of the large monarchies of Asia, ii. 85. Of revolutions, 90. His remarks on the divisions in Rome, 122. Note. Of the increase of soldiers, 259. Of the labours of the Roman soldiers, 280.

Moors, their former flourishing state in Spain, ii. 236.
Their banishment, *ibid.*

Moral Sense, what, i. 153. Existence of, iii. 114. *et seq.*

Morality, principles of, iii. 103. *et seq.* Analysis of human actions, *ibid.* Division of them into right, wrong, and indifferent, 109. Natural laws respecting our moral conduct, 122. Division of moral actions, 137. Principles of duty, 139. Final causes of the moral laws of our nature, 163. How morality is influenced by liberty and necessity, 175. Progress of, 201. *et*

seq. Innocence of rude nations, 205. Rise of malevolence, 209. Lowness of morality in the middle ages, 225. *et seq.* Instances in England, 231. Two errors in morality fatal to conduct in dark times, 243. *et seq.* Considered as a branch of duty to our Maker, 377. *et seq.* Bad consequences to, arising from a composition for sin, 394. From its place being supplied by mere ceremonies, 396. From a wrong appretiation of, 410. *Moralities*, plays so called, i. 163. *Motives.* See *Necessity*. *Music* can only accompany simple poetry, i. 179. Of the Greeks, 235. See *Melody*. *Mysteries*, plays so called, i. 163.

N

Napier, his credulity, iii. 314. *Natural History*, imperfect state of, among the Greeks and Romans, i. 54. *Necessity*, considered with respect to morality, iii. 175. *Negroes*, the skin of, colder than that of whites, 18. Not inferior in understanding, 50. *Newton*, his great genius hurtful to general science, i. 244.; ii. 136. *Nobility*, defective education of the, ii. 289. Effeminacy of the French, 290. Note. *Noyon*, Bishop of, his account of a good Christian, iii. 403.

O

Oaths, in taxation, to be avoided, ii. 189. Bad effects of, in many cases, iii. 240. The Pope pretended to disengage from, 421. *Oedipus*, the tragedy of, iii. 245.

Oran

Oran-Outang, his inferiority to man, i. 61. Note.

Oration, funeral, i. 162.

Ossian, proofs of his excellence, i. 180. Note. The works of, ancient, 343. The manners described by, not fictitious, 344. *et seq.* His account of the love of fame in the ancient Caledonians, 349. *et seq.* Their elevated sentiments, 353. Their tenderness, 354. Humanity, hospitality, and magnanimity, 358. Their respect for women, 361. Susceptibility to love, 363. Belief of immortality, 366. Illustration of this refinement of manners, 368. Comparison of the Caledonians with the ancient Scandinavians, 375. *et seq.* Opera form of the poems of Ossian, 399. Extracts from, iii. 345. 365.

Ovid quoted.

Oxen, preferable to horses for husbandry, ii. 193. Note.

P

Pairing of animals, remarks on, i. 481. *et seq.*

Palmyra, courage of its inhabitants, ii. 250.

Parasites, what, i. 164.

Pascal, false reasoning of, ii. 445. Note.

Passions, selfish their use.

Patriotism, accompanied by aversion to strangers, ii. 29.

Rise and fall of, 128. *et seq.* How raised, 132. Of a Corsican, 133. Note. Causes that relax or destroy it, 137. *et seq.* Decay of, in Athens, 146. Note. Should be taught in public schools, 147. Two examples of, 151.

Penances, origin of, iii. 334. Instances of, *ibid. et seq.*

Farther remarks on, 415.

Pennant, remark of, i. 489.

Persecution, its dreadful effects on morality, iii. 423.

When it does not take place, 424. Instances of, 426.

et

et seq. Motives of, 430. Parable against, 436. Passages of Scripture against, 437. Why it prevails among Christians, 439. Note. What the desire of making proselytes proceeds from, 443.

Peru. See *America*.

Petronius Arbiter, his remark on the decline of the fine arts, i. 242. Quoted, iii. 254.

Plants have each a proper climate, i. 8. Note. Original climates of wheat, oats, &c. 71. Note. When several were introduced into England, 139.

Plato, false reasonings of, ii. 422. 426. 430. His definition of man, iii. 33.

Plautus, remarks on the comedies, of, i. 211. His puns, 213.

Pliny, his deficiency in natural knowledge, i. 56. 409. His remarks on the barbarity of man, ii. 29. His account of polytheism, iii. 270.

Plutarch quoted, ii. 80.; iii. 314.

Poetry, why earlier than prose, i. 174. *et seq.*

Polygamy, not known among the northern nations, i. 386. An infringement of the law of nature, 415. *et seq.* Rise of, 424.

Poor, public police in different countries concerning the, ii. 296. *et seq.* Ill management of the poor's rates in England, 300. *et seq.* Plan concerning, 313. *et seq.* 327. Ought to be left to private charity, 320. *et seq.* Remarks on poor-houses, 331. *et seq.*

Pope, pretensions of the, to bestow kingdoms, iii. 423.

Population, proportionable to the quantity of food, i. 83. Increased by the bounty for exporting corn, 85. Decrease of, by luxury, 88. By foundling hospitals, 89. Note. By despotism, 90. By an overflowing quantity of money, *ibid.*

Porphyry,

- Porphyry*, his introduction, iii. 9.
- Portuguese*, their discoveries, i. 144. Ruined by opulence, ii. 149. Degraded state of the, 150. Note.
- Predicables*, the five, iii. 15.
- Procopius*, his superstition, iii. 300. Quoted, 313.
- Property*, progress of, i. 91. *et seq.* Idea of, not confined to the human species, 94. Its advantage, 96. Miseries arising from the appetite for, 97. Exemplified in the conduct of the Spaniards to the Americans, *ibid. et seq.*
- Propositions*, Aristotle's definition of, and remarks on, iii. 35. *et seq.* Of the conversion of, 38. 48. See *Reasoning*.
- Prose*, later than poetry, i. 174. *et seq.* At first dramatic, 180.
- Profelytes*, remarks on the desire of making, and its folly, iii. 443. *et seq.* How the people of Rum were converted, 447.
- Punishments* to be mitigated as society improves, i. 60. See *Law*.
- Pythagoras*, foolish conceits of, ii. 460.

Q

- Quakers*, tenet of the, iii. 394.
- Quintilian* quoted, iii. 348.

R

- Ramus*, his categories, iii. 25. His addition to Aristotle's Logic, 51.
- Ray*. See *Buffon*.
- Raynal*, his remarks on the insolence of the Creoles, i. 298. Note.
- Reason*, principles of, ii. 394. *et seq.* Of truth and falsehood, *ibid.* Source of our knowledge, 395. *et seq.* Of propositions,

propositions, 399. Mathematical reasoning depends on the idea of equality, 400. Mental powers required in, 402. Why mathematical *r.* demonstrative, 403. Of opinion, 408. Of belief, 410. *et seq.* Analogical *r.* 414. Progress of, 418. *et seq.* Hindered by Aristotle, 420. Instances of absurd *r.* 422. Various sources of this, *ibid.* Too high idea of this power formed by the ancients, iii. 62.

Reid, his account of Aristotle's logic. See *Logic*. Quoted, iii. 130. Note.

Religion. See *Worship*.

Reparation. See *Law*.

Ridicule, too coarse for refined manners, i. 158.

Robertson quoted, ii. 96. Remark of, 121. Note.

Romans, corrupted by opulence, i. 327.; iii. 238. Instances of their breach of faith, i. 327. *et seq.* Their military establishments, ii. 252. Labour of their soldiers, 277. Integrity, when a small state, iii. 237. Folly of their religious creed, 277. Their superstition, 310. Note. Addicted to forms, 372.

Rousseau, an assertion of, i. 279. What he considers as the best quality in women, 406. His character of a wife, 419. Note. Quoted, 421. Reprobrates convents as schools of education, 478. Remarks of, 514. 519.; ii. 4. 73. 125. Quoted, iii. 129. 405.

Russia, despotic nature of its government, ii. 67.

Ruth, story of, narrated, i. 181.

S

Sabatai Levi, account of, iii. 321.

Sacrifices. See *Worship*.

Sadder, doctrines in the, iii. 384.

Sallust, his remarks on the corruption of the Romans, i. 328.

Salt

Salt tax, its absurdity, ii. 195.

Samson, his foxes, i. 252. *et seq.*

Saxe, Marshal, quoted, ii. 264.

Scandinavians, courage of the, i. 31. 375. *et seq.* Their bards, 377. Sentiments of their poetry, 378. *et seq.* Moral sentiments, 381. Their resemblance to the ancient Caledonians, 382. *et seq.* Their respect for women, 383. Odes of, 387. *et seq.*

Schools, inutility of charity, ii. 318.

Sciences. See *Reason*.

Scotland, ill peopled in the days of James V. i. 85. Circumstances which tended to hinder the progress of its inhabitants, 149. Probability of its being much beautified, 173. Music of, 237. Clan spirit of its Highlanders reduced, ii. 248. Note. Of entails in, iii. 451. *et seq.* Government of royal boroughs in, 464. *et seq.* Plan for improving the highways in, 472. Considerations that support this plan, 481.

Scriptures, Holy, dramatic style of the, i. 181. *et seq.*

Seneca, a corrupter of the Roman taste, i. 222.

Senses, internal, various, ii. 395.

Servius, remark of, i. 42.

Shakespeare, why formerly less relished than Johnson, i. 167. His knowledge of human nature, 223.

Shepherd state, how first introduced, i. 71. Friendly to population, 73. Continued longest in cold countries, 75. Never existed in the torrid zone, 81.

Silver. See *Commerce*.

Slavery, when abolished in England, i. 300. Considered as a capital punishment, 301.

Society. See *Man*.

Socrates, his dying prayer, iii. 286.

Soil, barren, favourable to industry and liberty, i. 402.

Nachwort 70

VORWORT.

Der „Octavius“ des Minucius Felix hat trotz seines geringen Umfanges bedeutendes Interesse erregt. Nachdem er einmal durch Franz Balduin 1560 als selbstständige Schrift und nicht wie ehemals durch Faustus Sabäus 1543 als liber octavus der Schrift des Arnobius an die Öffentlichkeit gelangt war, haben die Gelehrten aller Zeiten, besonders aber der Gegenwart, sich mit ihm beschäftigt. Zunächst in der chronologischen Frage. Galt hier anfangs die Priorität des mit dem „Octavius“ sich mannichfach berührenden „Apologeticum“ Tertullians als schlechthin unanfechtbar, indem man vor allem nicht wagte, an der litterarischen Selbstständigkeit des berühmten Afrikaners zu zweifeln, so wurde die Folgezeit grade der entgegengesetzten Meinung. Die ersten Bedenken gingen von Frankreich aus, erhoben von Blondel 1641 und Daillé 1660*) und wurden auf deutschem Boden von v. Hoven 1766, Rössler 1777, Russwurm 1824, Meier u. A. getheilt. Indess, erst A. Ebert gelang es, in seiner Schrift „Tertullians Verh. zu Min. Felix,“ Leipzig 1868 (vgl. auch seine „Gesch. der Litt. des Mittelalters im Abendlande,“ Bd. 1, 1874. S. 25 f.) für die Priorität des „Octavius“ einen vollgültigen Nachweis zu liefern. Wenn gleichwohl gegen dieses Ergebniss sich Stimmen erhoben haben, wie W. Hartel (Zeitschr. für d. österr. Gymn. 1869, S. 348—368), welcher jedoch zu jenem nicht in directem Widerspruch steht, da er für beide

*) D. Blondel „Eclaircissements familiers de la controverse de l'Eucharistie“ (Quevilly 1641) p. 119. J. Daillé „Lettre à M. Le Coq de la Talonnière, sur le changement de religion de M. Cottiby“ (Charenton 1660) p. 92 vgl. Paul de Félice Étude p. 17. J. D. van Hoven in s. Brief ad Gerh. Meermann 1766, abgedr. in Lindners edit. II 1773. Rössler Bibl. d. Kchv. 1777 Bd. 3. Russwurm in s. Ausg. 1824. Meier commentatio, Turin 1824.

Apologeien eine verloren gegangene lateinische Quelle voraussetzt, ferner wie E. Klusmann (vgl. Jenaer Litt-Ztg. 1878, No. 4, S. 56 f.) oder aber wie V. Schultze, der in den Jahrb. f. prot. Theol. 1881, No. 3, S. 485—506 die Priorität des Apologeticum nachzuweisen sucht und die Abfassung des „Octavius“ sogar zwischen 300—303 verlegt, — so wird trotzdem Eberts Resultat jetzt immer allgemeiner anerkannt*). Auch wir halten im Wesentlichen daran fest.

Welches Interesse man dem „Octavius“ auch von philologischer und theologischer Seite entgegenbrachte, das beweisen die zahlreichen, bisher erschienenen Ausgaben und die ihn betreffenden Abhandlungen. Nach oben genannten zwei ersten Editionen sind folgende zu nennen: die von Fulvius Ursinus 1583; Meursius 1598; Wowerus 1603; Elmenhorstius 1603; Heraldus 1605, 1613; Rigaltius 1643, 1645; Ouzelius 1652, 1672; Cellarius 1699; Davisius 1707; Gro-novius 1709, 1743; Lindner 1760, 1773; Russwurm 1824; Lübker 1836; Muralt 1836; Migne Patrol. III. 1844; Oehler 1847; Kayser in us. schol. 1863; Halm, Wien 1867, welche letzte unserer Arbeit zu Grunde liegt und Dombart, Erlangen 1881 (mit Uebersetzung). Die jüngste erst vor Kurzem erschienene Ausgabe ist von J. J. Cornelissen, Lugduni-Batavorum 1882 (E. J. Brill). Besondere Ab-handlungen aber schrieben neben bereits genannten v. Hoven, Meier, Ebert, noch Fr. Balduin und D. Nic. Le Nourry in Mignes Patr. tom. III. 3. S. 194—231, 371—652; C. Rören, „Minuciana,“ Bedburg 1859; E. Voreaux, thèse présentée à la faculté de theol. prot. de Strassbourg 1859; J. B. Kayser in Wiedemanns österr. Quartalschr. für kathol. Theol. I. 4, 1862; E. Behr, der „Octavius“ des M. F. in s. Verh. zu Ciceros Büchern de nat. deorum, Gera 1870; A. Faber, de M. F. comm., Nordhausen 1872; Th. Keim, „Celsus' wahres Wort,“ Zürich 1873, S. 151—168; ferner Paul de Félice, „Étude sur l'Octavius, thèse pour la licence etc., Blois 1880, sowie neustens G. Loesche, „Minucius Felix' Verh. zu Athenagoras“ in den Jahrb. für prot. Theol. 1882, No. 1, S. 168—178**).

*) Ist höchstens „einer theilweisen Neubegründung bedürftig“ (aber auch fähig), wie K. J. Neumann bemerkt. (Theol. Litt.-Ztg. 1881, No. 18. S. 422.) Sonst vgl. Bonwetsch „Die Schriften Tertullians nach der Zeit ihrer Abfassung untersucht“ Bonn 1878. S. 21 u. Dombart „Uebersetzung des Oct.“ 1881. S. VIII Anm. 3.

**) Mit text-kritischen Fragen beschäftigen sich noch speziell die Aufsätze von E. Bährens (lectiones latt. Bonn 1870 p. 22—31), H. A. Koch (Rhein. Mus. XXVIII, S. 615—621), B. Dombart „z. Erkl. u. Kritik des M. F.“ in Zeitschr. für d. bayr. Gymn. IX. 1873 S. 285—300.

Während aber die feine, in Form eines philosophischen Dialoges gebrachte Schutzschrift des Minucius nach diesen Seiten so vielfache Anregung gab und Berücksichtigung fand, so blieb doch grade ihre charakteristische Seite, die philosophische, bisher ganz unberücksichtigt. Man trat mit zu einseitig christlich-theologischem Interesse an die Apologie heran und setzte in dem feingebildeten Apologeten von vorn herein auch eine christliche Durchbildung voraus, wie man sie wenigstens bei den griechischen Apologeten anzunehmen pflegte*). Dies führte nothwendig dazu, dass man die zahlreichen Lücken in der christlichen Anschauung des Minucius sich nicht anders als aus Tendenz des Verfassers zu erklären wusste, andererseits aber dahin, das gesamte philosophische Material in der Apologie zu einem blossen Accidens herabzuwürdigen. Vertreter dieser Ansicht sind neben A. Faber vor allem B. Dombart in der Vorrede zu seiner Uebersetzung und Paul de Félice in seiner Étude. Beide von obiger Voraussetzung an die Schrift herantretend**) und darum von ihrem geringen christlichen Inhalt unbefriedigt, fassen dieselbe als eine vorläufige Grundlage für eine fernere christliche Belehrung des heidnischen Publicums. Während aber Dombart nur von jener vorbereitenden Grundlage spricht, glaubt Paul de Félice dem Apologeten auch die fernere christliche Belehrung nachweisen zu können. Anknüpfend an zwei Stellen***) im Dialog, die auf eine Fortsetzung desselben schliessen lassen, betrachtet er den „Octavius“ nur als die allgemeine Einleitung zu einer Reihe spezial-christlicher, jedoch nicht mehr

*) Vgl. übrigens M. v. Engelhardt Christenthum Justins 1878.

**) Characteristisch dafür ist, dass P. de F. den discours d'Octavius (chap. III. S. 112) d. h. Referat und Kritik gleich mit den Lücken beginnt, die er in demselben bemerkt hat. In der Voraussetzung, auch Minucius habe diese bemerken müssen, glaubt er auf eine Absicht desselben schliessen zu können S. 112: ... nous croyons préférable de signaler les lacunes du discours d'Octavius avant de dire ce qu'il contient. Par là nous pourrons, dès le début, bien déterminer quel nous paraît être le but qu'il a poursuivi. Er bemerkt im Ganzen drei Lücken: 1) l'absence de citations bibliques, 2) le silence presque complet sur la personne, la mission et l'oeuvre du Christ, 3) le silence sur la doctrine chrétienne par excellence, nous voulons parler du salut par la foi.

***) Nämlich 40, 2. 36, 2 (de fato) S. 118. Wir bemerken gleich hier zur richtigen Taxirung dieser Stellen, dass 40, 2 durchaus Nachahmung Ciceros ist De n. D. 40: Sed quoniam advesperascit, dabis diem nobis aliquem, ut contra ista dicamus, die Schrift de fato aber nach 36, 2 schon vom Alterthum angezweifelt worden ist. Vgl. Hieron. cat. script. eccl. c. 58 sowie ep. ad Magnum.

erhaltener Abhandlungen. In diese nun verlegt er den Schwerpunkt des ganzen minucianischen Christenthums, dort lässt er alle Lücken, die er hier bemerkte, nach und nach ausgefüllt werden und weist uns so von der einzigen erhaltenen Schrift des Minucius hinweg auf ein System blosser Vermuthungen*).

Diese Auffassungen überschätzen das christliche Element ebenso sehr, wie sie das philosophische unterschätzen. Es ist selbstverständlich, dass in dem Anschauungskreise eines so fein gebildeten und erst so spät zum Christenthum bekehrten Heiden das Heidnisch-Philosophische das Prius ist, der christliche Stoff aber erst durch sein heidnisches Verständniss hindurch musste. Schreibt nun ein Solcher eine christliche Apologie von anerkannt geringem christlichen und grossem philosophischen Gehalte, so ist dies doch weit eher auf die Nachwirkung seiner heidnisch-philosophischen Bildung zurückzuführen, als auf seine christlich-apologetische Tendenz, zumal wenn deren Fundament, die christliche Bildung, nur beweislos angenommen wird.

Von dieser entgegengesetzten Voraussetzung ausgehend sehen wir in der Schutzschrift des Minucius Felix, im Besonderen in der Rede des Octavius, zunächst nichts anderes, als einen Ausdruck der persönlichen Auffassung ihres heidnisch gebildeten Verfassers.

Diese Auffassung zu prüfen ist Zweck vorliegender Abhandlung. Die bisherigen Darlegungen ergänzend suchen wir grade von der philosophischen Seite in die Apologie einzudringen und haben es zunächst etwas umfassender versucht, die gesammte heidnische Bildung des Apologeten festzustellen, um sodann zu prüfen, wie dieser das Christenthum verstanden hat.

*) Vgl. S. 117: A nos yeux l'Oct. n'est qu'une Introduction à différents traités d'apologétique, dont le premier fut sans doute, en tout cas paraît avoir dû être le traité de Fato auquel il a été déjà fait allusion. Paul de Félice weiss auch, was darin stand S. 118: On peut conclure que dans ce traité Min. devait parler de la grâce, du salut par la foi et non par les oeuvres. Inhalt aber der nächsten Abhandlungen war sodann die Person Christi, seine Mission, sein Werk, die Propheten die ihn verkündigt hatten, ihre Autorität, der Bund mit Gott, die heiligen Schriften. C'est ainsi, so schliesst er die Betrachtung, que peu à peu, et par une série de traités, toutes les importantes questions auraient été étudiées, et les lacunes comblées (S. 119).

EINLEITUNG.

Der gebildete Heide.

Ueber die Person des Minucius Felix sind nur spärliche Nachrichten zu uns gelangt. Die äusseren Zeugnisse bei Lactanz und Hieronymus besagen nicht viel mehr, als dass er Verfasser des „Octavius“ und ein angesehener Rechtsanwalt (causidicus) zu Rom gewesen sei*). Auch das Wort causidicus verräth nichts für unsern Zweck, denn es hatte im Ganzen eine recht üble Bedeutung. Zur Zeit Ciceros und noch des zweiten Jahrhunderts verstand man darunter einen ganz gewöhnlichen Winkeladvokaten und Processeführer von gutem Mundwerk, angelernter juristischer Routine, aber ohne jegliche höhere Bildung. Cicero selbst stellt einmal einen causidicus in directen Gegensatz zu seinem bekannten, hochgebildeten Redner und zwar in für jenen recht bezeichnende Nachbarschaft: Non enim causidicum nescio quem neque proclamatorem aut rabulam hoc nostro sermone conquirimus, sed — so fährt er an ähnlicher Stelle kürzer fort — oratorem doctissimum et perfectissimum**). Fast ebenso äussert sich Quintilian XII, 1, 25, vergl. auch Juvenal VI, 438 ff. Wir können das Wort nicht weiter

*) Lact. instit. I, 11: Minucius Felix in eo libro, qui „Octavius“ inscribitur etc. V. 1. Min. Felix non ignobilis inter causidicos loci fuit. Huius liber, cui „Octavius“ titulus est, declarat, quam idoneus veritatis assertor esse potuisset, si se totum ad id studium contulisset. Hieron. cat. script. eccl. c. 58: Minucius Felix, Romae insignis causidicus, scripsit dialogum Christiani et Ethnici disputantium, qui Oct. inscribitur. Sed et alius sub nomine eius fertur „de fato“ vel contra Mathematicos, qui cum sit et ipse disertus hominis, non mihi cum superioris libri stylo convenire videtur. Derselbe ad Magnum: Min. Felix causidicus Romani fori in eo libro, cui Octav. titulus est, et in altero contra Mathem., si tamen inscriptio non mentitur auctorem, quid gentilium scripturarum dimisit intactum?

**) De orat. I. 46. 202. Orat. 15, 47.

verfolgen, wohl aber annehmen*), dass es zur Zeit der Antonine einen jener Juristen bezeichnete, die im Unterschied von eigentlichen Rechtsgelehrten sich der Praxis zuwandten, „mit oder ohne öffentlichen Charakter Bescheide über Rechtsfragen ertheilten oder Prozesse führten.“ Aber auch bei dieser Auffassung des Wortes fällt auf den Minucius Felix der Verdacht, eine höhere Bildung nicht besessen zu haben.

Wenden wir uns daher direct an seinen „Octavius“ und fragen wir, welches Zeugniß dieser dem causidicus auszustellen vermag.

Zunächst die Personalien. Marcus Minucius Felix hat die Jugend mit seinem Busenfreunde Octavius Januarius verlebt, vielleicht auch mit ihm zusammen studirt**), ist aber von jugendlichen Fehlritten nicht frei gewesen. Er gesteht dies selbst ein, 1, 4: sic solus in amoribus conscius, ipse socius in erroribus. Später wählten beide die Advokatenthätigkeit zu ihrem Lebensberufe und waren, wie es scheint, noch als Männer nicht bloss Heiden, sondern sogar Gegner des Christenthums, indem sie die christlichen Bekenner auf die bekannte ungerechte Weise gerichtlich verfolgen halfen (c. 28). Erst auf Vortritt des Octavius ging Minucius zum Christenthum über. Als Christen jedoch scheinen sie sich getrennt zu haben, um vielleicht nach langer Zeit erst (2, 1) in Rom sich wiederzusehen, wohin Octavius aus überseeischer Provinz (3, 4) herbeigekommen war, wo aber Minucius bereits ansässig das Amt eines Advokaten auch als Christ noch und allem Anschein nach in ziemlichem Ansehen weiter verwaltete. Hier zu Rom hat er wohl auch seinen Dialog geschrieben.

Dieser selbst, zu dem wir uns jetzt speciell wenden, macht seiner Gesamt- wie Einzelanlage nach den Eindruck strengster Ordnung, genauester Durcharbeitung und zeugt von einem unfraglich rhetorisch gebildeten Verfasser, der namentlich die Kapitel de inventione und de collocatione aus dem Grunde verstand. Schon die Idee, den heidnisch-christlichen Stoff in zwei Reden zu fassen, bekundet rednerisches Interesse. Mehr aber noch deren Ausführung. Beide Reden (c. 5—13, 16—38), Angriff und Widerlegung, Heidenthum und Christenthum, sind, gleich zwei Portraits in einem Rahmen, von einer gemeinsamen Einkleidung umschlossen (c. 1—4, 14—15, 39—40), im Innern selbst wieder streng gegliedert und

*) Teuffel „Gesch. der röm. Litt.“ 3. Aufl. 1875 S. 837.

**) Contubernalis Teuffel S. 862.

in diesen vihren Untertheilen, selbst in den einzelnen Punkten, einander entsprechend angelegt. Deutlich unterscheidet man in jeder Rede drei Untertheile. Wir bemerken einen philosophischen (c. 5 vgl. c. 16, 5—c. 19, 15), einen heidnisch-apologetischen (c. 6—7), dem christlicherseits ein polemischer (c. 20—27 einschliesslich des Uebergangstheils der Dämonologie) und endlich einen heidnisch-polemischen, dem anderseits ein christlich-apologetischer entspricht (c. 8—13, vgl. c. 28—38). Den Schluss jeder Rede bildet eine mit *proinde* eingeleitete und schulgerecht mit einer *adhortatio* endende *peroratio* (c. 12, 7—c. 13, 5, vgl. c. 38, 5—6), welche beide sich gleichfalls genau entsprechen und den Hauptinhalt der einzelnen Reden kurz herausstellen.

Je näher man an den Dialog herantritt, desto mehr kann man seine kunstvolle Composition bewundern. Nicht nur stehen sich die zwei Reden bis in die einzelnen Gedanken und Ausdrücke hinein, wie Frage und Antwort gegenüber und lassen so einen einheitlichen Disputirstoff erkennen, sondern jede einzelne Rede, selbst jeder Untertheil bildet seinerseits wieder ein abgerundetes Ganze, das gleichwohl mit dem nächsten wie vorhergehenden in engstem Zusammenhang steht. Minucius erreicht dies einerseits durch zahlreiche Recapitulationen, wodurch er die einzelnen Gedanken zu selbstständigen Gedankengruppen abschliesst, andererseits durch die gewandtesten Uebergänge*), die jene einzelnen Gedankengruppen aneinanderketten und so das gesammte Material zu einem schönen Ganzen zusammenschliessen. Namentlich ist dies

*) Schon A. Ebert erwähnt dieselben und führt als Beispiele c. 25—26 und 38, 2—4 bis zum Schlussabschnitt der Rede des Octavius an. Wir unsererseits halten für den geschicktesten Uebergang den ganzen Abschnitt der Dämonologie, als Mittelglied zwischen dem eigentlichen zweiten und dem dritten Theil. Er ist einerseits die Erklärung für den vorausgehenden heidnischen error (*fons erroris*) als auch für die nachfolgenden Vorwürfe gegen die Christen (*fons pravitatis*). Einen musterhaften Aufbau bietet der erste Untertheil dieser Rede. Streng nach den angekündigten Vorbedingungen, namentlich der deductiven Methode (17, 2), wird in dem angewandten Theil 17, 4—18, 3 vom All angefangen und beim Menschen aufgehört. Dieses alles wird in dem Vergleich vom wohlgeordneten Haus recapitulirt und dann mit nochmals rückblickendem Uebergang zu der Frage nach der Einheit Gottes fortgeschritten, die mit vierfacher Beweise belegt wird, aus der Geschichte (5), aus der Natur (7), dem Gottesbegriff selbst (7) und dem *consensus omnium* (11), deren letzter sich wieder in drei Theile zerlegt (Volk, Dichter, Philosophen 18, 11. 19, 1. 19, 3). Die Einheit Gottes erhält 20, 1 ihre Recapitulation, gerade wie der ganze erste Untertheil 20, 2: *quod si providentia mundus regitur et unius Dei nutu gubernatur etc.*

in der Rede des Octavius bemerkbar, welcher der Verfasser als der Widerlegung naturgemäss die grössere Sorgfalt widmete. Wir verweisen hier für alle Einzelorientirung auf die Analysen bei Lindner, Ebert und Paul de Félice*).

Wir sind nun grade bei Minucius Felix in der glücklichen Lage, auf den Lehrer schliessen zu können, bei welchem er in die Schule gegangen. Es ist kein Anderer als der Altmeister Cicero. Die äussere Anlage des Octavius, sowie auch manches Material, verdankt er diesem, in Sonderheit dessen Büchern *de natura Deorum*. Die daselbst Disputirenden, der Epikureer Vellejus, der Akademiker Cotta und der Stoiker Balbus, vornehmlich letztere zwei**), sind in unseren Disputanten Cäcilius Natalis und Octavius Januarius unschwer wieder zu erkennen. Die Zuhörerrolle des Cicero hat Minucius übernommen, als Zeit sind gleichfalls die Gerichtsferien, zum Ort ist aber nicht das Haus des Gastgebers, sondern die Meeresküste bei Ostia gewählt. Den Gegenstand des Gespräches bildet mit Abzug des christlichen Materials ebenfalls das Wesen der Götter. Welche weiteren Aehnlichkeiten sich nachweisen lassen, zeigt obige auf Eberts Anregung erschienene Dissertation von E. Behr „der „Octavius“ des Minucius Felix in seinem Verhältniss zu Ciceros Büchern *de natura Deorum*.“ Gera, 1870. Aber auch sonst enthält der Dialog manche Berührungen mit ciceronianischen Schriften oder ciceronianischer Eigenthümlichkeit.

Ersteres beweist grade der Eingang. Absehend von einigen kleineren Reminiscenzen in den ersten Zeilen***) stossen wir auf eine frappante Aehnlichkeit mit dem Eingang von Ciceros *Brutus*. Hier wie dort dasselbe Stimmungsbild. Jeder der zwei Verfasser gedenkt voll Wehmuth eines dahingegangenen Freundes, jeder schildert die gegenseitigen engen Beziehungen und endlich seinen tiefen Schmerz um den Verstorbenen. Auch in den Ausdrücken ähneln sich die Eingänge. Bei Cicero ist es der *socius et*

*) J. G. Lindner „analysis logica“ abgedruckt in Mignes *Patrol. lat.* tom. III. 3 S. 226. Ad. Ebert in obiger Schrift abgedruckt in den *Abhandlungen der königl. sächs. Gesellschaft der Wissensch.* XII. Bd. V. 1870 S. 332—340. — Paul de F. S. 41—78.

**) Der Epikureer kommt dogmatisch wenig in Frage.

***) Das bekannte *cogitanti mihi* und die beliebten Metaphern *(trans) acta et decursa*, vielleicht auch das an *ad Att.* 5, 10 erinnernde *intimis sensibus*. Vgl. die Anmerkungen in der Ausgabe v. J. Gronovius, Leyden 1709.

consors gloriosi laboris, der conjunctissimus meorum consiliorum omnium societate, welcher triste nobis desiderium reliquerat (1, 2). Im Octavius ist es der conscius in amoribus, ipse socius in erroribus, welcher pari mecum voluntate concinebat eadem velle vel nolle und immensum sui desiderium nobis reliquit. Somit gleich in der Einleitung Spuren von Cicero*). In der Disputation selbst ist es noch dessen Dialog de divinatione, welcher von Minucius unstreitig benutzt worden ist (2, 24, 52. 2, 56, 116 und 57, 118, vergl. Octavius c. 26, 4—6).

An Cicero ferner erinnert in der Einkleidung**) jene feine Urbanität des Gesprächs, welche den einzelnen Personen des Dialogs, vor allem unserem Verfasser eignet***). Es ist jener „gute Ton“ gegenseitiger Artigkeit und Verbindlichkeit, in dem die Gebildeten, namentlich der römischen Hauptstadt, mit oder von einander zu reden pflegten und den sie selbst im engsten Freundeskreise beibehielten. Er ist ein Characteristicum ciceronianischer Schriften, besonders seiner Dialoge und Briefe. Beweis sind Liebenswürdigkeiten wie diese: homo tibi subiratus, mihi propter eam ipsam causam minus quam volebam familiaris†), wo auch nach der andern Seite ein Compliment gemacht wird, oder aber wie fast ebenso ad Attic. V, 9: Dionysium semper equidem, ut scis, dilexi: sed cotidie pluris facio et mehercule in primis, quod

*) Auch die folgenden Ausdrücke der Einleitung scheinen Reminiscenzen zu sein, wenn auch nicht gerade ciceronianische: eadem velle vel nolle, das stark an das geflügelte Wort Sallusts erinnert: idem velle atque idem nolle, ea demum firma amicitia est (Cat. 20, 4), sowie auch der viel gebrauchte Gedanke: unam mentem in duobus divisam, welcher vielleicht auf Lilius 25, 92: amicitiae vis in eo (est) ut unus quasi animus fiat ex pluribus oder aber auf das schöne horazianische Wort anspielt Od. II, 17: A, te meae si partem animae rapit maturior vis, quid moror altera? — Es ist entschieden auffällig, dass der Verfasser bei diesen seinen Herzensergiessungen fremder Ausdrücke sich bedient. Der Eindruck entsteht, als sei dieser Tod und diese Freundschaft weniger Wiedergabe einer Thatsache als vielmehr Produkt künstlerischer Fiction.

**) Im Dialog selbst geht's manchmal scharf her, vgl. c. 25 u. 28. Hier weicht der Dialog der Apologie.

***) Am allerwenigsten Octavius.

†) Cic. de orat. I, 16, 72. — Uebrigens gehörte diese urbanitas zu den Erfordernissen des ciceronianischen Redners, vgl. de orat. I, 5, 17: accedat codem oportet lepos quidam facetiaeque et eruditio libero digna subtili venustate atque urbanitate conjuncta, welche letztere mit der von Octavius in malam partem gebrauchten urbanitas 16, 2. 28, 10 selbstverständlich nicht identisch ist.

te amat etc., was noch von dem bekannten zärtlichen Wortspiel übertroffen wird ad Attic. V, 20: Brutum non minus amo quam tu, paene dixi, quam te. Aehnlich auch hier. So in der zart gestellten Frage des Minucius an Cäcilius nach dem Grunde seiner plötzlichen Verstimmung 4, 1: Quid hoc est rei? cur non agnosco, Caecili, alacritatem tuam illam? et illam oculorum etiam in seriis hilaritatem requiro? Oder, wenn gegen Ende der überwundene Cäcilius so überraschend fein sich den Sieg zuschreibt, ohne ihn doch dem Octavius zu entreissen: Ego Octavio meo plurimum quantum, sed et mihi gratulor... vicimus et ita.. nam ut ille mei victor est, ita ego triumphator erroris, was sofort Minucius ebenso fein und zartfühlend zugleich zu wenden weiss: at ego prolixius omnium nostrum vice gaudeo, quod etiam mihi Octavius vicerit, cum maxima judicandi mihi invidia detracta sit. Besonders charakteristisch für die urbane Höflichkeit ist folgender Satz, worin der Verfasser sogar auf seine Leser Rücksicht nimmt 4, 6: et cum dicto eius adsedimus, ita ut me ex tribus medium lateris ambitione protegerent: nec hoc obsequi fuit aut ordinis aut honoris, quippe cum amicitia pares semper aut accipiat aut faciat, sed ut arbiter et utrisque proximus aures darem et disceptantes duos medius segregarem. Jeder, der dies liest, freut sich der passenden Gruppierung: die zwei Gegner zu beiden Seiten des Unparteiischen. Niemand denkt an Absicht. Indessen, der feinfühligste Minucius, der seine Person durch jenen Mittel- und Ehrenplatz allzusehr in's Centrum der Aufmerksamkeit gerückt sieht, hält es für nöthig, sich gegen die etwaige Unterlegung einer selbstgefälligen Absicht vor seinen Lesern zu verwahren. Er fügt darum obigen Zusatz hinzu, der freilich etwas umständlich ausfällt, (nec aut-aut, quippe cum aut-aut, sed et-et), uns aber zeigt, wie sehr der Verfasser hier in der Einleitung beim Schreiben sein Leserpublicum im Auge hatte und auch diesem direct gegenüber seine Urbanität entfaltete*).

So sehen wir schon jetzt, auch in der Darstellung hat der Verfasser sich Cicero zum Vorbild genommen. Dies ist um so auffälliger, als zu Minucius' Zeit die Rednerschule Frontos die

*) Dieser Hang zur Höflichkeit und der damit verbundenen Lobrednerei verführt ihn öfter zur Breite und Schwülstigkeit. Man beachte wieder den Eingang und darin die Häufung lobender Beiwörter und Redensarten: Octavii boni et fidelissimi tanta dulcedo et affectio inhaesit — intimis sensibus — vir eximius et sanctus — immensum desiderium (bei Cic. nur triste) etc. Ferner in c. 2, 1

stilbeherrschende war, die für alterthümliche Litteratur und Sprachfärbung eingenommen, durch alle Arten von Archaismen die Rede zu würzen suchte*). Von dieser Sucht ist Minucius

die bis in's Kleinliche gehende Hervorhebung des Opfers, das ihm Oct. mit der Herreise gebracht hatte: *nam negotii et visendi mei gratia Romam contenderat, relictā domo, conjuge, liberis, et quod est in liberis amabilius, adhuc annis innocentibus et adhuc dimidiata verba temptantibus, loquellam ipso offensantis linguae fragmine dulciorem.* Schliesslich aber 2, 2 die schwülstige Schilderung der Freude über dessen Ankunft: *non possum exprimere sermonibus, quanto quamque impatienti gaudio exultaverim, cum augetur maxime laetitiam meam amicissimi hominis inopinata praesentia.* — Diese Ueberschwänglichkeit gleich in den ersten Capiteln des Dialoges hat etwas Gewaltiges an sich und fällt um so mehr auf, als sie der Sprache des eigentlichen Dialoges ganz fremd ist, der bei allem Reichthum der Diction sich durch Knappheit auszeichnet. Aber auch die referirten Facta, der dem Verfasser so zu Herzen gehende Todesfall und die innige Freundschaft des Octavius, verlieren an Naturwahrheit und Glaubwürdigkeit durch jene Entlehnung aus Cicero wie durch die sonstigen Anklänge an fremde Gedanken und Ausdrucksweise. Hierdurch wird uns der Verdacht nahe gelegt, dass dem Verfasser die Absicht beseelte, weniger zu referiren als zu interessiren. Dazu verhalfen allerdings jener sensationelle Todesfall, jene ideale Freundschaft, dazu auch die allerliebste Strandscene c. 3, deren ganzes Vorhandensein und deren unverhältnissmässige Länge (über ein Viertel der Einleitung) sich lediglich aus der Absicht, Interesse zu erregen, erklärt, sowie endlich auch kleinere Effectmittel wie in *amoribus conscius* und die Erwähnung jener kindlichen Sprachversuche c. 2. — Die dadurch wachgerufene Muthmassung, dass die Einleitung, vor allem die Person des Octavius fingirt sei, ward uns zur grössten Wahrscheinlichkeit durch folgende Beobachtungen. Es kann bei näherer Betrachtung niemandem entgehen, dass die zwei Disputanten ganz ungleich gezeichnet sind. Am gelungensten durchgeführt erscheint die Person des Cäcilii. Sie ist eine durch und durch einheitliche, lebenswahre Figur. Cäcilii ist ein heiterer, lebhafter, etwas excentrischer junger Mann, für den das von Minucius wie von Octavius gebrauchte *erupit* (16, 5. 40, 1) charakteristisch ist. Sein Schmollen 4, 1: *tacens, anxius, segregatus*, seine plötzliche Herausforderung 4, 4: *de toto et integro mihi cum Octavio res est* und die Freude (*renidens* 14, 1) am Schlusse seiner eigenen Rede mit dem triumphirenden Schlussworte: *ecquid ad haec audet Octavius etc.*, alles dieses sind charakteristische Pinselstriche, die uns ein lebhaftes Bild von dem Manne ermöglichen und ohne Frage eine factisch existirende Persönlichkeit copiren.

Man vergleiche dagegen den Octavius. Was sagt er eigentlich ausserhalb seiner Rede? — Einen einzigen Satz, der überdies mit dem persönlich gehaltenen Eingang seiner Rede in schroffstem Widerspruch steht. Dieser eine Satz ist eigentlich ziemlich grob: *Non boni viri est, hominem domi forisque lateri tuo inhaerentem sic in hac imperitiae vulgaris caecitate*

*) Vgl. Teuffel S. 829. 856. A. Naber *Epistulae Corn. Frontonis et M. Aurelii*. Lipsiae 1867, p. III.

frei. Er steht so über seiner Zeit. Freilich in einer andern Beziehung vermochte er sich nicht so ganz ihren Fesseln zu entziehen. Die damals immer mehr in die Litteratur eindringende Volkssprache hat sich auch in seinen Octavius eingeschlichen und wehrt ihm so den Anspruch auf reinste Classicität. Man hat dies erst neuerdings beobachtet**). Namentlich sind es die abgeschwächten Gradationsformen, die hier in Betracht kommen. Ein Positiv neben dem Superlativ: *boni et fidelissimi* 1, 1 oder statt letzterem ein Comparativ: *et quod est in liberis amabilius* oder aber ein Superlativ für einen Positiv: *utrum unius imperio an arbitrio plurimorum* 18, 5 zeigen, wie sehr auch ihm wie der Volkssprache das Gefühl für Gradunterschiede verloren gegangen war. Dennoch ist aus der sonstigen reinen Latinität die Absicht unverkennbar, durch Zurückgehen auf die classischen Vorbilder, namentlich auf Cicero, sich der herrschenden Zeitrichtung zu entziehen, an sich schon ein Beweis von litterarischer Selbstständigkeit wie von gutem, stilistischen Geschmack.

Gehen wir auf seine Darstellung etwas näher ein. Jede der beiden Reden hat bei aller Unverkennbarkeit des gemeinschaft-

deserere, ut tam luculento die in lapides eum patiaris inpingere, effigiatos sane... cum scias huius erroris non minorem ad te quam ad ipsum redundare infamiam. Am Eingange aber seiner Rede zeigt er sich so überaus liebenswürdig und rücksichtsvoll gegen den nämlichen Cäcilius, dass Faber daraus sogar auf christliche Sanftmuth schliesst (Comm. S. 11) vgl. Oct. 16, 2: *sed in Natali meo versutiam nolo, non credo: procul est ab eius simplicitate subtilis urbanitas.* Sonst nirgends ein bezeichnender Ausdruck weder von ihm noch über ihn. Auch die oben angeführten Epitheta und Redensarten sind sämtlich so subjectiv, so farblos (vgl. *boni, fidelissimi, eximius, etc.*), dass sie nirgends ein Bild von ihm in der Phantasie des Lesers aufkommen lassen.

Aus diesem Widerspruche in der Zeichnung der Person des Octavius wie ferner aus dem gänzlichen Fehlen charakteristischer Züge darin schliessen wir, unterstützt durch obige Verdachtsgründe, dass dem Verfasser bei Zeichnung dieser Person die lebendige Vorlage gänzlich gefehlt habe. Der Octavius ist vielmehr der Verfasser selbst, der bei der einmal gefassten Idee, den gesamten Stoff in die Form einer Disputation zu bringen, sich begreiflicherweise nicht selbst zum Helden derselben machen konnte — wir kennen ja seine persönliche Zurückhaltung dem Publikum gegenüber —, sondern die Person des O. fingirte und sich obiger Kunstmittel bediente, um seine Leser für denselben und somit für die Apologie selbst gleich von vorn herein zu interessiren. — Wie viel an der ganzen Disputation Faktum ist, ob sie überhaupt stattgefunden hat, ob sie zwischen Cäcilius und Minucius stattfand, wer wollte dies bestimmen?

*) Vgl. J. N. Ott Jahrb. für class. Philol. 111. S. 788—799.

lichen Verfassers ihren eignen Character. Erstere, als die Angriffsrede, ist gekennzeichnet durch rednerisches Pathos. Gleich am Anfang c. 5 zeigt sich dieses in der Fülle der Ausdrücke, der raschen Folge rhetorischer Fragen und der Häufung asyndetischer und anaphorischer Sätze*). Die im nächsten Theil, in der Vertheidigung väterlicher Religion zu verspürende Wärme steigt im dritten Theil zu glühender Leidenschaft gegen die Christen, namentlich im achten Capitel. Hier jagen sich Ausdrücke, alle asyndetisch aneinander gestellt, folgen sich von Ausrufen untermischt Antithese, Oxymoron und selbst Paradoxon: *latebrosa et lucifuga natio, in publicum muta, in angelis garrula: templa ut busta despiciunt, deos despuunt, rident sacra, miserentur miseri ipsi, honores et purpuras despiciunt, ipsi seminudi. Pro mira stultitia et incredibilis audacia! Spernunt tormenta praesentia, dum incerta metuunt et futura, et dum mori post mortem timent, interim mori non timent!* — Für den bestimmten rhetorischen Character der Rede spricht übrigens das Urtheil des Minucius selbst. Er gründet darauf das ganze Zwischengespräch c. 14—15, worin sowohl der verurtheilte *eloquentiae tumor* 15, 2 als auch Grundsätze wie 14, 2: *cum non laudi sed veritati disceptatio vestra nitatur* nicht nur ein Urtheil über die oratorische Leistung des Caecilius, sondern auch des Minucius' Abneigung gegen eine glänzende, aber wahrheitswidrige Rhetorik überhaupt enthalten. Darauf hin fällt die andere Rede weniger rhetorisch aus, wenigstens ist deren erster Theil, die philosophische Entwicklung, ganz in dem ruhigen Tone einer solchen gehalten. Doch schon im nächsten Hauptabschnitt, der Bekämpfung des Heidenthums, wird es lebendig. Sarkasmen und Ironien platzen gegen dasselbe los (c. 21 und 25), und gehen im dritten Abschnitt, bei der Zurückgabe der Vorwürfe an die Heiden, sogar in schneidigen Hohn über (c. 28). Im Uebrigen zeigt sich an gewissen Stellen, wie bei der Erörterung des Gottesbegriffes (c. 18 und 32), eine edle Wärme, die bei der Lehre von der Auferstehung und am Schluss (c. 34 und 38) sogar zur Sprache der Poesie sich steigert.

Die eigentliche Diction der Reden zeigt Gedrängtheit und Fülle zugleich. Minucius erreicht beides durch das Asyndeton und die Anaphora, besonders durch das sogenannte asyndeton tri-

*) Ein frappantes Beispiel anaphorischer Gedrängtheit ist der Satz 6, 2 mit dem doppelten *sic* und dem sechsfachen *dum*. Nur durch die Anaphora wird die Länge des Satzes entschuldigt.

membre, die hervorstechendste minucianische Spracheigenthümlichkeit. Minucius liebt es nämlich, mehrere Ausdrücke, gewöhnlich drei, in ein Bündel zusammen zu fassen, einen Gedanken gleichsam in drei Strahlen aufblitzen zu lassen. So gleich c. 16: errantem, vagam, lubricam — inlitteratos, pauperes, imperitos — sine dilectu aetatis, sexus, dignitatis etc. und so fast in jedem Capitel. Besonders evident ist folgende Stelle, zugleich ein Beispiel für die Figur der Symploke 23, 13: ecce funditur, fabricatur, sculpitur: nondum deus est: ecce plumbatur, construitur, erigitur: nec adhuc deus est: ecce ornatur, consecratur, oratur: tunc postremo deus est etc. So wird die Sprache lebendig und anschaulich, ohne doch breit zu werden. Als sonstiger Schmuck der Rede findet sich, namentlich in der Rede des Octavius, die Vergleichung 16, 3, 17, 11, in besonderer Schönheit die Metapher 16, 1, 34, 12, 38, 4 und kleinerer rhetorischer Zierrath, sogenannte commutationes 23, 1—2: nec desinunt vel perdere quod inveniunt vel invenire quod perdunt und gleich darauf nonne ridiculum vel lugere quod colas vel colere quod lugeas, sowie endlich ganz vereinzelt die Paronomasie: impietas expiatur 38, 6. Zu dieser Darstellung in den zwei Reden kommt nun in der Einkleidung noch eine meisterhafte Schilderung der Natur (vergl. die reizende Strandscene c. 3), vornehmlich aber jene urbane Anmuth, welche der ganzen Einkleidung eigenthümlich ist und schliesslich dem Dialog einen überaus lebenswürdigen Abschluss giebt 40, 4: Post haec laetihilaresque discessimus, Caecilius quod crediderit, Octavius gaudere quod vicerit, ego et quod hic crediderit et hic vicerit. Kann man treffender und anmuthiger zugleich recapituliren!

Aus alledem erkennen wir, wie gewandt unser Verfasser die Sprache zu handhaben verstand, wie genau er von den rhetorischen Darstellungsmitteln, auch dem Capitel von der elocutio unterrichtet war. Was wir besonders hoch schätzen müssen, das ist die weise und geschmackvolle Verwendung des gesamten Redeschmuckes, der überall durchscheinende Grundsatz, frei zu sein von aller Ueberladung, von aller rednerischen Ostentation*). Das ist's wohl, was er von Cicero gelernt hatte, was ihn diesem nahe

*) Er spricht diesen Grundsatz selbst aus. Vgl. ausser obigem Worte des Minucius: non laudi, sed veritati disceptatio nitatur, noch 16, 6 den gleichen Grundsatz des Octavius: atque etiam quo imperitior est sermo, hoc inlustrior ratio est, quoniam non fucatur pompa facundiae et gratiae, sed, ut est, recti regula sustinetur. Ein weiterer Beleg für die Identität des Minucius mit der Person des Octavius.

bringt und was ihn weit über seine Zeitgenossen, einen Fronto, Apulejus oder gar Gellius erhebt*). Fügen wir hierzu das Urtheil von J. F. Gronovius, dem alten leydener Professor der Beredsamkeit, der unsern Verfasser, wenn nicht mit dem wirklichen, so doch mit dem christlichen Cicero Lactanz vergleicht**):

„Minucius Felix dialogum contra paganos scripsit lactea sermonis ubertate Lactantio nihil cedentem; mirabili ubique perspicuitate etiam in acute dictis, nihil argutiarum obscuritate molestarum, nihil intempestiva eruditionis ostentatione insolens aut arcessitum, nihil verborum novitate, aut transferendi improbitate aut compositionis scabitudine durum, horrens, abruptum. Omnia certe eius, in quibus quomodo legendum sit, non ambigitur, has habent virtutes. Argumentum ingens, illa quoque, quae labem contraxerunt, ita esse curanda, ut non in Minucio Minucium quaeras, Tertullianum aut quemvis durissimum Afrorum invenias.“

Keineswegs aber bleibt seine Kenntniss auf das Gebiet ciceronianischer Schriften beschränkt. Zahlreiche Namen und Anklänge auch aus anderen litterarischen Gebieten sind zu verzeichnen. Aus dem Bereiche der Beredsamkeit kommt, ausser Cicero und Demosthenes, welcher letztere nur flüchtig erwähnt wird (26, 6), zunächst Fronto aus Cirta in Betracht. Das erste Mal (9, 6) wird seine oratio, dann (31, 1) der orator selbst genannt. Das Urtheil (31, 1): convicium ut orator adpersit enthält zugleich eine abfällige Kritik gegen die Redner überhaupt. Wahrscheinlich ist ferner die Bekanntschaft des Verfassers mit Apulejus, speciell mit dessen Metamorphosen***). Mit ihm theilt er auch manche formelle Eigenthümlichkeit. Von anderen Zeitgenossen nennen wir hier den Celsus, dessen λόγος ἀληθής Minucius nach Keims

*) Was Fronto an Cicero auszusetzen hat, ist gerade das, worin er seine Stärke sucht, aber seine Schwäche zeigt: in omnibus eius in orationibus paucissima admodum reperias insperata atque inopinata verba, quae nonnisi cum studio atque vigilia atque multa veterum carminum memoria indagantur. Vgl. Teuffel S. 829, 856 u. 863.

**) Abgedruckt in der Ausgabe des Oct. von Jac. Gronovius, Leyden 1709.

***) Vgl. Met. 4, 14. Oct. 31, 6. Die andere Aehnlichkeit 8, 27, Oct. 27, 3 ist wohl weniger auf Entlehnung als auf gemeinsame Erfahrung zurückzuführen. Dahin weist wenigstens die anschauliche Schilderung mit ihren präsentischen Ausdrücken. Das Gleiche gilt von der ähnlichen Stelle Lucan 5, 169 f, bes. v. 172. — Ueber die formellen Eigenthümlichkeiten vgl. Ott und Dombart (Anhang) wie auch Teuffel S. 863.

Ansicht gekannt und dessen Vorwürfe gegen das Christenthum er zum Theil dem Cäcilius in den Mund gelegt haben soll*). Endlich aber führen wir den Athenagoras mit an, dessen Verhältniss zu Minucius Felix im Interesse der Priorität des griechischen Apologeten neuerdings Lösche in d. Jahrb. für prot. Theol. 1882, 1. S. 168—178, näher beleuchtet hat**).

Häufigere Verwendung als die Redner finden die Dichter***). Aus ihrer Mitte hebt sich deutlich der „Mantuanus Maro“ hervor,

*) Theod. Keim: Celsus' „wahres Wort.“ Zürich 1873. S. 156. Darüber Näheres weiter unten.

**) Die Annahme von Entlehnung ist zwar formell wie materiell diesem Apologeten mehr als andern gegenüber berechtigt, grenzt auch in Einzelheiten wie c. 10 vgl. Oct. 18, 7. c. 12 vgl. 38, 4. c. 21 vgl. 23, 3 und öfter in der Charakteristik der Dämonen an Wahrscheinlichkeit, doch ist sie unseres Erachtens aus dem Vorliegenden nicht mit Sicherheit zu constatiren. Manches Gemeinsame erklärt sich aus der gemeinsamen Erfahrung, wie die ungerechte Verurtheilung der Christen Ath. 1. 2. 35. Oct. 28, sowie die Lächerlichkeit der so mannigfachen Götterculte Ath. 14. Oct. 6. Ath. 15. Oct. 23. Ath. 21. 30. Oct. 21. 23. Ath. 23. 30. Oct. 21. Ath. 20. Oct. 20. Es flossen ja deren so viele und verschiedene in der Hauptstadt zusammen (Oct. 6) und schon längst hatte sich innerhalb des Heidenthums selber über sie ein derartiges Urtheil gebildet. Vgl. den ciceronianischen Cotta de n. D. III. selbst den Epikureer Vellejus I. 16, 42—43 und den Stoiker Balbus II. 27, 70. Einiges kann auch zu andern Apologeten in Beziehung gebracht werden. So die Entwicklung über das Dasein Gottes Oct. 17—18, vgl. Theoph. ad. Aut. I. 2—6 oder die Gründe für die Opferunterlassung Oct. 32, vgl. Just. I. 9 u. 13. Manches geht auch bei der Belesenheit des Apologeten auf antike Quellen zurück, wie die Beispiele aus Homer, den Minucius sicher kannte, Ath. 21. Oct. 23, 3 u. 5, wohl auch die Klage der Isis und das Schlagen der Brüste Ath. 14. Oct. 22, vgl. Juvenal 6, 533 mit dem bezeichnenden grege calvo plangentis populi etc. Ohne Frage aber weisen folgende Aehnlichkeiten nicht auf apologetische, sondern auf classische Quellen hin. So auf Seneca: Ath. 31. Oct. 36, 8, vgl. de prov. 4, 6. 3, 4 f. u. Ath. 12. Oct. 36, 9, vgl. de prov. 2, 6 f. Auf Cicero aber: Diagoras als Beispiel eines Atheisten Ath. 4. Oct. 8, vgl. de nat. Deor. I, 23. 63 (ἄθεος); der ganze Euhemerismus Ath. 17. 18. 28. 29. 30. Oct. 19. 20. 21. 29, vgl. de n. D. I. 42, 118 f. I. 15, 38. II. 23, 60; die physiologische Behandlung der Mythologie Ath. 22. Oct. 19, vgl. de n. D. I. 14—15; die Providenz Ath. 4. 7. 10 etc. Oct. 17. 18, vgl. de n. D. II. (Vgl. das Einzelne bei Behr S. 15 f.); schliesslich aber ist der von Loesche so ausdrücklich hervorgehobene (S. 169) Vergleich vom wohlgeordneten Hause Oct. 18, 4 nicht auf Ath. 16, 1 zurückzuführen, sondern unfraglich auf de n. D. II, 5, 15, vgl. 6, 16 (dessen charakterisches melius der Apologet nicht unberücksichtigt gelassen hat).

***) Bei dieser wie auch den folgenden Zusammenstellungen haben wir die Angaben der Dombart'schen Ausgabe benutzt.

der nicht nur am auffälligsten verwendet*), sondern auch als der einzige von ihnen ausdrücklich citirt wird: Aen. 6, 724 ff., 1, 743. Georg. 4, 221; vgl. Oct. 19, 1. Genannt wie benutzt wird ferner Homer**), den Minucius genau gekannt zu haben scheint (23, 2 f.), sodann Ennius genannt, ohne citirt (26, 6), sowie Terenz citirt, ohne genannt zu werden (21, vgl. Eunuch 4, 5, 6). Letzteres geschieht nach Cicero de div. 56, 116 vgl. de nat. D. 2, 23, 60. Sonst begegnen wir zahlreichen Anklängen an Ovids Fasten und Metamorphosen, an Juvenal, namentlich dessen 6. und 15. Satire***), sowie mehr oder weniger augenscheinlichen Berührungen mit Lucrez, Horaz, Tibull, Lucan und Martial†). Auch mag Minucius an gewissen Stellen den Hesiod und den Euripides im Sinne gehabt haben††). Ausserdem kommen neben Hesiod die Namen des Orpheus (19, 11) und Plautus vor (14, 1), die aber für unseren Zweck nichts verrathen. Dass ferner der Verfasser mit noch weiterem poetischen Material dienen konnte, beweist von mehreren praeteritiones wenigstens die eine 7, 5, *omitto vetera, quae multa sunt et de deorum natalibus, donis, muneribus neglego carmina poetarum*, die man ihrer Ausführlichkeit wegen nicht für eine blosse Redensart zu halten hat. Für seine Kenntniss in Sonderheit dramatischer Litteratur sprechen endlich noch allgemeine Ausdrücke wie: memo-

*) Wörtliche Anklänge: Aen. 3, 137. Oct. 5, 10. 6, 797. Oct. 6, 2. 7, 717. Oct. 7, 4. 7, 606. Oct. 7, 4. 8, 187. Oct. 9, 2. 8, 321 u. 357. Oct. 21, 6. 8, 424 f. Oct. 23, 6. 8, 635. Oct. 25, 3. 9, 105. Oct. 35, 2.

**) In c. 23 allein folgende Anklänge: Il. 20, 67 f. 5, 386. 385 f. 855 f. 1, 396 f. 16, 459. 14, 315 f. 21, 443 f. Aber auch die Odyssee hat ihm vorgelegen: 18, 136. Oct. 19, 1. 11, 303 f. Oct. 22, 7. 8, 266 f. Oct. 23, 3.

***) Ovid: Met. 1, 84. Oct. 17, 2. 10, 155 f. Oct. 23, 7 u. ö. Fast. 5, 13 f. Oct. 5, 2. 6, 769 f. Oct. 22, 7 u. ö.

Juv. 2, 17 (Oct. 4, 1). 6, 533 f. 8, 29 (22, 1). 6, 512 (24, 4). 6, 489 (25, 11). 9, 24 (25, 11). 15, 1 (25, 9). 15, 9 (28, 9). 15, 116 (30, 4). 10, 104 (37, 7).

†) Lucr. de rer. nat. 1, 248 f. 2, 1100 f. 6, 417 f. vgl. Oct. 5. Dann 5, 407. vgl. Oct. 34, 3.

Horaz Od. I. 3, 38. Oct. 5, 6.

Tibull 1, 3, 89. 2, 5, 11. Oct. 21, 7. 27, 1.

Lucan 1, 111. Oct. 18, 6 allerdings concurrirend mit Florus 4, 2 f.

Mart. 2, 61. Oct. 28, 11. Evident.

††) Hesiod op. 122 f. (Oct. 26, 8). Eurip. Alc. 8 (Oct. 23, 5). Mit alibi nämlich wird von Homer auf einen andern Dichter gewiesen. Das Angeführte aber findet sich nur bei diesem.

moriae et tragoediae vestrae 31, 3, als auch die eingehende Schilderung des lasciven und gottlosen Treibens auf der Bühne 37, 12.

Die Fülle von geschichtlichen Beispielen und Anspielungen zeugt aber weiterhin von seiner Kenntniss der Historiker. Minucius nennt von ihnen den Nepos, Cassius (Hemina), Thallus und Diodorus (Siculus), als Vertreter der „omnes scriptores vetustatis Graeci Romanique“ (21, 4). Dazu kommen die Namen des Flavius Josephus (jedenfalls ein Glossem, vgl. Halm S. 47), und Antonius Julianus, deren Lectüre Octavius dem Cäcilius statt der jüdischen Schriften*) anempfiehlt (33, 4). Offenbare Verwendung findet, ohne genannt zu sein, Livius, namentlich im 6. und 7. Capitel des Octavius, wo mit der Weisung *specta de libris memorias* sicher zunächst auf dessen *historiarum libri* hingedeutet wird. Neben Livius aber findet sich Herodot benutzt, auf dessen Urheberschaft wohl die empfangene Notiz von dem unreinen Gefässe (dem *ποδανιπήρ* des Amasis) wie auch die erwähnte Todesstrafe für die Vernichtung heiliger Thiere in Egypten zurückzuführen ist**). Fernerhin kommt Florus in Betracht, vielleicht auch Valerius Maximus und Sueton. Endlich ist noch, wenn auch entfernter, an Plinius, Sallust und Cäsar zu denken***). Nicht zu ermitteln ist die Quelle über Hostanes (c. 26, 11) und von dem Briefe Alexanders (21, 3), der nach dem Epitheton *insignis* ziemlich bekannt gewesen sein muss und auch von Athenagoras, dem ein-

*) Mit alttestamentlichen Schriften — natürlich in der Version — scheint er bekannt gewesen zu sein, wie auch einige Anspielungen an alttestamentliche Stellen im Laufe der Rede wahrscheinlich machen. Welche Aehnlichkeiten mit der heiligen Schrift überhaupt bemerkt worden sind, zeigen von den Neueren vornehmlich Dombart o. und Dräseke Brief an Diognet, Jahrb. für prot. Theol. 1881. No. 3. S. 450—459.

**) Für Ersteres vgl. das *ut accepimus* 23, 12. Für Letzteres aber (28, 8) vgl. Herod. II, 172 ff. II, 65 ff.

***) Florus I, 13. Oct. 6, 3, wohl eher denkbar als Liv. 5, 46, ferner 4, 2. Oct. 18, 6, allerdings, wie bemerkt, mit Lucan I, 111 concurrierend.

Val. Max. I, 8, 1. Oct. 7, 3. I, 6, 7. Oct. 26, 3.

Sueton Vesp. 23. Oct. 21, 10.

Plinius h. n. 2, 7, 16. Oct. 28, 9. 30, 1, 8. Oct. 26, 11. 35, 12, 165. Oct. 24, 4. Doch ist Entlehnung nicht wahrscheinlich. Erstere und letztere Stelle müssen vor dem sicher benutzten Juvenal (6, 512. 15, 9) zurücktreten; die mittlere, die noch am meisten für Entlehnung sprechen könnte, aber gleichfalls, da Minucius über Hostanes zu viel selbstständige Kenntniss aufweist.

Sallust. Cat. 22. Oct. 30, 5.

Caesar B. G. 6, 16. Oct. 30, 4.

zigen unter den gleichzeitigen Apologeten, der ihn erwähnt, als solcher angesehen wird (Suppl. c. 28, vgl. dazu August. de civ. Dei 8, 5).

Leichter wird es uns, die Quelle anzugeben bei den nun folgenden Philosophen. Wir haben sie grossentheils bei Cicero, speziell in dessen de nat. Deor. zu suchen. Minucius hat sich's unfraglich hier bequem gemacht. Doch würde man irren, wollte man ihm deshalb alles eigne philosophische Verständniss absprechen. Wie sehr er selbst noch in philosophischen Vorstellungen lebt und webt, das wird der nächste Theil der Abhandlung genügend erkennen lassen. Aber auch in dem, was er hier an philosophischem Material bringt, verräth er eingehendere Kenntniss und Selbstständigkeit des Urtheils.

Lassen wir den stattlichen Philosophenreigen an uns vorüberziehen. Er theilt sich in sechs Gruppen, deren mittelste nicht weniger als 21 Philosophen zählt. Nach Vorantritt des Sokrates (c. 5), der zwar nicht namhaft, doch durch das *vetus sapientis oraculum* kenntlich gemacht wird; folgen c. 8 die drei Gottesleugner Theodor von Cyrene, Diagoras von Melos und Protagoras aus Abdera, allerdings nicht, um Cäcilius, dem Skeptiker, gegen die Gewissheit der heidnischen Religion als Zeugen zu dienen, sondern von Cäcilius, dem Vertreter altheidnischer Tradition getadelt zu werden*). In der zweiten Gruppe (c. 13) befinden sich ausser dem diesmal genannten Sokrates noch Arcesilaus, Carneades nebst den plurimis Academicorum, wie auch der Lyriker Simonides, den wir nach Ciceros Vorgang den Philosophen zuzählen können**). Alle die Genannten — ausgenommen Sokrates — sind mit ihren Ansichten zum Theil wörtlich aus Cicero herübergenommen. Nur wenig davon ist selbstständig. Indessen, es fehlt nicht, sei es nun in dem längeren Passus über Sokrates 13, 1—2, oder in kleinen, aber beweisenden chronologischen Notizen, wie 8, 2: *sit licet*

*) Diese zwei Seiten der cäcilianischen Anschauung, Skepsis und Tradition, bilden eben den von Oct. gerügten Widerspruch in der Rede des Cäcilius 16, 1—2. — Indess wird deren Unglaube an die heidnischen Götter — dem christlichen gegenüber! — bedeutend abzuschwächen gesucht, indem ersteren Beiden in allgemeiner Sentenz (*numquam pollebunt*) jeder factische Erfolg abgesprochen, die Gotteslästerung des Letzteren aber mehr auf Forschungstrieb als auf Frivolität zurückgeführt wird (*consulte magis quam profane*).

**) Vgl. Cic. de n. D. 1, 22: *non enim poeta solum suavis verum etiam ceteroqui doctus sapiensque traditur*.

ille Theodorus Cyrenaeus vel qui prior Diagoras Melius (jener lebte unter Ptolemäus Lagi [† 283], dieser um die Mitte des 5. Jahrhunderts, als Zeitgenosse von Demokrit, Protagoras und Sokrates), oder wie 13, 3: Arcesilaus et multo post Carneades (jener 316—241, dieser 214—129).

Die dritte Reihe, die grösste, enthält folgende Namen (c. 19):

1. Thales.
- 2—3. Anaximenes. Diogenes Apolloniates.
- 4—6. Anaxagoras. Pythagoras. Xenophanes.
- 7—8. Antisthenes. Speusippus.
- 9—11. Demokrit. Straton. Epikur.
- 12—14. Aristoteles. Heraklides Ponticus. Theophrast.
- 15—18. Zenon. Chrysippus. Cleanthes. Diogenes Babylonius.
- 19—21. Xenophon. Ariston. Plato.

Ein flüchtiger Blick darauf überzeugt uns, dass es dem Verfasser nicht um eine chronologische, sondern rein sachliche Zusammenstellung zu thun war. Höchstens der Anfang lässt eine chronologische Reihenfolge erwarten, sowohl Thales, qui primus de caelestibus disputavit, als vornehmlich die vorausgehende Präteritio jener rudes et veteres, qui de dictis suis sapientes esse meruerunt (19, 4). Gemeint sind die sogenannten sieben Weisen mit ihren ethischen Kernsprüchen. Der Ausdruck rudes, sowie deren Ausschliessung aus der Reihe der Philosophen beweist, dass Minucius sie als solche nicht eigentlich anerkenne und darum die übliche Bezeichnung derselben nicht recht billige. Er lässt deutlich herausblicken, dass zu einem rechten Philosophen noch etwas mehr gehöre als blosser dicta, einzelne Aussprüche, die ein Stück praktischer Lebensweisheit enthalten, aber eben so weit entfernt sind von einer spekulativen Betrachtung des Alls, wie von einer systematischen Behandlung der gewonnenen Resultate. Gleich dies ist ein selbstständiges Stück mit einem ganz treffenden Urtheil. Man vergleiche dazu den bei Diog. Laert. I, 40 erhaltenen Ausspruch des Philosophen Dicäarch, der obige „Weisen“ οὔτε σοφούς οὔτε φιλοσόφους, συνετούς δέ τινας καὶ νομοθετικούς bezeichnet*), also grade so, wie Minucius, den Philosophentitel ihnen abspricht.

Auch im Folgenden finden sich Spuren eigenen Wissens. So der Zusatz bei Demokrit: quamvis atomorum primus inventor, ferner das Urtheil über Epikur, der bei Cicero ganz fehlt, sodann

*) Vgl. Ueberweg, Grundriss der Gesch. der Philos. 6. Aufl. 1880. I. S. 30.

die eingehendere Darlegung von Zenons physiologischer Interpretation*), namentlich aber in der Behandlung der drei letzten Philosophen dieser Gruppe. Schien nämlich schon in der Erwähnung der Ansicht Xenophons der bei Cicero nicht vorhandene Vordersatz mit der hieran geknüpften Folgerung: *formam Dei veri negat videri posse et ideo quaeri non oportere* auf die Quelle *Memor. 4, 3, 13 ff.* hinzudeuten, so verweist uns der Excurs über Plato direkt auf dessen *Timäus* und zwar, wie ausdrücklich bemerkt wird, auf den Anfang desselben (*praefatur.*) Unschwer erkennt man in den Worten *mundi parens, artifex, fabricator*, platonische Ausdrücke wie *ποιητής καὶ πατήρ* 28 C. *τεκταινόμενος* und *δημιουργός* 29 A. speziell in dem *artifex animae* den Bildner der Weltseele, wie er gleichfalls am Anfang der Rede des *Timäus* 30 B. 34 B—36 D. hervortritt, vor allem aber in dem Satze: *quem et invenire difficile prae nimia et incredibili potestate, et cum inveneris, in publicum dicere impossibile* die platonische Stelle 28 C.: *τὸν μὲν οὖν ποιητὴν καὶ πατέρα τοῦδε τοῦ παντός εὐρεῖν τε ἔργον καὶ εὐρόντα εἰς πάντα ἀδύνατον λέγειν.*

Nachdem ferner Minucius c. 23 ganz vereinzelt *Platos Staat***) und dessen Abneigung gegen Homer erwähnt hat, eine Stelle, die entweder auf *Plat. resp. III, 9* oder auf *Cic. Tusc. II, 11, 27* zurückgeht, führt er uns c. 26 eine vierte Philosophengruppe vor: Sokrates, den Magier Hostanes, der hier mit genannt sein mag, und abermals Plato, sämtlich von Cicero unabhängig, zum Theil sogar abweichend. Während nämlich in dessen *de div. I. 54, 122* (übrigens nach *Plat. Apol. 19*) bestimmt hervorgehoben wird, dass Sokrates seinem Dämonion: *nūquam impellenti, saepe revocanti* gehorcht habe, heisst es bei Minucius: *Socrates novit, qui ad nutum et arbitrium adsistentis sibi daemonis vel declinabat vel petebat.* Wir erklären uns diese Abweichung aus dem Zurückgehen auf den ungewöhnlicheren, aber hier sowohl zweckdien-

*) Was nämlich Cicero 1, 14, 36 nur allgemein angiebt, specialisirt Minucius 19, 10. Cic.: *neque enim Jovem neque Junonem neque Vestam neque quemquam, qui ita appellatur, in deorum habet numero, sed rebus inanimis atque mutis per quandam significationem haec docet tributa nomina.* Min.: idem interpretando Junonem aera, Jovem caelum, Neptunum mare, ignem esse Vulcanum et ceteros similiter vulgi deos elementa esse monstrando publicum arguit graviter et revincit errorem.

**) Der Ausdruck: *quam in sermone instituebat* ist vielleicht nicht ohne Absicht gesagt und birgt wohl die geheime Andeutung in sich, dass ein *in re* institui desselben nicht recht möglich war.

licheren, wie auch neben obiger Aehnlichkeit naheliegenden Bericht bei Xenoph. mem. 4, 3, 12 (vgl. 1, 4, 15): προσηµαλίνουσίν σοι (θεοί) ἄτε χρὴ ποιεῖν καὶ ἃ μή. Ueber die Ansicht des Hostanes haben wir schon bemerkt, dass sie nicht wohl aus Plinius stammen könne, trotzdem dieser sogar von zwei Magieren dieses Namens zu erzählen weiss. Freilich darf daraus auf eine direkte Kenntniss von dessen Schriften (Plin. 30, 1, 14) noch nicht geschlossen werden. Jedenfalls aber weiss Minucius mehr von ihm wie Tatian, der einzige unter den gleichzeitigen Apologeten, der jenen noch anführt (vgl. ad Gr. c. 17). Aus Plato endlich bringt Minucius ausser einer Reminiscenz*) an obige Stelle im Timäus, in Anknüpfung hieran (sine negotio), das Symposion mit herein, speziell Symp. 202 E. Hier heisst's: πᾶν δαιμόνιον μεταξύ ἐστὶ θεοῦ τε καὶ θνητοῦ, insbesondere vom Dämon Ἔρως: er ist μεταξύ θνητοῦ καὶ ἀθανάτου. Während aber bei Plato nicht weiter auf dieses Verhältniss der beiden Begriffe eingegangen, sondern mit τίνα δύναμιν ἔχον zu einer anderen Frage fortgeschritten wird, bleibt Minucius grade hier länger stehen und erklärt dieses Verhältniss: id est inter corpus et spiritum mediam (substantiam), terreni ponderis et caelestis levitatis admixtione concretam, ex qua monet etiam... nos procupidinem amoris et dicit informari et inlabi pectoribus humanis et sensum movere et adfectus fingere et ardorem cupiditatis infundere. Ein Blick auf folgendes Capitel mit seiner dämonischen Einwirkung auf die Menschen, auf deren Körper (2) und Geist (8), sagt uns auch den Grund dafür: er zielt auf die instigatio daemonum, sucht hier eine physiologische Erklärung dafür zu geben und nach seiner Gewohnheit am Ausgang eines Capitels das folgende bereits vorzubereiten. Dass ihm aber hierzu obige Stelle des Symposion und auch das Nächstfolgende (ausser höchstens 203), zu wenig Stoff bot, ist klar. Daher griff Minucius, ohne aus dem Rahmen des Symposion herauszugehen, zu anderen Stellen, die ihm dienlicher schienen, und fährt mit monet und dicit fort, Plato zu citiren, indem er das dort von dem einzelnen Dämon Eros Gesagte auf das Gattungswesen überträgt. Anders wenigstens können wir uns die sehr corrupte Stelle nicht erklären. So bezog er sich wohl bei dem folgenden Citate zunächst auf Symp. 196 A, wo Agathon vom Eros sagt, dass er von sehr geschmeidiger Gestalt sei (ὕγρὸς τὸ εἶδος vgl. ὕγρᾶς ἰδέας) und leicht in die Gemüther und

*) Qui invenire Deum negotium (ἔργον 28 C.) credidit.

Seelen eindringe, um dort zu wohnen: οἷός τε πάντῃ περιπτύσσεσθαι, διὰ πάσης ψυχῆς εἰσιὼν λανθάνειν, vgl. 195 E: ἐν γὰρ ἡθεσι καὶ ψυχαῖς θεῶν καὶ ἀνθρώπων τὴν οἴκησιν ἴδονται, was unserem informari et inlabi pectoribus entspricht. Auch die Einwirkung des Dämons auf die Sinnlichkeit kann auf Vorausgehendes zurückgeführt werden, durch die Annahme, dass Minucius speziell an den Ἔρως πάνδημος, Sohn der gleichnamigen Aphrodite gedacht und auch dessen Sinne und Sinnlichkeit anregende Function jenem Mittelwesen im Allgemeinen übertragen habe (181 B). So wählte Minucius aus dieser Schrift Platos aus, was er für seinen Zweck brauchte. Diese bedachte Auswahl aber beweist seine nähere Kenntniss von ihr.

Doch wenden wir uns zu der fünften Gruppe (c. 34). Es mag unsere letzte sein, da die sechste (c. 38), sich mit einziger Ausnahme des Pyrrho als Wiederholung der c. 13 Genannten herausstellt. Die jetzige enthält als Zeugen für die Lehre vom Weltbrand die Stoiker, Epikureer und Plato, für die Lehre von der Seelenwanderung den Pythagoras und wiederum Plato. Bei der Erwähnung der stoischen ἐκπύρωσις folgt Minucius noch einmal seinem Gewährsmann Cicero (II. 46, 118), bei der epikureischen Ansicht vielleicht dem Lucrez (5, 407 f. vgl. aber noch Ovid Met. 1, 256 f.). Doch geht er auf die Quelle zurück bei Erwähnung der platonischen Lehre 34, 4: loquitur Plato: partes orbis nunc inundare dicit, nunc alternis vicibus ardescere, et cum ipsum mundum perpetuum et insolubilem diceret esse fabricatum, addidit tamen, ipsi artifici Deo soli et solubilem et esse mortalem. Behr behauptet zwar S. 32, indem er von der Voraussetzung ausgeht, dass Minucius auch hier dem Cicero I. 8, 20*) gefolgt sei: „Minucius hat hier also Cicero weniger gewissenhaft benutzt und wir müssen einräumen, dass er der platonischen Lehre nicht gerecht geworden ist.“ Aber eine Vergleichung der beiden Stellen ergiebt, dass Minucius hier den Cicero gar nicht benutzt hat. Bei diesem ist nur von einer Ewigkeit schlechthin die Rede, doch der Timäus enthält in der That Stellen, die diesen Satz einschränken. Ueber die Feuer- und Wasserzerstörung 22 C: πολλὰ καὶ κατὰ πολλὰ φθορὰὶ γέγονασιν ἀνθρώπων καὶ ἔσονται, πυρὶ μὲν καὶ ὕδατι μέγισται etc. Die nur relative Ewigkeit der Welt aber findet sich

*) Cic.: si alia est, cur mortalem fecerit mundum, non quemadmodum Platonius deus sempiternum.

direkt ausgesprochen 41 A: τὸ μὲν οὖν δὴ δεθὲν πᾶν λυτόν vgl. auch 38 B: χρόνος μετ' οὐρανοῦ γέγονεν, ἵνα ἅμα γεννηθέντες ἅμα καὶ λυθῶσιν, ἃν ποτε λύσις τις αὐτῶν γίγνηται, welcher Vergänglichkeit selbst die unsterblichen Götter ausgesetzt sind 41 B: ἀθάνατοι μὲν οὐκ ἐστὲ οὐδ' ἄλυτοι τὸ πάμπαν. Volle Unvergänglichkeit kam ja dem Entstandenen nach platonischer Ansicht gar nicht zu, vgl. 37 D: ἡ μὲν οὖν τοῦ ζώου φύσις ἐτύγγανε οὕσα αἰώνιος, καὶ τοῦτο μὲν δὴ τῷ γεννητῷ παντελῶς προσάπτειν οὐκ ἦν δυνατόν. Sonach ist Minucius hier nur dem Cicero nicht gerecht geworden. Er zeigt sich durchaus als einen Kenner des platonischen Timäus, ja Platos überhaupt. Wir haben daher allen Grund, anzunehmen, dass er auch die platonische Seelenwanderungslehre (34, 6) aus der Quelle kannte. Die dem Wortlaut am nächsten kommenden Stellen sind Tim. 42 B f. und bezüglich der Rückkehr in bestimmte Thierkörper Phäd. 81 E—82 A.

Hiermit ist die eigentliche Philosophenreihe zu Ende. Doch müssen wir noch eines Nachzüglers gedenken, der zwar ohne Namen, aber nicht ohne sichtliches Interesse von Minucius benutzt worden ist. Es ist Seneca. Zwei ganze Capitel (36, 37) sind in seinem Geiste gehalten und voll seiner Worte und Wendungen. Besonders ist es der kleine Dialog de providentia, der dem Minucius vorgelegen hat, daneben die uns verloren gegangene, aber noch bruchstücksweise bei Augustin erhaltene Schrift de superstitione und vielleicht auch Senecas Briefe. Da wir später auf die Aehnlichkeiten näher ein gehen werden, so wollen wir uns hier mit der Anführung der hauptsächlichsten Parallelstellen begnügen*). De prov. 2, 7 f. Oct. 37, 1 f. De prov. 4, 6. 5, 9. 6, 6. Oct. c. 36. De superst. bei Aug. de civ. Dei 6, 10 f., vgl. Oct. 25, 7 und 24, 4. Moral. phil. bei Lact. inst. 6, 25, vgl. Sen. ep. 95, 47 und 41, 1. Oct. c. 32. Exhort. bei Lact. inst. 3, 15, Oct. 38, 5.

Blicken wir noch einmal auf jenen Philosophenzug zurück, so fallen uns besonders zwei Gestalten auf, die Minucius selbst vor den anderen ausgezeichnet hatte: der so oft benutzte Seneca und der so oft genannte Plato. Ist es erlaubt, aus der Sonderstellung dieser Beiden auf ein besonderes philosophisches Interesse des Verfassers zu schliessen, so kann dasselbe nur auf den Stoicismus und Platonismus gerichtet sein. In der That werden im nächsten Abschnitt beide und zwar als Hauptbestandtheile minucianischer Anschauung uns wieder begegnen.

*) Vgl. auch Dombart Anhang, S. 135—137.

Nach alle diesem nun ist es offenbar, dass wir in Minucius Felix einen Mann vor uns haben von ausgedehnter heidnischer Bildung, von feinsten Urbanität, von grösster rednerischer Gewandtheit und Anmuth, einen Freund der classischen Form und Kenner beider Litteraturen, römischer und griechischer, auf dem Gebiete der Poesie wie der Geschichte, wie der Philosophie. Man begreift daher, mit welchem Rechte Hieronymus von unserem *causidicus* sagen konnte: *Minucius Felix, causidicus Romani fori, in libro, cui titulus Octavius est... quid gentilium scripturarum dimisit intactum?* Erinnern wir uns von hier aus des oben aufgestellten ciceronianischen Gegensatzes von einem *causidicus* und einem *orator*, so sehen wir uns jetzt am Schlusse genöthigt, scharf zu scheiden zwischen unserem und dem ciceronianischen *causidicus*, ja, wäre zu entscheiden, sogar berechtigt, unserem *causidicus* das Prädicat eines *orator* zuzuerkennen, im Sinne einer umfassenden, vorzugsweise rhetorischen Bildung.

Dies ist der heidnische Boden seiner Geistesbildung. Sehen wir zu, wie weit das Christenthum darin aufgegangen ist.

Der Philosoph und der Christ.

A. Dem Akademiker gegenüber.

Wir haben im vorausgehenden Theile bereits genügend von dem Vorhandensein philosophischer Elemente Einsicht nehmen können. Wir werden uns hier aber überzeugen, dass diese den wesentlichen Bestandtheil der Apologie ausmachen, ja durch deren ganze Anlage bedingt sind.

Die Apologie ist nicht bloss die Widerlegung einer Reihe heidnischer Vorwürfe, wie die Schutzschriften Justins, Athenagoras' u. A., sondern in ihr stehen Heidenthum und Christenthum in zwei Personen redend einander gegenüber. Hierbei aber ist auffällig, dass der Gegner des Christen nicht nur im Allgemeinen ein Heide ist, sondern ein Philosoph und auch nicht nur dies, sondern der Anhänger einer ganz bestimmten philosophischen Schule, der mittleren Akademie, 5, 2, 13, 5*). Damit erhält

*) Wir billigen nicht, dass Paul de Félice den Cäcilus einen Epikureer nennt. S. 26: Cécilius n'est point un homme ignorant. Sans appartenir précisément à aucune école de philosophes, il les connaît un peu toutes. Pour

auch die Widerlegung von vornherein eine ganz bestimmte und, dürfen wir sagen, schiefe Richtung. Der Christ, so muss man voraussetzen, wird auf die Vorwürfe des Philosophen nothwendig eingehen, erwidern und somit selbst als Philosoph erscheinen, andererseits aber als Gegner speziell eines Akademikers in Gefahr gerathen, auf jene Seite gedrängt zu werden, wo schon seit Alters her ein Gegner akademischer Skepsis stand — zum Stoicismus.

In der That hat die Widerlegung diese schiefe Richtung eingeschlagen, der Christ erscheint durchaus als Philosoph und im Wesentlichen durchaus als Stoiker. Dies wird das Folgende zeigen.

Nachdem Octavius in dem persönlichen Eingang seiner Rede den Widerspruch zwischen dem Prinzip der Skepsis und der religiösen Tradition in der Rede des Gegners aufgedeckt, beginnt er seine eigne mit der Widerlegung jenes cäcilianischen Cardinalvorwurfs: des Mangels an aller höheren Bildung der Christen und ihrer gänzlichen Unbefugniss zu philosophischer Spekulation. Dem gegenüber macht er auf's Entschiedenste seine Grundsätze geltend und zwar nicht nur von der allgemeinen Berechtigung der Menschen dazu, sondern sogar von der Pflicht derselben, womit er gleichzeitig die rechte Methode der Spekulation verbindet.

Die allgemeine Berechtigung ruht auf dem Grunde allgemein menschlicher Befähigung dazu, 16, 5: *et quoniam meus frater erupit, aegre se ferre... inperitos de rebus caelestibus disputare, sciat omnes homines sine dilectu aetatis, sexus, dignitatis rationis et sensus capaces et habiles procreatos nec fortuna nanctos, sed natura insitos esse sapientiam: quin ipsos etiam philosophos, vel si qui alii artium repertoires in memorias exierunt, priusquam sollertia mentis parerent nominis claritatem, habitos esse plebejos, indoctos, seminudos: adeo divites facultatibus suis*

lui, et en cela il est épicurien, la vérité est dans une sage réserve, un doute raisonnable (?). S. 88: Nous comprenons maintenant pourquoi Cécilius tient au doute et le prêche. Il y va de sa tranquillité et après tout, ce qui lui importe le plus, ce n'est pas que la vérité soit ceci ou cela, mais qu'il jouisse lui-même en paix de l'existence et de ses douceurs. Il est vraiment épicurien. — Gerade der Epikuräer Vellejus kommt am wenigsten in Betracht. Cäcilus ist trotz seiner Neigung zu epikureischer Physik 5, 7 f. vielmehr Gegenstück des ciceronianischen Cotta, jenes Skeptikers und römischen Oberpriesters, gleich diesem ein Repräsentant des in sich zerfallenden Heidenthums mit innerer Skepsis hinter dem Aushängeschild der Tradition (c. 5, c. 6, vgl. de n. D. I. 5, 12. III. 2, 5). Dass dieser Skeptiker aber speziell als Anhänger der mittleren Akademie auftritt, beweist eben das eigenthümlich stoische Interesse des Apologeten.

inligatos magis aurum suspicere consuesse quam caelum, nostrates, pauperes et commentos esse prudentiam et tradidisse ceteris disciplinam. Die Pflicht und die Methode aber, beide eng verbunden, bringt er am Anfang des nächsten Capitels 17, 1: Nec recuso, quod C. adserere inter praecipua conisus est, hominem nosse se et circumspicere debere, quid sit, unde sit, quare sit etc. (2) quod ipsum explorare et eruere sine universitatis inquisitione non possumus, cum ita cohaerentia, conexa, concatenata sint, ut nisi divinitatis rationem diligenter excusseris, nescias humanitatis, nec possis pulchre gerere rem civilem, nisi cognoveris hanc communem omnium mundi civitatem, praecipue cum a feris beluis hoc differamus, quod illa prona in terramque vergentia nihil nata sunt prospicere nisi pabulum. Nos quibus vultus erectus, quibus suspectus in caelum datus est, sermo et ratio, per quae Deum adgnosimus, sentimus, imitatur, ignorare nec fas nec licet ingerentem sese oculis et sensibus nostris caelestem claritatem: (3) sacrilegii enim vel maximi instar humi quaerere quod in sublimi debeas invenire.

Wir sehen, wie tief hinein der Christ dem Philosophen auf spezifisch philosophisches Gebiet folgt und sogar zu der Frage nach den Grundlagen menschlichen Denkens Stellung nimmt. Hier nun trifft das ein, was wir von Anfang an vermuthet hatten: Minucius schlägt sich der Skepsis des Cäcilius gegenüber auf die Seite der Stoiker. Gleich von vornherein macht er den stoischen Sensualismus, ja das ganze stoische Erkenntnissprinzip: *sensus et ratio*, sinnliche Wahrnehmung und daraus schliessende Vernunft*) geltend, dem schon früher die Häupter der mittleren Akademie, Arcesilaus und Carneades, ihre *ἀκαταληψία* entgegen gehalten hatten**). Nach echt stoischem Dogmatismus hat Minucius dieses am Anfang als Substrat für alle weitere Entwicklung einfach ponirt (*sciat*), ohne die *ἀκαταληψία* des Cäcilius (5, 2) auch nur mit einem einzigen Worte zu entkräften oder sein Prinzip selbst erst als sicher erwiesen zu haben.

Mit diesem stoischen Erkenntnissprinzip harmonirt auch die folgende *insita natura sapientia*. Sind sinnliche Wahrnehmung und Denkvermögen die Organe zur Aufnahme der Wahrheit, so ist *insita sapientia* die durch jene eindringende Wahrheit, welche hier

*) Zeller: Philos. der Griechen. 3. Aufl. 1881. III. 1. S. 76.

**) Cic. de orat. III. 18, 67. de n. D. I. 2, 4. Zeller III. 1. S. 492.

ihrer Möglichkeit nach als allen Menschen eingepflanzt gedacht wird. Man erkennt darin die stoischen *προλήψεις* oder *κοινὰ ἔννοιαι*, Vorstellungen, die, weit entfernt, für angeboren gehalten zu werden, dennoch durch die sinnlichen Erfahrungen und daraus gemachte Schlüsse zum Theil von selbst (*ἀνεπιτεχνήτως*) im menschlichen Geiste entstehen und darinnen verbleiben als ein oft ungemerakter Wahrheitsfond. Selbst die höchsten Ideen, die des Guten und der Gottheit fanden auf diese Weise zum Menschen ihren Eingang*). Ein solcher Wahrheitsfond ist obige *insita sapientia*. Sie kann vermöge der Natur unseres Denkens von Allen gleichmässig aus der Erfahrung abgeleitet werden und ist sonach potentiell mit jener natürlichen Denkanlage zugleich gegeben.

Die aus letzterer dem Menschen erwachsende Pflicht, Gott zu erkennen, ist gleichfalls echt stoisch. Sie führt uns auf den Grundgedanken stoischer Ethik: *ὁμολογουμένως τῇ φύσει ζῆν*. Auch in ihrer speziellen Gestalt, auf Grund der *vultus erectus*, *suspectus in caelum*, *sermo et ratio* den Himmel denkend zu betrachten und so Gott nachzuahmen, erweist sie sich als stoisch. Ist ja nach stoischer Ansicht dies alles vom göttlichen Geiste bewusst geschaffen, für den menschlichen Gebrauch bestimmt, deren Nichtbenutzung demnach — wie auch Minucius sagt — Pflichtverletzung. Wie genau hierin unser Apologet mit dem Stoicismus zusammenstimmt, zeigen die Worte des Balbus de n. D. II. 56, 140: *qui (dii) homines humo excitatos celsos et erectos constituerunt, ut deorum cognitionem caelum intuentes capere possent. Sunt enim e terra homines, non ut incolae atque habitatores, sed quasi spectatores superarum rerum atque caelestium, quarum spectaculum ad nullum aliud genus animantium pertinet. Ueber die Nachahmung Gottes, übrigens ein ursprünglich platonischer Gedanke**), äussert er sich II. 14, 37: Ipse autem homo ortus est ad mundum contemplandum et imitandum, wo stoisch-pantheistisch die Welt Gott gleichgesetzt ist, vgl. II. 17, 47.*

Aus dieser Hauptaufgabe des Menschen erklärt es sich, dass Minucius die Forderung der Selbsterkenntniss nicht wie Caecilius inter praecipua adserit, sondern jener nachstellt. Noch immer soll der Mensch Object der Forschung bleiben, aber nicht das erste, sondern deren letztes Ziel, welchem die Erkenntniss des Alls und

*) Zeller III. 1. S. 75. Ueberweg I. S. 234.

**) Tim. 47, C. 39 E.

der Gottheit voranzugehen hat*). Dass diese aber vorangehen muss, d. h. die ganze deductive Methode der Selbsterkenntnis erklärt sich abermals aus stoischer Anschauung. Das Weltall erscheint den Stoikern als ein strenggeordneter Organismus, ein *ornatus* (*κόσμος*), eine *communis omnium mundi civitas* Cic. de n. D. II. 6, 17 vgl. Oct. 17, 2 ff. Wie nun im classischen Staate die Stellung des Einzelnen sich wesentlich bestimmte nach seiner Stellung zum Staate, so wird auch der Mensch seinem Wesen nach nicht anders erkannt, als aus dem Weltzusammenhang heraus, worin er als nothwendiges Glied eingefügt steht (vgl. Cic. II. 14, 37). Man sieht, die altclassische, speziell römische Staatsanschauung ist bei den Stoikern wie bei Minucius übertragen auf das Weltall. Wird dort der Mensch lediglich zum Staatsbürger, so hier zum Weltbürger. Der altclassische Particularismus erweitert sich zum Kosmopolitismus.

Von dieser Auffassung der Welt als eines Organismus gelangt Minucius mit den Stoikern zu jener teleologischen Argumentation für das Dasein der Gottheit, welche die Stoiker besonders von Sokrates adoptirten und welche den direkten Gegensatz zur skeptischen Zufallslehre bildet**). Auch hier tritt sie letzterer entgegen, in ihrer Einzelausführung sogar wörtlich dem ciceronianischen Balbus folgend 17, 4. 18, 4 vgl. de n. D. II. Ihr Resultat ist darum auch von dem jenes Stoikers nicht verschieden: *esse aliquod numen praestantissimae mentis, quo omnis natura inspiretur, moveatur, alatur, gubernetur* vgl. Cic. de n. D. II. 2, 4: *esse aliquod numen praestantissimae mentis, quo haec regantur*. Dieses Resultat seiner Himmelsbetrachtung lässt ihn dann auch streng methodisch jene letzte Frage (17, 1) nach dem Wesen des Menschen beantworten (18, 2)***). Der Mensch ist nicht eine zufällige Composition von Elementen (*elementis concretus*), oder ein blosses Aggregat

*) Aus der Zusammenstellung von *universitas* und *divinitas* ersieht man übrigens, wie hier der stoische Pantheismus noch nachwirkt.

**) Auch deshalb von genannten Akademikern, besonders Carneades angegriffen wurde, vgl. Cic. de n. D. I, 2, 4. II, 65. 163. — Die Aeusserlichkeit, womit die Stoiker mit Sokrates diese Zweckbeziehung aller Dinge fassten und wonach alles in der Welt nur des Menschen wegen da sei, fehlt auch bei Minucius nicht. Es sprechen das ausser dem von Cicero entlehnten Gedanken 17, 6: *ut sit nobis operis et quietis alterna reparatio* folgende Stellen aus: 36, 5. 32, 2. 34, 11. 38, 1.

***) Diese streng durchgeführte Ordnung durch die *universitas* hindurch bis zum Menschen genau der Ankündigung gemäss 17, 2 macht uns aufstützig gegen

von Atomen (*concinatis atomis*), sondern in der That, wie oben erwartet war (*potius*), a Deo factus, formatus, animatus vgl. 17, 1.*). Durch diese ästhetische Weltauffassung kommt aber zugleich ein ästhetisches Moment in den Gottesbegriff hinein. Gott ist nicht nur Urheber und *formae nostrae pulchritudinis* 17, 11, der Schönheit der Welt, sondern er selbst ist schön 18, 4: *ita in hac mundi domo cum coelum terramque perspicias... crede esse universitatis dominum parentemque ipsis sideribus et totius mundi partibus pulchriorem*. Auch dies ist ganz stoisch-platonisch, vgl. Cic. de n. D. II. 7, 18. Symp. 201 C. Tim. 30 A. u. C.

Während jedoch bisher auf's Strengste die Einheit der Welt betont wurde, so zwar, dass selbst die Gottheit stoisch-pantheistisch mit in die Welt hereingezogen ward**), so wird im Weiteren der Monismus in einen Dualismus gespalten, die *communis omnium mundi civitas* wird zu einem *caeleste regnum* (18, 5), dem die *imperia terrena* gegenüber stehen. Es handelt sich um

die Echtheit des Abschnittes 18, 3. Er stört den schönen Fortschritt, passt weder zum Vorausgehenden noch bereitet das Folgende vor. Zwar liesse sich der Satz *nec — consulit* noch halten, aber nicht als Uebergangsprase, sondern als Recapitulation für die Einzelfürsorge, die ja schon besprochen ist, an die hierauf der folgende Vergleich vom wohlgeordneten Hause als Endrecapitulation über die Providenz überhaupt sich um so besser anschliessen würde.

*) Die Uebersetzung Dombarts (S. 43) „ein Product der Verdichtung der Elemente“ vgl. auch c. 5, 8 scheint uns, wenn auch sprachlich richtig, so doch sachlich nicht ganz passend. Die „Verdichtung“ kommt nach dem Sinn unserer Stelle und auch c. 5 gar nicht in Betracht; es genügt überall die eigentliche Bedeutung „Verschmelzung“, „Verbindung“, wie solche 26, 12 sogar gefordert wird. Und zwar ist es die durch Zufall zu Stande gekommene Verbindung von Elementen, die *fortuitae concursiones* 5, 7, die *elementorum ut voluntaria concretio* 5. 8, es ist die ganze mechanische Naturerklärung ohne ordnenden *νοῦς* (vgl. *natura in se coeunte* und *quis deus auctor* 5, 7) nach Art des Empedocles, des Democrit, der Epicureer mitsammt dem Akademiker Cäcilius, gegen welche Minucius sich wendet und welcher er sein bewusst schaffendes und ordnendes Lebensprinzip, seinen weltbildenden Gott gegenüberstellt. Auch hier wieder ganz nach seinem Vorbilde Balbus, der gleichfalls gegen die Entstehung der Welt durch eine *fortuita concursio* und durch einen *concursus atomorum* polemisirt de n. D. II. 37, 93 f.

**) So durch schon erwähnte Zusammenstellung von *universitas* und *divinitas*, dann durch jenen Vergleich der Welt mit einem Hause, dem Gott innewohnend gedacht wird, wodurch auch das *quo omnis natura inspiretur, moveatur, alatur* 17, 4, den Sinn einer inneren Durchdringung der Natur durch das göttliche Wesen erhält, vgl. auch Cic. de n. D. II. 35, 90.

das erste Argument für die Einheit Gottes. Minucius meint 18, 5: quod ipsum non multi laboris aperire cogitanti terrena imperia, quibus exempla utique de coelo. Quando umquam regni societas aut cum fide coepit aut sine cruore desiit? Diesem folgen dann geschichtliche Beispiele, die gegen die Mehrherrschaft sprechen. Dass hier platonische Anschauung mit unterläuft, beweisen die plötzlich auftauchenden Urbilder exempla παραδείγματα. Es ist diese ganze Stelle ein eigenthümliches Stück minucianischer Anschauung. Die irdischen Reiche und zwar die für den Denkenden als das Normale sich herausstellenden Monarchieen sind Abbilder der himmlischen Urbilder, resp. des göttlichen Urbildes. Man kann sich dies nicht anders denken, als dass Gott, der nach 25, 12 (deo dispensante) auch in der Geschichte waltet, „ihm zum Bilde“ die Monarchie der Entwicklung der Völker als das Naturgemässe zu Grunde gelegt habe, dass dieses von den Denkenden als das Normale aus der Geschichte erkannt werde und nun seinerseits einen Beweis abgebe für die göttliche Monarchie im Himmel*). So wird die geschichtliche Erscheinung der Alleinherrschaft der Ausdruck eines der Geschichte zu Grunde liegenden Gesetzes und hat somit nicht nur den Werth einer blossen Analogie, sondern durchaus den eines Beweises, um so mehr, da sie besonders dem Denkenden (cogitanti) an's Herz gelegt wird. Sie ist aber sonach auch auf folgenden Gedanken, eine reine Analogie aus der Natur, von Einfluss. Dadurch, dass auch unter den Gesellschaftsformen der Thiere die Monarchie sich geltend macht, stellt sich von selbst der Gedanke ein, dass die Alleinherrschaft von Minucius als ein im ganzen Weltall verbreitetes Gesetz angenommen worden ist. Dies aber führt uns auf das stoische ἡγεμονικόν, das zunächst als der beherrschende Theil der Seele (die Vernunft), dann in jedem zusammengesetzten Wesen befindlich gedacht wurde (Cic. de n. D. II. 11, 29), von Minucius jedoch auf jeden Gesellschaftskörper überhaupt, in einem einzelnen Naturgebiete wie im Weltganzen, angewendet worden ist. Aehnlich äussert sich Balbus II. 11, 29:

*) Allerdings eine petitio principii. — Er berührt sich hierin eigenthümlich mit Plutarch, der auch die Monarchie, angeblich nach Plato, die wünschenswertheste Verfassung und den Herrscher das Bild und den Diener der Gottheit nennt (Zeller III, 2. S. 189). Sollte Minucius dessen „περὶ μοναρχίας“ gekannt haben?

omnem naturam necesse est, quae non solitaria sit neque simplex, sed cum alia juncta atque connexa, habere aliquem in se principatum, ut in homine mentem, in bellua quiddam simile mentis, desgleichen in den Wurzeln der Pflanzen und so auch in der ganzen Natur: omnium verum potestate dominatuque dignissimum. Vgl. Zeller III. 1. S. 148. Indem nun Minucius sich Gott als das *ἡγεμονικόν* der Welt dachte, das nach seinem Plane alle anderen Gemeinwesen gleichfalls mit solchen *ἡγεμονικά* ausstattete, so mochten sich ihm die platonischen *παράδειγματα* sowie der Gegensatz von Himmel und Erde nahegelegt haben*). Wir haben sonach in dieser spezifisch minucianischen Stelle eine Vermischung stoischer und platonischer Anschauung.

Mehr noch tritt jener Dualismus hervor in dem dritten Argument für die Einheit Gottes: aus dem gewonnenen Begriff des Schöpfers (*parens***) . Indem darin der Werkmeister seinem Werke gegenübergestellt wird, erweitert sich der Gegensatz von Himmel und Erde zu dem von Gott und Welt und wird Gott selbst in die reine Transcendenz hinausgerückt, 18, 7: *tu in caelo summam majestatem dividi credas et scindi veri illius ac divini imperii totam potestatem, cum palam sit parentem omnium Deum nec principium habere nec terminum, qui nativitatem omnibus praestet, sibi perpetuitatem, qui ante mundum fuerit sibi ipse pro mundo.* Man könnte nun hier, wie auch bei den folgenden Wesenseigenschaften Gottes, auf christlichen Einfluss schliessen. Indess man würde damit zu weit gehen, so nahe er auch zu liegen scheint. Denn die Transcendenz, die Ewigkeit und Unveränderlichkeit, sowie die daraufgenannten Eigenschaften der Unsichtbarkeit (*visu clarior*), Uebersinnlichkeit (*sensibus maior*), Immaterialität (*tactu purior*), Unermesslichkeit (*infinitus, immensus*), Unbegreiflichkeit und Unaussprechlichkeit ergeben sich einestheils bei dem einmal angenommenen Schöpferbegriff aus Abstraction, zu der ja die Stelle selbst indirekt auffordert, andererseits aber

*) Den Sitz der weltbeherrschenden Macht dachten sich übrigens die meisten Stoiker im Himmel vgl. Zeller III, 1. S. 137.

**) Eigentlich ist dieses so wenig ein Argument wie die vorausgehende Analogie aus der Natur, sondern eher eine Appellation an die Vernunft, aus dieser letzten Schöpfungsursache weiter zu schliessen und zwar, wie hier angegeben wird, zunächst auf ihre Anfang- und Endlosigkeit, ihre dem Werden (*nativitas*) gegenübergestellte *perpetuitas*, Ewigkeit und zugleich Unveränderlichkeit, sowie zuletzt auf ihre Einheit. Anders lässt sich die entschieden corrumpirte Stelle nicht wohl erklären. (S. Dombart S. 48 u. 131. Anhang.)

finden sie sich schon, längst unter den Philosophen, vor allem unter den Platonikern. So schon bei Plato selbst die Transcendenz vgl. Resp. VI. 507 B. f., die Unveränderlichkeit Resp. II. 380 D. f. und die von den ersten Christen so oft angeführte Unaussprechlichkeit Gottes Tim. 28 C. *). Unter den Zeitgenossen aber finden sich obige Eigenschaften bei Platonikern wie Maximus von Tyrus vgl. Zeller III, 2, S. 207, Apulejus e. d. S. 211, Albinus S. 213 und sogar Celsus S. 215, Anm. 2, dem vermeintlichen Gegner des Minucius. Es ist demnach hier weit eher der heidnisch-philosophische, insbesondere eher der platonische als der christliche Einfluss anzunehmen **).

Herrscht hier aber platonischer, so im Folgenden wiederum der stoische Einfluss vor, in dem letzten Argument für die Einheit Gottes, de consensu omnium 18, 11: quid quod omnium de isto habeo consensum? audio vulgus... audio poëtas (19, 1).. et philosophos (19, 3). Nach obigen Voraussetzungen ist dies für Minucius ein nicht unwichtiges Argument. Es ist nichts Anderes als ein Zurückgehen auf erwähnten Fond gemeinsamer Wahrheiten, jene insita sapientia aller Menschen, darinnen sich namentlich die Idee von dem einen Gotte vorfindet. Sie konnte ja und musste sich sogar einem Jeden aus der Erfahrung aufdrängen ***), vornehmlich aus der sinnenden Betrachtung des Himmels und seiner geordneten Schönheit, dann der Erde und ihrer mannichfachen Wesen, deren einzelne Gesellschaftsformen mit ihren ἡγεμονικά in sich nothwendig auf ein Urhegemonikon, den einen und wahren Gott, hinwiesen. Dass nun denselben die erfinderische Vernunft des Menschen (ingenium 16, 5) in der That in sich aufgenommen, dem Einzelnen weniger oder mehr bewusst, das beweisen die Stimmen aus dem Volke, die Dichter und die Philosophen, das beweisen in erster Linie die Christen. Sie sind es, die den Reichen und Vornehmen gegenüber, welche von ihren Reichthümern geblendet magis aurum suspicere consueverant quam caelum, vielmehr umgekehrt caelum magis quam aurum suspexerunt et prudentiam

*) Bei den Apologeten und ersten Kirchenvätern oft gebraucht, auch lebendiges Gemeindebewusstsein vgl. Eus. h. eccl. V. 1. § 58 u. 61.

**) Christlich oder wenigstens biblisch erscheint höchstens das verbo jubet, das im Verein mit dem geschichtlich gewendeten qui ante mundum fuerit sibi ipse pro mundo an den Schöpfungsbericht der Genesis erinnern könnte.

***) Vgl. 17, 2: ingentem sese oculis et sensibus nostris caelestem claritatem.

commenti sunt et tradiderunt ceteris disciplinam d. h. gestützt auf jene Wahrheitsorgane sensus et ratio den Himmel durchforscht und daraus den wahren Gott erkannt haben (16, 5)*). Minucius schliesst den Abschnitt gegen den Akademiker mit einer Recapitulation, in welcher er rückblickend auf den cäcilianischen Hauptvorwurf den Christen eine solche Gleichberechtigung mit den Philosophen zugesteht, dass er sie sogar mit dem Philosophentitel auszeichnet 20, 1: *Exposui opiniones omnium ferme philosophorum, quibus inlustrior gloria est, Deum unum multis licet designasse nominibus, ut quivis arbitretur, aut nunc Christianos philosophos esse aut philosophos fuiss'e jam tunc Christianos.*

Unsere Muthmassung ist Wahrheit geworden. Minucius hat sich in Wirklichkeit durch die ganze Anlage zum Stoicismus hinüberdrängen lassen. Nicht nur zeigt er sich in den meisten seiner Anschauungen als Stoiker, sondern macht auch seine Glaubensgenossen dazu. Das Christenthum wird auf dem stoischen Erkenntnissprinzip aufgebaut und der Christengott durch stoische Teleologie gefunden. Dass dies eine fundamentale Verkenning des Christenthums als einer Offenbarung Gottes ist, leuchtet ein. Das Christenthum entspringt nach minucianischer Anschauung durchaus dem Menschengenoste selber wie jedes andere menschliche Geistesprodukt und ist darum auch geschichtlich als prudentia und disciplina aus ihm hervorgegangen (16, 5). Hierin aber steht Minucius in prinzipiellem Gegensatz zu den Haupt-Apologeten seiner Zeit**). Man lese nur bei Athenagoras Aussprüche wie Suppl. 7, 4: *Ποιηταὶ μὲν γὰρ καὶ φιλόσοφοι, ὥς καὶ τοῖς ἄλλοις, ἐπέβαλον στοχαστικῶς (sc. ἓνα θεὸν εἶναι), κινηθέντες μὲν κατὰ συμπάθειαν τῆς παρὰ τοῦ θεοῦ πνοῆς ὑπὸ τῆς αὐτοῦ αὐτοῦ ψυχῆς ἕκαστος ζητῆσαι, εἰ δυνατὸς εὗρεῖν καὶ νοῆσαι τὴν ἀλήθειαν. τοσοῦτον δὲ δυνηθέντες ὅσον περινοῆσαι οὐχ εὔρονται, ὥς οὐ παρὰ θεοῦ περὶ θεοῦ ἀξιόσαντες μαθεῖν ἀλλὰ παρ' αὐτοῦ ἕκαστος.*

*) Caelum ist durchaus in eigentlicher Bedeutung zu fassen, es kommt in der Apologie nicht anders vor (selbst das Adjectiv caelestis 19, 14 kann so gefasst werden). Auch das suspicere, obwohl 16, 5 zugleich auf aurum bezüglich und daher = hochschätzen, behält doch durch den im Folgenden ausgesprochenen Sensualismus und die daran anknüpfende teleologische Betrachtung des Weltalls, ganz besonders aber durch das suspectus in caelum 17, 2 obige eigentliche Bedeutung ehrfurchtsvoller Himmelsbetrachtung.

**) Wir citiren die griechischen Apologeten nach der Ausgabe von Otto.

— (8) ἡμεῖς δὲ ὧν νοοῦμεν καὶ πεπιστεύκαμεν ἔχομεν προφήτας μάρτυρας, οἳ πνεύματι ἐνθέῳ ἐκπεφωνήκασιν καὶ περὶ θεοῦ καὶ περὶ τῶν τοῦ θεοῦ. Vgl. dazu 32, 13. 24, 24. Genau so Tatian ad Gr. c. 20, 9. 32, 1 f., wie endlich auch Justin, nach welchem die Christen Schüler des in Christo Mensch gewordenen ganzen Logos sind, I. 13. I. 12, 13. II. 6. II. 8, 5. Wir werden später sehen, wie sich in Minucius selbst der Christ gegen dieses Vernunftprinzip sträubt, ohne jedoch dagegen aufkommen zu können.

B. Dem Vertheidiger des Heidenthums gegenüber.

Von diesem rein philosophischen Standpunkte aus begreift sich nun auch der gesammte zweite Untertheil mit seinem ausschliesslich intellectuellen Interesse, mit seiner scharfen Polemik gegen die Leichtgläubigkeit der Vorfahren, ihren gesammten Götter- und Wunderglauben. Minucius ist sich dabei seiner Gleichstellung mit den Philosophen so bewusst, dass er dem heidnischen Götterglauben gegenüber sich getrost auf die Autorität der Philosophie berufen zu können meint 20, 2: *non nos debet antiquitas imperitorum fabellis suis delectata vel capta ad errorem mutui rapere consensus, cum philosophorum suorum sentiis refellatur, quibus et rationis et vetustatis adsistit auctoritas.* Bei diesem Zusammengehen mit den Philosophen vergisst er offenbar ganz seinen Christenstand. Im Eifer gegen den unsinnigen Wunderglauben der Heiden lässt er sich zu Sätzen fortreißen, die auch die eigene christliche Ueberlieferung und den Glauben an sie treffen. So 20, 4: *quae (miracula) si essent facta, fierent: quia fieri non possunt, ideo nec facta sunt*, ein Satz, der durch folgende noch näher illustriert wird 24, 2: *vos timetis, quos facitis, dum unusquisque vestrum non cogitat prius se debere deum nosse quam colere, dum inconsulte gestiunt parentibus oboedire, dum fieri malunt alieni erroris accessio quam sibi credere, dum nihil ex his quae timent norunt.* Er folgt hier vielmehr dem Stoiker Balbus nach, der auch gegen die *falsae opiniones erroresque et aniles superstitiones* der Vorfahren zu Felde zieht vgl. *de n. D.* II. 28, 70*). Mit diesem theilt Minucius

*) Selbstverständlich geht er über ihn noch hinaus, wie in der Beurtheilung heidnischer Orakel und Weissagungen c. 26. Gleichwohl zeigen sich auch hier noch Spuren eines Glaubens an ihre Gültigkeit c. 27, 1: *falsis pluribus involuta* vgl. 26, 7.

auch die Abneigung gegen Homer sowie den bekannten Euhemerismus, über den drei Capitel mehr oder weniger direkt handeln (c. 21—23). Auch sonst finden sich Aeusserungen, die den oben geltend gemachten stoischen Anschauungen entsprechen. Wenn er z. B. 23, 1 sagt, die Dichter haben *veritati ipsi* geschadet und bald darauf 23, 8, die Heiden seien in ihrem Irrthume alt geworden, obgleich *veritas sit obvia, sed requirentibus*, so ist zwar unter der Wahrheit zunächst negativ die Erkenntniss von der Nichtigkeit heidnischer Götterverehrung zu verstehen. Indess verglichen mit dem Vorangegangenen, der *insita sapientia* und dem natürlichen Gottesbewusstsein, das instinctiv selbst unter dem ungebildeten Volke lebendig ist, gewinnt jene *veritas* einen positiven Inhalt. Sie ist das im All verbreitete Gesetz des *ἡγεμονικόν* und die daraus gewonnene, auch den Heiden innewohnende *ἐννοια κοινή* des einen Gottes. So allein begreift sich jene reale „*veritas obvia*,“ „*veritas ipsa*.“ Gesagtes stimmt auch ganz und gar mit dem Folgenden überein 24, 2. Hier wird in Gestalt eines Grundsatzes gegenüber dem *alienus error* das *sibi credere* geltend gemacht. Im Menschen also liegt die Wahrheit! Diese aber ist nichts anderes als eben jene *sapientia insita*, obige *ἐννοια κοινή* von dem einen Gotte, welche ermöglicht wird durch die gegebenen natürlichen Aufnahmeorgane für die Wahrheit, durch *sensus et ratio*. Auf diese Naturanlage drängt unser Apologet immer und immer wieder zurück. So schon im ersten Satze dieses Capitels 24, 1: *Quanto verius de diis vestris animalia muta naturaliter judicant*, wo er den vernunftbegabten Menschen sogar das natürliche Urtheil der Thiere entgegenhält. Dann aber in dem stark an *Senecas de superstitione**) anklingenden Gedanken (4): *aut cui testa sunt obscena demessa, quo modo deum non violat qui hoc modo placat, cum si eunuchos deus vellet, posset procreare, non facere?* Diese Naturanlage umzuändern hiesse an Gottes Willen ändern, in Gottes Machtgebiet frevlerisch eingreifen, ist daher ebenso ein *sacrilegium*, wie oben (17, 3) die Vernachlässigung der von Gott gegebenen und zum Gebrauch bestimmten Vernunftanlage. Auch hier also treffen wir auf jene Hochachtung vor dem natürlich Gegebenen und die daraus hervorgehende Forderung eines naturgemässen Lebenswandels, das Grundprinzip stoischer Moral.

Eine abermalige Vermischung stoischer und platonischer Gedanken bietet die nun folgende Dämonologie (26, 7—27, 8). Den

*) Bei Aug. de civ. Dei 6, 10.

Schlüssel zum Verständniss dafür, ja wir möchten sagen, der ganzen minucianischen Grundanschauung, giebt uns unseres Erachtens c. 26, 12 die minucianisch-stoische Interpretation jener platonischen, zu damaliger Zeit viel benutzten Stelle Symp. 202 E*). Wir bemerkten schon, Minucius wollte hier für die im nächsten Capitel zu besprechende dämonische Einwirkung auf die Menschen eine physiologische Erklärung geben und so zu jener selbst hinüberleiten. Dabei aber ist ihm wohl unwillkürlich seine eigne, dem Plato fremde Anschauungsweise mit untergelaufen. Sie verräth sich gleich in den ersten Worten. Das einfache platonische *πάν τὸ δαιμόνιον μεταξύ ἐστὶ θεοῦ τε καὶ θνητοῦ* giebt er wieder mit: *vult enim esse substantiam inter mortalem inmortalemque (sc. substantiam), fügt dazu als Erklärung id est, inter corpus et spiritum mediam* und erweitert dies in einer zweiten Erklärung *terreni ponderis et caelestis levitatis admixtione concretam*, nimmt also einerseits *mortalis substantia, corpus, terrenum pondus* zusammen und bringt sie in Gegensatz zu den gleichfalls identifizirten Begriffen *inmortalis substantia, spiritus, caelestis levitas*. Das ist ein interessanter Einblick in seine eigene philosophische, allem Anschein nach dualistische Grundanschauung. Allein, der Dualismus darin ist kein prinzipieller. Während nämlich *inmortalis* und *mortalis subst.*, *spiritus* und *corpus*, *caelum* und *terra* allerdings direkte Gegensätze sind, so doch nicht *pondus* und *levitas*, die letzten und charakterischsten Begriffe in jener Interpretation. Denn *levitas* ist logisch nicht „Gewichtslosigkeit“, nicht ein *contrarium*, sondern ein *minus* zu *pondus*, schliesst demnach noch immer ein Theil Schwere in sich, eine Eigenschaft, die nur dem Gebiete des Stofflichen angehört. Damit aber ergiebt sich auch für die *caelestis levitas* wie gleichfalls für *spiritus* und *inmortalis subst.* die Grundeigenschaft des Materiellen und demnach auch kein absoluter Gegensatz genannter drei Glieder zu *terrenum pondus, corpus* und *mortalis subst.*, sondern nur ein relativer, sofern ihnen allen eine materielle Substanz zu Grunde liegt, die hier nur nach grösserem und kleinerem Gewicht oder, physisch erklärt, nach grösserer und geringerer Verdichtung der Urmaterie geschieden wird**). Das aber ist ohne Frage stoische

*) Vgl. Zeller III, 2. S. 211. Anm. 4.

**) Dies ist allerdings ein Widerspruch zu der 18, 7 f. ausgesprochenen Uebeweltlichkeit Gottes. Aber dieser Widerspruch ist nicht zu lösen. Es gehen

Physik. Hier treten auch die feineren Stoffe den gröberen gegenüber und sind massgebend für die Stellung des Weltganzen. Die schwere Erde nebst dem Wasser liegt tiefer als die leichte Luft mit dem Feuer. Diese bilden von unten nach oben resp. von innen nach aussen die 4 Schichten im Weltall: Erde, Wasser, Luft und Feuer. Das Feuer des Umkreises hiess der Aether, dessen äussersten Theil Zeno den Himmel nannte vgl. Zeller III. 1, S. 184 f. Dass diese ätherische Leichtigkeit bei Minucius mit der unsterblichen, also göttlichen Substanz, andererseits mit dem menschlichen Geist als gleichfalls göttlichen Wesens, identifiziert wird, ist ebenso echt stoisch, vgl. Zeller III. 1. 137 (2). 138. 200. — Der Gegensatz in der Interpretation ist also nicht fundamentaler Art. Der Dualismus ruht im Grunde auf stoischem Monismus. Ja wir können stoischen Einfluss selbst in diesem vermeintlichen Dualismus noch wahrnehmen. Bringen wir nämlich zur weiteren Erklärung den *caelestis vigor* von 26, 7 hinzu, so bestimmt sich der Gegensatz zum *terrenum pondus* als kraftvolle zur ohnmächtigen, als aktive zur passiven Substanz. Dies aber führt uns zu den zwei stoischen Grundprinzipien alles Daseins, welche die Stoiker innerhalb des Körperlichen selbst wieder unterschieden, dem *ποιοῦν* und dem *πάσχον*, vgl. Zeller III. 1. S. 131. Ueberweg I. S. 235 f. Die Kraft oder das Göttliche ist nach stoischer Anschauung nur der feinere Stoff gegenüber dem spezifisch Stofflichen. Beide, Kraft und Stoff, sind in der minucianischen Anschauung vertheilt auf die Gebiete des Himmels und der Erde. Dort ist, wie ja auch Zeno, Chrysippus und die Mehrzahl der Stoiker annahmen,

hier eben die zwei Anschauungen, die stoische und platonische, unvermittelt neben einander. Spricht Minucius von Gott allein, so hebt er ihn platonisch über Erde 18, 5, Welt und Endlichkeit 18, 7 f. hinaus. Kommt er aber auf Gottes Einwirkung auf die Welt, seine Allgegenwart, Providenz zu sprechen, so geschieht dies nach stoisch-materialistischer Denkweise. Gott ist ihm *da nobis infusus*, ferner *omnia caelestia terrenaque et quae extra istam orbis provinciam sunt*, sind *Deo plena* 32, 8; *non solum in oculis eius, sed in sinu vivimus* 33, 1; Gott ist die *mens*, qua omnis natura inspiratur, movetur, alitur (also von innen heraus), vgl. dazu die volle Uebereinstimmung mit der stoischen Ansicht Vergils 19, 1, nach der diese Welt *spiritus intus alit et infusa mens agitat* (bei Seneca *cons. ad Helv.* 8, 3: *diffusus*). Auch hier in seiner Interpretation ist die stoische Anschauung durchgekommen. Sie erweist sich, weil seiner eigenen Erklärung entstammend, als spezifisch minucianisches Eigenthum, wie auch der platonischen Denkweise gegenüber als die ursprünglichere.

der Sitz der göttlichen, weltbeherrschenden Kraft, auf der Erde der Sitz träger Schwere, der Sitz der Ohnmacht*).

Diese Unterscheidung aber führt uns hinüber zu einem wirklichen platonischen Dualismus, der an anderer Stelle der minucianischen Dämonologie doch nicht fehlt. Am Anfang derselben 26, 7 f. erfahren wir, wodurch die Dämonen zu ihrer Doppelnatur gelangt sind, nämlich *terrenis labibus et cupiditatibus*. Das nun ist ganz platonisch. Diese *terrenae labes* im Gegensatz zu dem Göttlichen bilden den eigentlichen platonischen Dualismus von Gott und Sinnlichkeit. Die Körperlichkeit — hier zur Irdischkeit erweitert — ist nach Plato der Sitz der Begierden, welche die Seele beflecken und von dem guten und vernünftigen Gott abziehen, Phäd. 81 B. 80 D. Das oberste Ziel platonischer Ethik ist daher die Flucht aus der umgebenden Sinnenwelt, die Ablösung der

*) Zeller III. 1. S. 137 u. 152 f. Uebrigens spricht auch der Stoiker Balbus von der Erde als der *crassissima regio mundi* von dem *crassissimus aer* umgeben de n. D. II. 6, 17. Ueber den *caelestis vigor* 26, 7 vgl. man die auf obige (19, 1) citirte Stelle aus Vergil folgenden Verse Aen. 6, 730: „*Igneus est ollis vigor et caelestis origo seminibus etc.* und 745 f.:

Donec longa dies perfecto tempore orbe

Concretam exemit labem purumque relinquit

Aetherium sensum atque aurai simplicis ignem.

Diese philosophische Auseinandersetzung des Anchises, aus der auch genanntes Citat stammt 19, 1, bildet inhaltlich wie sprachlich betrachtet den reinen Commentar zur minucianischen Anschauung. Da haben wir den göttlichen *spiritus*, die *infusa mens*, die sich *magno se corpore miscet*, also die Scheidung von Geist und Körper in universalem Sinne. Da haben wir den *vigor*, der mit dem Attribut *igneus* und seinem Nachbarbegriff *caelestis origo* sich seinem Wesen nach als feurig, und seinem Wohnsitze nach als himmlisch herausstellt. Dazu kommt endlich als fernere Erklärung *purus aetherius sensus* und *ignis simplicis aurai* (sc. *caeli*, des höchsten Theiles der Atmosphäre vgl. v. 733. X. 898). Hierdurch erklärt sich auch die *simplicitas substantiae suae* 26, 8 als die ätherisch-feurige, von der Ursubstanz wohl nicht verschieden gedachte Wesenheit der Dämonen, die dieselbe durch ihr bewiesenes Wohlgefallen an irdischem Sinnengenuss — und nun kommt die platonische Anschauung herein — befleckt, beschwert haben, dadurch zur Erde herabgesunken und dann — auf welche Weise, sagt Minucius nicht — zu jenen räthselhaften Mittelwesen geworden sind *inter substantiam mortalem immortalemque, id est inter corpus et spiritum medii, terreni ponderis et caelestis levitatis admixtione concreti*. Der Unterschied zwischen der Anschauung des Minucius und des Vergil ist nur der, dass die Seelen in der Unterwelt das einst wieder erlangen werden (*simplicitas subst.*), was die Dämonen in der Vorzeit verloren haben. Sonst sind die Anschauungen ganz gleich. Es sind wesentlich stoische vgl. Cic. de n. D. II. 24. 64. 15, 39 und 41. 11, 30 f.

Seele vom Körper, wie sie besonders im Phädo empfohlen wird (vgl. auch Theät. 176 A. Rep. VII. 514 f.). Auch der Gedanke von dem Belasten der Seele durch die körperliche Gemeinschaft, selbst die Fassung des Körperlichen als eines Irdischen, Erdartigen findet sich dort ausgesprochen, Phäd. 81 C: ἐμβριθεὶς δέ γε τοῦτο οἷσθαι χρεὶ εἶναι παῖ βαρὺ καὶ γεῶδες καὶ ὁρατόν. ὃ δὲ καὶ ἔχουσα ἡ τοιαύτη ψυχὴ βαρύνεται τε καὶ ἔλκεται πάλιν εἰς τὸν ὁρατὸν τόπον etc. *) Aehnlich hier: spiritus sunt insinceri, vagi, a caelesti vigore terrenis labibus et cupiditatibus degravati. isti.. posteaquam simplicitatem substantiae suae onusti et immersi vitiis perdiderunt... non desinunt alienati a Deo... a Deo segregare 26, 8.

So vereinigt jetzt die terra zwei Begriffe in sich, den physischen der Ohnmacht (Schwere) und den mehr ethischen**) der Sinnlichkeit. Mit beiden versehen tritt sie in Gegensatz zu Gott (Geist) und Himmel und bildet mit diesem einen Dualismus, der nur nach der einen Hälfte (der ethischen Seite) ein platonischer genannt werden kann, nach der anderen aber (der physischen) nur die mehr stoische Unterscheidung der einen materiellen Ursubstanz ist nach Schwere und Leichtigkeit, nach Ohnmacht und Kraft.

Es gehen hier also platonische und stoische***) Elemente eng nebeneinander, treffen aber zusammen in dem einen Begriff der terra mit seiner doppelten, theils physischen theils ethischen Grund-

*) Auch dieser Platonismus findet sich bei Vergil, vgl. VI, 731 f.: noxia corpora, terreni artus, moribunda membra . . . 734: clausae tenebris et carcere caeco (sc. corpore) . . . 737: corporeae pestes und die mit der Seele verwachsene (concreta) labes, von der sie gereinigt werden soll und wird, vgl. 745 f. — Bei dieser Uebereinstimmung mit Vergil verstehen wir nun auch die fast enthusiastische Zustimmung des Minucius 19, 1: quid Mantuanus Maro? nonne apertius, proximius, verius . . . ait etc., wie auch den auffälligen Umstand, dass er den Mantuaner von allen Dichtern allein und zwar namentlich citirt.

**) Freilich nicht rein ethisch, sondern ethisch-intellektuell, vgl. Ausdrücke wie error pravitatis 26, 8 und 27, 2: nam falluntur et fallunt. Genau wie Plato Phäd. 81 A: πλάνης καὶ ἀνοίας καὶ . . . ἀγρίων ἐρώτων καὶ τῶν ἄλλων κακῶν τῶν ἀνθρώπων πείων ἀπηλλαγμένη etc., weshalb auch die reine Seele zum ἀγαθὸς καὶ φρόνιμος θεός gelangt 80 D. Dadurch deutet auch hier der Gegensatz der terra nur auf einen guten und vernünftigen, nicht im christlichen Sinne auf einen wesentlich heiligen Gott.

***) Noch einmal auf dämonologischem Gebiete kommt die stoische Anschauung zum Vorschein in der Auffassung des menschlichen Genius' als eines Dämons 29, 5.

bedeutung. Wir werden diesen Begriff nach seiner einen Seite auf eigentlich christlichem Gebiete wieder antreffen.

Die Dämonologie, so sahen wir, schliesst den zweiten Untertheil ab und leitet zum dritten, dem spezifisch christlichen über, c. 28—38. Es lässt sich erwarten, dass wir in diesem die eigenthümlich christlichen Lehren und Begriffe vorfinden werden, welche wir bisher noch ganz vermissten, und dass es sich zeigen wird, wie und ob Minucius dieselben verstanden hat.

C. Dem Ankläger des Christenthums gegenüber.

Auch hier, um mit Allgemeinem zu beginnen, wird noch immer der intellectuelle*) Standpunkt eingehalten, besonders gegenüber den plumpen, sicher dem Volke entstammenden Anschuldigungen: quasi Christiani monstra colerent, infantes vorarent, convivia incesta miscerent 28, 2. Minucius fertigt sie mit Wendungen wie quis tam stultus ... quis stultior, ut hoc credat 28, 7 kurz ab, um darauf nach Art der Apologeten den Heiden ihre Vorwürfe, aber ungleich feiner, sogar mit schlagendem Witz 28, 7 f. (totos asinos) zurückzugeben. Hierzu aber kommt grade in diesem Untertheile die ethische Beurtheilung, die ebenso in sittlicher Entrüstung über das verwahrloste heidnische Leben und Treiben, wie auch in vernichtender, theilweise recht concret redender Kritik desselben sich äussert, vgl. 31, 1. 28, 9—11. 37, 12, andererseits aber in der Entschiedenheit und Wärme, womit er für den reinen Lebenswandel seiner Glaubensgenossen eintritt (29, 1. 31 und 38).

Und nun im Einzelnen. Bereits kurz vor dem Ende des vorausgehenden Untertheiles konnten wir zwei spezifisch christliche Begriffe in der Darstellung bemerken, die fides und gratia. Beide aber geben uns, so christlich sie klingen, über die christliche Lehre nur wenig Aufschluss. Es heisst nämlich 27, 7 von den Dämonen: adjurati inim per Deum verum et solum**) inviti miseris corporibus inhorrescunt et vel exiliunt statim vel evanescunt gradatim, prout fides patientis adjuvat aut gratia curantis adspirat. Gratia ist

*) Sind doch alle an die Götter d. i. die Dämonen Glaubende inperiti 27, 8 caeci et hebetes 29, 2. Alle Anschuldigungen erwachsen eben auf dem durch vorangegangenen zweiten Untertheil gelegten Grunde heidnischen Irrthums.

**) Interessant ist der Seitenblick auf Justin II. 6, 13. 8, 5, wo dies κατὰ (διὰ) τοῦ ὀνόματος Ἰησοῦ Χριστοῦ geschieht.

hiernach nicht die göttliche Gnade, sondern im Besitz eines Menschen, ohne Zweifel die christliche „Gnadengabe,“ deren ja in den ersten Jahrhunderten nach Christo so verschiedenfache lebendig waren, hier speziell das *χάρισμα ἰάματος* 1. Cor. 12, 9 (vgl. Tat. ad Gr. 18, 1). Die fides aber lässt zwei Bedeutungen zu, entweder ist sie der Glaube an die Wunderkraft des Exorcisten (eine Art Sympathie) oder der Glaube an den deus verus et solus. Beides ist nichts speziell Christliches*).

Bei weitem mehr zu denken giebt die nächste hier in Betracht kommende christliche, sogar christologische Stelle 29, 2, die einzige, in welcher Christus selbst erwähnt wird. Hier vor allem sehen wir uns im Gegensatz zu den genannten Beurtheilern des Minucius. Dombart, um nur diesen hier anzuführen, meint (S. VIII Einl.): „Es muss einem jeden Leser auffallen, dass in der Schrift, die doch eine Apologie des Christenthums sein soll, so wenig von Christus und eigentlich christlichen Verhältnissen gesprochen wird. Die neue Lehre stellt sich uns fast durchweg als ein moral-philosophischer Monotheismus dar. Man würde aber irren, wollte man daraus schliessen, Minucius oder gar die damalige Christenheit habe wirklich nur solch' einem abstrakten Monotheismus gehuldigt. Dass er selbst über Christus wesentlich dieselben Vorstellungen hatte, wie die Apostel und wie noch heute die gläubige Christenheit (!), lässt sich unschwer aus einer kurzen Bemerkung c. 29, 2 abnehmen, welche indirekt seine und seiner Genossen (!) Glauben an die göttliche Natur Christi bezeugt.“ Indem nun Dombart einerseits die Uebereinstimmung des Minucius mit den christologischen Anschauungen der Mitapologeten (Justin, Athen.) ponirt S. VIII, andernteils auf die Keim'sche Hypothese gestützt, annimmt, dass der Octavius eine Antwort auf Celsus' „wahres Wort“ sei, drittens aber die in letzterer Schrift gebrachten Angriffe gegen Christi Person im Octavius nicht widerlegt findet, „zumal da sie theilweise von Caecilius vorgeführt sind“**), so kommt er zu dem Schlusse, dass Minucius über Christus absichtlich geschwiegen, d. h. also, grade das Hauptsächlichste des Christenthums für sich behalten habe. Dombart fügt dazu: „offenbar hielt er den

*) Vgl. 33, 3: nam et Judaei Deum nostrum, idem enim omnium Deus est, experti sunt.

**) Wir müssen hier zur Vermeidung eines Missverständnisses dieses etwas dunklen Satzes bemerken, dass Min. durchaus alles zurückweist, was Cäcilus gegen die Person Christi vorbringt, vgl. 9, 4.

Angriffen auf die Person Christi gegenüber Zurückhaltung und Schweigen vorläufig für das Zweckmässigste. Ohne bei seinen heidnischen Lesern etwas Anderes vorauszusetzen als Vernunft, Wahrheitsliebe und Kenntniss der heidnischen Litteratur, suchte er vor Allem drei Dinge sicher zu stellen: die Existenz eines Gottes, die Regierung der Welt durch dessen allwaltende Fürsorge und die sittliche Reinheit der christlichen Glaubensgenossenschaft. Die ersten beiden Punkte belegt er durch historische und philosophische Gründe, für deren Würdigung er sein Publikum, die gebildete Heidenwelt, genügend vorbereitet wusste, und von der Wahrheit seines Zeugnisses für den reinen Wandel der Christen konnte sich jeder seiner Leser bei redlichem Willen durch den Augenschein überzeugen.“ (S. X, XI).

Nun, wir läugnen nicht, dass der einzige, so kurze und auch schwerfällige Passus über Christi Person auffallend erscheint, um so mehr, wenn man die ausführlichen christologischen Erörterungen der übrigen Apologeten damit vergleicht*). Aber, so fragen wir, folgt hieraus so ohne Weiteres, dass er damit etwas verschwieg, was er selber gewusst? Steht es von vornherein so fest, dass Minucius die Christologie der übrigen Apologeten getheilt habe? Ja, besass er in dieser schwierigen Frage überhaupt ein Urtheil? Das sind Fragen, die weder von Dombart noch von Paul de Félice beantwortet werden. Beides wird einfach vorausgesetzt. Beides aber sind Voraussetzungen, gegen deren Gültigkeit wir unsrerseits schon jetzt Einspruch erheben dürfen, nachdem wir eine so prinzipielle Differenz zwischen der minucianischen Auffassung vom Christenthum und der der griechischen Apologeten constatirt haben, nachdem wir gesehen haben, wie ein philosophisches Interesse ihn zu einer Verkenntung grade des Centrums christlichen Glaubens, der Offenbarung, trieb und wie er auch sonst sich durchaus in philosophischen Gedankenkreisen bewegte. Fassen wir überdies unsere Stelle näher in's Auge. So ganz schwieg Minucius doch nicht. Er lässt den Caecilius unter den christlichen Verehrungsobjekten auch den *hominem summo supplicio pro facinore punitum* 9, 4 mit anführen und antwortet dem Heiden Punkt für Punkt darauf 29, 2: *nam quod religioni nostrae hominem noxium (et crucem eius) adscribitis, longe de vicinia veritatis erratis, qui putatis Deum credi aut*

**) Just. I. 13 f. II. 6. Athen. suppl. 10 f. Tat. ad Gr. 5 u. 7. u. ö.

meruisse noxium aut potuisse terrenum. Minucius wendet sich sowohl gegen den noxius als gegen den homo. In seiner Begründung geht er vom Gottesbegriffe aus. Für einen rechten Gott gehalten werden, d. h. ein rechter Gott sein, noxius non meruit: das kann ein Verbrecher nicht aus Mangel an der nöthigen ethischen Beschaffenheit, anderseits terrenus non potuit: das kann auch kein „Irdischer“ wegen der seiner terra anhaftenden Ohnmacht. Da haben wir wieder unsern Begriff der terra und zwar nach seiner physischen Seite. Die Wahl dieses Wortes ist charakteristisch. Warum sagt Minucius nicht einfach hominem, wie auch Caecilius? — Weil er eine Reflexion daran knüpft. Christus ist ihm weder Verbrecher noch Mensch, ja nicht einmal terrenus. Er spricht also Christus die terra ab, mit dieser aber (nach 26, 12) terrenum pondus und damit auch humanum corpus! Die positive Antwort aber wäre: Christus ist seinem Wesen nach spiritus, immortalis substantia, caelestis levitas, caelestis vigor, also ganz dieselben Vorstellungen, unter denen er sich das Göttliche überhaupt denkt. Wir müssen demnach allerdings zugestehen, dass er Christus für einen Gott hält, aber wir fragen, ist die Weise, wie er sich diesen Gott denkt, identisch mit den Vorstellungen, „welche die Apostel von Christo hatten und noch heute die gläubige Christenheit“? — Wir meinen, das ist reiner Dokerismus. „Christus, ein Gott,“ so hatte der Christ von aussen vernommen, „Christus, ein Ueberirdischer,“ so lautete die Erklärung im Kopfe des Philosophen. — Man sieht, die kleine Stelle verräth doch noch mehr, als man anzunehmen pflegte, freilich erst, nachdem man in seinen philosophischen Gedankenkreis eingetreten ist. Minucius verschweigt daher seine Ansicht nicht, nur ist es seine persönliche, nicht die allgemein christliche oder wenigstens apologetische Ansicht. Diese aber ist ganz erklärlich, wenn man nur nicht gleich den fertigen Christen bei ihm voraussetzt. Wie und was mag wohl ein Heide bei der ersten Botschaft „Christus ein Gott“ gedacht haben? Wird er gleich auf die gelehrten Erklärungsversuche eines Justin, Athenagoras, Tatian gekommen sein? Das Natürlichste ist, dass er die Erklärung zunächst bei sich selber suchte und zurückgriff auf die Vorstellungen, die er von den Göttern oder dem Göttlichen bereits in sich trug. Ganz so hier. Minucius bedient sich in der That seiner bisherigen, vorwiegend heidnisch-philosophischen Vorstellungen vom Göttlichen, die Stelle ist in Wirklichkeit

Ausdruck einer eigenen Reflexion über den räthselhaften Gottmenschen und somit ein Beleg, dass Minucius einer von denen ist, die nach Athenagoras über Gott nicht von Gott, sondern von sich haben lernen wollen. Er kommt so freilich über eine bloße Negation nicht hinaus. Er vermittelt sich Christi Gottheit, indem er, wie auch 18, 7, von der Menschlichkeit abstrahirt. Eine Anfangsstufe der Spekulation! Etwas Christlich-Positives über Christi Person, sein Verhältniss zum Vater oder gar seiner göttlichen zur menschlichen Natur zu bringen, war er nicht im Stande. Hätte er eine positive Erörterung gegeben, so würde diese nur zu obigen philosophischen Anschauungen geführt haben, die zunächst auf den einen und wahren Gott passen und überdies eine Erklärung des Verhältnisses zu diesem gar nicht zulassen. Eine Auseinandersetzung aber des gegenseitigen Verhältnisses der beiden Naturen wäre einestheils überflüssig gewesen, sofern Minucius in jedem Menschen eine menschlich-sterbliche und göttlich-unsterbliche Natur annimmt, hätte ihn aber wohl andernteils zum platonischen Dämon geführt. — Sollen wir daher unsrerseits für die Kürze wie die Schwerfälligkeit dieser Stelle eine Erklärung abgeben, so kann es nur die sein, dass er zu einer weiteren Exposition über die Person Christi gar kein Verständniss besass. Die Person Christi wie auch die Geister vor ihrem Fall (c. 26, 7 f.) stehen zu Gott ausser jeglichem Zusammenhang. Sie haben in diesem wesentlich monotheistischen System weder Raum noch Bedeutung. Hiervon noch weiter unten.

Von jetzt ab gelangen wir auf ethisches Gebiet. Grundsätze wie: *non facie, sed mente pudorem praestamus* (31, 5), welcher sich in *unum matrimonium, in pudica convivia, castus sermo, castius corpus, in corporis virginitas perpetua* erweist, sowie ihr *pulchrum genus vivendi*, das sich (7) in *innocentia, modestia, mutuus amor* zeigt, leiten dahin über. Christlich ist hier ausser dem *mutuus amor* die Bezeichnung *fratres* und zwar *ut unius Dei parentis homines, ut consortes fidei, ut spei coheredes*. Die Stelle erinnert sogar an I. Petr. 3, 7. Indess sind wir auch hier nicht im Stande etwas Bestimmtes über den Inhalt der *fides* wie der *spes* anzugeben. Gewiss nur ist aus dem ersten Gliede, dass die Brüdergemeinschaft zunächst auf dem schöpfungsmässigen Naturgrunde, nicht auf dem Boden des gemeinsamen Heiles erwächst. Als Geschöpfe des einen Gottes, nicht aber als Erlöste oder als Brüder Christi nennen sie sich Brüder. Diese Auffassung muss dann auch auf den Inhalt der *fides*

und spes von Einfluss sein. Dies wird sich in der That später herausstellen.

Mehr scheint der christliche Charakter im Folgenden hervorzutreten. Minucius geht näher auf das Verhältniss von Gott zu Mensch ein und nennt Letzteren Gottes Ebenbild *simulacrum*. (32, 1). Dies klingt biblisch vgl. Gen. 1, 26—27. Noch mehr aber das Folgende, wo auf eine innerliche Gottesverehrung gedrungen wird: *Nonne melius in nostro immo consecrandus est pectore? — litabilis hostia est bonus animus et pura mens et sincera conscientia*. Dies wird erklärt mit: *igitur qui innocentiam colit Deo supplicat, qui justitiam, Deo libat, qui fraudibus abstinet, propitiat Deum, qui hominem periculo subripit optimam victimam caedit*. Auch in diesen Sätzen glaubt man durchaus christlichen Einfluss zu erkennen, namentlich an ψ 50 (51) 18 f. erinnert zu werden. Doch was sollen wir dazu sagen, wenn wir bei Seneca, ja den Stoikern überhaupt auf ganz gleiche Gedanken stossen? So heisst es bei Seneca (Lact. inst. 6, 25, 3) wörtlich: *vultisne vos Deum cogitare magnum et placidum... non immolationibus et sanguine multo colendum... sed mente pura, bono honestoque proposito... non templa illi congestis in altitudinem saxi exstruenda sunt: in suo cuique consecrandus est pectore*. Aehnlich auch ep. 95, 47: *Deum colit qui novit... vis Deum propitiare? bonus esto. Satis illos coluit quisquis imitatus est*. Ja bereits vor Seneca und dem Christenthum lässt Cicero den Stoiker Balbus aussprechen: *cultus deorum est optimus idemque castissimus atque sanctissimus plenissimusque pietatis, ut eos semper pura, integra, incorrupta et mente et voce veneremur* (de n. D. II. 28, 71). So können wir diesen stoischen Einfluss auch in dem *Simulacrum* erkennen. Minucius fasst dies absolut: jeder Mensch ist Bild Gottes. Er weiss aber nicht, dass die Ebenbildlichkeit dem Menschen durch den Sündenfall verloren gegangen war, wie es doch Tatian ausführt*). Er zeigt uns vielmehr noch in dem nämlichen Capitel die enge Verwandtschaft des Menschen mit Gott, indem er — echt stoisch — Gottes Allgegenwart mit Infusion erklärt: *non tantum nobis proximus, sed infusus est* 327 (vgl. auch das Interesse für die stoische Stelle 19, 2). Also wieder die materielle Grundanschauung! Wie sehr diese auch formell der Senecas ähnelt, zeigt Sen. ep. 41, 1: *prope est a te Deus, tecum est, intus*

*) Tatian ad. Gr. c. 12. 13. 15.

est. Auch bei den andern, den späteren Stoikern, kommt der Gedanke öfter vor. So nennt Epiktet wie Marc Aurel die Seele wiederholt ein *ἀπόσπασμα θεοῦ*, letzterer auch *μέρος, ἀπόρροια*, ja XII. 26 den *νοῦς* des Menschen sogar *θεός*. Vgl. Zeller III, 1 S. 200. Aus dieser Gottverwandtschaft leitete Posidonius die Befähigung der Seele zur Erkenntniss der Natur und Cicero die Allgemeinheit des Glaubens an Gott ab. Aehnlich, wie wir sahen, Minucius, 17, 3. 16, 5 und auch hier.

Eine weitere Aehnlichkeit mit Seneca bietet der Gedanke am Anfang des nächsten Capitels: *reges statum regni sui per officia ministrorum diversa noverunt: Deo indiciis opus non est: non enim solum in oculis eius, sed in sinu vivimus* 33, 1. Man vergleiche Sen. ep. 95, 47: *non quaerit ministros deus: quidni? ipse humano generi ministrat, ubique et omnibus praesto est...* Diese minucianische Stelle, so geringfügig sie scheint, ist doch dadurch wichtig, dass sie eine der stärksten Abweichungen von der üblichen apologetischen Lehre und zwar der Engellehre enthält. Sowohl Justin wie Athenagoras — Tatian kommt hier nicht in Betracht — lassen die Engel an der Regierung der Welt theilnehmen. Nach Athenagoras Suppl. c. 24 vgl. c. 10 hat Gott die Materie und deren Gebilde ihnen unter einem *ἄρχων τῆς ὕλης καὶ τῶν ἐν αὐτῇ εἰδῶν* überlassen. *τοῦτο γὰρ ἡ τῶν ἀγγέλων σύστασις, τῷ θεῷ ἐπὶ προνοίᾳ γεγονέναι τοῖς ὑπ' αὐτοῦ διακεκοσμημένοις, ἵνα τὴν μὲν παντελικὴν καὶ γενικὴν ὁ θεὸς ἔχη τῶν ὅλων πρόνοιαν, τὴν δὲ ἐπὶ μέρους οἱ ἐπ' αὐτοῖς ταχθέντες ἄγγελοι* (24, 19). Nach Justin II. 5 vgl. I. 6 aber hat ihnen Gott *τὴν μὲν τῶν ἀνθρώπων καὶ τῶν ὑπὸ τὸν οὐρανὸν πρόνοιαν* übergeben (II. 6, 4). Von alledem weiss Minucius nichts. Ihm ist Gott nur der *verus et solus* 27, 7. 18, 10 u. ö., *Alles in Allem, numen praestantissimae mentis, quo tota natura inspiretur, moveatur, alatur, gubernetur* 17, 4, welcher *universa quaecumque sunt, verbo jubet, ratione dispensat, virtute consummat* 18, 5, welcher *non universitati solummodo, sed et partibus consulit*. Das ist seine eigentliche Grundanschauung, die durch die ganze Apologie hindurchgeht und auch an unsrer Stelle hervortritt. Man kann da recht deutlich sehen, was an seiner Anschauung Substanz und was Accidens ist. Es liesse sich nämlich 26, 7 aus der Existenz gefallener Geister (*sunt enim etc.*) auf die Schöpfung von Engeln und von dieser wieder auf einen Zweck derselben, eine ähnliche Theilnahme am Weltregiment, wie bei Justin und Athenagoras, schliessen. Doch

wie ist das mit unserer Stelle, wie mit der ganzen bisherigen Anschauung zu vereinigen? Das ist die Frage, die Minucius selber offen gelassen hat, Weit entfernt, den Leser über die ursprüngliche Weltstellung der „unreinen Geister,“ vor allem über ihr ursprüngliches Verhältniss zu Gott aufzuklären — die wenigen Andeutungen c. 26 besagen nicht viel —, referirt er nur, was er von ihnen nach dem Falle weiss und verweilt mit Vorliebe bei jenen Anekdoten (durch's ganze c. 27), für welche er wohl bei seinen abergläubischen Zeitgenossen ein grosses Interesse voraussetzen durfte, für die wohl bei ihm selbst ein solches vorhanden war. Man merkt es der umständlichen Schilderung dämonischer Einwirkung (c. 27) an, wie wenig hier der wissenschaftliche Standpunkt zu seinem Rechte kommt und andererseits an der mageren philosophischen Exposition in c. 26, wie wenig tief diese Dämonologie in seine ganze Grundanschauung eingedrungen ist. Sie ist ein aufgefropftes Reis. Ein Blick aber auf das Wort Senecas zeigt, wie leicht dessen Anschauung mit der unseres Apologeten zu vereinigen ist und wie sehr hier der heidnisch-philosophische Einfluss den christlich-apologetischen überwiegt.

Der nämliche Einfluss macht sich noch in einem Andern geltend. Obiger *bonus animus*, jene *pura mens* und *sincera conscientia* 32, 2 werden durch den Satz näher bestimmt 32, 3: *igitur qui innocentiam colit, Deo supplicat, qui justitiam, Deo libat, qui fraudibus abstinet, propitiat Deum, qui hominem periculo subripit, opimam victimam caedit : sic apud nos religiosior est ille qui justior*. Sie werden hier durch die vier Tugenden: Unschuld (Unschädlichkeit), Gerechtigkeit, Ehrlichkeit und sogar Hilfsbereitschaft (Menschenliebe?) erläutert und die ganze religio, der eben jener *bonus animus* etc. eignen soll, mit der *justitia* identifizirt. Damit aber wird die Religion zur Moral, werden die Pflichten gegen Gott zu Pflichten gegen die Menschen, welche beide sich zusammenfassen in der einen Forderung der Gerechtigkeit. Auch dieser Gedanke, wonach die Religiosität oder Frömmigkeit der eine Theil der Gerechtigkeit sei, deren anderer sich auf die Menschen erstreckt, ist echt philosophisch. Es ist die doppelte Gerechtigkeit der Stoiker, welche diese von Plato herübergenommen haben. Vgl. Zeller III, 1. S. 241, 2. Ueberweg I. S. 156. Diese Anschauung geht übrigens durch die ganze Apologie. Sie zeigt sich in Verbindungen wie *impii injustique* 35, 4, *innoxie religioseque* 33, 3, besonders in

der Erörterung über die Gottlosigkeit der römischen Vorfahren c. 25. Mithin abermals philosophische Münze unter christlichem Gepräge (*sic, apud nos*).

Noch mehr verräth sich der Philosoph im Folgenden. Es handelt sich um die Unsichtbarkeit Gottes 31, 4: *Deum quem colimus nec ostendimus nec videmus*. Minucius steigert den Satz, indem er hinzusetzt: *immo ex hoc Deum credimus, quod eum sentire possumus, videre non possumus*. Da haben wir das Wesen christlichen Glaubens, wie es Hebr. 11, 1 ausgesprochen ist: eine innere Ueberzeugung unabhängig, ja entgegengesetzt aller sinnlichen Wahrnehmung. Wird dieses Princip aufgestellt, so wird — muss man erwarten — obiges Erkenntnissprinzip *ratio et sensus* nothwendig aufgehoben. Minucius thut weder das eine noch das andere. Er mildert die Schroffheit des Satzes mit einem Zwischensatze: *quod eum sentire possumus* und beweist damit, wie wenig er vom alten Principe lassen, wie wenig er gegen obiges *per quae Deum adgnosimus, sentimus* 17, 2 verstossen will. Er geht aber noch weiter. Es folgt nämlich die Begründung des ausgesprochenen Satzes: *in operibus enim eius et in mundi omnibus motibus virtutem eius semper praesentem aspiciamus, cum tonat, fulgurat, fulminat, cum serenat*. Was hat er begründet? — Offenbar nicht das *credimus quod videre non possumus*, sondern vielmehr das *credimus quod sentire possumus*, nämlich Gott in seiner Kraftäusserung, womit er sich uns bemerkbar macht. Da aber dieses *sentire Deum* nur durch obiges *sensus et ratio* möglich ist, so hat Minucius nicht das christliche Glaubensprinzip, sondern sein altes philosophisches Erkenntnissprinzip, also grade das Gegentheil nachgewiesen. Der Glaube wird zum Wissen, die innere Ueberzeugung zur äusseren Ueberführung. *)

Man ersieht hieraus, welchen Einfluss der Philosoph auf sein christliches Verständniss ausgeübt hat. Ohne Zweifel ist ihm der christliche Satz von aussen zugegangen, er hat ihn aber nicht verstanden. Er vermischte das Neue mit dem Alten, so dass zuletzt jenes von diesem nicht mehr zu unterscheiden war.

Freilich so ganz ohne Reaction gegen das philosophische Fundament geht es nicht ab. Grade eine Betrachtung über Gottes

*) Charakteristisch dafür sind die Ausdrücke für die Bekehrung des Cäcilius: *fateor de providentia, de Deo cedo et de sectae jam nostrae sinceritate consentio*.

Grösse war im Stande, die Machtvollkommenheit des menschlichen Erkenntnisvermögens herabzusetzen. Geschah letzteres bezüglich der sinnlichen Wahrnehmung schon vorher, so erleidet jetzt das Erkenntnisprinzip auch an seinem andern Theile, dem Denkvermögen einen Stoss. Minucius vergleicht 32, 8 Gottes Allgegenwart mit den überall hinreichenden Strahlen der Sonne. Quanto magis, so schliesst er, Deus . . . speculator omnium, a quo nullum potest esse secretum, tenebris interest, interest cogitationibus nostris, quasi alteris tenebris! Wenn Minucius 1, 4 die Weisheit, speziell die christliche, lux nennt, hierauf 16, 5 allen Menschen Weisheit, also einen Theil jener lux immanent sein lässt, hier aber von einer Finsterniss, ohne Bild, von der gänzlichen Unzulänglichkeit menschlichen Denkens spricht, so ist dies eine plötzliche Verleugnung des alten Prinzipes, wenigstens nach seinem zweiten Bestandtheil, der ratio. Es ist dies psychologisch und dogmatisch von Interesse. Gleichwie er nämlich oben in philosophischer Ueberlegenheit über die heidnische Thorheit den Christen vergass, so vergisst er jetzt in christlicher Demüthigung unter den überwältigenden Gedanken von Gottes Allgegenwart — den Philosophen. Zugleich aber tritt an Stelle des alten Prinzipes, der Machtvollkommenheit oder doch Selbstständigkeit der Vernunft, ein neues Prinzip, die von aussen kommende Offenbarung. Ist unsere menschliche Vernunft Finsterniss, so kann sie nur des Lichts von draussen warten.

Dieses Offenbarungsprinzip, so unvermittelt es hier herein gebracht wird, so folgelos es gleichsam wieder versprüht, tritt doch im Weiteren dem Vernunftprinzip bewusst entgegen. Sehen wir zu, welches von beiden den Sieg behält.

Ersteres deutet sich schon an in dem heilsgeschichtlichen Excurs über das Schicksal der Juden. Ganz den jüdischen Quellen gemäss wird deren Geschichte unter den Gesichtspunkt göttlicher Erziehung gestellt und ihr gegenwärtiges trauriges Geschick auf ihren Ungehorsam zurückgeführt. Die Heilsvorschriften praecepta salubria waren da, auch die zukünftigen Strafen für deren Uebertretungen vorausgesagt, doch jene wurden nicht befolgt und darum diese nicht vermieden. Hier erscheint der Gedanke der Offenbarung zugleich mit dem des Heils, welche beide dem Menschen von aussen her kundgeben, was ihm nütze sei, sein eigenes Suchen daher strenggenommen überflüssig machen. Doch bleibt diese Offenbarung hier noch auf das Gebiet jüdischer Geschichte be-

schränkt. Ausgedehntere Geltung erlangt dieselbe in den Weissagungen der Propheten, wie sie im Folgenden der Philosophie und deren Erkenntnisprinzipie gegenüber treten. Die hierher gehörigen Stellen erfordern eine nähere Berücksichtigung. Es ist vom Weltbrand die Rede (c. 34). Minucius, statt auf die Klage des Cäcilius einzugehen, dass durch diese Lehre alle Naturgesetze bedroht würden, entgegnet nur dies: *Ceterum de incendio mundi aut improvisum ignem cadere aut . . . non credere vulgaris erroris est.* Denn, so fährt er fort, *quis sapientium dubitat, quis ignorat omnia quae orta sunt occidere, quae facta sunt, interire?* Nachdem er von diesen sapientes die Ansichten der Stoiker, Epikureer und des Plato angeführt hat, schliesst er mit der Recapitulation: *ita d. h. weil es die Philosophen alle behaupten, nil mirum est, si ista moles ab eo, quo exstructa est, destruat.* Diese Lehre ist ihm demnach wesentlich durch die Autorität der Philosophen gewiss. Urplötzlich aber, wie ein Einfall, kommt im nächsten Satze die Autorität der Propheten herein, aus deren Weissagungen jene die Wahrheit erborgt und entstellt haben: *animadvertis philosophos eadem disputare quae dicimus, non quod nos simus eorum vestigia subsecuti, sed quod illi de divinis praedictionibus profetarum umbram interpolatae veritatis imitati sunt.* Mit diesem Satze macht Minucius seine ganze vorausgehende Argumentation zu nichte. Zugleich aber ist dies ein bewusster Gegensatz zur Philosophie überhaupt. Er wirft die Waffen der Vernunft weg und greift zu den neuen der Offenbarung. — Indess, ob auch im nächsten Satze noch diese prophetische Autorität der philosophischen überstellt wird, so fällt es ihm nicht im Entferntesten ein, auch nur ein Wort des vorher Gesagten zurückzunehmen, erklärt es vielmehr darauf ausdrücklich für sein propositum, darzustellen, *etiam in hoc sapientes vestros in aliquem modum nobiscum consonare, d. h. also, sich auf jene interpolata veritas weiter zu berufen, ja fährt im Folgenden, in Ausdrücken wie quis tam stultus aut brutus, ut audeat repugnare* ruhig fort mit der Vernunft statt mit der Offenbarung zu operiren. Er hebt die alten Waffen wieder auf. Er weiss mit den neuen nichts anzufangen.

Die Argumentation für die Lehre vom Weltbrand fällt ziemlich kärglich aus*). Wir sahen schon, es ist eigentlich nur ein Grund,

*) Unzweifelhaft ist diese dem Apologeten schwer gefallen. Es scheint, er hat sich nicht anders helfen können, als indem er den Unglauben daran für vulgaris

den er angiebt, nämlich, dass mit dem Anfang der Welt auch ihr dereinstiges Ende gesetzt sei. Genauer genommen aber ist der Grund nur die Uebereinstimmung in der philosophisch gebildeten Welt, in der, wie auch Minucius andeutet, der Weltuntergang ein unumstössliches Dogma gewesen zu sein scheint. Der Umstand, dass Minucius hierauf fussend es gar nicht für nöthig hält (*ita nil mirum*), einen Untergang alles Geschaffenen erst nachzuweisen, beweist daher, wie sehr Minucius selbst in diese Ansicht verstrickt und von der Philosophie noch abhängig war. Dieselbe oberflächliche Argumentation widmet er der Auferstehungslehre 34,10: *ceterum quis tam stultus est, ut audeat repugnare, hominem a Deo, ut primum potuisse fingi, ita posse denuo reformari? nihil esse post obitum, et ante ortum nihil fuisse? sicut de nihilo nasci licuit, ita de nihilo licere reparari?* Wie dort der Anfang der Welt ihr Ende wahrscheinlich machte, so hier auch ihren zweiten Anfang, ihre Neubildung (*reformari, reparari, iterari*). Unter dieser Vorstellung erscheint bei Minucius die Auferstehung in beiden Reden vgl. 11, 2 und 8. Er denkt sie sich sicher nach dem Weltbrand, denn dann erst kann von einem *perpes vita* oder *sempiterna poena* die Rede sein vgl. 11, 5 und 2. Bis zum Weltbrand bewahrt Gott als der *custos elementorum* den in seine Urbestandtheile aufgelösten Leib des Menschen auf (vgl. auch *reservatur* 10). Hierauf beginnt die Neubildung des Menschen. Diese Anschauung führt uns auffallend nahe an die stoische Lehre von dem Kreislauf der Dinge und die damit verbundene Lehre von der *παλιγγενεσία* oder *ἀποκατάστασις*, wonach das Urwesen den Stoff, den es als seinen Leib von sich ausgesondert hat, allmählich wieder in sich aufzehrt, um dann nach einem allgemeinen Weltbrand

error erklärte und positiv sich auf die öffentliche Meinung unter den Gebildeten berief. Dadurch wurde nun die Entgegnung nahe gelegt, dass die Christen diese Lehre von jenen adoptirt hätten. Dieser will Minucius hier vorbeugen, und recurrt deshalb auf die landläufige selbst von Heiden getheilte Ansicht (z. B. Numenius mit seinem *Πλάτων, ἀττικίζων Μωϋσῆς* vgl. Ueberweg I. S. 286), dass im Gegentheil die Philosophen die Entlehner gewesen seien. Das kommt ihm aber nicht vom Herzen. Formell wie inhaltlich macht es den Eindruck einer unverdauten Weisheit, die er der Zeit nachredet und hier im plötzlichen Bewusstwerden seines Gegensatzes zur Philosophie an den Mann bringt. So plötzlich wie sie gekommen, verschwindet sie auch. Nur einmal noch werden in der Apologie Propheten genannt 35, 1. Dabei ist aber fraglich, ob jüdische oder heidnische gemeint sind. Vgl. auch Dräseke „Brief an Diognet“ in Jahrb. für prot. Theol. 1881. II. S. 272.

ἐκπύρωσις die Welt von Neuem zu bilden vgl. Zeller III. 1, V. 152 und 155. Auch wird es schwer, nach dem was er über den Zwischenzustand vom Tode bis zur Auferstehung sagt, einer materialistischen Auffassung seiner Lehre zu entgehen. Nach 26, 12 zeigt sich der Apologet gegenüber dem Trichotomiker Tatian (c. 12) als Dichotomiker (spiritus et corpus), theilt andererseits die allgemein apologetische Lehre von der ἀνάστασις τῆς σαρκός, der Auferstehung des alten Leibes. Er selbst erklärt sich 34, 6 gegen die Isolirung des Geistes vom Körper sowie ein Uebergehen desselben in andere Körper, womit er sich demnach für schon genannte dritte Möglichkeit des Fortlebens entscheidet, vgl. 11, 7. Die Frage nach dem Wie dieser Möglichkeit freilich lässt er offen. Wie nämlich verhält sich der Geist, nach 26, 12 immortalis substantia, caelestis levitas, zu dem nur in seinen Elementen noch bestehenden Leib? Ist er überhaupt noch von den Elementen verschieden? Hat sich wohl gar der Leib in die Geistessubstanz aufgelöst? Oder ruht auch diese neben den Urstoffen im Schoosse des göttlichen custos elementorum? — Das sind Fragen, die nicht beantwortet sind, deren Antwort aber, nach aller Voraussicht, wohl nicht ohne stoisch-materialistischen Character ausfallen würde. Das göttlich-materielle Urwesen liegt zu nahe, schon nach 26, 12, als dass man an ihm vorüber könnte. — Wie tief nun diese Auferstehung als allgemeines Gesetz in der Natur begründet sei, das sagt uns schliesslich noch die folgende Analogie aus der Natur: vide quam in solacium nostri resurrectionem futuram omnis natura meditetur. Sie erinnert zugleich an die stoische Teleologie, wonach alles für den Menschen geschaffen sei, indem sie auch den Trost der allgemeinen Naturauferstehung in diese Zweckbeziehung der Schöpfung auf den Menschen mit aufgenommen sein lässt.

Also auch diese Lehre ist mit stoischen Grundvorstellungen in Zusammenhang zu bringen. Den eigentlichen Kern derselben, die Auferstehung Christi, hat der Apologet nicht getroffen.

Der folgende, an die Auferstehung sich anlehrende Gedanke des göttlichen Gerichts trägt aber unfraglich christliches Gepräge. Der Wortlaut*) führt sogar auf eine neutestamentliche Stelle: II. Petr 3, 9 zurück, obgleich sie auch bei Justin I. 28, II. 7 sich findet und sich daher auch als christlichen locus communis auffassen

*) quorum error augetur et in saeculo libertate remissa et Dei patientia maxima, cuius quanto iudicium tardum, tanto magis justum est.

lässt. Minucius geht näher darauf ein und verweilt mit besonderem Interesse bei der Schilderung der Gerichtsstrafen 35, 3. Es ist interessant, wie er sich dieselben vorstellt: *illic sapiens ignis membra urit et reficit, carpit et nutrit. Sicut ignes fulminum corpora tangunt nec absumunt, sicut ignes Aetnaei montis et Vesuvi montis et ardentium ubique terrarum flagrant nec erogantur: ita poenale illud incendium non damnis ardentium pascitur, sed inexesa corporum laceratione nutritur.* Woher weiss er das so genau? Aus der Schrift gewiss nicht. Ein Blick aber auf Vergil Aen. VI, 559—637 und Homer Od. XI, 558—600 lässt uns die Quelle erkennen. Es ist die alte heidnische Vorstellung von der Ewigkeit göttlicher Strafen, nach der einem Tityon die angefressene Leber stets wieder nachwuchs, nach der einem Sisyphus der tückische Marmor immer wieder entrollte, vor dem lechzenden Tantalus das Wasser eiligst verlief oder den Danaiden das Fass sich nimmer füllen wollte. Nach diesen Vorstellungen denkt er sich auch die Strafwürdigen im ewigen Feuer des christlichen Gerichtes: die angebrannten Theile des Körpers wachsen wieder nach und das Feuer erhielt so immer neue Nahrung. Es ist dies also wieder eine subjective Reflexion, die durch heidnische Anschauungsweise veranlasst wurde.

Dogmatisch wichtig ist nun die Frage, wer bestraft wird. Minucius antwortet darauf ausdrücklich im Folgenden: *ei qui Deum nesciunt* 35, 4 und fügt als Erläuterung hinzu: *cum parentem omnium et omnium dominum non minoris sceleris sit ignorare quam laedere.* Eine Vergleichung mit 17, 3: *ignorare nec fas nec licet etc* zeigt uns, dass wir es hier mit dem alten stoischen Grundsatz der Benutzung natürlicher Anlage zu thun haben, speziell der Forderung mit den gottgegebenen, zur Gotteserkenntniss bestimmten Naturanlagen (*sensus, ratio* 16, 5, *vultus erectus, suspectus in caelum* 17, 2) Gott wirklich auch zu erkennen. Diese Forderung ist hier zur höchsten Pflicht erhoben, deren Verletzung, als ein Sacrilegium (17, 3), auch die höchste Strafe nach sich zieht. Daher geht Minucius zu dem Satze fort 35, 5: *inperitia Dei sufficit ad poenam.* Die nothwendige Consequenz dieses stoisch gefärbten Satzes wäre nun: *notitia Dei sufficit ad veniam.* Allein, das scheint ihm doch etwas zu viel behauptet zu sein. Darum schwächt er es ab in dem Satze, dessen Schwerfälligkeit man anmerkt, dass sein Inhalt dem Schreiber zu

schaffen gemacht hat*): et quamquam inperitia Dei sufficit ad poenam, ita, ut notitia prosit ad veniam, tamen si vobiscum Christiani comparemur, quamvis in nonnullis disciplina nostra minor est, multo tamen vobis meliores deprehendemur. Er hält zur rechten Zeit zurück. Da jene Grundforderung an die Menschen wesentlich an deren Intelligenz gerichtet war, Minucius aber auf diesem Gebiete die heidnische Philosophie dem Christenthum noch immer überlegen weiss, so sieht er sich gezwungen, jene Forderung nicht ausschliesslich auf die Intelligenz zu beschränken. Es kommt vielmehr noch etwas hinzu, wie dieser Satz beweist und die nächsten Sätze uns erklären. Um nämlich multo meliores als die Heiden befunden zu werden, muss mit der notitia Dei noch der schuldlose Lebenswandel der Christen verbunden sein (35, 6): vos enim adulteria prohibetis et facitis, nos uxoribus nostris solummodo viri nascimur: vos scelera admissa punitis, apud nos et cogitare peccare est: vos conscios timetis, nos etiam conscientiam solam, sine qua esse non possumus: denique de vestro numero carcer exaestuat, Christianus ibi nullus etc. Es ist also speziell Keuschheit, Herzensreinheit, ein gutes Gewissen gemeint, die wir, als die rechte Gesinnung zumeist den Nebenmenschen gegenüber, zusammenfassen können in obige justitia gegenüber der heidnischen injustitia, impietas, 32, 3 vgl. 35, 4. Diese justitia kommt sonach zur notitia Dei hinzu, ergänzt deren prodest zu einem sufficit. Sollen wir dies christlich-dogmatisch ausdrücken, so ergiebt sich der minucianische Satz: Gotteserkenntniss und Gerechtigkeit erwirken das Heil: notitia (Dei) et justitia justificant. Dadurch gelangt obiger Satz 32, 3: sic apud nos religiosior est ille qui justior zu seinem Rechte, erleidet aber auch andererseits eine Beschränkung, indem eben die Pflichten gegen Gott nicht nur identisch sind mit denen gegen die Menschen, sondern neben letzteren die notitia Dei als eine besondere, ja als erste der Pflichten sich hervorhebt. Wir sehen hierin wieder eine deutliche Vermischung philosophischer und christlicher Anschauungen. Christlich ist die Erwartung eines zukünftigen Gerichtes. Philosophisch ist die Forderung der notitia Dei auf Grund der gegebenen Naturanlagen. Vermischung beider ist die grade auf die inperitia Dei gesetzte Feuerstrafe und die theilweise (prodest) auf die notitia,

*) Dass letzteres überhaupt der Fall gewesen ist, deutet er selbst an 39, 1: ea quae facilius est sentire, quam dicere etc.

andernteils auf die *justitia* gesetzte Erwirkung der Gnade. Man merkt, es fehlt dieser Auffassung jede Spur des christlichen Begriffes der Sünde; die *justitia civilis* ist ihrestheils identisch mit *justitia coram Deo*. Darum fehlt hier auch der eigentliche Begriff der Gnade d. i. Vergebung aus grundloser Barmherzigkeit, sondern *venia* ist mehr die Errungenschaft menschlicher Verdienste, gleichsam eine juristische Gegenleistung Gottes für vorher vom Menschen erfüllte Bedingungen.

Diese Aeusserlichkeit der Auffassung tritt noch mehr hervor in der folgenden Erörterung über das *Fatum*, das Minucius gegenüber dem cäcilianischen Vorwurf der Identifizierung mit Gott durchaus von Gott unterscheidet (vgl. 11, 6): *quid enim aliud est fatum quam quod te unoquoque nostrum Deus fatus est? qui cum possit praescire materiam, pro meritis et qualitatibus singulorum etiam fata determinat.* Gott sieht die ethische Beschaffenheit (*materiam*) der Menschen und in ihr alle zukünftigen Handlungen wie deren sittlichen Werth (*merita et qualitates*) gleichsam implicite voraus*) und bestimmt darnach die Gesicke (*fata*), d. h. nach 11, 5 entweder *poenam sempiternam* oder *vitam beatam et perpetem*. Denn 36, 1: *sit sors* (äussere Lebensstellung) *fortuna*, *mens tamen libera est et ideo actus hominis, non dignitas judicatur.* Sonach ist Jeder seines Glückes oder besser seines Seelenheiles Schmied. Er vermag es mittelst der ihm gelassenen Freiheit, er soll es mittelst, ja wegen der ihm gegebenen göttlichen Vernunft 16, 5 und wegen der für ihn geschaffenen Welt 17, 6. 38, 1 u. ö. — Man erkennt hier abermals ein Verhältniss der Menschen zu Gott, welches durch keine Sünde gestört ist, vermisst jede Spur eines inneren sündlichen Habitus und im Wesensbegriff Gottes selbst jede Andeutung von Heiligkeit, die der Sünde feindlich gegenübersteht. Es ist hier nur der gerechte Gott, der auch von den Menschen neben der Erkenntniss von ihm nur Gerechtigkeit verlangt. Sind diese Bedingungen erfüllt, so hat ein Jeder Anspruch auf's ewige Leben.

Von nun an werden die christlichen Anklänge immer seltener. Nachdem die spezifisch christlichen Grundgedanken, wie das

*) Ein paulinischer Gedanke Röm. 8, 29. 11, 2 *οὓς προέγνω καὶ προώρισεν συμμόρφους τῆς εἰκόνης τοῦ υἱοῦ αὐτοῦ* etc. Dass dieser Gedanke aber zu damaliger Zeit allgemein war, scheint Justin I. 44 und Tatian ad Gr. 7 im Verein mit unserer Stelle zu beweisen. Eine direkte Abhängigkeit braucht ebensowenig, wie bei der Petrusstelle in c. 34, 12, angenommen zu werden.

Glaubens- und Offenbarungsprinzip endgültig überwunden sind, breiten sich die philosophischen immer weiter aus und lassen einige, reminiscenzartig auftauchende, christliche Gedanken nicht aufkommen. Die letzten Capitel athmen durchweg römisch-stoischen Geist. Die Armuth gilt nicht als infamia, sondern als gloria, weil durch sie die Geisteskräfte gestählt werden 36, 3. Wahrhaft arm ist nur der Ungenügsame, der nie genug hat; wahrhaft reich aber, der keine Bedürfnisse kennt: qui non eget, qui non inhiat alieno, qui Deo dives est*). Es folgt sogar ein Wort Senecas: nemo tam pauper potest esse quam natus est**). Ferner gilt die Armuth nicht nur für eine Tugend (gloria), sondern auch für ein Glück: igitur ut qui viam terit, eo felicius quo levior incedit... non sub divitiarum onere suspirat. Darum verachten die Christen den Reichthum und streben lieber nach innocentia und patientia; wäre er es werth, sie würden Gott darum bitten. Aehnlich Seneca prov. 6, 1: numquid hoc quoque aliquis a deo exigit, ut bonorum virorum etiam sarcinas servet? remittunt ipsi hanc deo curam, externa contemnunt. Democritus divitias projecit onus illas bonae mentis existimans. — Mehr aber als beim Ertragen von Armuth offenbart sich stoische Denkweise beim Erdulden des Unglückes. Hier glaubt man keinen Christen, sondern einen Römer zu hören: et quod corporis humana vitia sentimus et patimur, non poena, militia est. fortitudo enim in infirmitatibus roboratur et calamitas saepius disciplina virtutis est. vires denique et mentis et corporis sine laboris exercitatione torpescunt. Eine Vergleichung mit Senecas de providentia c. 2-4 lässt die Geistesverwandtschaft erkennen. Man liest hier ganz ähnliche Grundsätze: marcet sine adversario virtus 2, 4 oder calamitates terroresque mortalium sub jugum mittere proprium magni viri est 4, 1. Ganz evident aber ist die Aehnlichkeit 4, 6: calamitas virtutis occasio. Hieran reiht sich im Octavius der andere stoische Gedanke von der Erprobung des Menschen im Unglück, womit Minucius dem Einwurf des Cäcilius begegnet, als könnte und wollte Gott nicht helfen (9):

*) Vielleicht eine biblische Reminiscenz Luc. 12, 21.

**) Sen. prov. 6, 6. Der daran gefügte Gedanke: aves sine patrimonio vivunt et in diem pascuntur könnte an die Bergpredigt erinnern Matth. 6, 26. Dem daselbst ausgesprochenen Gedanken von der gleichmässigen Fürsorge Gottes für alle seine Geschöpfe hätte jedoch Minucius sofort die echt stoische Wendung von der endgültigen Fürsorge Gottes für die Menschen gegeben: et haec nobis tamen nata sunt.

er mit dem Hinweis auf ihre zukünftige wie gegenwärtige Glückseligkeit: *quieti, modesti, Dei nostri liberalitate securi spem futurae felicitatis fide praesentis eius majestatis animamus. sic et beati resurgimus et futuri contemplatione jam vivimus.* Die Sätze sind von Interesse. Sie erschliessen uns einen Einblick in sein ganzes Christenthum. Glaube, wie wir sahen, im Verein mit der Tugend, Hoffnung, Glück, diese charakterisiren den Christen. Der Glaube, seinem Wesen nach Erkenntniss, ist, wie wir jetzt endlich bestimmt erfahren, seinem Inhalt nach die Erkenntniss von dem einen Gotte. Letzterer tritt den Menschen in dreifacher Gestalt gegenüber: Als der Welt Schöpfer (*parens*), Erhalter (*providentia*) und als ihr Zerstörer (c. 34), womit er zugleich zum Richter der Menschen wird (c. 35). Vor diesem Richter ist neben einem tugendhaften Leben voll Keuschheit, Unschuld, namentlich Gerechtigkeit, der christlichen Cardinaltugend, die zugleich den Kern aller Frömmigkeit bildet, vor allem die *notitia Dei* nothwendig zur Vermeidung der zukünftigen Gerichtsstrafen, zur Erlangung des ewigen Lebens. Diese *notitia Dei* ist hier identisch mit der *fides praesentis Dei majestatis*. Sie belebt, erwirkt ihrerseits die Hoffnung *futurae felicitatis* d. i. auf ein Fortleben nach dem Tode, frei von jenen Strafqualen, und die Hoffnung wiederum auf diese zukünftige Glückseligkeit erwirkt letztere schon hier. Die Gewissheit nämlich vor dem grössten Unglück, den ewigen Strafen, sicher zu sein, macht ruhig in gegenwärtigem Unglück. Die Gewissheit aber, des höchsten Glückes theilhaftig zu werden, macht bescheiden in den Ansprüchen auf irdische Glücksgüter und lässt die Christen mit dem sich begnügen, was ihnen die Freigebigkeit des einen Gottes bescheert hat.

So bildet das Wesentliche im minucianischen Christenthum in der That ein „moral-philosophischer Monotheismus“. Dieser Glaube an den einen Gott ist das *unum bonum quod sapimus omnes* (31, 6), macht die Christen zu Brüdern, *ut unius Dei parentis homines, ut consortes fidei, ut spei coheredes* (31, 8). Von dessen Wahrheit ist der Apologet selbst durchdrungen und glaubt dabei so fest auf ureignem christlichen Boden zu stehen, dass er — das erste Mal! — eine scharfe Grenzlinie zieht zwischen Christen und Philosophen und diesen ein Wort entgeschleudert, welches man eher einem Tatian als einem Minucius Felix zutrauen würde 39, 5: *nos philosophorum supercilia contemnimus, quos corruptores et*

adulteros novimus et tyrannos et semper adversus sua vitia facundos. Seiner christlichen Vorzüge sich bewusst, fügt er hinzu: nos qui non habitu sapientiam sed mente praeferimus, non eloquimur magna, sed vivimus, gloriamur nos consecutos quod illi summa intentione quaesiverunt nec invenire potuerunt. quid ingrati sumus, quid nobis invidemus, si veritas divinitatis nostri temporis aetate maturuit?

Hier am Schlusse spricht er es selber aus, was er für das Wesen des Christenthums hält: es ist die Wahrheit des Monothismus gegenüber dem Irrthum heidnischer Vielgötterei, die lux sapientiae et veritatis, zu der er selbst aus der Tiefe finsternen Aberglaubens emporgetaucht war (1, 4). Er ist nichts Neues, dieser eine Gott. Inmitten des Heidenthums lebte er bereits im natürlichen Volksbewusstsein, in den Werken der Poëten, in den Systemen der Philosophen, aber unter Irrthum tief versteckt (19, 4). Als nun die Menschen gebildeter und aufgeklärter zu werden anfangen (politiores et minus creduli 26, 6), da haben die Philosophen ihn gesucht, doch die Christen erst gefunden. Sie haben ihn, der als insita sapientia, als blosser Keim im Menschengeste lag, durch denkende Betrachtung des Himmels zur Reife gebracht und in einer vernunftgemässen Lehre, die sie er-sannen, der Menschheit zum Geschenk gemacht.

Diese Gesamtauffassung vom Christenthum hier am Schlusse führt uns zu dem sogenannten λόγος σπερματικός der ersten Kirchenväter, vor allem Justins. *) Es ist bekannt, dass der Name dieses λόγος σπερματικός zwar stoischer Herkunft, aber aller Beziehung auf die natürliche Entwicklung entäussert, bei Justin nur den Logos in seiner geistigen und sittlichen Einwirkung auf den Menschen bedeutet. **) Während der Logos aber bei Justin als die göttliche Vernunft aus Gott herausgehoben ist, erscheint er bei Minucius noch durchaus ungetrennt von ihm: numen praestantissimae mentis 17, 4 summus opifex et perfecta ratio 17, 6, qui omnia verbo jubet, ratione dispensat, virtute consummat 18, 7. ***) Während dort der Logos persönlich hervorgetreten ist in Christo I. 5. II. 6, liegt er hier als ein Theil Gottes (infusus 32, 7), als

*) I. 46. II. 8 u. 10. Auch Clem. Alex. Strom. V. 3. I. 5. VI. 5. Coh. VI. 59; selbst Tertullians Wort von der anima naturaliter christiana gehört hierher (de test. an. I f. Apol. 17).

**) Ueberweg II. S. 40.

***) Zur Illustrirung des Unterschiedes auch von Athenagoras diene der Hinweis auf das charakteristische διὰ τοῦ παρ' αὐτοῦ λόγον Suppl. 4, 15. 10, 20.

eine Potentialität (*ingenium* 16, 5) im Menschen selbst, die sich bewusst oder unbewusst zu einer inneren *sapientia* auswirkt. Während also dort der Mensch gewordene *Logos* die volle Wahrheit verkündet, nachdem er sich schon vorher solchen, die mit ihm gelebt hatten, theilweise kund gethan, so ist diese Wahrheit bei Minucius noch die reine stoische *πρόληψις*, die durch die Christen nur zur *ἐπιστήμη* geworden und zwar, wie wir sahen, dadurch, dass sie *caelum magis quam aurum suspexerunt* und dieses wieder durch *sensus et ratio*, durch den natürlichen *Logos*, die allgemein-menschliche Vernunft. Dies ist der prinzipielle Unterschied unseres Apologeten von Justin. Aus dieser Auffassung versteht man auch die Grundsätze: *prius nosse quam timere et colere* oder *sibi credere* 24, 2, hieraus erklärt sich die hohe Gerichtsstrafe auf die *inperitia Dei*, die grosse Pflicht der *notitia Dei*, die mit der *justitia* das Heil erwirkt, und schliesslich auch die den gebildeten Heiden gegenüber geltend gemachte Pflicht philosophischer Spekulation zum Zwecke der Auswirkung der inneren *ratio* wie zum Zwecke der Erkenntniss Gottes aus dem Weltall heraus. Wie nahe sich in alle diesem der Apologet Minucius mit dem Stoiker Balbus berühren, zeigen diese Worte II. 61, 153: *Quae contuens (d. h. den gestirnten Himmel) animus accipit ab his cognitionem deorum, ex qua oritur pietas, cui conjuncta est justitia reliquaeque virtutes, e quibus vita beata existit par et similis deorum.*)*

D. Zusammenfassende Kritik. Folgerungen.

So tritt hier am Schluss noch einmal der Philosoph in seiner ganzen Eigenthümlichkeit hervor. Im Einzelnen wie im Allgemeinen trafen wir auf eine wesentlich philosophische Auffassung des christlichen Lehrmaterials. Nur Weniges zeugte von christlichem Verständniss. Sollen wir den Philosophen an ihm näher charakterisiren, so sehen wir in ihm einen Eklektiker von überwiegend stoischer Färbung, dessen Anschauungskreis nicht allzuweit über den der Popularphilosophie hinausreicht.**)

Mit den Zeitgenossen verglichen kommt er jenen späteren, platonisirenden Stoikern am

*) Vgl. Oct. 37, 8: *absque enim notitia Dei quae potest esse solida felicitas?*

**) So ist die von Minucius so oft berührte, in ihm selbst tief gewurzelte Ansicht von dem eingepflanzten Gottesbegriff einer von den Lieblingssätzen der Popularphilosophie seit Antiochus und Cicero. Zeller III, 2. S. 207.

nächsten, zu denen ein Seneca, Epiktet und Marc Aurel zählten.*) Bei diesen war an Stelle des früheren, strengen Monismus, wonach theils materialistisch der vernünftig-göttliche Urstoff in allen Menschen sich vorfand, theils deterministisch die göttliche Vernunft alles in der Welt bestimmte, durch die trüben Erfahrungen mit der sittenlosen, unvernünftigen Wirklichkeit ein ethischer Dualismus von Vernunft und Sinnlichkeit, von Geist und Körper getreten.**) Dieser ist, wenn auch nur kurz angedeutet, bei Minucius gleichfalls zu finden vgl. 26, 12 u. 7 f. Doch steht Minucius mehr noch auf dem Boden der älteren Stoiker, indem dieser Dualismus, wie wir sahen, nicht rein ethisch, sondern seinem andern Theile nach physisch war, und indem diesem physischen Dualismus noch immer eine monistische Anschauung zu Grunde lag, andererseits aber insofern, als die aus dem ethischen Dualismus zu ziehende Consequenz auf die allgemeine Sündhaftigkeit und Hilfsbedürftigkeit der Menschen gänzlich fehlte, welche doch jene späteren Stoiker mehr oder weniger alle aussprechen***) und wodurch sie dem Christenthum bei weitem näher kommen, als er, der christliche Apologet.†)

Dieser Fond philosophischer Anschauungen ist nun auf seine Auffassung des Christenthums von grösstem Einfluss gewesen. Wir sahen bereits oben, wie ihn ein spezifischphilosophisches Interesse auf den Boden der Philosophie hinübertrieb und wie er dort das Christenthum auf dem stoischen Erkenntnissprinzip aufbaute. Im Menschen selbst liegt die christliche Wahrheit d. i. die Vernunft und in dieser keimartig die höchste Vernunft und Weisheit: der eine Gott. Dass auf diesem Vernunftfundament neben der Philosophie (16, 5) das geoffenbarte Christenthum nicht Raum finden konnte, ist klar und wohl auch vom Apologeten gefühlt worden, wie die plötzlichen Gedanken von der Finsterniss menschlichen Denkens und von der Autorität prophetischer Weissagungen nahe-

*) Zeller III, 2. S. 235 f.

***) Zeller III, 2. S. 236 f.

†) Auch vermissen wir die von den Apologeten und späteren Stoikern so nachdrücklich betonte Menschenliebe, obwohl deren Voraussetzung, der Kosmopolitismus, vorhanden ist (c. 17). Ansätze dazu finden sich c. 31, 8. 32, 3. Der Gedanke der Feindesliebe, wie er von den Apologeten so oft den Heiden gegenüber vertreten wird, fehlt hier gänzlich. Vgl. dagegen nur Athen. c. 11, 5. 12, 21.

legen. Letztere waren eben zu schwach, um sich neben der Vernunft Raum zu schaffen oder gar ein Fundament für sich zu bilden. Im Gegentheil, wie fest jenes Prinzip der *sensus et ratio* in der Anschauung des Apologeten gegründet lag, zeigt obiges Missverständniss des christlichen Glaubensprinzips: er kann sich eine Ueberzeugung, einen Glauben, schlechterdings nicht denken ohne Vermittelung der äusseren Wahrnehmung und ohne Mitthätigkeit der eigenen Vernunft. Damit fehlt seiner Auffassung das eine wesentliche Stück des Christenthums, die Offenbarung.*) Dieses philosophisch-intellektuelle Interesse aber in Verbindung mit spezifisch stoischen Anschauungen lässt ihn auch die andere Hälfte des Christenthums gänzlich verfehlen. Er hat zunächst gar kein Verständniss von der Sünde, weder nach ihrer ethischen noch ihrer habituellen Seite. Da droht Gott der gesamten Welt mit plötzlicher Feuervernichtung. Niemand aber erfährt warum. Weit entfernt, von einem Falle der Menschheit in der Vorzeit zu vermelden und dem seitdem widergöttlich gewordenen Sinn der Menschheit, welcher Gottes Zorn erregt und Strafe fordert, lässt Minucius nur die *Deum nescientes* bedroht sein und nicht einmal ganz mit Recht, da sie erst von den Dämonen geblendet sind, *qui pravas religiones induxerunt* (c. 26), *inrepunt corporibus, terrent mentes etc.* (c. 27). Ja eigentlich sind sogar diese nicht recht strafbar, da auch sie die Getäuschten sind: *nam falluntur et fallunt, nescientes sinceram veritatem* 27, 2. Es fehlt der Sünde also gerade ihr Charakteristisches: das Ethische**) und das der Menschennatur Habituelle. Sie ist dem Minucius wesentlich Unwissenheit und durchaus individuell. Selbst im Einzelnen kann sie nicht eigentlich ein Habitus sein, denn der Mensch hat volle Freiheit (36, 1) und wenn auch Gott nach der *materia*, der Geistesrichtung (also etwas Habituellem) die Gesicke bestimmt, so ist doch sie es nicht, sondern sind es die Handlungen, welche bestraft werden 36, 1. Wie

*) Der 19, 4 ausgesprochene, minucianischer Ansicht gerade entgegengesetzte Gedanke: *eo altior et sublimior aquae et spiritus ratio, quam ut ab homine potuerit inveniri, a deo traditum*, auf den sich Faber im Interesse der Offenbarung stützt (Comment. S. 29), ist ein mit Recht neuerdings mehr und mehr geltend gemachtes Glossem. Halm S. 26. Dombart S. 52. Cornelissen S. 30.

**) Nur scheinbar hat sie ethische Wurzel, wenn sie als Folge des Nichtgebrauchs gottgegebener Vernunftkräfte und der Nichtbefolgung göttlichen Willens erscheint 17, 3. Denn diesen Willen zu thun bedarf es selbst erst der Erkenntniss desselben aus der im Weltall verbreiteten Vernünftigkeit.

kann auch bei minucianischer Ansicht an einen sündigen Habitus des Menschen gedacht werden, wenn nach seiner echt stoischen Ansicht Gott selbst dem Menschen innewohnt (*infusus*), wenn 26, 12 die menschliche Seele als *inmortalis substantia* der göttlichen gleich gestellt wird! Nicht einmal der menschliche Körper, wie doch die späteren Stoiker anzunehmen geneigt waren, kann als Sitz der Sünde angesehen werden, obwohl ein Ansatz zu dieser Anschauung vorhanden ist. Denn der irdische Körper war vorwiegend als Sitz physischer Ohnmacht gedacht und die Konsequenzen aus der anderen Seite der Körperlichkeit, der sittlichen Unzulänglichkeit auf eine allgemeine sündhafte Anlage der Menschen, wie gesehen, waren gänzlich unterlassen. — So gelangt er gerade zu der umgekehrten Ansicht: das Christenthum ruht seinem Wesen nach im Innern des Menschen und die Sünde — wenn überhaupt von dieser zu reden — kommt in den Dämonen von aussen. Wie soll da die Rede sein von Offenbarung, von einem Logos als deren persönlichem Ausdruck, von Schriftautorität gegenüber der Autorität der menschlichen Vernunft, wie die Rede sein von der Erlösungsbedürftigkeit aller Menschen, von deren faktischer Erlösung, von Versöhnung mit Gott, von Gnadengemeinschaft und Gnadenmitteln? Für alles das ist in seiner Auffassung kein Raum. Damit aber ist das eigentliche Centrum des Christenthums, die Heils-offenbarung, gänzlich verfehlt. Das minucianische Christenthum erscheint nur als eine Aufklärung, als die Enthüllung einer in der Welt und im Menschen liegenden Wahrheit, als die Entzifferung des göttlichen Autors aus dem aufgeschlagenen Buche der Schöpfung (c. 17).

Ist das blosses Accidenz? Sind das nur „historische und philosophische Gründe für die Existenz und die Regierung Gottes“? — Das ist philosophische Grundanschauung, aus welcher heraus jene einzelnen Argumente erst erwachsen sind.

So ist in dem bekehrten Heiden das Heidnisch-Philosophische nicht nur Prius gewesen, sondern auch Prius geblieben. Die Philosophie herrscht noch immer vor und hat hier auf seine Denkweise derartig eingewirkt, dass sie ihn zu einer richtigen Auffassung des Christenthums nicht nur nicht führte, sondern sogar direkt davon abzog. Dass sich der Apologet von jener so gängeln liess und dabei doch glaubte, als guter Christ zu handeln, beweist uns, wie wenig er Christenthum und Philosophie zu unterscheiden im

Stande und wie wenig er in das eigentliche Wesen des Christenthums eingedrungen war. Für die centralen christlichen Wahrheiten besass er zur Zeit weder das nöthige Verständniss noch — wie wir schliessen — die nöthige Unterweisung. Prüfen wir beispielsweise seine Vorstellung und seine Kenntniss von Christus. Wie denkt er sich ihn? Als Erlöser? — Unmöglich, denn er kennt keine Erlösung, keine Sünde, die die Menschheit fesselt. Oder als persönliche Offenbarung Gottes wie Justin? — Ebensowenig, denn Gott hat sich bereits geoffenbart in der Welt, im einzelnen Menschen. Es gilt nur ihn zu finden. Ihn zu suchen ist oberste Pflicht, dies zu unterlassen Sacrileg (17, 3. 24, 2). Christus könnte höchstens als Erster unter den nostrates ihn gefunden haben und daraus prudentiam commentum esse et tradidisse ceteris disciplinam. Dann wäre er allerdings dem Justin'schen Christus ähnlich (Ap. I. 13), der Lehrer der Menschen (ceteris), der Aufklärer von dem Wahn des heidnischen Polytheismus und dessen unsittlichem Einfluss. Aber dann wäre seine Gottheit ganz überflüssig. Christus hätte nur geleistet, was jeder Andere auch hätte leisten können, ja wozu im Grunde Alle verpflichtet waren. Ihm gebührte nur, wie anderen repertores artium 16, 5, ein hervorragendes ingenium, und höchstens die Priorität seiner „Erfindung“ (38, 6) vor denen anderer — Menschen. Das zeugt doch wahrlich weder von christlichem Verständniss noch von christlicher Unterweisung! Sogar Christus als Wunderthäter, dessen Thaten doch im Gemeindebewusstsein lebendig und wohl das Erste waren, was von einem Bekehrten gehört und gefasst werden konnte, sogar dieser wird in Frage gestellt durch obigen Ausspruch über die Wunder überhaupt, welchen selbst Dombart*) für ein „bedenkliches Argument“ erklärt 20, 4: quae sie essent facta, fierent: quia fieri non possunt, ideo nec facta sunt. Selbst wenn man annähme, dieser Satz sei ihm im Uebereifer gegen das abergläubische Heidenthum entschlüpft, so würde er doch andererseits beweisen, wie schwach der Glaube an die Wunderthaten seines Herrn und Meisters in ihm Wurzel gefasst hätte.

Wir haben es sonach mit einem Anfänger in der christlichen Erkenntniss zu thun und dürfen von ihm nicht viel mehr vermuthen, als was er gesagt hat. Ist es doch kaum wahrscheinlich, dass der, welcher so scharfsinnig den Zwiespalt in der Rede

*) Ausgabe S. 57.

des Cäcilius aufdeckte und sich vermass, denselben durch die seinige auszugleichen (16, 4), sich einem ganz gleichen Tadel bewussterweise ausgesetzt hätte, wenn es in seiner Macht gestanden, ihn zu vermeiden. Denn genau dasselbe: interim Deum, interim deos credere se variavit hätte ihm der Heide zurückgeben können, wäre er noch einmal zu Worte gekommen. Warum duldete Minucius diesen Widerspruch oder warum suchte er ihn nicht zu erklären? — Weil er ihn weder verschweigen wollte noch sich selbst zu erklären wusste. Zu jenem war er zu gewissenhaft, zu diesem zu unwissend. — Mit dieser Auffassung löst sich alles. So werden wir der philosophischen Seite der Apologie gerecht, so erklären sich die „Lücken“ seines Christenthums*) und so entheben wir auch unseren Apologeten dem Verdachte, ein im Grunde fremdes Glaubenssystem für das christliche, für sein eignes ausgegeben zu haben. Für diese Auffassung aber spricht schliesslich das Alterthum selbst in dem authentischsten aller Gewährsmänner über Minucius; in Lactanz: Huius liber, cui Octavius titulus est, declarat, quam idoneus veritatis assertor esse potuisset, si se totum ad id studium contulisset (inst. V. 1). —

Damit werden wir mit hoher Wahrscheinlichkeit zu der schon von Keim**) ausgesprochenen Ansicht geführt, in Minucius Felix einen Neubekehrten vor uns zu haben, der in der ersten Liebe für die neue Lehre, nach seiner Fassung, für den moral-philosophischen Monotheismus, eine Lanze bricht. In der That merkt man dem Verfasser das grosse persönliche Interesse für diese Lehre allenthalben an. Diesem einen Gotte widmet er einen ganzen Haupttheil der Rede (16, 5—20, 1), er bildet den Mittelpunkt des christlichen Glaubens und Glückes 31, 8. 38, 4. 37, 8. 36, 4, bei der Darlegung des göttlichen Wesens wird der Apologet lebhaft 18, 7 vgl. 38, 4 und nicht müde, ihn den heidnischen Gottheiten als den Wahren und Einen gegenüber zu stellen 18, 7. 19, 3. 26, 11. 27, 2. 7, kurz, ihn hält er hoch und zeigt er der Welt, als wie ein eben aufgefundenes Kleinod.

Dieses sichtliche Interesse für den Monotheismus legte uns die Vermuthung nahe, dass Minucius, nachdem er einmal durch

*) Auch die „Citate“, die man bisher aufgefunden zu haben glaubt, zwingen nicht auf direkte Bibelbenutzung zu schliessen. Sie erklären sich viel eher als christliche loci communes.

**) Keim: „Rom und Christenthum.“ 1881. S. 472.

den sittlichen Lebenswandel der Christen von dem gewöhnlichen Vorurtheil gegen sie abgebracht worden war, grade durch diese und die damit eng verbundenen Auferstehungslehre, bei deren Ausführung seine Sprache sogar poetisch wird 34, 11, zum Christenthum bekehrt worden sei. Ansätze zum Monotheismus bot ja das Heidenthum genug dar, wie Minucius selbst angiebt. War nur einmal die negative Voraussetzung, das Bewusstsein von der inneren Haltlosigkeit des heidnischen Götterglaubens in solch' einem gebildeten Geiste vorhanden, so vermochte das Christenthum mit dieser Lehre an den hinter den Erscheinungen, ja hinter dem gesammten Götterhimmel bereits geahnten „unbekannten Gott“ anzuknüpfen. Man sieht es hier deutlich, wie sich sein gewonnener christlicher Gottesbegriff an bereits vorhandene philosophische Momente anlehnt. Es kann kein Zweifel sein, dass dem höchsten Werkmeister, dem Künstler, dem schönen Gott der platonische *δημιουργός, τεκταίνόμενος* etc. zu Grunde liegt, welchem ja als dem Guten und Vollkommenen zugleich die Schönheit mit innewohnt*), während bei dem mit Fürsorge waltenden Regenten mehr an die stoische *πρόνοια* zu denken ist. Das eigentlich Christliche darin ist das Moment des Richters, welcher der Welt Zerstörung und den Menschen theils ewige Strafe androht, theils ewiges Leben verheisst.

Dieser innere Vorgang erklärt uns auch die minucianische Anschauung vom Christenthum als einem Fortschritt, einer Aufklärung (26, 6), einer höheren Entwicklungsstufe, zu welcher die Philosophie eine nothwendige Vorstufe war (38, 6). Was in seinem Innern vorging, vermeinte er auch in der Geschichte wiederzuerkennen. Das Christenthum erscheint ihm wesentlich als eine Zusammenfassung aller Wahrheitsmomente, die im Heidenthume nur zerstreut bereits vorhanden waren. Aus dieser Anschauung ergiebt sich auch seine wechselnde Stellung zur Philosophie. Geht er gegen den heidnischen error vor, so stellt er sich mit ihr auf gleichen Boden und kämpft mit den nämlichen Waffen der Vernunft wie diese. Vertheidigt er aber seine eigne Christenstellung, so wird er sich auch des Unterschiedes zwischen Christenthum und Philosophie bewusst. Er findet ihn freilich nur in

*) Vgl. Symp. 201 C. Tim. 30 A u. C. Aus dieser Verwandtschaft mit dem platonischen Gott erklärt sich auch das überaus günstige Urtheil über Plato 19, 14: *Platoni apertior de deo . . . oratio est et quae tota esset caelestis, nisi persuasionis civilis nonnumquam admixtione sordesceret.*

dem reineren Lebenswandel der Christen (35, 5) und dem Besitz der Wahrheit gegenüber einem blossen Suchen nach ihr (38, 6). Einen eigentlichen Wesensunterschied zwischen Beiden aber kennt er nicht. Christenthum wie Philosophie haben nach der Wahrheit gesucht, Beide mit dem nämlichen Organ der Vernunft, Beide auf dem nämlichen Arbeitsfelde, dem umgebenden Weltall 17, 2, im Besonderen an dem mächtigen Himmelsgewölbe mit seiner erhabenen Schönheit und planvollen Gesetzmässigkeit (c. 17). Das Christenthum hat die Wahrheit nur gefunden, in dem Einen, dem höchsten Werkmeister und Künstler (17, 6 und 11), der selbst schön (18, 4) diese schöne Welt gebildet, dem höchsten Regenten, der sie mit Fürsorge verwaltet, und dem ernstesten Richter, der an ihrem Ende steht mit der Absicht, sie zu zerstören, alle, die von ihm nichts wissen, in ewige Pein zu stürzen, die ihn aber erkannt haben, in ihren alten Leibern wieder herzustellen zu einem neuen, glücklichen Leben (37, 7. 35, 4. 34, 10—12 vgl. 11, 1 f.).

Wir Späteren freilich sind sehr geneigt, sein wesentlich monotheistisches Christenthum zu unterschätzen. Dennoch hat schon die Hinkehr zu diesem als grosser Fortschritt zu gelten. Minucius ist sich desselben wohl bewusst. Das Heidenthum, aus dem er *discussa caligine de tenebrarum profundo in lucem sapientiae et veritatis emergebat* 1, 4, steht noch lebhaft vor seinem Geiste nebst all' den schädlichen Einflüssen, womit es durch die Erziehung, durch die Poesie, durch Kunstwerke und Cultus auf die Geister von Jugend auf einwirkte. Er selbst gesteht den gesammten Göttervorstellungen gegenüber 23, 1: *Has fabulas et errores et ab inperitis parentibus discimus et, quod est gravius, ipsi studiis et disciplinis elaboramus, carminibus praecipue poetarum etc.*, ferner 23, 8: *his atque huiusmodi figmentis et mendaciis dulcioribus corrumpuntur ingenia puerorum, et isdem fabulis inhaerentibus adusque summae aetatis robur adollescunt et in isdem opinionibus miseri consenescent etc.* vgl. 23, 9. Die Leute wuchsen in diesen Vorstellungen auf, wurden darin alt. Mochte auch der Verstand sie läugnen, die Phantasie hielt daran fest. Dass selbst unser Apologet noch nicht so ganz aus heidnischem Aberglauben heraus war, dafür zeugt seine Dämonenlehre*). Man vergleiche jene anekdotenhaften Erzählungen in c. 27, besonders 27, 5 f.: *haec*

*) Auch schon der Umstand, dass er den heidnischen Orakeln nicht alle Wahrheit abzusprechen wagt 27. 1. 26, 7.

omnia sciunt pleraque pars vestrum ipsos daemones de semetipsis confiteri, quotiens a nobis tormentis verborum et orationis incendiis de corporibus exiguntur. ipse Saturnus et Serapis et Jupiter et quicquid daemonum colitis, victi dolore quod sunt eloquuntur, nec utique in turpitudinem sui, nonnullis praesertim vestrum adsistentibus, mentiuntur. ipsis testibus, esse eos daemones, credite fassis. Dazu kommt 35, 2 die minucianische Auslegung vom Schwur Juppers, die uns abermals seine innersten Gedanken offenbart: et ideo apud eos (sc. poetas) etiam ipse rex Jupiter per torrentes ripas et atram voraginem jurat religiose: destinatum enim sibi cum suis cultoribus poenam praescius perhorrescit. Man sieht, die alten Götter leben noch, nur unter dem Namen von Dämonen. Und zwar derselbe Saturn, derselbe Jupiter, denen er c. 21 mit solcher Ausführlichkeit ihre Menschlichkeit, ihren Tod, ja ihre Grabstätte nachgewiesen hatte. Die der philosophirende Verstand aus dem Vorstellungskreis hinausgethan hat, führt der Aberglaube dahin zurück. Freilich nicht so ganz unverändert, denn das Gute an ihnen ist abgestreift und übertragen auf den neuen und einen Gott, der jetzt an ihrer Stelle den Himmel eingenommen hat. Seitdem irren sie gleichsam entthront und heimathlos umher (vagi), suchen in stetem Gegensatz gegen den neuen Gott ihre alte Macht, soweit sie ihnen geblieben ist, zu bethätigen und die Menschen zur Anerkennung ihrer Herrschaft zu zwingen (27, 1—2). Es enthält somit diese Dämonologie noch einen Ueberrest vom Polytheismus her. Sie lässt uns hineinblicken in den psychologischen Process, den ein zum Monotheismus bekehrter Heide durchmachen musste und den grade dieser bekehrte Heide noch nicht so völlig hinter sich hatte, als man anzunehmen geneigt ist. Sie lässt uns aber ebendarum auch den Fortschritt würdigen, den der Apologet zu diesem Monotheismus hin gethan zu haben glaubte.

Mochte ihn also vornehmlich dieser zum Uebertritt bestimmt haben, was bewog ihn, das Christenthum zu vertheidigen? — Wir meinen, weder der *λόγος ἀληθής* des Celsus, wie Keim, noch die Rede des Fronto, wie Paul de Félice schliesst (S. 37), sondern die öffentliche Meinung, das eingefleischte Vorurtheil des Publicums gegen das Christenthum, speziell jener höheren Kreise, die mit hochmüthiger Ueberlegenheit auf die un-

gebildeten Christen herabzublicken pflegten.*) Es war in der Regel ein Hauptvorwurf, womit jene Classen die Christen von vorn herein abfertigten: der Mangel an jeglicher höheren Bildung und die gänzliche Nichtberechtigung zum Philo-

*) Es liegt uns hier natürlich eine eingehendere Widerlegung fern. Indess fragen wir Keim gegenüber, warum Celsus auch nicht ein einziges Mal in der Apologie genannt oder auch nur angedeutet wird, während doch der Name Frontos sogar zweimal vorkommt. Keims Erklärung hierfür S. 156: „dass sein Name aus Schicklichkeit, da die Disputation in eine bedeutend frühere Zeit zurückverlegt wird, nicht genannt sei“, kann doch unmöglich genügen. Einem Apologeten, welcher selbst den Lehrer der beiden späteren Kaiser M. Aurel und L. Verus nicht nur nennt, sondern auch so schroff beurtheilt wie 31, 2, dem trauen wir unmöglich Schicklichkeitsrücksichten zu einem Manne gegenüber, der doch dem Christenthum viel weher gethan hatte als Fronto. Andererseits wird aus einer blossen Dialogeinkleidung zu viel Capital geschlagen. Wir haben oben dargethan, dass gerade die unsrige am wenigsten darauf Anspruch machen kann. Wir betrachten sie durchaus als Mittel zum Zweck, gleichsam als Empfehlungskarte in jene höheren Kreise, um daselbst durch ihren Inhalt zu wirken. Diese Ansicht bestätigt uns am Schlusse der Verfasser selbst. Nachdem dort Octavius seine Rede beendet hatte, spricht Minucius darüber folgendes Urtheil aus: *quod ad me est, magnitudine admirationis evanui, quod ea, quae facilius est sentire quam dicere et argumentis et exemplis et lectionum auctoritatibus adornasset, et quod malevolos isdem illis quibus armantur, philosophorum telis retudisset*. Wir meinen, dieser Wink ist deutlich genug. Nicht ein Einzelner wird widerlegt, sondern eine Mehrheit, nicht der harmlose Cäcilius, die lebenswahrste Person des Dialoges, sondern eine ganze Classe dem Christenthum übel gesinnter Leute, die den Christen gegenüber sich in den Philosophenmantel hüllten und ihnen jede Berechtigung dazu absprachen. Letzteres geht auch gegen Paul de Félice, der zwar innerhalb des Gegebenen bleibt, aber unseres Erachtens Peripherisches in's Centrum rückt. Fronto steht nie allein, sondern stets in Verbindung mit der Allgemeinheit vgl. 9, 6: *et de convivio notum est; passim omnes loquuntur, id etiam Cirtensis nostri testatur oratio* und 31, 2: *sic de isto et tuus Fronto*. Ferner aber ist gar nicht nachweisbar, ob diese Rede gegen die Christen gerichtet war (vgl. auch die Kritik der *Étude P.s de F.* von J. Neumann. Theol. Litt. Ztg. 1881. 18. S. 423). Vielmehr dient Fronto nur als Illustration der Gegenwart, speziell jener tonangebenden gebildeten Welt der römischen Hauptstadt, deren gefeierter Wortführer er war. Vgl. Teuffel S. 825, auch das *Cirtensis noster* des Cäcilius 9, 6, das freilich Octavius resp. Minucius vom gegnerischen Standpunkte aus auf tuus Fr. einschränkt. Ja gerade durch ihn, den Lehrer der kaiserlichen Thronfolger, erhält die Apologie zugleich eine Zweckbeziehung auf die höchsten Beamten- und Hofkreise in der nächsten Umgebung des Kaisers und somit auf den eigentlichen Herd des Heidenthums selbst. Man vergleiche dazu besonders c. 37, 7 f.: *divitiis affluent, honoribus florent, polleant potestatibus . . . in hoc quidam imperiis ac dominationibus eriguntur . . . ferner 9 f. die Auswahl der Beispiele: rex es . . . dives es . . . fascibus et purpura gloriaris . . . nobilitate generosus es etc.* Dazu

sophiren. Die Widerlegung dieses Hauptvorwurfs ist unseres Erachtens Zweck der Apologie. In der That bildet ersterer die Voraussetzung für die ganze Rede des Cäcilius. Die Christen werden dort als solche angesehen, die sich anmassen in philosophischen Fragen, und zwar den schwierigsten, mitzureden: philosophari, disserere divina, de rebus caelestibus disputare, certum aliquid de summa rerum ac maiestate decernere 13, 1. 12, 7. 16, 5 vgl. 19, 4. Dieses ist der erste und der letzte Vorwurf, er schliesst die Rede ein (5, 3. 12, 7—13, 1.) und fasst sich am Schluss, wie der Ring in der Perle, zusammen in jenem charakteristischen Triumphwort des Cäcilius, das noch einmal den Hauptgedanken der ganzen Rede kurz heraushebt 14, 1: Ecquid ad haec audet Octavius, homo Plautinae prosapiae, ut Christianorum praecipuus, ita postremus philosophorum?! Es lässt sich begreifen, dass grade dieser Vorwurf der Unbildung einen feingebildeten Mann wie Minucius auf's Empfindlichste treffen musste.

noch 29, 5 das vorsichtige etiam principibus et regibus, non ut magnis et electis viris, sicut fas est, sed ut deis turpiter adulatio falsa blanditur.

Hiermit sind wir bereits auf chronologischem Gebiete. In der That, nach unserer Ansicht, wonach die Einkleidung des Dialoges fingirt erscheint, haben wir keinen Grund mehr gegen die Abfassung der Schrift noch zu Lebzeiten Frontos, spätestens also 175 (vgl. Teuffel S. 826). Eine nähere Bestimmung der Abfassungszeit wagen wir nicht. Sie gehört auch nicht hierher.

So erklären wir uns die Vorwürfe durchaus der öffentlichen Meinung entstammend. Sie sind ja keineswegs so eingehend, dass die Heiden, noch dazu die Gebildeten unter ihnen, erst eines wissenschaftlichen Vermittlers dazu bedurft hätten, sondern konnten von jedem Beobachter aus der Erfahrung gewonnen werden, zumal in einer Zeit, wo bereits die öffentliche Aufmerksamkeit, ja Sorge den Christen zugewandt 9, 1, andererseits aber auch der Verkehr zwischen Heiden und Christen noch nicht abgebrochen war. Letzteres beweist ja das Ansehen des christlichen causidicus in der Kaiserstadt wie namentlich der freundschaftliche Umgang zwischen dem Heiden Cäcilius und dem Christen Minucius, welchen wir wenigstens als allgemein geschichtliches Vorkommniss nicht leugnen können. Ist es erlaubt, eine Muthmassung auszusprechen, so war es gerade ein solcher gemischter Freundeskreis, dem diese Apologie ihre Veranlassung verdankt. Hier, inmitten der heidnischen Freunde, hatte der neu Uebergetretene wohl manchen Disput zu bestehen gehabt. Eine solche Disputation hat ihm wohl die Unterlage zu seinem Dialoge abgegeben, nur wurde sie dann für das allgemeine Publicum erweitert, darin Heidenthum und Christenthum gleichsam portrairt. Das Heidenthum ist ihm dank seiner reichen Lebenserfahrung am besten gelungen. Desgleichen der lebhaft Heide Cäcilius; möglich, dass der Zeichnung desselben das Bild eines seiner heidnischen Freunde und — Gegner mit unterlief. Den Christen Octavius aber traf er nicht. Der war er eben selbst.

Er greift ihn daher als das — für ihn — Wichtigste heraus und stellt ihn sich selbst in der ersten Rede zum Hauptwiderlegungs-object. Ihn hat er dann auch in der zweiten Rede, in welcher wir so recht eigentlich seine persönliche Ueberzeugung zu suchen haben, siegreich zurückgewiesen, und zwar nicht mit einzelnen gelegentlichen Seitenhieben wie 31, 2, sondern mit den Grundgedanken jedes der drei Haupttheile der Rede, wie sie sich zu-
meist*) in den Recapitulationen am Schlusse ausgesprochen finden und dort als folgende sich ergeben:

1) Auch das Christenthum ist eine Philosophie 16, 5—6. 20, 1.

2) Vielmehr im Heidenthum liegt die Unbildung (inperitia, error) 20, 2. 26, 7. 27, 8 u. ö.

3) Ja das Christenthum verdient den Vorzug vor Heidenthum und Philosophie, und zwar durch eine lebendige Sittlichkeit wie durch den alleinigen Besitz der Wahrheit 38, 6 vgl. 35, 5. Alle drei aber ergeben den einen Grund- und Hauptgedanken der Widerlegungsrede und somit der ganzen Apologie: Das Christenthum erst ist die rechte Philosophie.

Das hatte der Apologet dem Cäcilius und in ihm jenen gebildeten heidnischen Kreisen sagen wollen.

Damit aber wird der Grundgedanke zur Tendenz. Ihn und seinen Gegenpart fasste er in die Form eines philosophischen Dialoges nach dem Muster Ciceros. Ihm schickte er vor allem jene reizvolle Einleitung voraus zur schnelleren Einführung in genannte Kreise. Dieser Grundgedanke aber zeigt uns endlich auch, wie der Verfasser selbst das Christenthum aufgefasst hatte: als Philosophie.

*) Mit Ausnahme des zweiten Haupttheils, der durch den Uebergangstheil der Dämonologie zu eng an nachfolgenden letzten Haupttheil gebunden ist.

NACHWORT.

Wir glauben nicht, uns getäuscht zu haben. Je tiefer wir in die Apologie eindringen, desto mehr stiessen wir auf heidnischen Untergrund. Das eigentlich Christliche aber, das ja unläugbar in der Apologie vorhanden ist, suche man nicht in der Auffassung christlicher Lehre als vielmehr in der Aneignung christlicher Lebensgrundsätze. Es ist der neue sittliche Geist, wodurch der Wandel der ersten Christen gegen den heidnischen Genussucht so sichtlich abstach. Dieser mochte es gewesen sein, der in Gestalt der Standhaftigkeit und Treue den ursprünglichen Christenfeind auf die neue Sekte aufmerksam machte, ihn trieb, mit ihren Grundsätzen und Lehren sich näher bekannt zu machen und ihn endlich ganz hinüberzog in's christliche Lager, in welchem er statt bunter Götterculte den einen und den wahren Gott verehrt sah und unter ihm ein inniges, bescheidenes Zusammenleben erkannte, fern vom geräusch- und anspruchsvollen Treiben der verkommenen Heidenwelt (37, 12. 38, 4. 31, 5 f.).

Diese neue Geistesrichtung, auch in ihm selbst bemerkbar, scheidet sich deutlich von seiner heidnischen Geistesanlage. Selbst der urban gebildete Mann, wendet er sich doch mit Entrüstung gegen die schamlose urbanitas der römischen Hauptstadt 28, 10. 16, 2. Selbst mit den rhetorischen Kunstmitteln so vertraut, eifert er doch gegen die lügenhafte Rhetorik seiner Zeit, 31, 2. c. 14—15, vgl. 16, 6. Selbst endlich im Grunde noch der Alte, der Philosoph, tritt er doch den Philosophen auf solch' schroffe Weise gegenüber wie 38, 5. Dass er letzteres aber nur an einer einzigen Stelle gethan hat*), an anderen

*) Und selbst hier nicht, ohne zunächst an ganz bestimmte Philosophen, die Skeptiker, vor allem die mittlere Akademie, zu denken, und in dieser Opposition auch hier am Schluss noch seinen ursprünglich stoischen Standpunkt zu verrathen, was um so wahrscheinlicher wird durch die Vergleichung des ganz

jedoch den relativen Werth, ja Vorzug des Heidenthums anerkannte (19, 14. 35, 5), beweist, wie pietätvoll er auf die heidnische Wissenschaft, die ihn grossgezogen hatte, zurückblickte. Dies ist für Minucius Felix charakteristisch. Schon bei dem nächsten lateinischen Apologeten, bei Tertullian, ist das anders geworden. „Was hat der Philosoph und der Christ gemein? Der Schüler Griechenlands und des Himmels? Der Bewerber um Ruhm und der um ewiges Leben? Der Wortmacher und der Thatenvollbringer? Der Zerstörer und der Erbauer der Dinge? Der Freund und der Feind des Irrthums? Der Verfälscher der Wahrheit und ihr Wiederhersteller? Ihr Dieb und ihr Wächter?“ So der rauhe Afrikaner (Apol. 46). Man sieht diesen hier mit Bewusstsein die Wurzeln durchschneiden, die doch auch ihn an die heidnische Wissenschaft fesselten. Der „Octavius“ aber des Minucius Felix erscheint in der That, wie schon Ebert ihn ansah (S. 386), „nicht sowohl in dem einseitigen Lichte eines Gegensatzes zu der classisch-antiken als vielmehr in dem wahren einer Neubildung auf ihrer Grundlage.“

ähnlichen Urtheils über die Philosophen aus dem Munde seines Lehrers Seneca (Exhort. apud Lactant. Inst. 3, 15): *Plerique philosophorum tales sunt, disertissimi in convicium suum. quos si audias in avaritiam, in libidinem, in ambitionem perorantes, indicium profectos putes: adeo redundant ad ipsos maledicta in publicum missa.*
